**WASHINGTON**—There's no question in the minds of consumers about the benefits of specialty pesticides like those used on golf courses and home lawns. But there are concerns about their responsible use, according to results of a survey commissioned by RISE (Responsible Industry for a Sound Environment).

The survey, undertaken by Charlton Research of San Francisco, focused on attitudes of the general public rather than consumers who specifically purchase and use pesticides.

Eight focus groups were held in Pittsburgh, Seattle, Milwaukee and Birmingham. Each group was composed of 9-10 adults of mixed age, gender, area of residence and location.

Focus group information was combined with a national telephone survey of 1,000 adults.

"Our research shows that we need to help the public better understand several issues relative to the value of pesticides, as well as their responsible use," says Alan James, RISE'S executive director.

"As the official voice of the pesticide industry, RISE will work with audiences (ranging) from government and industry influencers to the media and consumers, to increase understanding of the value of pesticides as pest management tools which help enhance the quality of life and the environment when used responsibly."

Several of RISE'S planned initiatives are educating consumers on responsible pesticide use, promoting the benefits of pesticides, and increasing awareness about the training certified applicators must undergo.

**SURVEY REVELATIONS**

- Many Americans are willing to balance their personal and environmental health and safety concerns with the perceived benefits of pesticides.
- Respondents think pesticides are used more by other people in their local government than by themselves or their neighborhood circles.
- Most people use some form of pesticides.
  - 64% use pesticides to control household insects/rodents
  - 48% use pesticides to control garden insects
  - 38% use pesticides on their home lawns
  - 10% currently use a lawn care company
- Controlling termites, insects and bacteria with pesticides is seen as an important personal health and safety protection issue. It is more important than having a beautiful lawn or the public cost of highway maintenance. *If a personal protection issue is at stake, a large majority of people will override their initial concerns about pesticides.*
- People strongly believe pesticides are safe when used as directed. But they are not certain if their neighbors are using pesticides safely. They also believe that professional applicators use stronger pesticides, but are trained to apply them safely.
- Only about 50% believe pesticides made available to the public are thoroughly tested.
- The most trusted source of pesticide information is from independent local government agencies like extension agents, poison control centers and health departments.
- "Maintaining public health" was the reason given by almost 80% of the respondents for applying pesticides to control pests and weeds in public areas.

Small business sales and profits healthy last spring

ATHENS, Ga.—Small businesses across the U.S. enjoyed a healthy surge in sales and profits during the second quarter (April-June) of this year, according to the most recent quarterly survey conducted by Padgett Business Services USA here.

Traditionally, second quarter numbers are the strongest for small business, and 1994 was no exception, the report notes. Overall sales were up 13.2 percent and profits showed a healthy 33 percent climb over first quarter numbers.

“Second quarter numbers generally tell us how the rest of the year will go,” says Padgett chairman Dan Sautner. “This year looks better than 1993 or 1992 in this respect, but—more importantly—expenses are down and under control.”

Small businesses are stretching their profits by keeping expenses down, the survey says. Reduced spending—up only 4.4 percent over last year—indicates that small business owners are watching their bottom line very closely.

The entire study is published as “Small Business—The Engine of Our Economy” by Padgett. Highlights:

- A 4.4% wage increase shows small business is producing more jobs than other economic sectors.
- Inventories are up 12.7%.
- Nearly half of those polled believe now is not a good time to start a business.
- 72% said they don’t think small business should be required to contribute any portion of the health care tab that was proposed during the survey’s time frame.
- Not one person believes the Clinton administration has helped the situation for small business.
- The Midwest saw the greatest sales growth in the country, up 8% from the same period last year.
- The East didn’t reach expected sales levels, posting the greatest increase in inventory over last year at 17.3%.
- The South showed the highest wage increase in the country at 8.8%, indicating confidence in the economy.
- The West was the only region in the country to experience a decrease in sales over last quarter.

For more information on the report, contact Padgett Business Services USA, 160 Hawthorne Park, Athens, GA 30606; (706) 548-1040.
HIRE & FIRE WITHOUT FEAR...Rightful Termination: Defensive Strategies for Hiring and Firing in the Lawsuit-Happy 90s was written to help employers and business owners regain control of their businesses with proven techniques for hiring and firing. The book is written by James Walsh. To order, contact Nolo Press, at (800) 992-6656.

GOLF & THE ENVIRONMENT...RGF Environmental Systems, Inc. is offering a free booklet entitled Environmental Guidelines for Golf Course Maintenance Facilities. The booklet is offered as a public service to golf course superintendents. It includes information on how to reduce the risk of contaminants entering the environment: EPA laws, maintenance shop housekeeping, mix & load operations, storm water run-off, managing hazardous waste on site and pollution solutions. Contact RGF at 3875 Fiscal Court, West Palm Beach, FL 33404; (800) 842-7771.

ARCHITECT LISTING...The American Society of Golf Course Architects’ 1994-95 membership list features all the names, addresses, telephone and facsimile numbers of the 122 members. To receive a free copy of the list, send a stamped, self-addressed business-size envelope to The American Society of Golf Course Architects, 221 N. LaSalle St., Chicago, IL 60601.

KNOW THE PLAYERS...The Associated Landscape Contractors of America (ALCA) has published its 1994 directory, Who’s Who in Landscape Contracting. The directory is a reference source for landscape contractors, landscape designers, building owners and managers, facilities managers and more. It contains a complete list of ALCA members and other industry-related contacts. For a copy, contact ALCA, 12200 Sunrise Valley Dr., Suite 150, Reston, VA 22091; (703) 620-6363.

IPM GUIDE TO PESTS...The University of California has published Pests of Landscape Trees and Shrubs. Included is emphasis on IPM methods of pest controls, hundreds of illustrations, and 50 pages of tables. Cost is $32. Contact ANR Publications, 6701 San Pablo Ave., Oakland, CA 94608-1239; (510) 642-2431.

SOIL & PLANT ANALYSIS...The Handbook on Reference Methods for Soil Analysis is a laboratory technique manual for the more common soil testing procedures. The latest edition includes several new procedures and new sections on nitrate and heavy metals. Cost is $49.95, and is available from St. Lucie Press, 100 E. Linton Blvd., Suite 403B, Delray Beach, FL 33483; (407) 274-9906.

IRRIGATION MANUAL...Troubleshooting Irrigation Control Systems. by irrigation consultant Bill Derryberry, covers electricity, meters and valve operation, simple electricity, how meters work and how they are used to diagnose typical problems. Contact Irrigation Publishers, 5818 East Oak St., Scottsdale, AZ 85257; (602) 423-0542.
