Incoming FTGA president on fast track with lawn care business and automobile racing.

- Drag racers call the metal pole with its row of colored lights "the Christmas Tree." It signals the start of each race. It flashes yellow, yellow, green! Reflexes uncoil like a great spring. Hands grip the wheel. The right foot slams down so hard on the accelerator it's a wonder it doesn't burst through the firewall. Headers belch so loudly as to split your skull. The driver launches his car and, in less than 10 seconds, rockets past and triggers an invisible timing beam.

"Stress relief," says Nick Dennis, weekend driver and car sponsor, and full-time family man and lawn care pro, as he describes his involvement with drag racing—"But it's really not.

"Racing is perfect for you, a friend told me," says Nick. "He said, 'You're the most impulsive person I've ever met. If you don't like something, you'll tear it apart and rebuild it because you love to experiment.'"

Nick Dennis operates Pro Lawn Plus and former college roommate (U. of Georgia) Mike Feely. You'll recognize Mike immediately. He's the calm one. "I'm always in everybody's face," admits Dennis.

Nick Dennis started his lawn care business almost 14 years ago after visiting Atlanta and noticing, really noticing, ChemLawn trucks for the first time. "I started snooping around, looking at their trucks, talking to their people," he recalls.

Within a few months, he'd told his wife that he was quitting his pest control job and starting his own lawn care company in Jacksonville. She urged him to go for it.

Nick's timing turned out to be pretty good. He caught the industry moving up. Florida home owners, long used to professional insect control in their homes and in their yards, also started to realize their lawns could be even nicer with regular fertilization and weed service. Adding to the demand was the steady stream of retirees, Yankees from the North buying homes in Florida and wanting nice lawns too.

Nick, however, believes the industry's heyday is over in northeast Florida.

He points to severe price cutting in his market as proof. Also, the ever-growing amount of lawn care regulation.

"As an industry, we've brought a lot of this scrutiny on ourselves by sloppy work and sloppy marketing," says Dennis, "by hiring warm bodies and throwing them out there and saying they're trained when they're not trained."

He says lawn care business owners now must be more responsible and responsive to customers if they want to survive.

To be profitable and have their companies grow, their service...
quality and/or delivery, must be markedly better or different from competitors.

"The only way we (Pro Lawn Plus) can hope to out-distance ourselves from everybody else in the marketplace is to be different from the others, more flexible than everybody else," says Dennis, who says his company grew by 7 percent during 1992.

That’s one reason why Dennis is so involved in the Florida Turfgrass Association, regularly making the 2-hour-plus drive to Orlando while working on various committees. In September he becomes the first lawn care business owner ever to serve as FTGA’s president.

"Being involved with the association has allowed us to keep a sharp eye on all the turfgrass research taking place in Florida," says Dennis. "We know all the latest on nematodes and mole crickets. We know about the updates on the herbicides, the hybrid grasses as they’re being developed.

"A lot of this is information we can use on our customers’ lawns. Sometimes it’s information they should know, and we can pass it on in the newsletter we leave with each service round."

Dennis admits his schedule is just about as full as it can get.

"I like what I do, but when I get tired of it, I have other things, other diversions. Maybe that’s how I keep such a strong interest in this business. When the men and women come here every morning, they see that I’m still excited about what we’re doing," says Dennis.

"I guess I look at this as kind of like a NASCAR race team, and I’m the car owner."

"This promises to be a milestone year for the 41-year-old Florida Turfgrass Association (FTGA).

Sometime this summer or early fall—perhaps in time for the FTGA Conference and Trade Show Sept. 25-30 in Tampa—the 1,000-member association will help:

• unveil the first Florida Turfgrass Survey since 1974. It promises to have some eye-opening numbers. There were only about 400 golf courses in the state in 1974 and an estimated 1200 (and still counting) in 1993.

• dedicate a state of the art turfgrass research facility at the University of Florida, Gainesville, the Envirotron. The Envirotron was funded by private support from the FTGA and by matching funds contributed by the state. It has been under construction since March 11, 1992.

FTGA Executive Director Robert J. Yount says Florida’s turfgrass industry is justifiably excited as the two projects near completion.

Results of the survey should give state lawmakers proof of just how vital turfgrass is to Florida’s economy. "Legislators keep asking how big turfgrass is in the state, and now we’re going to be able to tell them," says Yount. "This will be extremely important as the state continues to deal with issues like water."

Also, by surveying and categorizing the industry, suppliers can more accurately and comprehensively match their products with the markets, says Yount.

