11 Controlling spring weeds
As March comes, so do the first weeds of the season, invading turfgrass areas everywhere. Warm-season tips by Dr. Tim Murphy of the University of Georgia begin on page 11, cool-season on page 16.

19 LM Reports: Mower engines
Though the engine is only part of what you'll be purchasing when you go to your lawn mower dealer, it's an important part, and you should know the options available.

24 Snappy sales pitches
Use your pallet of experience to paint a colorful picture when meeting a prospective customer. Your first impression is the most important.

26 Spring landscape recovery
You and your customers might be surprised to see all the damage done by winter snow plows and salt. Here are some spring fix-it suggestions.

31 Wildflower seeding
Pick the best of three methods offered for wildflower seeding by the Texas Department of Highways, all of which yield an even distribution with good seed-to-soil contact.

38 Using geotextiles
This step-by-step instruction for lining a typical eight-foot side slope ditch will help keep soil from eroding.

40 ‘Least management’ fields
Park/athletic field managers in small towns, high schools or community colleges may need a little help from friends.

44 Picking the right dealer
When you need new equipment, chemicals or seed, do you shop for the best price, or the best deal? Listen to these two experts speak.

46 Halting soil erosion
The old adage about an ounce of prevention will help you avoid environmental problems on your landscapes.

52 Bringing luck out of hiding
Are you a lucky person? How does luck happen? Can you be the beneficiary of luck? Or is luck just something that happens to other people?

54 ‘Home field advantage’
Is it the job of the athletic field manager to create equal opportunity for all athletes, or to make sure the home team has an edge?

56 Checking out competitors
Are some of those ‘price cutters’ in reality just more sophisticated business people from whom you can pick up some helpful hints?

58 How to get the bite on insects
The appearance of insects means new business for the astute lawn/landscape company.

60 Changing your soil pH
Obtaining the correct soil pH can be tricky. You may have to amend the soil, depending on turf species and existing soil conditions.

66 Crabgrass, a tough foe
Proper fertilization and mowing allow turfgrass to outcompete crabgrass, but pre-emergents are still very popular. Also: tips for better product applications, a rundown of newer products that give turfgrass pros more options.

72 A new weed control
Spring-Green Lawn Care's ‘biological’ program stresses fertility, cuts herbicide use, receives customer approval.
74 Tick risk small on turf
The nymph of the tiny Ixodes dammini is most abundant in woodlots. Nymphs are responsible for 70 percent of Lyme disease cases.

Deborah Smith-Fiola

76 Bunker renovation
At times, a golf bunker may require some renovation: enlarging to original size, repairing drainage, replacing all the sand, or a combination of any of these.

78 Another view on respect
Lack of respect could be a failure to nurture and develop that respect for the long term, says this golf course general manager.

Greg Christovich

80 Golf course liability
Affirmative action, safety are prime considerations, says GCSAA legal counsel.

Jerry Roche

80 Aerifying bent greens
Many kinds of machines are available for breaking up soil layers, says this University of Georgia expert.
