Environmental Industries Inc. Grows as Fast as Its People Can

Large west coast company avoids publicity and concentrates on building a company around its employees.

The management of Environmental Industries, Calabasas, CA, doesn't seek publicity. Success is something they don't like to flaunt. In fact, many people still think 'the big landscape company in California' is Valley Crest Landscape, it's old name.

"Although we have grown rapidly, we are not motivated by taking over the nursery, construction, or maintenance business," says Bruce Wilson, president of Environmental Care Inc., the maintenance subsidiary. "Our growth is based more on our people and our customers than it is on sales objectives. We try to grow at a rate that provides opportunity for our people without the wheels falling off. Good employees want growth and opportunity. So, we grow at the rate our staff can take on more work." Environmental Industries has grown from $28 million to $60 million in sales in five years.

"As a rule, we enter new cities, like Houston and Denver, when one of our California clients asks us to handle facilities there," Wilson states. "We started the Houston branch when Shell Development Co., a Los Angeles customer, asked us to take over maintenance at its West Hollow Research Center. We took the job and built the Houston branch around the Shell job."

"You can't go into a city and start a branch as if you are McDonalds," Wilson pointed out. "It takes years to get your name to the right people and to be accepted as not being an "out-of-towner". Behind this seemingly loose style is a finely-tuned machine driven by Burton Sperber, presi-
dent and chairman. "His philosophy," Wilson states, "is to let the branches worry about business and corporate to handle details such as banking, insurance and benefits."

From this service core, branch out four subsidiaries. Environmental Care Inc. is the maintenance branch. There are two landscape construction companies, Valley Crest Landscape Inc. and Western Landscape Construction. Valley Crest is the 35-year-old company Sperber built into Environmental Industries. The fourth subsidiary is Valley Crest Tree Co., a nursery operation. The subsidiaries have offices in California, Colorado, Texas, and Arizona with roughly 1,500 employees.

Starting at the bottom
Wilson grew up in Rye, NY, was graduated from Cornell University in 1969, and worked for Starner Tree Service in Harrison, NY, for almost two years. In 1970, he and his wife decided there was no better time to try the "California life" and moved to Los Angeles.

Sperber had just purchased Green Valley Landscape maintenance company from Joe Marsh and formed Environmental Care with Marsh as president. Marsh hired Wilson, started him trimming hedges and mowing turf. Wilson, after working his way up to branch manager, became president of the subsidiary upon Marsh's retirement in 1979.

This 'start at the bottom' policy is still in effect. "It is a disadvantage in recruiting college graduates since they often believe college permits them to skip field work," Wilson muses. "But, they are much more effective later on if they have experienced the type of work they manage."

Keys to growth
Green Valley specialized in municipal and industrial landscape maintenance. Environmental Care has continued that specialization with more emphasis on industrial and multi-family residential. "We are being moved out of municipal work by low bidders," Wilson said. "Public work is very volatile, going out to bid every two to three years. Industrial/commercial work is based more on quality and reliability than low price."

We are also experiencing an influx of landscape construction companies competing for maintenance work to cover overhead while construction is off. This is cyclical, fortunately, and we'll get our share back when construction picks up again."

"We are not adverse to bidding," Wilson adds. "We make our own subsidiaries bid for work we do. Our biggest problem with bidding in maintenance is most clients don't have specifications, so they are not comparing apples to apples."

Much of Environmental Industries' success today is based on establishing good relationships with developers and corporate level property managers. "A majority of construction and maintenance is in the hands of a Headquarters for Environmental Industries in Calabasas, California.

Hoffco knows how to
build monofilament trimmers.

• Foolproof starting
  with solid state ignition
• Long wearing auto-centrifugal clutch
• Patented drive shaft system
• Automatic “tap” feed monofilament
  head for ease and convenience
• Dependable 15.4 cc engine

Design features that you expect to pay more for are
standard with Hoffco.

Remember... we don’t come apart
when you need parts... we deliver.
Our Parts and Service Program is a
unique part of Hoffco’s total selling program...

it works with you and for you.

Bruce Wilson, president of
Environmental Care.

few individuals," Wilson points
out. “Impress them with perfor-
mance, fairness, and quality, and
you become part of their team.
Undoubtedly, there is danger in
relying too greatly on a few
accounts, so we try to balance
each branch with a variety of
accounts.”

Attracting a variety of accounts
requires flexibility. Large con-
struction work is primarily union,
so Valley Crest Landscape, run by
Burton Sperber, is union. For
smaller, more competitive con-
struction work, Western Land-
scape Construction, run by Stan
Colton, is non-union. To supply
plant material to its own construc-
tion companies, as well as other
landscapers, Environmental
Industries has Valley Crest Tree
Company, run by Burt’s brother
Stuart.

After the landscape is in and
the unions leave the job site,
Environmental Care’s non-union
crews can take over with mainte-
nance. “We don’t generally offer
separate maintenance services
such as weed control or fertili-
ization,” says Wilson. “We do it all,
pruning, mowing, flower care,
tree spraying, everything. We are
not a chemical application com-
pany. We use chemicals where
they are needed and when they
save labor. We don’t charge extra
for chemicals when needed. All
problems and needs are taken
care of as part of our overall ser-
vice.”