The Envirotron, being built on the U. of Florida campus, will consist of a research laboratory, a greenhouse, a study/living area and a rhizotron—a glass-walled laboratory which allows researchers to study roots and soil.

"Turfgrass is so important to Florida that we have to continue to recruit excellent students," says Yount. "It’s almost like recruiting a top quarterback. And we think the Envirotron will help the University of Florida get top-flight students."

In an unrelated matter, Yount reports that its Turfgrass Friends coloring and activity book has been a big hit with youngsters. The FTGA had distributed almost 15,000 by the beginning of summer.

Management’s responsibility: support service people

- Your technicians have the most contact with customers, right?
  * Do they get just enough pay, encouragement, and/or support to get them through another day?
  * Do they really matter to your firm?
  * Are they only the technicians? Are they only the people who deliver service to your customers?

Second in a series on Zemke and ‘service.’

“We’ve got to come to grips with what we pay people in front-line service jobs,” says nationally known business consultant Ron Zemke. The operators of service businesses will have less and less choice anyway, says Zemke, because the number of eligible and trainable people looking for entry-level service jobs is shrinking.

Zemke directed a three-day ALCA Executive Forum this past February, and a big part of its message was that responsible, effective front-line people are the soul of any successful service company. About 250 lawn/landscape business owners took part in the Forum.

Zemke says some service delivery operations never rise from mediocrity because their management is like a pyramid and rigid. These operations foster the perception that the only way for employees to advance their careers is to become managers, to concentrate more on the organization’s operation as they retreat further and further away from customer concerns.

This is dangerous thinking. The function of managers, in fact everybody in a service organization, should always be focused on customers. Or, says Zemke, in serving the people who serve customers.

A manager’s role is, in many respects, a servant’s role, he believes—supporting service personnel, running interference, creating an atmosphere of understanding and trust and support.

“You have to have people at the front line who are comfortable with the idea that they have some control, and that you support their effort,” says Zemke.

Back to the issue of technician pay.

Do high-quality service delivery organizations always pay their service people more than competitors? Not necessarily.

“Sometimes people are willing to trade off higher pay off for long-term employment and security,” he adds. Other organizations reward competent people by giving them increasingly more responsibility and/or job variety. Don’t be afraid to be creative when it comes to compensation.

Some tools require a lot of time and manpower...
GMAW picks two for top honors

- Instead of a single "Person of the Year," why not two?

That's what the Grounds Management Association of Wisconsin (GMAW) members decided when they voted both Joe Bilskemper, LaCrosse, and Terry Kurth, Barefoot Grass, the honor.

Bilskemper, representing Lawn Care Specialist Inc., is a 1976 graduate of Viterbo College. He serves on four LaCrosse Chamber of Commerce committees. Kurth, a 1974 graduate of the University of Wisconsin, operates Barefoot Grass of Madison. He's GMAW's president and the past president of the Wisconsin Turfgrass Association.

Both green industry professionals served on the Ad Hoc Committee for the revised AG-29 rules, attended PLCAA's 1992 Day on the Hill, and also testified to defeat the Louis Forest Lawncare Bill AB-468 in Wisconsin.

The men were honored during the Wisconsin annual conference at Chula Vista Resort in the Wisconsin Dells.

Winners Terry Kurth, left, and Joe Bilskemper surround PLCAA board member Lou Wierichs.

Partners now in NH

Earlier this year, Partners purchased the customer base of Orkin Lawn Care's consolidated offices in Billerica and Marlboro, both in Massachusetts.

Partners' President Dick Ficco, said plans had already been under way during 1992 to expand into markets north of Boston prior to acquiring Orkin's accounts.

Partners was formed in 1987. Ficco is a board member of the Professional Lawn Care Association of America.

Correction

- An error was made in the article about Nutrilawn International.

The article stated that Nutrilawn has 50,000 customers in Winnipeg, Canada when, in fact, those customers are nationwide. It also states that franchisees need at least 30 customers to make a franchise viable. The correct number is 300.

Roundup® herbicide is the ideal management tool when budgets are tight or manpower is limited.

You can cover more ground in the same amount of time it would take using mechanical methods or pulling weeds by hand.

Better yet, Roundup gives you long-lasting control. So crews don't have to keep coming back.

You'll be able to allot more manpower to other jobs and save wear and tear on equipment—getting the most out of your budget.

If you're not already using Roundup, don't waste another minute. Ask for our FREE brochure telling how Roundup combines ecology and economy.
