What's so NEW about

AZAK?

Selective Pre-Emergence Herbicide for Crabgrass Control

- One application gives full season control
- Safe for established turf
- Nonleaching
- Compatible with fertilizers and other pesticides
- Practically odorless
- Low in toxicity to warm-blooded animals
- Now available at a new low cost

*Hercules Trademark

Azak*, Hercules' new carbamate herbicide for pre-emergence crabgrass control, puts superior crabgrass control within the reach of every budget. Dollar for dollar there is no pre-emerge control on the market that has the many advantages Azak offers.

Be sure to include Azak in your 1965 formulations. For technical data and product availability, contact Hercules Powder Company, Wilmington, Delaware 19899, or one of our turf specialists in the district offices listed below.

When Writing to Advertisers Please Mention WEEDS AND TURF
UGLY SPOTS CAUSED BY FUNGAL DISEASE

EASY TO AVOID
WITH THIS SPRAY

Fungal diseases such as you see here can ruin a beautiful lawn fast. First, ugly yellow, brown or grayish spots appear. Left unchecked, these diseases destroy vital root systems and spread, killing off large areas of lawn. To prevent such costly damage, simply apply Panogen Turf Fungicide.

This hard-working chemical makes it easy—and inexpensive—only .14 to 28c per 1000 ft. to spray away the danger of fungal disease. Can be used to keep healthy lawns disease-free, or to control an outbreak of fungal disease during early stages. Highly selective; attacks only fungal diseases without injury to turf. A liquid concentrate. Simply mix with water and apply with sprayer. Order from your chemical supplier.

When You're Talking Turf...

TURF HERBICIDES

FISONS MCPP
SELECTIVE WEED KILLER

A potassium salt formulation containing 2 1/2 lbs. of MCPP per gallon. Made available through Fisons research in England. Developed especially for use on fine turf grasses where control of chickweed (common and mouse-ear), clover, and knotweed has heretofore been difficult to accomplish without injury to bent grasses, bluegrass, and fescues. Because of its safety features, its slow-acting; full effects from treatments are not visible for about three weeks.

Also available — Fisons NSMA 100 AMA for crabgrass control as well as Fisons NSMA 100 for control of Dallis grass.

TURF FUNGICIDES

FISONS DAP-CAL

60% Mercurous Chloride, 30% Mercuric Chloride. Suspension type fungicide based on combination of mercury chlorides for positive long-lasting control of Large Brown Patch, Dollar Spot, Snow Mold.

Fisons TURF-TOX

75% Thiram

Wetable powder 75% Thiram, a proven fungicide for the prevention and control of Brown Patch, Dollar Spot, Snow Mold. Fisons TURF-TOX may be safely mixed with mercury to your own specifications. Apply to prevent disease or to control it after it occurs.

Fisons TURF-TOX MC

Thiram with Mercury

One convenient wettable powder formulation that eliminates the need for on-the-spot mixing. Fisons TURF-TOX MC combines the widely used turf fungicides, Thiram, Mercurous Chloride and Mercuric Chloride, for the prevention and control of Dollar Spot, Brown Patch, Copper Spots and Snow Mold. Also available — Fisons 10% PHENYL MERCURY ACETATE. Effective for control of Bluegrass Blight, Curvularia Blight, Copper Spot, Dollar Spot, Pink Patch, Snow Mold.

TURF FERTILIZERS

Fisons XL TURF FERTILIZER 28-7-14

A concentrated water soluble fertilizer in the popular 4-1-2 ratio suitable for use on greens and fairways. XL Turf Fertilizer provides a better control of growth, texture and color by going to work instantly, feeding through blades and roots.

Also available — XL LIQUID FERTILIZER, 15-10-5, and STOP-WILT, an emulsifiable vinyl compound in concentrated form for preventing moisture loss.

A Clarification

Elsewhere in this issue spokesmen for regional trade groups discuss the pros and cons of a national association of weed, turf, and tree spraymen. At the Horticultural Spraymen’s Association of Florida Convention in Ft. Lauderdale next month (Pier 66 Hotel, November 5-7), delegates will actually establish such an organization, it is reported.

While W&T has stood squarely behind this movement from the beginning, we feel obligated to clarify our position. Weeds and Turf feels that a hard-working group of applicators, functioning within the framework of a well-conceived nationwide association, can do the industry immeasurable good.

