Leading sod farmers are using Eversman Automatic Land Levelers to make smooth, uniform seedbeds. Also for golf courses, cemeteries, landscape architects.

Eversman Smoothers combine in one machine a field plane, open bottom scraper and a complete tillage tool for superior seedbed preparation. Smooth, level fields make possible even seeding, uniform germination with uniform turf maturity and faster, precision harvesting on fields that are easy on equipment.

The exclusive EVERSMAN Crank Axle.

The secret of the success of Eversman Land Levelers is the exclusive crank axle design. This principle is as simple as a child's teeter-totter. When one end goes up—the other goes down.

The leveler's main wheels are placed outside the cutting blade for a specific reason. These wheels serve as feeler gauges. They follow the contour of the field and automatically adjust the cutting blade to the correct depth—Independently of the tractor driver.

When these gauge wheels come to a high spot or ridge, they ride up on top of the ridge and this forces the blade to lower and cut through the ridge. The soil is then carried along by the blade until the gauge wheels go into a hole or depression in the field, which forces the blade to raise and fill the depression.

Eversman offers land smoothers in sizes and price ranges to accommodate your size operation and your regular wheel tractors, from 3-plow to 5-plow models. (Blade widths 9' or 12', lengths of 32' or 45') Write for folder which gives complete information.

Eversman Manufacturing Company, Dept. S21, Curtis & Fifth Streets, Denver, Colorado 80204

Users Tell The Story

"We have been using Eversman levelers for over fifteen years," writes Dale Habenicht of H & E Sod Nursery, Inc., Tinley Park, Illinois. "Several other types were tried, but we've always found the Eversman to be the most satisfactory. They give us the smooth surface we are looking for—with easy maneuverability.

"The H & E Sod Nursery operates three farms consisting of 1300 acres. I commute between farms with my Cherokee 180 and use the sod fields that have been leveled by the Eversman for landing strips."

"We could not properly prepare our seedbeds without the Eversmann Leveler," writes Parker Sherling, Manager of Princeton Turf Farms, Inc., Centreville, Maryland.

"In preparing our fields," Parker Sherling continues, "we instruct our operators that a field is not ready until a car can be driven in any direction at 40 miles per hour over the field. It's a joke, but we actually bring our fields to this condition.

"Our operators have also developed the skill where we can shape our drainage ditches with the same machines, thus saving the rental of additional equipment."

in 13 locations in Florida last August. He said that the insects have successfully completed their life cycle on water hyacinth and careful examination of the leaves has revealed eggs and developing larvae produced by this generation.

Dr. Robert W. Geiger, 3M Company spoke on a new algicide for filamentous algae and chara. He said that promising results from early tests indicate effective control of these problem weeds.

New officers of SWSS for 1973 are: Dr. Allen F. Wiese, Texas A&M University, USDA Southwestern Great Plains Research Center, Bushland, Texas, president; Dr. William G. Westmoreland, Ciba-Geigy Corporation, president-elect.

**Turfgrass Weed Control Studied In NE Universities**

New compounds and techniques of weed control in turfgrass continue to be major areas of study in many northeastern universities.

The evaluation of pre-emergence crabgrass herbicides goes on in an effort to discover effective materials which may be used more safely on a wider range of turfgrass species. The flexibility in time of application is also an important consideration.

In post-emergence applications made by John A. Jagschitz, assistant professor plant and soil science dept., University of Rhode Island, new compounds which can control the grass-like weed nutseed are also being evaluated.

Chemicals which prevent seed head formation are also under test. This work is being done by T. L. Watschke, J. M. Duich and D. V. Waddington of the department of agronomy, Pennsylvania State University, University Park, Pa. These chemicals will prevent the spread of weeds which must reproduce by seed. Lawn grasses are perennial in nature and reproduce by the formation of underground or above-ground stems which produce new plants. Lawn grasses need not ever go to seed as must annual broadleaf and grassy weeds.

This is another method of plant population control without the immediate elimination of the weedy plant pest. It is a program approach and may someday supply another useful tool to the turf grower.

**Hale Pump Line Expanded**

To meet the growing demand for increased volume and pressure ranges in irrigation pump requirements, Hale Pumps, Conshohocken, Pa., has recently broadened its lines of irrigation pumps. This expansion includes important additions to its PTO and skid and trailer lines.

In the PTO group, Hale now has a full range of pumps to match the power of every tractor size — from 15 hp to 150 hp. These pumps are designed to meet any irrigation volume requirement — from 200 gpm to 2000 gpm at operating pressures from 150 psi through 200 psi.

