EXCEL HUSTLER
Engineered to cut mowing time around obstacles.

EXCEL's exclusive, dual-hydrostatic system powers both drive wheels independently. So with twin lever steering ease, you can move one wheel forward while reversing the other to execute a true zero-radius turn.

This total maneuverability plus the 3-way offset mower deck lets you trim everything but the "whiskers" around tree trunks, benches, ball washers or any other obstacle. You can even mow over the lips of sandtraps and water hazards.

The 3-way mower deck is another EXCEL exclusive that lets you mulch...discharge clippings to the side...or direct the discharge rearward.

Other HUSTLER attachments include a 60" flail mower, 72" heavy-duty deck, rotary broom, utility scoop, dozer blades, edger and more.

Call toll free 1-800-835-3260 or write for the name of your EXCEL distributor and free literature. He'll be glad to set up an EXCEL HUSTLER field demonstration on your own turf.

Robinson named vp of marketing for Pickseed

Mike Robinson, a nine-year veteran of the Northwest seed industry, has been named vice president of marketing for Pickseed West, Inc., Tangent, OR.

In the past two years, Robinson has introduced Pickseed proprietary products in numerous markets throughout the United States. Most recent varieties introduced include Fiesta, Dasher, and Blazer Perennial Ryegrass, and America Kentucky bluegrass.

Robinson will continue to be responsible for the company's proprietary marketing turf and forage seed. His other major responsibility is coordinating Pickseed's research and variety development.

Turf Seed introduces chewings fine fescue

Shadow, a new variety of chewings fine fescue, is being marketed by Turf Seed, Inc., Hubbard, OR.

Dr. William Meyer of Turf Seed developed Shadow after working with many germ plasm sources. It has shown good resistance to powdery mildew and rust (Puccinia coronata).

Shadow has a medium dark green color with leaf width similar to Banner or Jamestown and with similar performance and heat tolerance.

Lofts hosts 400 at annual field day

More than 400 golf course superintendents, park managers, sod growers, county agricultural agents, automated lawn dealers, and landscape architects attended the 4th annual Lofts Pedigreed Seed field day at its Martinsville Research Farm.

After observing Lofts' plots, attendees heard a slide presentation demonstrating the various aspects of seed production accomplished within Lofts' facilities. This was followed by a plant disease clinic held by Dr. Noel Jackson of the University of Rhode Island. Richard Hurley, Lofts' director of research, showed overseeding equipment and practices. Other discussions included Fusarium roseum control and fall fertilization.

The company also has published its new "Guide to Seed & Sod in the U.S.," a concise reference to various turf varieties and their adaptations, recommended uses, planting rates, and dates. It is available free of charge from: Lofts Pedigreed Seed, Inc., Bound Brook, NJ 08805, 201/356-8700.

Perennial ryegrass gets Canadian license

Omega, a new fine-textured moderately dark green turf-type perennial ryegrass, has been awarded a Canadian license by Agriculture Canada, Plant Products Div. in Ottawa on an application by Oseco Inc. of Brampton, Ontario.

Omega, a 32 clone synthetic variety, was developed by Turf-Seed Inc., Hubbard, OR. It has been tested at a number of official stations in Canada since 1976 and has proven to be a versatile turf-type perennial ryegrass suitable for a variety of climates.

ASPA winter show will include exhibits

Equipment and services, always a popular part of the American Sod Producers Association summer meeting, will become an additional feature to the group's winter meeting in Lake Tahoe.

Exhibits will be on display from beginning to end of the conference at Tahoe's Sahara Hotel, February 16-18. They will share the spotlight with two full days of speakers and topics of technical and practical nature.

Program Chairman Steve Cockerham of Rancho Verde Turf Farms, Perris, CA, says that there will be sessions on hydro-mulching, stolen versus sod, and warm and cool season grasses. Dr. Victor Gibeault from the University of California will speak on energy and water; Jerry Faulring, president of the Professional Lawn Care Association of America, will talk about cooperation between sod growers and the lawn care industry; and Attorney William Harding will explain how to deal with state agencies.

