After this year's Memorial Tournament in May, the turf around the 18th green and concession area was bare from attendees trampling on the rain-dampened turf. With intense overseeding, by September it was perfect.

**JACK'S BABY**

Muirfield Village Golf Club is the home of the Memorial every year, and in 1987, the Ryder Cup. It is a well-maintained course—some say the best in the country. It has to be. It's the course that Jack built.

by Jeff Sobul, assistant editor

This is a stadium golf course. Not in the sense that Pete Dye's courses are stadium golf courses, with embankments contoured into grandstands and the like. Rather, Muirfield Village Golf Club was designed to handle the 40,000 to 50,000 daily spectators who each year attend the Memorial Tournament. The Dublin, Ohio, course was essentially built for the Memorial, and was also the site of 1987 Ryder Cup matches.

When Landscape Management visited superintendent Michael McBride on September 1, the course was entering final preparations for the Ryder Cup, about two-and-a-half weeks away.

Play on the course would soon be limited to member play only, up until the day before the week of the Cup. Guest play would be cut off two weeks before the Ryder began.

From the day the Memorial ended on May 31, preparations began for the Ryder Cup.

Rain on the third day of the Memorial caused problems. "There was no turf here at the end of May," McBride says, indicating with a sweep of his arm the areas around the 18th green and the main concession area adjacent to the clubhouse. "It was bare. We did a pretty intense overseeding program right after the tournament. I've been happy with the way it turned out so far. A couple of weeds in it yet, but we'll take care of those."

Standing along nearly every hole are television towers. Usually after the Memorial they are removed from their permanent in-ground foundations and placed in the outside TV complex until the following year. But with the Ryder scheduled, they were left in place to avoid the hassle of putting them up again just a few months later.

**Alterations**

"This is one of my favorite holes," McBride says, standing on the tee of the picturesque par-three eighth hole. Thick trees line the right side of the hole, providing a buffer between the course and the expensive houses just
McBride's staff raised the left side of the eighth green slightly to aid drainage and reduce wear on the walk-off area.

on the other side. The cart path winds down the left side to the green.

"We made this little mound here right after the Memorial," he says a few minutes later, standing just off the left side of the green. "This was raised about two inches because (water) came off and it was really flat here and we didn't have any good surface drainage. The water would sit here and we couldn't grow good turf."

"We contoured it just a little bit—not a lot, just enough to get good surface drainage. Actually, the surface drainage comes in toward the center of the green and then out the front (through a drain tile in a bunker and into a catch basin). It was that or reconstruct the whole (left) side, which wasn't going to work.

"We just brought this together and put a drain in there. We top dress this (left) side about every four days to bring it up and keep the level of the green together. Once we take it down to tournament cutting height, it all has to be even. You can't have any scalped areas or areas that are too low getting growth that's too long and hairy. It's important to keep an area like this top dressed and the transition area top dressed so it all smooths out." At the time, the cutting height was at 9/32 of an inch. It would be taken down to 1/8 for the Ryder.

"This has always been a tough green to maintain," he says of the eighth. "One of the problems on this green is that we don't have enough air movement. Usually, you have a wind coming out of the west. We've thinned out this whole area through here just to get additional air movement. Especially working with bentgrass, you've got to have some air movement, you've got to have a lot of sun to grow good turf. We've got another area on 12 that's stagnant as far as air movement goes."

Work on 12 is more extensive than just thinning the trees. The par three covers 160 yards over a sprawling pond below the elevated tee. The worn walk-off area straddling the bunker to the back of the green has been dug and painstakingly leveled. "We'll get the sod in there, pin it, and use a good starter fertilizer high in phosphorous and potassium," McBride explains. "That stuff's just like glue. It'll stick. (The roots) will be down in there in another four or five days, and in two-and-a-half weeks you won't even know it was sodded."

Tickling the fairways
A lightweight triplex mower cuts across the seventh fairway at a 45-degree angle, making the alternating light and dark green pattern so appealing to TV cameras. McBride takes a couple of golf balls from the golf car and drops them onto the freshly-cut fairway.

"It's a nice lie," he comments from one knee. "It's only at a half an inch. I'm not a real believer in having them (cut) too tight. You ever want to hit your three-wood off a tee without a tee? Would you think you could hit the shot? Even for some pros it's tough. They need to have a little cushion."

He walks ahead to an uncut area on the fairway. Grooves are visible from verticutting. "It brings it up real nice," he says of the verticutting. "Then you just cut it off. You see how it brought it up?" McBride runs a hand through the bentgrass then motions toward the mower operator. "He's taking off a lot more than he normally would if he weren't verticutting.

