John Watson, owner of Knoxville, TN-based Common Grounds Landscape Management, operates his business around a set of core values. He also promotes sustainable practices for the industry. Watson started his career in the professional landscaping industry through a high school internship and is now the president of the Tennessee Nursery & Landscape Association.

“As members of the original Green Industry, I believe it’s important for us to take the lead in finding alternative, environmentally friendly ways to manage our landscapes,” he says. Watson stops to share his views of the maintenance industry with LM.

**TOP TRENDS**

› **Propane-fueled mowers.** We started using propane-fueled mowers two years ago as participants in a study conducted by the University of Tennessee, which compared gasoline-fueled mowers with those fueled by propane. We were so impressed with the performance of the propane-fueled mowers that we converted half of our walk-behind fleet to propane-fueled models. These mowers help reduce costs, because propane costs less than gasoline for us — especially in the summer — and our on-site refueling station provides convenient refueling and virtually no fuel spillage.

› **Smartphones on the job.** We provided smartphones to our employees to help with everyday tasks and to help track our job costs. Our personnel clock in on their smartphones at the beginning of the day and clock into a specific job when they get to the property to start service. Everything is web-based, so we can check the progress of each job, what is finished and not finished, and can even post new jobs to the site.

› **Educated customers.** Google has changed the world as we know it. I have noticed our customers use Google to look up information about their plants and landscape, and they are looking for educated technicians who are just as knowledgeable. I tell my account managers not to hesitate to do a little on-site research with customers on their smartphones when questions arise. If this happens, I counsel the customer that they need to be sure they are using a reputable information source.

**TOP OPPORTUNITIES**

› **Environmental stewardship.** Our customers are really focused on finding sustainable ways to lower their carbon footprint. Common Grounds was green before it was popular to do so. We believe it’s important for the industry to find alternate ways to manage our landscapes.

› **Rewarding employees.** We developed an open-book bonus plan in 1990, which is based on our profit-and-loss statement from each month. The simple formula is sales less the cost centers on which team leaders can have a direct effect. We take this number and use a multiplier that is split between all the team leaders. During the economic downturn, this knowledge of all costs allowed our team to become very lean. With everyone working together, we were able to save all the full-time jobs — and actually increased team leaders’ bonuses.