Other topics concern income and estate planning and positive alternatives to unions and organized labor. For more information, contact: American Sod Producers Association, Association Building, 9th & Minnesota, Hastings, NE 68901, 402/463-4683.

Reed's Sod Farm was the site for the Sixth Annual Field Day of the Irrigation Association of New Jersey in October. The Princeton, New Jersey, farm hosted more than 300 irrigation contractors, golf course superintendents, lawn care managers, and Rutgers University staff. Users were able to see demonstrations and discuss problems with dealers, distributors, and university specialists.
A DIAMOND IN THE ROUGH.

You're a pro and it shows. Everything has to be just right—especially the equipment you use. That's why you'll want the Mitsubishi diamond on those rough jobs, where a tractor has to deliver.

Satoh Mitsubishi tractors deliver. Versatile, dependable and efficient; they deliver the highest amount of productivity at the most reasonable cost, the least amount of downtime and the kind of application flexibility you demand.

Satoh Mitsubishi tractors—they're as professional as you are.

For the name of your Satoh Mitsubishi dealer see your local Yellow Pages or write Satoh Mitsubishi, Box 5020, New York, NY 10150.

WE BUILD A BETTER TRACTOR
It's DUOSAN® — a scientifically formulated combination of a systemic and a contact fungicide. The combination creates a synergistic effect achieving better results than if the two were used independently. And it takes less to do the job.

Now you can overcome the problems of fungicide-resistant disease strains or the emergence of pathogens not affected by a single control...without separate applications of systemic and contact fungicides...without resorting to "homemade" mixtures of two possibly incompatible controls.

DUOSAN is labeled for most major spring and summer turf diseases except Pythium and results in good color and overall excellence of turf. Why not give your turf—and yourself—the advantages of this unique development. Get mean about Green with DUOSAN.

NOW THERE'S ONE FUNGICIDE FOR TURF...

THAT'S BETTER THAN TWO!
The current issue of WEEDS TREES & TURF carries meeting dates beginning with the following month. To insure that your event is included, please forward it, 90 days in advance, to: WEEDS TREES & TURF Events, 757 Third Ave., New York, NY 10017.

Finally, An Aid For Teaching Turfgrass

Superintendents, Contractors, Lawn Care Managers, New, On-the-Job Reference. The Turf Managers' Handbook is a comprehensive, organized approach to turfgrass science and care. It has been designed and written by leading turf specialists from Purdue, Dr. William Daniel and Dr. Ray Freeborg, for on-the-job reference and as a text for students. The book contains 150 illustrations and 96 color photographs. Data includes 240 tables and forms. Included are specifications for rootzones, employment, calculations for chemical applications, and extensive metric-imperial conversion. Business and technical aspects of turfgrass management are covered in this 424-page book. Planning, purchasing, hiring, construction, and plant selection are put together for easy on-the-job reference. Markets covered include lawn care, sod production, golf course management, cemeteries, athletic fields, and low maintenance areas. If it concerns turf, it's in the Turf Managers' Handbook.

Turf Managers' Handbook

Ordering Information

Please send ______ copies of the hardback ($18.95* ea.)
_______ copies of the paperback ($14.95* ea.)

*Please add $1.50 per order, and if ordering multiple copies, also add 25¢ per additional copy for postage and handling costs.

A check or money order for ______ is enclosed.

I understand that delivery may take six to eight weeks. Quantity and bookstore rates available upon request.

Duluth, MN 55802
Old strip mine becomes classroom for Ohio school

An abandoned 50-acre strip mine has become a place for more than 100 students in mining and reclamation at Belmont Technical College, in St. Clairsville, Ohio, to study heavy equipment and reclamation technology.

The mine, stripped prior to the 1972 Ohio law, has sheer walls, no topsoil, and many pond areas. The land was purchased from R&F Coal Co. Following reclamation performed by the students, the area will revert to public use for hunting and fishing. A grant of $240,000 has been provided for the project by the Ohio Department of Natural Resources and should cover nearly 75 percent of the cost. Coal companies are lending the students heavy equipment. Students hope to compare plots covered with lime and fertilizer, topsoil, sludge and fly ash.

