ground up—Design the management landscape” and Goss’ seminars on turf grasses and turf nutrition were presented to packed auditoriums of over 110 grounds managers.

If anything, the Portland locale might have been too nice for a PGMS conference. Some of the attendees told WTT that they were dismayed at the lack of problems that the Pacific Northwest seemed to be encountering. Next year’s conference and trade show will be held in San Diego, CA, November 14-18. A record turnout is expected.

**New York conference draws 700 to Albany**

Despite competition from hunting season, the PLCAA Show, and last minute problems with the conference hotel, the New York State Turfgrass Association Conference and Trade Show attracted nearly 700 turf managers to Albany’s modern Empire State Plaza.

Educational sessions were divided into lawn care, golf, and athletic field management. General sessions covered turf and landscape topics and featured regional experts such as Cornell’s Paine on weather forecasting, Rhode Island’s Jagshitz on growth regulators, Rutgers’ Indyk on athletic field construction and maintenance, Cornell’s Smiley on diseases, Bing on weeds, Petrovic on turf management, and Tashiro on insects.

**ALCA Maintenance Symposium stresses salesmanship**

Steve Brown, president of The Fortune Group, set the mood for ALCA’s Maintenance Symposium with an upbeat presentation on effective management. “Management is the skill of attaining predetermined objectives,” Brown noted. “The only thing that matters is results.” With the stage set, the approximately 150 landscape contractors heard presentations on marketing potential, budgeting and forecasting, selling and equipment costing.

The marketing potential seminar was run by Ken and Tom Oyler, Oyler Brothers Co., Orlando, FL, and Ray Gustin, Gustin Gardens, Gaithersburg, MD. They discussed marketing techniques that have been successful in their businesses. Richard Reasoner, Dendron, Novato, CA, presented the seminar on how to forecast sales and budget accordingly.

Phil Christian, division manager, ChemLawn Corp., conducted the equipment costing presentation. Christian provided the audience with various equations to ascertain their own equipment profitability.

Irv Dickson’s (ChemLawn) seminar on “Successful Selling Methods” picked up where Brown left off. Dickson stressed that “the difference between success and failure in sales is having the right attitude.” Dr. Robert Miller, vice president of group support services, ChemLawn, was the featured speaker at the luncheon. Miller, also a member of the National Coalition For A Reasonable 2,4-D Policy, spoke on the effects of chemicals in our world.

In other ALCA news, the association released its program for its 1982 Annual Meeting. The meeting will be held in Palm Springs, CA, January 25-29. The theme is “Winning in the 1980’s” and Ed Foreman and Earlene Vining will kick off the meeting with presentations on “Successful Living” and “The Art of Successful Selling.” Other noted speakers will be Jerry Lankenau, “How to Get the Government Off Your Back and On Your Side;” McNeil Stokes, “Contract Negotiating;” and David Bowen, “Cash Flow Management.”

There will be an expanded trade exhibit and the 12th annual presentation of the Environmental Improvement Awards. A full program for the interior landscape industry is also planned.

**SC Turf and Equipment Show draws over 6,800**

The Southern California Turf and Landscape Equipment Show held at the Orange County Fairgrounds, Costa Mesa, CA, was attended by more than 6,800 industry personnel and students. The show is the largest in the west and features more than 150 commercial exhibits and educational displays by seven community colleges and universities.

Fullerton College, Fullerton; Cal Poly University, Pomona; and Cuyamnacco College, San Diego; placed first, second and third, respectively, as the three schools best training future leaders for the turfgrass industry. Several of the exhibits attracted quite a bit of attention from the attendees. B. Hayman Co., Sante Fe Springs, featured an antique power mower which still runs. Environmental Care’s (Santa Ana) display featured an early model Ford pick-up truck. The hot air balloon advertising International Seed Co.’s Derby perennial ryegrass was one of the favorite attractions.

Additionally, the Southern California Turfgrass Council set plans for its 1982 Turf and Landscape Institute to be held in Anaheim, May 4-5. Seminars are planned for landscape, golf, water and energy, pest management and personnel management.

This magazine gives you good reading, good writing and good arithmetic.

We present the information in our articles clearly, accurately and objectively. That's good writing. Which means good reading.

We present the information in our circulation statement clearly, accurately and objectively. That's good arithmetic.

BPA (Business Publications Audit of Circulation, Inc.) helps us provide precise and reliable information to both advertisers and readers.

An independent, not-for-profit organization, BPA audits our circulation list once a year to make sure it's correct and up to date. The audit verifies your name, your company, your industry and your job title.

