Power Lok system
CORE’s Power Lok handheld blower, hedge trimmer and split boom landscaping system features interchangeable attachments that can trim grass, cut hedges and blow leaves and debris. This addition to the company’s GasLess line offers flexibility and efficiency for a fraction of the cost of purchasing separate units, the company says.

FS 240 and 240 R
These trimmers cut through heavy thickets and tall growth. The loop handle design of the FS 240 R offers the flexibility needed to trim between brushes, shrubs and other tight spaces. The FS 240 bike handle version offers a swivel design for easy transport and storage. Both feature a vertically pleated, paper air filter element that extends service life, reducing maintenance costs.

536LiL and 536LiR
Two new trimmers—the straight loop 536LiL (pictured) and the straight bullhorn 536LiR—offer ergonomics and balance. Each provides stepless electronic speed control, a brushless motor and rotation direction change for professional use.

T235
The new T235’s design inherits popular traits of the Shindaiwa brand such as a solid shaft drive, ergonomic grips, two-stage air filtration and full-wrap tank stand. A 20-in. cutting swath, easy reloading high-capacity Speed-Feed 400 head and a high-torque gear box are standard. Like all Shindaiwa products, it falls under the 7-Day Money Back Guarantee program.
