Chart, captions were reversed

In the article "Diseases of Cool-Season Turf," which began on page 48, the disease identified as necrotic ring spot was actually take-all patch and vice versa.
Colors in the disease calendar on page 50 were also reversed. The chart is reproduced correctly on page 58 of this issue.
The magazine regrets any inconvenience to author Noel Jackson, Ph.D., or any of its readers.

INDUSTRY
Monsanto buys 'Clipper' TGR
Monsanto Agricultural Co. has made an agreement with ICI Americas whereby it gains exclusive U.S. distribution rights to ICI's Clipper tree growth regulator.
The regulator extends tree trimming cycles so that electric utility companies can trim less often.
Clipper is injected through small holes drilled into tree trunks. It slows the growth of a variety of deciduous and broadleaf evergreen trees without adversely affecting flowering.

THE RIGHT STUFF...Pilot Field, the new home of the Class AAA Boston Bisons minor league baseball team, is made of the right stuff. That is, real grass. Bison president Robert E. Rich Jr. notes: "When we conceived the initial design for Pilot Field, we made sure of two very important details. We wanted the sun to shine on our fans, and our players to play on natural grass." The field, sodded last fall, contains a mixture of Victa, Bristol and Merit Kentucky bluegrasses with 10 percent Pennfine perennial rye. The field's irrigation system was designed by Toro Irrigation and installed by the John W. Danforth Co. Others involved in completing the field were George Terzian of Star Landscaping, Jim Hornung of Elber's Landscaping and Gerald Rothenberger of Cowper Management. Also, Comiskey Park's Roger Bossard served as a consultant.