Where large irrigation demands are a factor, the manufacturer now provides a complete line of skid and trailer mounted pumps capable of supplying volume needs from 550 gpm to 2700 gpm at pressures from 140 psi to 100 psi.
Agrico puts you eighteen up on the competition, before the competition even begins. Agrico Country Club fertilizers will help you get the most out of your golf course... the most people, the most wear, the most green. We've spent a lot of time developing a custom-tailored program for your golf course. We sincerely believe that it's the best there is. If you want a greener, thicker golf course, use Agrico. And you can stay eighteen up all year long. Agrico Country Club fertilizers will help you get the most out of your golf course... the most people, the most wear, the most green. FINALLY! AT LAST! IT'S HAPPENED!
Lumenite, with 35 years experience in the timing control and liquid sensing
fields, offers a truly economical, deluxe, line of lawn irrigation controls.

GREATEST SPECTACLE
(from page 38)

He also suggested strongly that
employees be subjected to hearing
tests.

In the area of administrative con-
trol of noise, he offered these sug-
gestions: 1. Don't operate equipment
too near the edge of a course too
early in the morning. It distracts
adjacent landowners. 2. Don't use
two pieces of high noise emitting
equipment together. 3. Trees, bushes
and other vegetation act as a noise
barrier. 4. Keep equipment in good
repair.

James L. Holmes, the Green
Makers, Bryan, Texas expressed his
views as a builder in changes affect-
ing green construction. Noting that
greens have been built quite far into
the south which support excellent
bentgrass turf, he said the key to a
properly constructed green is in
adequate infiltration, percolation,
water retention and drainage.

Dr. R. E. Engel, professor, soils
and crops department, Rutgers Uni-
versity spoke on “the effect of nitro-
gen fertilization on annual bluegrass
encroachment in bentgrass. He feels
the management practices of super-
intendents in relation to nitrogen use
are in part responsible for the en-
croachment of annual bluegrass. He
said that it has been shown that
high rates of N often result in more
annual bluegrass.

“Experience gained from research
trials has taught us one lesson on N
fertilization of bentgrass turf,” he
remarked. “Namely, avoid any type
of high N treatment that is likely to
cause massive turf failure and open
the turf to increased encroachment
of annual bluegrass.

He offered these suggestions to
superintendents: 1. Use no more N
than necessary for satisfactory
growth. 2. Slow, steady growth is
best. This is best done with small
and more frequent applications.
Amount of clippings in optimum cool
weather and color are good indica-
tors of N need. 3. Establishment or
re-establishment are the only place
for more generous N programs on
bentgrass.

Changes in automatic irrigation
concepts from the manufacturer's
point of view was the title of the
presentation by Ed Shoemaker, na-
tional sales manager, Rain Bird
Manufacturing Corporation.

"As a marketing organization," he
said, "We see ourselves helping you
stay out of the traps and pitfalls in
a major undertaking such as the con-
struction of an automatic irrigation

avoided with the system has the

It Blows... It Dusts... and It Sprays... Better! Because It's a STIHL!

This is the STIHL SG-17 Mist-Blower that Everyone is Talking About!

It blows, dusts and sprays dry and liquid chemicals, etc. to kill weeds and insects; to fight plant and tree diseases and to perform many related jobs in the garden, on the farm and in nurseries. It has also proven very versatile for spraying at construction jobs, blowing leaves and debris in sport stadiums, parks and recreation areas, in spraying cattle and dairy buildings and many new uses are being discovered every day.

You'll be amazed at its perfect balance and ease of handling and also at its very, very easy price. See for yourself. It's a STIHL!

**meeting dates**

Turfgrass Conference, North Carolina State University, Faculty Club, March 13-14.

National Conservation Tillage Conference, sponsored by the Soil Conservation Society of America, the American Society of Agronomy, the American Society of Agricultural Engineers and the National Association of Conservation Districts, Hotel Fort Des Moines, Des Moines, Ia., March 28-30.

Arizona Turfgrass Conference, Plaza International Hotel, Tucson, Ariz., April 4-5.

Atlantic Provinces Turfgrass Conference and Exposition, Halifax, N.S., Canada, April 9-10.

Annual Spring Institute (Horticulture), sponsored by the University of California agricultural extension and the Southern California Turfgrass Council, Quality Inn, 616 Convention Way, Anaheim, Calif., April 18-19.

