Living on the edge

BY CURT HARLER / CONTRIBUTING EDITOR

Just as a bit of starch accents the clean lines in a shirt, a sharp cut accents the edges where grass meets a path or flower bed.

At Evergreen Landscapes Inc., Newbury, OH, Dan Harb figures his edger paid for itself and made him money the first year. "I was looking for something that cuts a nice edge," Harb says. His choice was the Trenchmaster (see page 49).

"If you try to do it by hand, everyone's edge turns out looking different. With a machine, it is nice and uniform," Harb continues.

In addition to improving aesthetics, Harb wanted to speed up a labor-consuming job. "The machine costs a lot of money," he admits, "but with less labor required, it paid for itself in less than a season. If you don't do a lot of edges and beds, it might not pay back as fast."

Still, both he and his customers are impressed with the sharpness of the cuts the unit produces — and that makes for a good, long-term business relationship.

Check out the edgers below to find one that will put a crisp border around your jobs.

ARDISAM, INC.
800/345-6007
www.ardisam.com

Both the K286B and the K226B edgers from Ardisam, Cumberland, WI, are powered by 3.5-hp Briggs & Stratton engines. Each has adjustable cutting heights from 0 to 4 in. and feature cutting angle adjustment. Frames are solid steel, and the robot head adjusts from horizontal to vertical. The 286 has dual steel hub wheels for extra stability. The 226 has a single front wheel; at 65 lbs., it is 2 lbs. lighter than the 286.

LESCO, INC.  
800/321-5325  
www.lesco.com

The LHE-2500 Stick Edger from Lesco, Rocky River, OH, is a fast unit designed for the professional turf care market. It has easy-to-use wheel height adjustment for controlling edge depth, rubber debris flap to minimize material kick-back, and large rubber gauge wheel for good tracking. The 8-in. blade is powered by a 25-4 cc 2-cycle engine. Shaft is solid steel. Guide wheel, with steel ball bearings, is adjustable.

Circle #268
SALSCO, INC.  
800/872-5726  
www.salsco.com

Cut a cart path edge or create a new bed with the Model 09043 from Salsco, Cheshire, CT. Unit is powered by a 13-hp Honda engine with oil alert and hydrostatic forward/reverse. Options for cutting include the V-Groove that cuts to 9 in. for new beds or trenching, straight edge for narrow trench work, and combined Sod-Buster and Dish-type blades to break up sod. Optional brush mower deck is interchangeable with cutter deck by removing six bolts.

TANAKA
253/333-1200
www.tanakapowerequipment.com

Check out the TLE-550 walk-behind edger from Tanaka, Kent, WA. It features a 50 cc, 2.5-hp engine with transistorized electronic ignition and Walbro carburation. The 10-in. cutter blade runs to 3-in. maximum depth and is controlled from the handle to nine cutting depths. Also available are portable edgers, the TPE-2510 with 24 cc, 1.3-hp engine; and the TPE270PF with 26 cc, 1.4-hp engine. Both have 8-in. blades and a 3-in. cutting depth.

Circle #271

TRU-CUT
323/258-4135

The Pro-Series power lawn edgers from Tru-Cut, Los Angeles, CA, feature four Honda-powered models ranging from 2.5 hp to 4.0 hp. Units come with throttle lever and clutch depth controls at top of handle. Comfort hand grips make it easy to work all day. Blade is a 10-in. x 2-in. steel cutter. Strong protective belt and blade guards have an easily replaceable debris deflector. All models come with an all-steel, heavy-duty welded frame.
