

In a tight economy, it's right to insist on fertilizer that lasts longer and works harder. That's why Nitroform<sup>®</sup> slow-release nitrogen is right on the money for your turf budget.

The 38% nitrogen is released slowly and steadily to stretch time between applications. Nonleaching, it stays to feed. Non-burning, Nitroform can be applied with ease by any member of the crew.

Use Nitroform and give your members a golf course with lasting beauty. Use Nitroform and keep you and your crew looking good between applications.

You and your club members work hard for your money. Let Nitroform work hard and long for you. Order it today.

Choose Blue Chip<sup>®</sup> for spreading, or Powder Blue<sup>™</sup> for liquid application.

# WHEN MONEY'S TIGHT, NITROFORM<sup>®</sup> IS RIGHT.

HELP WANTED from page 90

**REGIONAL LANDSCAPE MANAGER** for national company to operate throughout Florida. Can be headquartered in Ft. Lauderdale area. Experience requirements: history of management of large community landscape facilities; degree in ornamental horticulture or horticul-

tural management and/or equivalent education or on-job training; experience in creating maintenance procedures and schedules; experience in teaching and dealing with landscape crews; history of operating on independent basis and developing realistic schedules for independent action. Salary open. Please call Mr. Carpenter (305) 972-8530.

## PROTECT NEWLY SEEDED AREAS FROM WIND AND WATER EROSION WITH TERRA TACK

Terra Tack used in any hydrograsser or hydroseeder provides erosion control for newly seeded areas or any other soil surface needing erosion protection. Terra Tack after application forms a water insoluble gelatinous crust, locking the seed and mulch to the soil. This invisible crust is, however, porous enough to permit moderate rainfall or irrigation water to soak into the soil, while excessive water runs off. Terra Tack also reduces soil moisture evaporation. When added in the same tank along with a slurry of water, seed, mulch, fertilizer or other compatible soil amendments, Terra Tack, in most cases, eliminates the need for two applications, separate equipment and extra manpower.

### Versatile Terra Tack can be used with straw, hay or wood fiber mulch.

#### Straw or Hay Mulch

Terra Tack when applied as a direct spray to straw or hay mulch helps prevent wind and/or water displacement of the mulch and seed.

#### Wood Fiber Mulch

Terra Tack when combined with fiber mulch, seed and water acts as a complete binder helping to lock the protective mulch blanket to the soil.

**Grass Growers**

424 Cottage Place, Plainfield, NJ 07060

**AGRICULTURALIST, HORTICULTURALIST/AGRONOMIST.** Excellent opportunity to assume broad scope responsibilities for a major chemical lawn care company. # How Roundup® helped Jim Siegfried renovate this fairway in days, without closing it for one minute.

Take a good look at this good-looking fairway.

Last fall, Jim Siegfried found a way to clean it up, without tearing it up—at the height of his club's busy season. With Roundup® herbicide by Monsanto.

Jim is the Greens Superintendent at Losantiville Country Club, Cincinnati, where bermudagrass had become a serious problem on the 18th fairway. To control it, Jim applied Roundup once—while the weeds were still actively growing—right at the start of the Labor Day weekend.

"That's really 'prime time' here," Jim told us. "But after we applied Roundup, we kept the fairway in play the whole weekend, and after. The members played right over it, with no problem."

Since Roundup has no residual soil activity, and won't wash or leach out of treated areas to injure desirable plants, Jim simply took normal precautions against spray drift—and didn't worry about damaging desirable vegetation along the fairway.

Even better, he was able to re-seed right into the dying bermudagrass only 7 days after applying Roundup—without loss of playing time or inconvenience to the membership.

Reinfestation won't be a big problem for Jim, either. He knows that Roundup destroyed the rhizomes of the treated weeds, helping prevent their regrowth.

Jim thinks he'll use Roundup again this year—and apparently some club members hope so, too. "As soon as they saw how good this fairway looks, some of the members started asking when I'm going to do the same for #10, where we have some more bermuda. I'll probably tackle that with Roundup this fall."

*If controlling many tough emerged weeds and grasses is a problem for you, see your local Monsanto representative or chemical dealer soon for your supply of Roundup.*

*Roundup. It worked for Jim Siegfried. It can work for you.*

**There's never been a herbicide like this before.**

Proven over 15 years

## A better way to remove sand from water.

The Old hydrocyclone (left) did a good job. But our separator (at right) is better. No high speed abrasion. No plugging the apex. No screens or filter elements to clean or replace.

No downtime or routine maintenance. No continuous loss of water and no high pressure losses.

It's simply a better way to protect irrigation equipment and pumps from sand and grit by removing up to 98% of all particles as small as 325 mesh. There's nothing else quite like it.

## deserves a new name all its own.

It just seemed the easiest way to make sure you won't confuse us with anyone else. So now it's Lakos Separators instead of Laval Separators. Same people . . . same dependable equipment . . . new name. Through four generations, 39 patents and spanning over 100 years, the Laval family name is still one you can trust . . . now in sand separation with Lakos Separators. Free literature and the name of your nearest distributor are yours for the asking.

# Professional tree care isn't simple any more that's why Mauget holds Tree Injection Seminars

Let's face it. The more you know about tree care, the better the professional job you can do for your customers. Mauget tree injection seminars tackle the tough problems faced in your business.

