Georgia executive chosen new director of GCSAA

Chief financial officer, chief operations officer, education manager for conference/certification are also named.

LAWRENCE, Kans.—Steve Mona is the new executive director/chief operating officer for the Golf Course Superintendents Association of America.

Mona, 36, has been executive director of the Georgia State Golf Association since 1983.

He visited GCSAA headquarters here on Dec. 6th.

"My first impression was that the quality of the GCSAA staff is remarkable," Mona tells LANDSCAPE MANAGEMENT.

He says the first order of business is establishing completely open lines of communication among the staff. From there, "our second focus is to really turn the axis of direction toward the membership," he says. "What’s in it for the members?" is going to be the first question that will be asked of every project. Members give the staff the license to exist."

A strategic planning session is another immediate order of business. An intensive three-day session, which has yet to be scheduled, will include the GCSAA Board of Directors and key staff members. Short- and long-range goals will be discussed and set.

"Steve Mona’s experience has given him the kind of knowledge and perspective essential in guiding the GCSAA to its next level of success," says current President Randy Nichols, who also hails from Georgia. "The fact that his background has been focused within the world of golf associations is clearly a big plus for us."

"He brings to our top executive’s position an established familiarity with the game’s key organizations, an outstanding record as a leader, and the attitude of a genuine ‘people person.’ We anticipate continued success as we move ahead."

Mona’s experience includes stints as tournament director for the Northern California Golf Association and assistant manager of press relations for the U.S.G.A. He was also president of the International Association of Golf Administrators, and a director of the National Golf Foundation.

Mona was to begin work at the GCSAA headquarters here early this month, at exactly the same time that the new chief operations officer, Joe O’Brien, begins.

O’Brien, 48, comes to the GCSAA from the presidency of the American Hotel Foundation. His other association experience includes 17 years in senior management with the Professional Golfers of America (PGA). He has also been senior business developer for Marriott Golf.

Mona believes O’Brien’s involvement in the golf industry will perfectly complement his own.

Mona replaces John Schilling, who resigned last year to start his own company, St. Andrews Golf. The position of chief operations officer is a new one.

In two related moves, the GCSAA named a chief financial officer and promoted one of its employees to education manager for conference and certification.

Julian Arredondo, former vice president and CFO of Midwest Titan Construction in Olathe, Kans. was named GCSAA CFO. Arredondo, 35, is a graduate of Rockhurst College.

And Rebecca Powell Clayton earned the promotion to education manager, conference/certification from education coordinator, special projects. She will develop and supervise the association’s certification program and all educational programs at the annual GCSAA conference and show.

2,4-D label may change applications

WASHINGTON—If the federal Environmental Protection Agency re-registers the herbicide 2,4-D, its label will probably include practices that will reduce applicator exposure.

According to information from the 2,4-D Hotline, here are specific label requirements for turf applications:

- Mixers, loaders and applicators must wear long-sleeved shirt, long pants, socks and shoes.
- Users of turf liquid products with "warning" or "danger" signal words must also wear eye protection.
- Professional applicators of turf liquid amine products must also wear chemical-resistant gloves, except when applying to golf courses. Other applicators of turf liquid amine products must wear rubber gloves.
- Full-yard sprayings (broadcast applications) will be limited to two per site per year.
- After using the product in liquid form, rinse gloves before removing, remove clothing and launder separately from other clothing before re-use. Promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.
- After using the product in granular form, remove clothing and launder separately from other clothing before re-use, and promptly and thoroughly wash hands and exposed skin with soap and water.
- Do not allow people or pets on treated area during application. Do not enter treated areas until the spray has dried or dust has settled.
- Persons engaged in open pouring of 2,4-D products packaged in containers of more than one gallon but less than five gallons must also wear coveralls or a chemical-resistant apron.
- A mechanical system (probe-and-pump) must be used for transferring the contents of containers of five gallons or more. If the contents of a non-refillable pesticide container are emptied, the probe must be rinsed before removal.

There are more specifications. For further information, contact the 2,4-D Hotline: (800) 345-5109.

 athens, Ga.—The University of Georgia now offers an independent (home) study course for persons working in turfgrass management.

"Principles of Turfgrass Management" is organized around 14 chapters and is presented in an easy-to-read, illustrated study guide written by Dr. Keith Karnok. Course material covers turfgrass identification, adaptation and use; soils; identifying and controlling weeds, insects and diseases; and much more.