Advantages, for example, include a national voice for influencing legislation; a coast-to-coast means to improve the industry image; and the opportunity for applicators from all over the country to exchange technical know-how and business insights. A fringe benefit, of course, is the effect such a confederation might have on suppliers, who would better understand the nature and scope of the industry, and thus could cater more adequately to its specific needs.

However, this magazine does not endorse any single alliance to the exclusion of another. In addition to HSAF, societies in Portland, Oregon, and Seattle, Washington, for example, are considering national status. There are also groups in Oklahoma and Texas, and elsewhere in the Midwest. Communications among many of these assemblies were originally initiated by W&T staff members, because we seek only to better serve industriemen everywhere by making them aware of the advantages inherent in a well-managed trade association. Our goal is to disseminate information about various federations which are considering national status. We hope that the several regional divisions will be surpassed, and that all industry representatives will find it possible to fuse their several organizations into a coalition which all will find acceptable.

We have devoted much space to discussions of the need for an action such as that to be undertaken next month in Ft. Lauderdale, and which was discussed last month at the Pesticide Sprayers Association of Portland (Oregon) during a joint meeting with other Northwest groups. We welcome the opportunity to tell our readers about the progress which is being made, so that each can decide for himself the course he wishes to advocate in the establishment of a single convocation which can effectively promote the weed, turf and tree maintenance industry in the US.

HANDBOOK OF PEST CONTROL

by
Arnold Mallis

All New, the HANDBOOK OF PEST CONTROL is the latest book published on household and industrial pests and their control. Written in easy-to-understand language by a recognized authority with years of scientific and practical field experience, it is technical, yet easily followed by those with a limited knowledge of science and the chemistry of pesticides. Deals fully with rodents, insects, decay, fungi, habits, identification, and latest control methods. A complete, up-to-the-minute book, bound in sturdy maroon cloth, gold stamped.

1148 Pages List of Contents Includes:
250 Illustrations

- Rats and Mice, Silverfish
- Springtails, Cockroaches
- Crickets, Earwigs
- Termites, Decay Fungi
- Woodboring, Bookboring Beetles
- Book Lice, Bedbugs
- Clothes Moths
- Hide and Carpet Beetles
- Ants, Bees and Wasps
- Stored Products Pests, Lice
- Fleas, Flies, Gnats, Mosquitoes
- Spiders, Mites, Ticks
- Miscellaneous Household Pests
- Pesticides
- Control Methods

Seeks Dodder Control

Can you tell me if there is a fungicide that will control the fungus known as dodder (also known as “golden thread,” “hell bind,” “strangleweed”)? This orange-colored, sticky, string-like fungus attacks any and all plants and succeeds in strangling even the hardy Algerian ivy.

During the past two years I have discussed this problem with several nursemens and a representative from the Department of Agriculture. These gentlemen have suggested a strong solution (50%-80%) of ammonium sulfate applied in a spray as the only method of chemical control. I found that such a solution only marginally affected the fungus but did kill the plant to which it had attached itself.

I would appreciate your readers' comments and advice.

C. M. Quigley
8640 Metz Place
Los Angeles, Calif.

Readers are invited to write directly to Mr. Quigley. Ed.

Father-Son Team Want More Training

My son and I want to expand our services to include aquatic weed control. We also want to obtain more information on tree spraying, etc. Could you suggest where we could receive instruction and training in these fields?

Paul Kucik
Detroit, Mich.

The Aquatic Weed Control Society, secretary of which is Albert Lopinot, Illinois Dept. of Conservation, Litchfield, Ill., and the Hyacinth Control Society, William Dryden, secretary, P. O. Box 1711, Fort Myers, Fla., can give you information which will help you in your objective. The National Arborist Assn., can help you on the subject of tree spraying, etc. Dr. Paul E. Tilford is executive secretary and may be reached at P. O. Box 426, Wooster, Ohio. Weeds and Turf has a 16-page reprint, “Applicator’s Manual of Aquatic Weed Control,” ($1) which should be helpful.—Ed.

