

Dedoes

the Aerating Pro

The Dedoes round pivoting tines enter straight in the turf and come out straight, leaving your green in a playable condition. ONE MAN CAN AERATE A 5000 SQUARE FOOT GREEN IN LESS THAN 15 MINUTES, with the plugs collected inside the drum! Saves costly clean-up.

HINGED TINE PRINCIPLE

TCA 50I THREE DRUM SUPREME

The Dedoes aerator mounts quickly to most any vehicle. With 180 tines, this model gives you a 42" swath. Backwards or forwards you have complete mobility.

Fast, positive hydraulic action.

The hydraulic principle utilizes the weight of the vehicle for down-pressure giving you needed hole depth.

Designed and ruggedly built to cut maintenance costs.

TCA-550 TWO DRUM

This model available with 240 tines on close to 2" centers - gives you a 25" swath.

POINTED TINES

Dedoes now has a pointed tine available for tees and greens which gives up to 3" penetration in the turf. Three sized tines from which to choose; 3/8", 1/2", and 3/4".

Our economy model TCA-450 costs 20% less than the regular models - has 120 tines on 2 drums.

DERBY

Turf-Type Perennial Ryegrass

Setting a New Standard of Excellence

Derby is the dark green beauty which joined Manhattan and Pennfine on the "highly preferred list of ryegrasses." That was last year. Now Derby is setting a new standard of excellence.

In the eyes of many Golf Superintendents it reigns supreme among the turf-type ryegrasses today. Why? Because it performs! And a Superintendent knows that claims are great, but performance counts.

- Consistently performs better than other leading varieties from California to Florida
- Durable, dark green and has excellent mowing qualities
- Tolerates a variety of soils & responds rapidly to fertilization
- Germinates in a week (or even less) under ideal conditions
- Better-than-average heat and drought tolerance
- An adaptable and disease resistant cool-season turf grass
- An excellent record as a Southern winter grass
- Thrives when close-cut

FOR THE PROFESSIONAL FANNO PRUNING & TREE SURGERY SAWS

No. 1 This saw was designed for the commercial pruner. It can be folded and carried in your pocket. It comes with 6 pts. per inch, with 10 1/2" cutting edge.

No. 8 This is a push cut saw designed for pruning and general tree surgery work. Made of 18 gauge steel with 22 1/2" cutting edge, the No. 8 is widely used by professional tree surgeons.

No. 20 This is a pull cut pruning saw designed for close work in trees. The curved blade plus the self feeding and self cleaning design, makes this an efficient cutting tool in any position.

VERMEER...

Transplanting Trees? Removing Stumps? Installing Underground Service Lines? Cutting Tree Roots Under Sidewalks? Splitting Firewood? Vermeer Cuts Your Costs . . . In Equipment . . . In Labor . . . In Minutes!

Vermeer Tree Spades. Patented tree-moving/tree-packaging machines that automatically dig, ball, transport and replant shrubs and trees up to 25 ft. in height. Tractor-mounted, trailer-mounted, or truck-mounted units—plus complete multi-purpose landscaping machines that handle a tremendous assortment of dirt-handling functions in addition to transplanting trees.

Vermeer Trenchers. Multi-purpose underground machines with a wide variety of money-saving dirt-handling attachments. On tracks or rubber tires. With power ranges from 18 to 195 hp. With digging capacities of 4-36 in. wide, down to 12 ft. deep. Vermeer Vibratory Plows, for installing cable directly underground without damaging finished surfaces or landscapes.

TOUCHDOWN

Kentucky bluegrass

PLANT VARIETY
PROTECTION CERTIFICATE
No. 7400066

SOD GROWERS KNOW WHAT THEY WANT.

Fast start! Tough turf! Disease resistance!

That's why more and more growers are specifying
**TOUCHDOWN KENTUCKY
BLUEGRASS.**

Fast starting Touchdown soon shows its color — germinating quickly and rapidly developing into mature, healthy plants. Early cover means fewer washouts or blowouts. Touchdown puts its growth where you want it — into rhizomes and roots — not all vertical leaf and stem.

Touchdown's benefits don't end there. It quickly produces a saleable quality turf. Turf with less waste and loss. Turf that's readily adaptable to modern, automated harvesting equipment.

QUALITY CERTIFIED SEED AVAILABLE — Summer '78

Produced and distributed by

WHAT?

What do our customers think of their Brouwer Sod Harvesters?

- "With only one of your harvesters and more orders than ever to fill, it has been necessary to operate the machine 24 hours a day for several months now. We have had trouble free operations with no breakdowns and find this absolutely amazing."

Brian Bouchard, Kingston Turf Farms, Kingston, Rhode Island.

- "I just want to tell you how pleased we are with our Brouwer Sod Harvester. Frankly, it's everything you said it would be, and possibly even more. It performs very efficiently, and we've been giving it a good workout. We really appreciate the simplicity of its design, with its minimum of working parts — and we like particularly the standardization of parts, making it so easy for us to keep this great machine operating."

Lester Woods, President, Willinger's Turf, Phoenix, Arizona.

- "Just to let you know that we feel very fortunate that we purchased a Brouwer Sod Harvester. It has really been a great help to us, as we have had some very large orders. I don't know what we would have done without it. It has been working perfectly."

Dan Gibson, D. G. Turf Farm, Boise, Idaho

Protect your investment in young trees with new **GUARD-TEX** self-adhering tree-wrap

Field-tested, weather-proven GUARD-TEX® tape provides needed protection against splitting, sun scald, and freezing temperatures. Distinctive odor repels rodents and other gnawing or nibbling animals.

Easy-on, Easy-off GUARD-TEX® sticks only to itself, removes easily without leaving gummy residue.

Versatile GUARD-TEX® can be used for grafting and many nursery uses, including those shown below.

staking
tomato plants

training
climbing roses

espaliering
trees and shrubs
