NO ONE MAKES RAIN SO MANY WAYS.

RAIN BIRD
Simply Better
Most times the best player on the course is the one who makes all the shots. Long and short. Around trees. Through narrow openings. In all kinds of conditions.

That's just the kind of trencher the Case 25+4 is. A total player. With the compact D70 backhoe, a fully hydraulic backfill blade, and trenching capability to 66" (1676 mm) deep, the 25+4 can handle the toughest hole on your course. Whether it's for installation of sprinkler systems. Drainage work. Tree planting. Or just about anything.

At 23 hp (17 kW) it gives you a perfect balance of power and economy. It's articulated and has 4-wheel hydrostatic drive. So it'll probably never get trapped someplace you don't want it. And it won't tear up the turf getting to and from jobs.

The 25+4 is easy to operate and service. New amateurs quickly learn how to use it. And old pros just love it.

The Case 25+4. The ideal trencher for golf course maintenance. The compact trencher with a whole bagful of tricks.

Cover: Morikami Museum and Japanese Garden is a high maintenance feature of Palm Beach County's park system.

You'll like this new, fine-textured variety with higher density than most of the currently available tall fescues. Falcon is a leafy, moderately low growing turf-type variety with pleasing green color and tolerance to heat and drought. It's a good performer under minimum maintenance programs, too. Throughout its area of adaptation, mature stands of Falcon have shown tolerance to wear and moderate shade which makes it useful for home lawns and play areas such as athletic fields and parks.

Golf Business joins WTT

Golf Business magazine is now a part of Weeds Trees & Turf. As one of the three top landscape markets, golf course management in many ways is the leader in technology, research and product development. We will continue to bring the latest word on golf to you.

I was a fledgling assistant editor when Harvest Publishing Company bought Golfdom in 1974. Bob Earley, publisher of Lawn Care Industry, joined us to work on Golfdom when we purchased it from Times Mirror. At that time, the magazine was already having problems and we tried for eight years to keep it breathing. The Golf Course Superintendents Association of America publication was stiff competition and as the market matured the viability of a privately published magazine to the golf turf market diminished.

It was not for a lack of effort or interest that Golf Business failed the profit test. Many of us worked extra hours to make it succeed, especially Jim Brooks who is now sales manager of Weeds Trees & Turf. That interest still exists but in Weeds Trees & Turf. A third of WTT will be devoted to golf from now on.

At the same time, we are honing in on better editorial coverage of the landscape and public sectors, such as schools, parks, and athletic field managers. Many pleasant surprises are on their way.

This month we welcome Bill Hoffman as our Washington correspondent. Bill recently retired from the Environmental Protection Agency after 34 years of service in the government. He knows the people and the way government works. His expertise will provide an early warning system for you in regard to pending regulations and registrations. We’ve witnessed a number of new channels, mainly state local need registrations. Bill will follow products and regulations from the early stages of development to announcement.

We invite your questions on Federal regulations. Bill can get answers quickly and accurately. Bill’s expertise is now a service to you from Weeds Trees & Turf. Please don’t hesitate to use him for answers to your regulatory problems.

Finally, we have some new blood in New York. Tom Paciello has joined the magazine as associate editor. He is very New York, very Italian, and very energetic. Part of his job will be to travel to all parts of the country interviewing readers about their businesses, problems, needs, and successes. He is also a good photographer and well educated. Please welcome him when he calls you. You’ll warm to his personality.

These are just part of the improvements planned for the magazine in the coming months. This magazine is going to be responsive to your needs. It is here to serve you, please use it. Write me at 757 Third Ave., New York, NY 10017. You’ll get results!
1. NEW BROUWER “2000” HARVESTER
All the features of the Brouwer Harvesters PLUS
- Automatic Steering guaranteed to cut exact width of sod for landscaper, with no loss of sod strips in the field.
- Automatic Pallet Injector to eliminate back breaking manual work.
- Controlled Pallet Level
- 4-Wall Piling Cavity ensures a square pallet at all times
- New Cutter Head
- Easy Stacking—1 or 2 men
- Higher Yield per hour

2. BROUWER ECONOMY HARVESTER
- Operate off uncut turf
- A more uniform cut
- Less down time
- Less top soil removal
- Available in 15, 16, 18 and 24 inch widths and choice of pallet sizes
- Cut, Roll, Slab or Fold 24 hours a day, wet or dry weather, all sod, all conditions.

Top Turf men around the world use Brouwer Harvesters to assure top profit.

3. NEW BROUWER GRASS COLLECTOR
CHECK OUT THE COMPLETE LINE OF TURF EQUIPMENT A PROVEN SUCCESS.

NEW
- Operates off Tractor PTO Drive
- 4 wheel flotation
- Pick-up width 12 ft.
- Simple easy-to-clear side unloader
- Enhances sod quality
- Collect grass clippings for cattle feed

Circle No. 106 on Reader Inquiry Card
Fire postpones move to new ASLA offices

Within two weeks of the scheduled move date, a renovated brownstone which is to be the future offices of the American Society of Landscape Architects in Washington, D.C., was damaged by fire.

The association has been carefully renovating the building to preserve woodwork, old brick, and wide staircases. Change of address notices had been mailed and the association staff was ready to move.

Fortunately, executive director Ed Able secured temporary office space in the existing building in downtown Washington until repairs could be made. Seven months is the hoped for short delay until the move to the building located at 1733 Connecticut Ave. Able hopes to have his staff in the building by December.

ASLA hopes to have the building back in shape for viewing by members during its annual meeting in Washington Nov. 22-25. More than $145,000 of a $400,000 goal for building fund pledges has been received.

"Nearly all the building will have to be reconstructed," said Able. "About 90 percent of the lobby woodwork will have to be replaced from the first floor down, and will match the existing woodwork above the first floor. Design-wise, the building will be the same."