W&T Article Well Received

After publication of my article on roadside spraying in W&T for July (p. 8), I had a number of messages and telephone calls which indicate: first, that your magazine is being read by a great many people; and, second, that a number of people were glad to have someone express a positive opinion on our responsibility to the public when applying roadside sprays.

Fred A. Ashbaugh
Supervisor of Forestry
West Penn Power Company
Greensburg, Pa.

Westerners Eye National Assn.

I believe there exists a definite need for a horticultural spraymen’s association on a national scale and I would gladly help to organize such a group. We must face a few hard facts however:

1. Such an association must be progressive in action as well as in thought;
2. An organizational meeting should be held at a location and time mutually arranged by those concerned;
3. All sections of the spray industry should be represented;
4. For the good of the industry’s future, this association must promote its interests and otherwise operate on the highest ethical plane.

Robert B. Cockburn
President Northwest Chemical Applicators Assn.

Everett, Washington 98202

Needs Complete Weed Book

I am a golf course greenskeeper-trainee trying to learn all I can in order to be good. I’m especially interested in weeds. I would like to be able to identify all the weeds I run across on the fairway. I may know almost all of them already.

I wonder if you have any kind of complete book showing all the weeds with their pictures for identification, and if so, if this book is for sale.

Your Weeds and Turf magazine is the best I ever saw.

Carl J. Foster
Baltimore, Md.

We do not have a complete book of weeds like the one reader Foster requests, although we publish each month our weed identification box. Other than that, one of the best suggestions we have is a book called Weeds of the North Central States, published by the University of Illinois Agricultural Experiment Station. While it is a regional publication, most of the weeds discussed thrive in wide-spread areas throughout the US. It’s available for $1 from the Station in Urbana. If readers have other suggestions for Mr. Foster, we’d be happy to pass them along in this column, should we receive any such letters.

Ed.

WT: Don’t Forget the Newcomer!

We would like to see more articles directed toward the newcomers to the business. I tend to get the impression from some of your articles that everyone is an expert and that they all started out that way. All companies dealing in weed control are not large firms. Not griping, just passing along my views.

Robert R. Shaw
Oklahoma City, Okla.

We try to achieve a balance in articles directed towards the “neophyte” and articles for the “old pro,” and have published many basic articles meant as background. However we welcome these comments and will pay close attention to articles like the ones reader Shaw desires. Ed.

WEEDS AND TURF, October, 1964
How to Live with Legislation

By N. Curtis Peterson, Jr.

In these days of increasing attention to pesticides, personnel concerned with protecting turf and trees, and with eliminating weeds and brush, find it necessary to live with an ever-growing number of laws, some good, some bad. This article tells how to achieve more balanced legislation, how to lobby effectively, how to prevent passage of some laws and how to introduce favorable ones, and how to use existing trade groups for legal benefit. Peterson's views are particularly timely now that spraymen are considering a national organization to help them achieve uniform and fair industry laws.

Agri-business is Florida's largest industry—exceeding the two-billion-dollar tourist trade by more than a billion dollars annually. Horticultural specialties make up a large segment of the agri-business; over $330 million of Florida's yearly income is from this source. And Florida is not alone; all over the country, horticulture's hand can be felt on the economy. Its voice should be heard in favor of fair and equitable treatment when the general good of the vegetation maintenance and control industry is at stake.

The experiences in legislation we horticulturists have had spotlight several important points which should be considered by anyone faced with a legislative problem. Our work has been primarily with state government, but the basic principles apply at any legislative level.

Sometime ago, for example, our organization, the Florida Nurserymen and Growers Association, promoted a bill which we hoped would be added to the Florida statutes. Our efforts brought us in close contact with legislators and their ways. At no time did we pressure, demand, or coerce the lawmakers. All we asked was for them to examine the circumstances to see if our proposal was good for all concerned and especially good for the public interest. This is very important, for if you ask for special consideration at the expense of others, you become a "special interest" group. But, if you tie your needs to those of an expanding economy and rapid growth of the state, and if you can show that your plans will benefit the general public, then your needs can be justified.

When Is Legislation Needed?

Agri-businessmen are not only citizens deserving consideration; they are also members of an industry that provides much that is beneficial to the general public. With these facts in mind, the man who seeks to propose legislation has some criteria on which to base his demands. Certain other essentials also support proposed legislation.

Weeds and Turf, October, 1964
