Many landscaping companies ventured further into the realm of full-service by adding irrigation installation to their arsenals during 1989. Benefits cited by company spokespersons responding to Landscape Management’s fourth annual survey of contractors include more income and less of the hassles often associated with subcontracting.

A full-time irrigation technician post was added to Four Seasons Landscape in Sacramento, Calif. Pete Bowman, operations manager, says the extra expertise generated revenue and helped improve maintenance.

"His duties include all irrigation troubleshooting, such as a valve that doesn’t work, or a clock in need of repair or replacement.”

Mark Cetnor of Scandia Landscaping, Livonia, Ill.: “We added an irrigation service a year ago. This year it was fully operational, and it went smoother. It complements our work when we’re doing landscape construction; the service can be operated independently (of other services).”

Who they are
The following are the Top 50 landscape contractors in the U.S., based on gross sales of those companies which responded to our survey:

1. Tropical Plant Lenders, Riverwoods, Ill., reported gross sales of $40 million. That’s a $5 million increase for Tropical, thanks to the efforts of 900 yearly employees stationed at 10 branch offices. Tropical’s maintenance contracts for 1989 surpassed the 10,000 mark.

2. Carlacio Landscape, Inc., Fullerton, Calif., had $22 million in gross sales. Carlacio’s gross sales were $4 million higher than they were in 1988. The company employed 240 peak season employees at four branch offices. They worked on three design/build jobs and six maintenance contracts.

3. Landscape Specialists, Inc., of El Toro, Calif. takes the number three position in its first year in the survey. The company recorded gross sales of $18 million for landscape design, build and maintenance. It completed 90 design/build jobs and fulfilled 61 maintenance contracts.
Finding qualified labor was the biggest concern of the large landscaping companies we surveyed.

Thirty-eight percent of respondents have trouble finding and keeping people who are willing to work.

"We get people who work for a few days, and you never see them again," says one landscaper. "And salary-wise, we're a little bit higher than others around here. We start a guy at $18,500. In my opinion, people don't want to do this work."

Scott Plein, president of KT Enterprises, is concerned about "the environment, and what type of approach our industry takes toward our interaction with and ability to affect our natural surroundings. Hopefully," says Plein, "we will be proactive in dealing with such issues and be at the forefront of developing more logical, sensitive controls and more responsible methods for solid waste disposal."

Other respondent concerns included the high cost of health insurance and workers' compensation, softness in the construction industry, and dangerously low bids by some contractors.

Most vocal about the issue of undercutting was Mark Yahn, president of Ground Control Landscaping, in the "fiercely competitive market" of Orlando, Fla.

Contractors must learn to bid responsibly for their own financial well-being as well as that of the industry," warns Yahn. "It does little good to take premium jobs out of the market if the final result is conflict with the owner and no profit; or, in some cases, red ink. Wake up, guys!"

Regarding another key financial development originating from the nation's capitol, James H. Taylor, president of Taylor Made Landscaping, Farmingdale, N.J. relates that, "Most of us landscape contractors work with builders, and builders account for a substantial part of our volume, especially as it relates to design/build. During the last couple of months, due to the new laws affecting banks, we have found that our largest customers have been unable to make payments as it relates to their balances. This is apparently because of the banks' new guidelines. They have not advanced monies that had previously been permitted."

"The new laws as they relate to banking and the reevaluation of the real estate market," says Taylor, "have created a situation in which a lot of trades are looking at very bleak conditions as they start the 1990 season. I don't know who to blame: the banks, the builders, or both."

—Terry Melver

4. American Landscape, Inc., of Canoga Park, Calif., had gross sales of $13.5 million, an increase of $1.9 million from 1988. The company has one branch office, and employs 250 peak season workers. The company completed 106 design/build jobs and 178 maintenance contracts.
