Ford unveils five new compact loaders

Five new compact Load Handlers are available from Ford that include diesel power, four-wheel hydrostatic drive and foot controls for the hydraulic-operated buckets. Ranging from Class II (700-900 lb. lift capacity) to Class V (more than 1,750 lb. lift cap.), the new models and their classes are: The CL-25 (Class II) with 800-lb. rating and 20 HP engine, the CL-35 (Class III) with 1,000-lb. rating and 28-HP engine, the CL-45 (Class IV) with 1,300-lb. rating and 33 HP engine, the CL-55 (Class IV) with 1,700 lb. rating and 43-HP engine and the CL-65 (Class V) with 2,000-lb. rating and 62-HP engine. The CL-25 and CL-35 are also available with gasoline engines on special order.

Poast labeled for non-food crops

The EPA has given Poast post-emergent herbicide additional labeling to control grassy weeds in ornamentals, nursery stock and other non-food crops including Christmas trees. The BASF Wyandotte Corp. product can now be used to control annual and perennial grasses in azaleas, cotoneaster, flowering dogwood, euonymus, Frasier fir, forsythia, holly, juniper, Southern magnolia, red maple, willow oak, periwinkle, Eastern white pine,lobolly pine, Virginia pine, poplar, Norway spruce, white spruce and other plants. The herbicide enters

Pressure compensated bubblers by Rain Bird

Low flow rates of .25, .50 and 1.00 gpm can now be maintained despite water pressure changes with the 1400 series Pressure Compensating Bubblers available from Rain Bird of Glendora CA. The bubblers are designed for localized irrigation of trees, shrubs and other small areas where precise watering is needed. The low flow rates and conventional installation features allow the bubbler to be used in many areas that were suited only for drip systems before.

Milorganite on dormant turf provides nutrients when they are needed

Apply MILORGANITE in early winter to get early green-up in the spring. Golf courses have done this for 50 years.

CAUTION

The following statements apply only to MILORGANITE. Other materials may produce excessive early growth or induce unwanted growth during winter thaws.

Milorganize in early winter like the golf courses to:

- Promote early spring green-up.
- Eliminate early spring feeding.
- Save money (off season order)
- Keep nutrients in place.
Milorganite is non-leaching.

Ask Your Grass!
Just ask your grass what it thinks of the nutrients MILORGANITE provides for dormant turf. Do it just before the heavy snow falls.

Circle No. 116 on Reader Inquiry Card
The SCIENTIFIC GUIDE TO PEST CONTROL OPERATIONS is written for owners, supervisors, servicemen, salesmen, students, persons preparing for state certification under the EPA/state programs for commercial pesticide applicators, and people interested in structural pest control. The SCIENTIFIC GUIDE TO PEST CONTROL OPERATIONS a must for anyone involved in the field of pest control!
The new Woods Models 650 and 750 utility backhoes can outperform others their size (and larger) digging footings, irrigation ditches, drainage ditches, wiring trenches, and for landscaping.

They offer control . . . and safety. Two lever control of all functions: reaching, digging, lifting, swinging and dumping. It couldn’t be easier. And Woods' exclusive "Saf-T-Lok®" mount which eliminates side-to-side free-play movement of the 3-point hitch, their wide stance cantilevered stabilizers, and their self-contained independent hydraulics make sure they go where they're put . . . and stay put. Woods' 162° bucket curl gives maximum breakout and full "bite", keeps material in the bucket, and tucks away for safe convenient transport between jobs. The operator platform, with adjustable seat, puts him where he can see his work, and perform safely and comfortably.

And they give a choice. Model 650 reaches 7' 10" and will dig 6' 6" deep from tractors rated 18-35 hp with standard category 1, 3-point hitch. Model 750 reaches out 9' 4" and down 7' 6" from 20-40 hp tractors.

Get the "full scoop" on these top performers today. Send for complete specifications.
Designed for center-mounting, the dual trim deck discharges at the rear with a 9.5-inch offset on both sides and has a low-profile design to reach under benches and other low obstacles. The deck features three 24-inch lift blades that counter-rotate to eliminate the windrowing effect. Cutting height adjustments from 1 to 5 inches can be made in quarter-inch increments using front-gauge wheels. The rear of the deck is also easily adjustable to ensure a level cut.

Embark PGA label expanded

3M's Embark Plant Growth regulator is now approved for use on a wider range of ornamentals for control of Poa Annua seedhead development and spraying grasses around agricultural premises following EPA approval. Japanese ligustrum, pyracantha, English ivy and holly now can be treated with Embark, as well as 14 additional ornamentals in California. On golf course fairways, the herbicide can be applied at a 1/2 pint per-acre rate for control of Poa annua seedheads which strengthens root systems and enhances summer color and vigor.