Editor, training director leave GCSAA staff

Dick Hale, editor of Golf Course Management, and Palmer Maples, training director for the Golf Course Superintendents Association of America, have left the association. The departures were not related according to Larry Goldsmith, manager-informational services.

Zahid Ikbal, a former member of the Kansas City Star staff and instructor at Kansas University, is the new editor. No major changes in the magazine's content or direction are expected.

An announcement is expected soon on Palmers Maples' replacement. Maples was acting executive director of the association after Conrad Sheetz left and before James McLoughlin took over. The director of training controls perhaps the largest training program for golf course superintendents in the country.

Golf course superintendents presidents

Golf Course Management will have a new editor soon. Dick Hale, the editor since 1979, has resigned to pursue other projects. Hale's last issue will be the November issue.

Palmer Maples, the training director, also resigned. He is stepping down to pursue other opportunities in the golf business.

Zahid Ikbal, a former member of the Kansas City Star staff and instructor at Kansas University, is the new editor. His first issue will be the November issue.

Zahid Ikbal, the new editor of Golf Course Management, is a newcomer to the magazine. He was a member of the Kansas City Star staff and an instructor at Kansas University. He is replacing Dick Hale, who resigned to pursue other projects.

The magazine will have a new editor in the November issue. Zahid Ikbal, a former member of the Kansas City Star staff and instructor at Kansas University, is the new editor. No major changes in the magazine's content or direction are expected.

The association intends to hold a concurrent conference with the 11th NIPGM conference Nov. 1-6 in Kansas City, Missouri. Dues will be $30 per year. Membership is open to professionals who are in charge of stadiums, college level sports areas, secondary school sports areas and others managing industrial and private sports areas.

Richard Ericson of Bloomington, Minnesota was elected president; Harry Gill of Milwaukee vice president; and Dan Weisenberger of W. Lafayette, Indiana, treasurer.

The goals of the association are to unite those persons engaged in the construction and maintenance of athletic turf areas for better playing conditions; to promote the interchange of ideas among members and other organizations; and to encourage the dissemination of scientific and practical knowledge.

Arboretum honoring Chadwick is dedicated

The Ohio State University Board of Trustees dedicated in May a two-and-one-half acre horticultural garden in Columbus as the Chadwick Arboretum honoring OSU professor and author Lewis C. Chadwick.

Chadwick, who retired in 1967, has contributed a tremendous deal to the field of horticulture in 38 years of teaching and writing. Many leading
We Recommend and Sell **CIBA-GEIGY DIAZINON** — The Most Useful Insecticide For Home, Yard and Garden.

**DIAZINON** Effectively Controls Nuisance and Problem Pests Around The Home, Yard and Garden — Such as ants, cockroaches, chiggers, ticks, fleas, earwigs, milipedes, sowbugs, spiders, crickets, aphids, wasps, mites, grasshoppers, slugs, scales, caterpillars, fruitworms, beetles, cutworms plus many moths and worms. Check the **DIAZINON** label for specific insects.

* Diazinon is the registered trademark of CIBA-GEIGY Corporation.

Van Waters and Rogers handles a complete line of insecticides, herbicides, and fungicides for your turf grass needs.
ALCA's ILD Conference to Emphasize Management

"Professional Growth through Management and Technology" is the theme of the 1981 Landscape Contractors of America Interior Landscape Division Conference, to be held at the Hyatt/Regency, Atlanta, on September 9-12, 1981. The program will include a "dual track" approach with much of the programming split into concurrent sessions, one session on a business management topic and the other on a horticultural technical subject.

A highlight of the conference promises to be the keynote address by Rod Bailey of Evergreen Services Corporation in Seattle, WA. A professional in the landscape contracting industry and a consulting professional to firms with organizational problems, Bailey will speak on personnel management and how to reduce turnover.

I.J. Jackson, a representative of the Fails Management Institute, will speak on strategies to improve human resources. Jackson will also administer the D.I.S.C. Profile test to interested individuals and provide direct feedback to each participant on self-perception response as expected by others and the individual's response to pressure.

Other experts will participate in panels on operational efficiency, developing a lease program, developing a company image, and automation. The Awards Presentation Luncheon will honor interior project winners of ALCA's 11th annual Environmental Improvement Awards.

Other Convention highlights will be the "Suppliers Night" with up-to-date information on equipment, and an informal roundtable discussion program with the conference speakers and industry leaders at the close of the conference.

Directory of contractors available

The 1981/1982 Who's Who in Landscape Contracting, containing over 900 listings of commercial landscape contractors throughout the U.S., has been published by the Associated Landscape Contractors of America.

The directory lists the members of ALCA and provides the full name, address, and phone number for each contractor, as well as the name of the principle contact person. Each listing also contains a size index and the specialties for that contractor.

To receive the directory, send $3 to ALCA Publications, 1750 Old Meadow Road, McLean, VA 22102.

Housing Starts Continue Slide

Landscapers and other businessmen affected by the housing industry are distressed that the number of housing starts continues to fall. After rising to an annual rate of 1.66 million starts in the construction of homes and apartments in January, housing starts plunged to an annual rate of 1.15 million units in May. This is the lowest level since the 938,000 starts of May, 1980, when the 1980 recession was in full swing.

"It's unquestionably interest rates," says Adren Cooper, a Commerce Department analyst. Although they have declined somewhat since then, mortgage rates were averaging a near-record 16.1 percent in early May.

"While the immediate future of the housing industry is not rosy," according to Commerce Secretary Malcolm Baldridge, "we are seeing some initial decline in inflation, and more recently in interest rates.

"If we can achieve lasting relief from inflation, then interest rates will come down," Baldridge added. "In this case, the next housing recovery could be more lasting than the recent one."