Seminars provide a constant updating of new information to keep your business progressively up to date. Topics include: new product

registrations, a new slide-talk on injection techniques, EPA experimental labels, results of current research, training in the use of INJECT-A-CIDE® B for systemic insect control, business management, local advertising, and other problem areas.

Don't wait. This once a year business opportunity is well worth the time.

*Plan Now To Attend. Each tree care firm who purchased Mauget capsules in 1978 will receive one free registration. Choose the location nearest you. Seminars begin at 9:00 a.m. Open to all arborists, city foresters, tree care firms, landscape contractors, golf superintendents, and grounds managers. Mauget Tree Injection products are field and university proven.*

## Don't Let Contamination Eat Up Turfgrass Profits.

Five Ways to help increase profits with  
Hendrix & Dail Custom Solid Tarp Fumigation.

**First, it's faster.** Our experience and our equipment help us to fumigate your land as much as five days faster than other fumigation methods.

**Second, it's more effective** because the solid tarp traps fumigants. They sink in and decrease chances of recontamination.

**Third, it can kill seeds** as well as insects, nematodes, and diseases. Fall fumigation can kill hard-to-kill seeds like henbit, buttonweed, and filaree.

**Fourth, special problems are no problem.** We're experts in soil fumigation. That's our only business. Let us tackle your hard-to-solve problems.

**Fifth, you can do it yourself.** We'll rent you the equipment you need. Or we'll fumigate for you.

**Hendrix & Dail**  
The soil fumigation specialists.

## WE RECOMMEND LESCOSAN

**In two seasons, we reduced the crabgrass population from 90%-plus to less than 10%. And this is on big lawns of almost an acre. Lescosan is the mainstay of our crabgrass control program.**

—JOHN R. LINKHART  
Perf-A-Lawn Vice-President (Sales)

As John R. Linkhart knows, Lescosan is the answer to pre-emergence crabgrass control. The undeniable proof exists in every application.

"Nashville is the premier area for crabgrass. And Lescosan is the main-stay of our crabgrass control program. It works better on crabgrass and foxtail than any other product."

The Perf-A-Lawn professional chemical lawn maintenance company specializes in liquid spray applications and they're building more than turf. They're building a reputation.

"Since we are constantly expanding our franchise

market, we must be sure a product works. So we recommend Lescosan to our franchisees."

Lescosan (Betasan\*), available in 4E emulsion or 12.5 granules, provides full-season effectiveness on all grasses, as well as on a number of ornamentals and ground covers. When Perf-A-Lawn buys Lescosan from Lakeshore, they buy from the formulator. And for Perf-A-Lawn, that means quality and savings!

If quality, savings and performance are selling Lescosan to you, take advantage of our toll-free information service and call Barb

today. Those east of the Mississippi can reach her by dialing 1-800-321-5951. (In Ohio, dial 1-800-362-7413.) If you're west of the Mississippi, call Barb collect at 216-323-7544.

She'll have our representative contact you so you'll know why Perf-A-Lawn recommends Lescosan and how our other fine LESCO Products (including LESCO 36 Sulfur Coated Urea) are selling themselves every day!

Our LESCO Quality Products and Friendly Service are always as close as your phone.

\*(Betasan—Registered TM of Stauffer Chemical Company.)

**HYDROGRASSING  
& POWER  
MULCHING  
EQUIPMENT**

**HG-15  
Hydrograsser**

Power, Precision, Performance. The HG-15 is ideal for applying fiber mulch, seed and fertilizer in one operation. Covers as much as three acres per load of granular solids in 12 to 20 minutes. Reinco's jet agitation system insures against clogging. Less down time for maintenance. HG-15... the profit producer.

**M-80C  
Trailer Mounted  
Power Mulcher**

Higher production. Lower maintenance. Heavy-duty M-80C handles a quarter of a million pounds of hay per day. Accurate distribution up to 95 feet. Equipped with straight through drive, M-80C has more power, needs less maintenance.

**TM7-30(X)  
Trailer Mounted  
Power Mulcher**

The TM7-30 (X) spreads 4 tons of hay per hour. Blows hay mulch up to 60 feet. TM7-30 (X) is also equipped with straight through drive. Discharge spout moves 360° horizontally, 60° vertically. Trailer mount permits on-site mobility, eliminates truck tie-up.

# PENNCROSS makes a POINT

## Penncross costs less, seed for seed, than Annual Ryegrass.

### Points on Penncross

1. **Penncross Creeping Bentgrass** required years of selecting and crossbreeding to develop. This unique grass is especially designed for the demands of golf courses.
2. **Penncross** is grown under a strict certification program by elite seed growers in Oregon's Willamette Valley, where the highest quality seed is produced.
3. **Penncross** is a true polycross

hybrid bentgrass developed for superior turf and greater disease resistance.

**But, did you know, Penncross costs less, seed for seed, than annual ryegrass?** For example, if you purchased a pound of annual ryegrass (approximately 200,000 seeds) for 30 cents, you would have to pay \$12 for as many ryegrass seeds as you would receive in one pound of **Penncross** (approximately 8,000,000 seeds).