"I'm a firm believer in verticutting. This summer, because it was so dry, we couldn't go out because it would bruise (the turf) too bad. So I didn't get to verticut as much as I wanted. This is really a greens verticut unit (on the fairway). So we're just tickling the top to try and train it. It makes a difference, though. If we do this once or twice before the Ryder Cup, then they'll be just where we want them."

Good luck, bad luck
During the summer, central Ohio went through a period of about seven weeks with less than a half-inch of rain. "We went out a week ago and fertilized the rough for the Ryder Cup and then it rained." McBride shrugs his shoulders and smiles. "I mean, what more could you ask for?"

How about a broken hydraulic hose on one of the triplexes, at the
It happened on August 23, just a month before the Ryder. A portion of the green was a mess. “It happens,” McBride says with the comfort of knowing that it will recover in time for the players and the cameras. “You don’t know when it’s going to happen. But it always seems to happen at the most unfortunate time.” A few years ago, he recalls, the same thing happened on the approach to the 18th green. Worse yet, it was on the Friday of the tournament. “At least this time I have a couple of weeks to recover.”

Indeed, on hands and knees, the green of fresh bentgrass is invading the brown area. “It’s coming back. I’ll have to plug out a few areas. It looks terrible but it’s not as bad as it looks. There’s a lot of new growth coming in. It won’t take long for that to really run in.”

And it won’t take long for McBride and his staff to have Jack’s Baby in perfect health for the Ryder Cup either.

A BACK-DOOR CAREER MAN

Six years ago, Michael McBride was selling computer systems. The rapid transition he’s made to superintendent at Muirfield Village Golf Club is something no computer could figure out.

As an undergraduate at Bowling Green State University, McBride worked the summers of 1973 and 1974 at Muirfield, while the course was under construction. “I guess what I liked was that I could do something with my hands, labor, and you could see it evolve, emerge,” he says.

Except, he was a political science major. At the time, he considered switching to agronomy. “But I was so far along I said, ‘Aw, I’ll just get my degree.’ It wasn’t a very good attitude at all.”

He graduated, he sold and he did well for himself. “But I had a problem,” he explains, “especially in the springtime.

“I was on straight commission as a computer salesman. But I’d go by a golf course and—zoom—there I go, sharp turn into the front drive. It hurts your livelihood. You’re not bringing home the money you should. You should be out working.”

Things had to change.

He wrote a letter to friend and mentor Ed Etchells, Muirfield’s superintendent at the time McBride worked there. Etchells, now Jack Nicklaus’s right-hand maintenance man for all his courses, suggested contacting Muirfield.

McBride began as seasonal labor. He was eventually hired on full-time and then sent to school at Rutgers. He would work in the summer and go to school in the winter while his wife remained behind in Columbus.

“It was tough on us. But I came back, got the assistant’s job and worked my way up. It was definitely a different avenue, but everything’s worked out.”

He has been superintendent for two years now. And he now has his job and his life in a clear perspective. “The attention to this golf course and the importance of the (Memorial) Tournament, really comes from the top (Nicklaus). That’s my job, to try to keep him happy. It’s his baby.

“It may be 99.9 percent perfect but that’s not good enough. It has to be better than that. That’s why it is what it is. He won’t settle for anything less than that. As long as we have the people, the resources, the funds, we’re always doing something. If you have all that, there’s no reason why it shouldn’t be perfect. That’s what makes it challenging for me.”

McBride seems a natural for his job, relying as much on instinct as on pure facts to make proper decisions about managing the course and its staff. He willingly accepts these challenges.

“You work your way to be Number One as far as course condition. But once you get up to the Number One spot, trying to maintain that spot is the most difficult because there are hundreds of great golf courses that all want to have that recognition.

“When you’ve been publicly recognized as the best that puts a little more challenge into the job of keeping it the best year in and year out. That’s what I try to instill in these 40 to 50 people, and they understand that. They’ll put in that extra effort because they have a lot of pride in it.”

So does McBride. There’s no where else he’d rather work, and with good reason. “If you feel you’re at the best golf course, where else would you want to go?”

Perhaps the first tee? —Jeff Sobul

Michael McBride (right) instills in his staff, the pride he holds for Muirfield. He checks the progress of verticutting on the 10th fairway with the operator of a greens verticutter, used on the fairway to stand up the bentgrass before mowing to control lateral growth.