The course is available for $275. Upon enrollment, the University of Georgia will mail participants all materials, provide instructions, and coordinate the program of study.

Successful completion of the course will earn participants the designation “Certified Turfgrass Professional” by the Professional Lawn Care Association of America (PLCAA). Persons achieving certification will receive a handsome plaque, a cloth certification patch, and a wallet-sized certification card.

For more information, or to register, phone (706) 542-1756 and ask for "Principles of Turfgrass Management." PLCAA members should call (800) 458-3466 for member rates.

Washington, D.C. tries to outlaw lawn equipment

WASHINGTON—Ten professional landscape organizations have joined in the opposition to a sweeping set of restrictions proposed by the Metropolitan Washington Air Quality Committee. The restrictions would cause major disruptions of commercial and residential landscaping operations.

The proposed plan would reportedly help Washington meet the EPA’s mandate to reduce ozone emissions by 15 percent:

- Prohibit the use of common lawn and garden equipment on so-called "ozone-alert" days. This would include lawn mowers, commercial turf equipment, wood splitters and shredders.
- Mandate the replacement of the above equipment with new, cleaner equipment.
- Institute a taxpayer-financed education program costing approximately $1 million.

“It’s critical that the industry deals effectively with these federal Clean Air Act directives here in the D.C. area,” says AAN government affairs director Ben Bolusky. “Many metropolitan regions across the U.S. will need to deal with the ozone issue, and they’ll look to see how the nation’s capital has handled commercial landscape operations. We can’t afford to have the excessive regulations proposed here
become a precedent for the rest of the country."

Some other organizations involved: AAN, ALCA, PLCAA, NAA and OPEI.

Corrections

- Readers: please note these corrections to articles and advertisements which appeared in our November issue:
  - An advertisement for Dimension on pages 36-37 should not have been mailed to our New York and California readers, since it is not registered in those states. If you live in either of those states, please do not attempt to purchase or use the product.
  - In the pie chart on page 26, soil composition for poorly drained soil should read: 45% minerals, 5% air, 45% water, 5% organic. Our apologies to Dr. Charles Darrah III, who authored the article, and to any readers inconvenienced.
  - In the article on pages 14-15 about spreaders, Turfco Manufacturing was inadvertently omitted. Turfco's address and phone number are: 1655 101st Ave. NE, Blaine, MN 55434; (612) 785-1000. We apologize for the omission.

EIGHT CUTTING EDGES FOR CLEANER, SHARPER TRIMMING

Cross-Fire™ Premium Trimmer Line from Echo.
The shape of things to come.

Not your ordinary line, Cross-Fire’s™ eight cutting edges shear rather than tear grass. That helps reduce the browning of grass tips for a more professional look. Cutting is easier and faster, too, even in long, thick grass.

Made from a specially designed premium copolymer, Cross-Fire™ has excellent flexibility and suppleness, plus exceptional split and tip wear resistance for longer life.

Also, the bright color is easy for the operator to see.

Choose the size you need from .065" to .130" in diameter, and lengths from 40’ loops to 5 lb. spools.

This year, don’t settle for the same old line.

ON PRICING...The Associated Landscape Contractors of America has released "Pricing," a how-to primer that walks landcapers through each of the elements of pricing what you sell. Included: valid pricing methods including markup of direct costs; putting together an estimating system; and making a proposal that sells. Author is Frank Ross of Ross-Payne Management. To order, write PBI/Gordon at 3875 Fiscal Court, West Palm Beach, FL 33404 or phone (800) 272-7737.

ON SOIL..."Organic Soil Amendments and Fertilizers," a 40-page booklet, is available for $5. The booklet doubles as a handbook and reference, with useful information about the management and availability of organic materials in California. Materials are listed alphabetically in the index, and a glossary defines some of the important terms. Ask for Publication 21505. Make checks to UC Regents. Contact: Fresno County Cooperative Extension, 1720 S. Maple Ave., Fresno, CA 93702; (209) 488-3285.

IPM PROGRAMS...For suggestions on controlling turfgrass pests, get "Developing and Integrated Turfgrass Pest Management Program," authored by Dr. Peter Landschoot, assistant professor of turfgrass science. The free publication is available through the Publications Distribution Center, College of Ag Sciences, 112 Ag Administration Bldg., University Park, PA 16802; (814) 865-6713.
