IDYLLIC INVERNESS

Superintendent Tom Walker keeps his course, host of this year's PGA Championship, in superb shape with a 'light and frequent' maintenance program.

by Ken Kuhajda, managing editor

It doesn't look like much, the blue hills spruce that sits near the tee of the 8th hole. But it sure made Inverness Club in Toledo, Ohio, even more famous.

It's become known simply as the "Hinkle Tree," the 25-footer that golfer Lon Hinkle made famous at the 1979 U.S. Open.

During the opening round, Hinkle decided to take a short cut on the par 5, 528-yard, dogleg left 8th hole by hitting his tee shot through a narrow opening and into the parallel 17th fairway.

From the 17th fairway, the no. 8 green was reachable in two strokes.

Number 18 at 354 yards is probably the shortest finishing hole on a major U.S. course. But the tiny green, bunkered front and left, slopes to the right and back, thus creating a challenge even for the pros.

Inverness Club superintendent Tom Walker is confident the "Hinkle Tree," the blue hills spruce directly behind him, will provide the barrier needed between the 8th and 17th holes.

Maintenance tricks

Walker tends a course that exhibits common northern characteristics: bentgrass tees and greens, bentgrass and poa annua fairways, and a bluegrass/tall fescue mix in the roughs. He says that only subtle changes are being made in preparation for the PGA.

The course has 94 sand traps, some of which are bordered by yarrow, a noxious weed that Walker lets grow and then uses to his advantage.

Hundreds of varieties of trees dot the course, some of which were gifts from members. "We have a membership who loves their trees. We try to bring in some different trees for them," says Walker, pointing to a fern leaf beech.

A paperbark maple in the 9th fairway is a gift from a doctor.
Inverness employee Eric Malczewski mows a narrow strip of turf in the U-shaped sand trap that sits in the fairway between holes 14 and 15.

Strong support
With all his maintenance activity, Walker needs both a big and capable crew. He's lucky. He has both.

About 30 workers toil the turf at Inverness (mainly with Toro and some Jacobsen equipment), with just

Jay Collins is all eyes as he mows tees to just under 1/4-inch.

member, says Walker. "We have more than 10,000 trees."

Inverness has its own nursery of sorts but it is temporarily uprooted in preparation for the PGA. It lost a territorial battle to the press tent. Walker says trees generally grow four to five years before they are planted on the course.

'Lightly and frequently'
In maintaining the trees and turf, Walker says he has no tricks. But after talking with him, it's evident that his maintenance program should be labeled "lightly and frequently."

The trees are frequently pruned by Inverness staff.

He uses a low nitrogen program, fertilizing lightly and frequently (every two weeks). He feeds his turf a lot of potassium.

He aerifies the greens in the spring and fall, the fairways in the spring and sometimes in the fall, and the tees continuously in the summer months.

He topdresses the greens lightly every two weeks.

In addition, he verticuts frequently, using a Toro riding greensmower. "It helps speed up the greens but certainly doesn't help with thatch," says Walker.

He mows his tees at just below 1/4 inch, the fairways at just below 1 inch, and the greens at just under 1/6 inch. The rough is kept at anywhere from 1 to 4 inches.

five remaining year-round. Walker repeatedly points out his crew's talent.

"I'd put this crew up against any in the country," says Walker. He adds there's something special, an added incentive, when preparing for a major tournament.

"Something like the PGA pulls them together. They realize it's a once-in-a-lifetime event and they get to participate in it," he says.

The crew is an interesting bunch.

Assistant superintendent Tim Kennelly, 23, already has eight years golf course experience. He has an associate degree of turfgrass management from renowned Michigan State University.

The tall, blond Kennelly worked for Walker at Highland Meadows. He also worked two summers at famed Oakmont Country Club in Oakmont, Pa. The youthful Kennelly says he doesn't feel great pressure to perform.

"I don't think age is an issue. It's ability and experience," says Kennelly, who hopes to land his own superintendent's job after this year's PGA.

Kennelly says he knew he wanted to be a golf course superintendent by his sophomore year in high school.

Crew member Aaron Asmus aspires to land an irrigation construction job in Florida when he graduates from the Agricultural Technical Institute (a part of Ohio State University) in Wooster, Ohio.
sionals and progressives about the additions. However, the PGA press kit notes: "...as the new holes mature and the memory of those eliminated fades, the furor has somewhat subsided. Most of

Inverness is still pure Donald Ross (the original architect)."

The course measures 6,982 yards with a par of 71.

There's no arguing over the fact that Inverness is well-respected and highly-rated in the golf world. Golf Digest ranked Inverness 55th among the nation's top 100 golf courses in 1985.

Back to normal
Walker and crew admit there's something special about preparing for a major golf tournament. But when the last hot dog wrapper is vacuumed after the PGA, Inverness will return to serenity with its 220 numbers 3 (par 3, 185 yards), 5 (par 4, 401 yards), 6 (par 3, 220 yards), and 8 (par 5, 528 yards) were added for the 1979 U.S. Open.

The battle still rages between traditionalists and progressives about the additions. However, the PGA press kit notes: "...as the new holes mature and the memory of those eliminated fades, the furor has somewhat subsided. Most of