This information enables our advertisers to determine if they are reaching the right people in the right place with the right message.

The audit also benefits you. Because the more a publication and its advertisers know about you, the better they can provide you with articles and advertisements that meet your information needs.

We make sure you get what you pay for.
Specialty topics included drought and water management, ground water contamination, insecticide-related bird kill, small computers, and preventative pest management. Representatives from regional organizations chaired the sessions such as Frank Claps of the New York Turf and Landscape Association, Robert Miller of the Central New York Golf Course Superintendents Association, Gregory Davis of the Western New York Golf Course Superintendents Association, Robert Alonzi of the Metropolitan Golf Course Superintendents Association, and James Carnevale of the Nassau-Suffolk Landscape Gardeners Association. James Wyllie, vice president of the Golf Course Superintendents Association of America and probable 1982 president of GCSAA, spoke on new construction.

Richard McGovern, president of McGovern Sod Farms, was chairman of the conference and ironed out last minute problems with the Hilton which failed to get an occupancy permit in time for the show. Jerry Strein of Greenview Nursery, South Hempstead, took over the NYSTA presidency from Thomas Strain of Vestal Hills Country Club, Elmira.

Bruce Shank, of Weeds Trees & Turf magazine, was elected to a three-year term on the board and appointed chairman of the long range planning committee.

The Empire State Plaza provided an attractive and efficient location for a trade show. The 1982 will return to Albany and the conference hotel will be the nearby Hilton, which received its occupancy permit on the final day of the NYSTA show.

TURFGRASS:
Youngner honored at West Coast show

Dr. Victor Youngner was named "Man of the Year" at the Southern California Turf and Equipment Exposition, Costa Mesa, CA.

Youngner, professor of plant science at the University of California, Riverside, is an internationally recognized turfgrass breeder, educator, and turfgrass scientist. Youngner is credited with developing the smog resistant hybrid bermudagrass cultivar, Santa Ana. He is currently developing and evaluating several improved zoysiagrass cultivars which show potential for being both energy and water efficient.

Bigger Specs for Bigger jobs.

Introducing the 4200 lb. capacity Trailer from Snowco.

Snowco built their reputation on sturdy dependable trailers. Their big new 4200 lb. capacity utility trailer has the same top-quality construction that makes every Snowco trailer rugged and practical. This newest trailer is ideal for hauling grounds maintenance equipment, construction equipment, ditches, and other bulky, hard-to-handle loads.

Standard equipment includes:
• heavy-duty steel deck
• adjustable loading ramps
• hydraulic brakes
• mag wheel covers
• screw-jack tongue stand
• adjustable hitch height

Snowco's lo-ride suspension system makes loading easy and lowers the center of gravity for maximum stability and safety at legal highway speeds. What's more, the big new 4200 lb. capacity trailer is backed by the reliable Snowco Warranty.

No matter what your hauling needs, Snowco's new top-of-the-line trailer can handle it... at a big 4200 lbs.

Model 20-016

Snowco offers a broad selection of ramp, tilt and box trailers, with capacities from 1000 lbs. to 4200 lbs. Shown here is Snowco's ramp loading utility trailer Model 20-002, with a capacity of 1150 lbs.

Snowco's lo-ride suspension system makes loading easy and lowers the center of gravity for maximum stability and safety at legal highway speeds. What's more, the big new 4200 lb. capacity trailer is backed by the reliable Snowco Warranty.

No matter what your hauling needs, Snowco's new top-of-the-line trailer can handle it... at a big 4200 lbs.

Snowco Division of Beatrice Foods Co. 4386 McKinley, Omaha, NE 68112

Please send more information on your complete utility trailer line.

Circle No. 142 on Reader Inquiry Card

JANUARY 1982/WEEDS TREES & TURF 13
EPA Officials on the Hot Seat

On two successive days in October, the U.S. Senate Environment and Public Works Committee grilled the EPA administrator, Anne M. Gorsuch, and her nominee for Assistant Administrator for Pesticides and Toxic Substances, Dr. John A. Todhunter. Mrs. Gorsuch was questioned severely about her plans for the future of EPA because the onboard EPA bureaucracy estimates that by the end of fiscal year 1983, there will be less than half of the 1981 employment level (around 10,000). She was also grilled about the Administration’s plan for rewriting the Clean Air Act, failure to do anything about Superfund, and the low morale in EPA.