Florida Turf-Grass Trade Show and Turf Management Clinics, Curtis Hixon Convention Hall and Manger Motor Inn, Tampa, Fla., April 29-May 2.

Pacific Seedsmen's Association, annual meeting, SS Queen Mary, Long Beach, Calif., April 29-May 2.

Florida Nurserymen and Growers Association, The Breakers Hotel, Palm Beach, Fla., May 17-19.

Western Chapter, International Shade Tree Conference, annual meeting, Hotel Utah, Salt Lake City, Utah, June 17-20.

American Association of Nurserymen, Radisson Hotel, Minneapolis, Minn., July 14-18.

American Sod Producers Association, annual meeting, Denver, Colo., July 16-19.

Industrial Weed Control Conference, 8th annual, Texas A&M University, College Station, Tex., Oct. 15-17.

These are only seven of the turf and ornamental pests Dursban controls. If we had more space, we could show you another seven. Like sod webworms, brown dog ticks, earwigs and Hyperodes weevils in turf. Or ornamental plant pests like mites, spittlebugs, exposed thrips, white flies and many more. But our point is, DURSBAN* insecticide is the choice of professional lawn spraymen when they need to get the job done. DURSBAN insecticide is effective on a wide variety of insects—including resistant strains. And it’s effective in a wide variety of applications. It’s economical because a little goes a long way. It’s non-phytotoxic, and it is biodegradable. So, if you haven’t tried it yet, it’s about time you did. Just remember to read the directions for use and follow the precautions for safe handling on the product label.

DOW CHEMICAL U.S.A.
Clean ground under ball park bleachers is treated with Hyvar X. Area is easier to keep clean and tidy when weeds and grass are eliminated. A single treatment lasts a season.

HALT WEED ASSAULT (from page 14)

had been eliminated entirely at Fort Dix.

"Now we're able to maintain vegetation control under fences and around other obstacles such as sign posts and fire hydrants. So we can use tractor-driven gang mowers exclusively," says Haug. "Without these herbicides we would need at least two more men for mowing fence lines alone."

Haug relies on two basic chemical recipes to keep weeds in check. Areas near trees or high-value ornamental plantings are treated with a mixture of Simazine weed killer plus a con-

Dacthal drives
20 annual weeds off the course
with one easy swing.

One application early in the spring. That's all it takes. Dacthal preemergence herbicide prevents 20 annual weeds from sprouting all season long. Problem weeds like carpetweed, chickweed, purslane and others. So you can devote time and manpower to more important work.

Dacthal doesn't stop there. It also drives out troublesome crabgrass and Poa annua. Hit 'em in the spring. And follow through with Dacthal in late summer for control of Poa annua and other late-germinating weeds.

Over the years, Dacthal has proven to be the closest thing to worry-free weed control. It won't harm new grass when used as directed. Won't leach out with frequent waterings. And there's no problem of residue buildup in the soil.

Dacthal degrades, naturally, in one season. Just read and follow label directions. You can even use Dacthal to keep the weeds out of flowers and shrubs. It's cleared for use on over 120 ornamentals. That's one more beauty of it.

This year, drive out weeds with Dacthal...the all-around favorite preemergence herbicide. Available in wettable powder or granules. Ask your supplier for more information or write: Agricultural Chemicals Division, Diamond Shamrock Chemical Company, 1100 Superior Avenue, Cleveland OH 44114.

And just what is a mowing tractor?  
A good one is squat and compact, clings to slopes without slipping. It’s nimble. Brakes, turns on its own axis and steers like a sports car.

It’s geared for every speed from creep-mowing next to fences and obstacles up to nearly 20 mph highway transport. It’s versatile — works with a rotary mower, ganged reels, or flail in the rear, and at the same time can handle a cutterbar with its side PTO.

And because grass just won’t wait, it’s built with the power and strength to get big mowing done in a hurry. Without breakdowns. With a minimum of maintenance.

That’s a mowing tractor.
That’s our 46 hp 2400A Lo-Boy.

Your International dealer has all the exact specs, including 9 ft. turning radius; hydrostatic power steering; 8-4 synchromesh shift-on-the-go transmission with Hi-Lo range and straight-line shifting; independent rear PTO, side shaft optional; big 11-inch Dyna-Life® clutch; wet disc hydraulic brakes — a package no other mowing tractor on the market can match.

Phone your dealer soon and let him prove it on your own turf.

We keep getting better at our business to get more of your business.
And keep it.

INTERNATIONAL HARVESTER