Report estimates $2 billion needed for abandoned sites

A report by the Division of Reclamation of the Ohio Department of Natural Resources estimates that more money than currently available is needed to reclaim severely impacted land in Ohio. At a cost of $8,000 per acre, the report claims that the Office of Surface Mining funding, if provided, will not meet the task over the 15 life of the program. OSM funds may total $8-10 million per year for the fifteen year period.

The report recommends how the state program will be organized and how sites will be selected for funding. Eligible sites include abandoned strip mined land, open mine shafts, underground mine openings, mine-related landslides on public and private property, and research and demonstration projects.

OSM enforcement authority clarified in new rules

Final rules clarifying the Office of Surface Mining's authority to enforce violations by coal mine operators of the Surface Mining Control and Reclamation Act of 1977 were published in the Federal Register on October 10.

An earlier decision by the Interior Department's Board of Appeals appeared to restrict OSM's enforcement authority. The new rules eliminated confusing language and replaced sanction authority.

Alabama small operators get $2.5 million in aid

A grant from the OSM will provide funds to consulting firms and laboratories to make it easier for small mine operators to obtain the data needed for surface mining permits in Alabama. The cost of such data was thought to be beyond the means of the large number of small operators in the state. Small operators are defined as producing less than 100,000 tons of coal per year. Data required by the Surface Mining Act is needed before operators can receive permits to mine.

Ore waste reclamation faces Minnesota test

A $170,000 grant from the Interior Department's Bureau of Mines has been awarded to Barr Engineering Co., Minneapolis, to observe the survival of ten plant species on tailings from ore processing. Release of toxic elements and the effect of weathering on the tailings will also be observed.

Tailings disposal is a major concern in the Iron Belt area of Minnesota and now there is great demand for mining copper and nickel in the area. The success and cost of the reclamation will greatly affect future mining in the area.
Forget all the claims. Banvel® Herbicides give you what you really need—exceptional weed control, without turf damage, at a more than competitive cost per acre. Banvel 4S gives you broad control of tough weeds, while Banvel® + 2,4-D provides an even wider spectrum of control, but see the label for certain grasses susceptible to 2,4-D. Both mix readily, and are stable in storage. And, Banvel Herbicides offer special translocation properties. This means they attack the entire weed both from the roots up and the leaves down.

Effective, yet economical weed control—that’s what Banvel Herbicides can add to your turf care program. When all is said and done, isn’t that just what you need?

**Banvel Herbicides—Tough on Weeds, Easy on Turf.**

Use Banvel Herbicides on your next broadleaf weed application. For more information:

Before using any pesticide read the label.

Skid steer loader model 11C can handle 1150 pounds and won't tip with 2300 pounds. A 30-hp. diesel, water-cooled engine powers it. Standard features include hydrostatic all-gear drive system, heavy-duty frame, and front protector gates. It also features the Hydra-Mac, Inc. hydra-lever control system for easy operation and increased canopy width and reduced noise level for operator comfort.

Write No. 701 on reader service card

Railroad rights-of way can be kept free of certain annual grasses and broadleaf weeds with a newly registered tank mix of herbicides from Ciba-Geigy Corp. It includes Ontrack 8E plus Atratol 80W plus Princept in the 80W, 4L, or Caliber 90 formulations. The herbicides control barnyardgrass, crabgrass, dogbane, fall panicum, giant foxtail, kochia, little barley, pigweed, ragweed, ripgut brome, Russian thistle, ryegrass, sprangletop, volunteer wheat, wild oats, and witchgrass.

Write No. 702 on reader service card

The Bolens FS-11 frame-steer riding mower can trim around trees, zig-zag between bushes, and make tight "square" turns next to sidewalks and driveways. The center-pivoting, full-frame steering lets the operator make sharper, tighter angle turns, which allows close trimming without jockeying back and forth.

An 11-hp. Briggs & Stratton engine powers it. Other features include electric start, rugged 5-speed transmission, a big front-mounted 40-inch mower deck, foam-padded adjustable seat, 16-inch pneumatic tires, and a totally enclosed engine for a quiet ride. FMC Corp. makes it.