On the next day at Dr. Todhunter’s nomination hearings, the Committee, with help from environmental organizations, unloaded on him. They were critical of health risk decisions made during his consultant status with EPA since they differed widely from previous agency policy. Of note were the decisions on formaldehyde and the controversy within EPA on the human exposure levels due to the use of ethylene dibromide (EDB) for fumigation of food crops in the Medfly quarantine areas of California. His public disclosure earlier this year about the EPA suspension of the uses of 2,4,5-T and silvex on insufficient evidence also came under fire. However, he was easily approved by the Committee and the full Senate.

More Pesticides for the Nursery Industry

A concerted effort by the American Association of Nurserymen, the National Forest Products Association and the Society of American Florists has given the nursery industry quicker access to new and effective pesticides. The cost of acquiring registration data has been so great that a manufacturer often did not register low volume uses until years after a chemical was registered for a major agricultural crop.

The three organizations made their problem known at the 1981 Congressional Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) oversight hearings. They requested the insertion of a new definition in FIFRA that would make “applying a pesticide, registered for use on a food crop, to any non-food or non-feed nursery crop against any target pest specified on the labeling, unless such use is specifically prohibited on the labeling” not inconsistent with its labeling. In subsequent meetings with the House Agricultural Committee staff and EPA, a method was found to resolve the nurserymen’s problem without making a change in the Act. Under existing statutory authorities, EPA proposed that the following uses are not inconsistent with labeling: (1) a pesticide registered for use on a specific ornamental plant can be used on all ornamental plants; (2) a pesticide registered for use in greenhouses can be used on all non-food plants grown in greenhouses; and (3) general or unclassified use pesticides registered for use on food crops may be used on non-food or non-feed nursery sites. In all three all label directions, precautions, and restrictions must be followed.

This new policy would make about 85% of the registered pesticides available to the nurserymen.

New Soil and Water Conservation Ethic

The U.S. Department of Agriculture is ready to embark on a new soil and water conservation program. The programs that evolved during the last 45 years assumed that farmers, ranchers and other resource users were motivated to practice sound conservation methods for financial reasons. Today, other factors in agriculture play a significant part and the USDA has decided to shift away from random ‘first-come, first served’ style of practice selection to one of priority designations worked out with state and county organizations. In order, these priorities are: (1) reduce soil erosion, (2) reduce flood damage in small, upstream waterways, (3) conserve water and enhance water quality, (4) improve fish and wildlife habitat and (5) increase the use of organic waste.

News from page 13

GOLF

Musser tournament raises over $2000

Over $2000 was raised for turf research through the Musser International Turfgrass Foundation at the Eighth Annual Oregon Musser Tournament.

Winner of the 18 hole tournament was a Salem team of Ray Anderson, Bob Renaud, Bill Burgher and Ed Radigan who won tickets for a free flight over Mt. St. Helens. Tualatin Country Club donated free green fees and the Tee-2-Green Corp. sponsored the evening banquet.

With 64 players entered this year, two women joined the fray for the first time.

Prusa takes on GCSAA training job

The new education director of the Golf Course Superintendents Association of America represents both the old and the new for superintendents.

Having grown up on Aquamarine Golf Club in Avon Lake, OH, where his father is superintendent, he was exposed to the methods of the 50's and 60's. Unlike others growing up in this rather rebellious time, he was captivated by his father's occupation.

After a tour in the Navy, he pursued a horticulture degree from Orange Coast Community College in Costa Mesa, CA., and California State Polytechnic Institute in Pomona. GCSAA recognized Prusa as a student at Cal Poly with a scholarship. He was Kent Kurtz’s technician for turf research. He graduated with honors in 1975 with a degree in turf management and ornamental horticulture.

After serving as superintendent at China Lake Golf Course in California, he moved to Pasatiempo, a course designed in 1927 by Allistair MacKenzie, often called the father of golf course architecture. MacKenzie also designed Cypress Point Golf Course in Monterey, CA. and Augusta National in Atlanta, GA, with Bobby Jones. Prusa took the job as superintendent at the beginning of the severe drought. He had to justify skyrocketing irrigation water bills and at the same time help the members adjust to course changes caused by water reduction. His dilemma was reported at the GCSAA Convention in St. Louis in 1979.

Prusa has always expressed an interest in the club management aspects of golf and now holds the title of Superintendent of Buildings and Grounds and acting General Manager of Pasatiempo.
Now, a second choice in shafts for your first choice in trimmer/cutters.

Introducing the Hoffco JP225 straight shaft.

It's the Hoffco trimmer you wanted for those hard-to-reach jobs like cutting under fences and pruning dense vegetation.

Our patented flexible drive shaft delivers full power from the 22.5cc Fuji-robin engine, also protects gears and engine from shock loads.

Hoffco's Guardian Triangle is a three point suspension that promotes operator efficiency, comfort, safety. Two-line monofilament cutting head is standard; tri-kut weed blade and brush blades are optional.

For lighter work, our lightweight WC215H.

It's got reach, maneuverability and the power to go after grass and weeds every day, all season long. Engine is the dependable 21.2cc Kioritz, proved on the job in Hoffco professional/commercial models.

Vibration-dampening loop handle, fatigue-reducing shoulder harness and two-line monofilament cutting head all come standard.

TOUGH ON THE JOB. EASY ON YOU.
Jim Prusa has always been active in group and community projects as president of the Cal Poly Horticultural Alumni Association, member of the California Farm Bureau and the Santa Cruz Chamber of Commerce, as well as the Golf Course Superintendents Associations of Northern and Southern California. He has been a member of the GCSAA Education Committee and served as secretary of the Southern California Turfgrass Council.

Kurtz describes Prusa as progressive, creative, confident, poised, articulate, and not afraid to rock the boat. "He has been very active in review of the pest control industry standards in California and outspoken on misuses of pesticides. He fought for the continued use of 2,4-D in Santa Cruz County and won.

"Jim recently built a tee on top of his maintenance building," Kurtz said, "so the building was hidden from the clubhouse and the tee position more challenging."

Jim's brother John is a turf management graduate from Ohio State University and is the New York area manager of Lawnmark Associates, a lawn care company. His wife, Karen is working on her CPA. Jim gives an annual scholarship to women in nursery management at Cal Poly in memory of his first wife, Patricia, who died following a hiking accident.

Fully, An Aid For Teaching Turfgrass

Superintendents, Contractors, Lawn Care Managers, New, On-the-Job Reference. The Turf Managers' Handbook is a comprehensive, organized approach to turfgrass science and care. It has been designed and written by leading turf specialists from Purdue, Dr. William Daniel and Dr. Ray Freeborg, for on-the-job reference and as a text for students.

The book contains 150 illustrations and 96 color photographs. Data includes 240 tables and forms. Included are specifications for rootzones, employment, calculations for chemical applications, and extensive metric-imperial conversion. Business and technical aspects of turfgrass management are covered in this 424-page book. Planning, purchasing, hiring, construction, and plant selection are put together for easy on-the-job reference.

Markets covered include lawn care, sod production, golf course management, cemeteries, athletic fields, and low maintenance areas. If it concerns turf, it's in the Turf Managers' Handbook.
You’ll find one on every National...

The little decal that means big savings!

It does more than tell you the belt sizes used on National mowers. It signifies our commitment to build a mower that can be maintained easily and inexpensively. It tells you that these are standard, off-the-shelf items available from your local supplier, not a special, high-priced belt designed by a manufacturer to be available only from him. It means less down time!

But standard belts are only part of National's value. There's the normal maintenance factor which is reduced by National's obviously easy accessibility. Field reports tell us that National mowers are one-third to one-half the cost of maintaining competitive models.

Then there's greater fuel economy. National's simple, functional design means as much as 44% to 62% less fuel consumption than competitive, power-robbing, hydrostatic type rotary machines.

Best of all, National's initial cost is less than that of other mowers sold to do the same job.

In these days when purchase price, fuel economy, continuous performance and longevity are most important, look to a National to do more work, with easier and faster maintenance, over a longer period.

Write to us for the name of your nearest dealer. Then call for a demonstration.
Attendees were treated to three days of informative seminars, workshops and exhibits. The two-hour evening workshops proved to be a well-appreciated innovation of the show. At the workshops, lawn care operators had the opportunity to fire questions at speakers who presented seminars earlier in the day. Both the seminars and workshops were very well-attended.

The show program got off on an inspired note with the keynote address delivered by Ralph Lewis Jr., vice president-coordinator corporate communications, Gulf Oil Corp., Pittsburgh, PA. In a saber-rattling speech, Lewis pointed out the public’s lack of knowledge of energy policy and stressed the importance of the relationship of energy, politics and global events.

The first day seminars centered around technical matters such as ornamentals, toxic waste, and lawn care equipment. Business seminars on office management, financial statements, accounting and employee discharge and compensation were the topics of the second day. Updates on herbicides, pesticides, pathology and 2,4-D were also presented.

The active participation of the lawn care operators during the educational program carried over into the trade show, according to many exhibitors. A steady flow of attendee traffic was noticeable during all of the exhibit hours. Additionally, many attendees were not just browsers but stopped at the booths to inquire about the products exhibited.

One of the highlights of the show was a presentation honoring Jerry Faulring (Hydro-Lawn Corp., Gaithersburg, MD) for his hard work and leadership in serving as PLCAA president for the association’s first two years. The board of directors was also voted in, including 1982 president J. Martin Erbaugh (The Lawnmark Corp., Pennisula, PA).

The 1982 PLCAA Convention and Trade Show will be held in Indianapolis, IN, November 14-16.

**ARBORICULTURE**

**Johnson named vice president at Davey Tree**

Edward Johnson has been named vice president of field services for the Davey Tree Expert Co., Kent, OH. Johnson will work closely with senior vice president of field services Bert Stamp who is planning to retire this month.

In his new position, Johnson will have overall corporate responsibility for personnel, safety and equipment for total company operations.

**Prior to his appointment, Johnson served as operations coordinator in the tree care department. He also served as manager of Parr and Hanson, a Davey subsidiary in Hicksville, NY. He has 26 years of experience in arboriculture and is past president of the New York Arborists Association.**

**EQUIPMENT**

**Cal Poly equipment program marks 3rd year**

California State Polytechnic University, Pomona, CA, celebrated the third year of turfgrass equipment evaluation program.

The turfgrass equipment is consigned to the university by Clarence McMicken, president of B. Hayman Co., Santa Fe Springs, CA (a turfgrass equipment distributor). Some of the companies involved in the program include Jacobsen, Smithco, National, and OMC-Cushman.

The equipment is shipped crated to the university where the students set it up. Once the equipment is assembled and checked out by the students and Dr. Kent Kurtz, several turfgrass areas are assigned for the evaluation. On-campus areas are agreed upon by Dr. Kurtz and Wayne Smith, supervisor of landscape services for the university. Areas of campus are also utilized such as little league baseball fields and youth soccer fields in neighboring communities. This segment of the program works to the benefit of not only the students, but also the volunteer organization who need assistance with turfgrass care.

The cooperating parent manufacturers have been pleased with the arrangement because it exposes the future turfgrass managers to their equipment. Several design modifications have resulted from this program since the students are critical of problems that may arise from using a particular piece of equipment.

**TURFGRASS**

**NCTC members request research projects**

Following a survey of its membership, the Northern California Turfgrass Council Research Committee has identified five areas in which research is desired. These areas are: a mowing height comparison of the most frequently used cultivars of Kentucky bluegrass, perennial ryegrass and fescues under normal institutional fertilizer and watering practices; a cost comparison of seeded versus sodded turf and the development of a cost-benefit ratio per unit area; the allelopathic effects of various turfgrasses such as perennial ryegrass and tall fescue; various aspects of turfgrass irrigation; and the selection and/or development of a fine leaf, slow-growing, and non-nuisance Kikuyugrass.

**TURF**

**Lakeshore promotes Winland to product manager**

Joe Winland has been named product manager for turf chemicals at Lakeshore Equipment & Supply Co., Elyria, OH.

Prior to his promotion, Winland served as plant manager and manager of inside sales for Lakeshore. His duties included formulating and technical support. Winland joined Lakeshore in 1976 following a career as a golf course superintendent at Pine Hills Golf Course Hinckley, OH, and Saw Mill Creek Golf Course, Huron, OH, where he was involved in the construction of the course.

As product manager of turf chemicals, Winland will continue his technical support functions, but will also become involved in product development and Environmental Protection Agency registrations.

How do you make a great crabgrass herbicide even better for turf?

PRODUCT NUMBER
2145

CHIPCO® RONSTAR® G HERBICIDE
CHIPCO® RONSTAR® G HERBICIDE

selective, preemergent herbicide for the control of annual grasses and broadleaf weeds in Turf and woody Ornamental shrubs, vines, and trees.

ACTIVE INGREDIENT:
Oxadiazon (2-tert-buty1)-4-(2,4-dichloro-5-isopropoxyphenyl)-3-1,3,4-oxadiazolin-5-one] 2.0%
INERT INGREDIENTS ................................................................. 98.0%

WARNING
KEEP OUT OF REACH OF CHILDREN
STATEMENT OF PRACTICAL TREATMENT
IF ON SKIN wash with soap and water.
IF IN EYES flush with plenty of water; get medical attention.
See Back Panel for Additional Precautionary Statements

Manufactured By
RHÔNE-POULENC CHEMICAL COMPANY
AGROCHEMICAL DIVISION
RHÔNE-POULENC INC.
Monmouth Junction, N.J. 08852

NET CONTENTS