New gearbox replaces Toro 690

The full-circle Model 10114 Gearbox from Royal Coach/Buckner is a two-nozzle impact drive sprinkler to replace the Toro 690 gearbox. An adjustable breakup pin on the drive nozzle reduces dry spots close to the head, while seven nozzle sizes with different volume and coverage patterns are available for special jobs. The 10114 has few moving parts and is made of heavy-duty bronze for long wear.

Marvik Aquaflow for ornamental pests

A new synthetic pyrethroid labeled to control aphids, thrips, whiteflies and leaf-eating caterpillers is available from Zoecon Corp. Marvik Aquaflow has been labeled for use on indoor and outdoor non-food ornamental crops and plantings, and shows good suppression of mites at the highest label rate. Applied as a full-coverage foliar spray, the water-based formulation should be used according to the severity of pest pressure or damage potential. Zoecon Products Manager Jim Heath said Marvik Aquaflow does not cause the mite flare problems other pyrethroids have shown because it does not affect most predators.

We Made It Simple!

- QUALITY — Built with Swiss clocklike precision.
- LIGHTWEIGHT — With the comfort of the user in mind.
- ACCESSIBLE — A durable self-lubricating and external pump assembly.
- SIMPLICITY — Insures cleanliness and longer wear. No tools necessary to dissemble and repair.
- PRICING — Here's one instance where you pay less for the best.

Protect your reputation
Know these facts before you buy fertilizer

Fact: Country Club and Greenskeeper fertilizers are of the highest quality homogenous grades made today.

With over 35 years of extensive university and proven end-use testing, the dependability of our product is clear. Each agronomically balanced pellet contains all three essential plant food elements—N, P, K, regardless of the material's sizing and coverage. This alleviates the possibility of certain elements sifting to the bottom of the spreader or particles being too large to pass through the opening. Our products are smooth flowing, non-binding and dustless, and specifically formulated with analysis for these end uses:

**GREENS and BENTGRASS TEES: SIZING FINE**
- Country Club 18-4-10 90% Org. Sulfate-Minors
- 18-3-12 70% Org. Sulfate-Minors
- 20-0-10 50% Org. Sulfate-Minors

**FAIRWAYS and TEES: sizing medium**
- Professional Lawn Applicators
- Country Club 18-5-9 50% Org. Sulfate-Minors
- 29-3-5 25% Org. Sulfate-Minors
- 12-4-6 50% Org. Muriate-Minors
- 8-4-4 30% Org. Sulfate-Muriate-Minors
- 13-25-12 50% Org. Muriate-Minors
- 20-20-20 Soluble
- 22-0-16 Soluble

**Greenskeeper**
- 20-8-8 50% Org. Sulfate-Minors
- 20-4-10 40% Org. Muriate-Minors
- 16-8-8 Muriate-Minors
- 10-6-4 50%&25% Org. Muriate-Minors
- 28-7-4% Soluble

**Fertilizers in Combination with Control Products**

*Not available in all market areas.

Fact: Lebanon Chemical has the flexibility to insure you with the right product for your turf needs and within your budget. We are ready to formulate exactly the analysis that will be the most beneficial to you. This includes a complete line of sulfur coated urea blends. A few of our most popular analysis are:

- Leb Pro
- 32-4-8 Muriate Minors
- 28-6-12 Muriate Minors
- 27-3-5 Sulfate Minors

If your needs dictate your own label, we are fully equipped to formulate and bag private label products as well. Lebanon Chemical can also supply your chemical needs, and is a major distributor for Mon- santo, Rhone-Poulenc, Diamond Shamrock, Ciba Geigy, BFC, McBay, Chevron, Rhom & Haas, Miller, Dow, Union Carbide, DuPont, Stauffer and Elanco.

Fact: Lebanon Chemical is a leader in providing service for you. Our knowledgeable sales representatives are ready to provide you with the information for your needs whether you’re a golf superintendent, turf manager, or a professional lawn applicator. Because of their technical backgrounds, Lebanons sales staff can assist all professionals in solving turf grass problems and aid in the designing of a complete turf care program. Publications outlining detailed specifications on our products and their use are available upon request, along with soil testing, specifically designed to diagnose soil related turf problems.

Lebanon’s Customer Service department is always ready to answer your questions and process your orders quickly and efficiently. And with a solid network of distributors throughout the country, Lebanon can ensure you of immediate service, and offer services such as palletized units and stretch wrapping of shipments.

Lebanon Chemical is setting the standards today for you to grow tomorrow.

FORD 555 DIGS MORE PER GALLON!

Independent tests prove Ford 555 stretches fuel better than the competitive rigs!

No. 1 in fuel economy! No. 1 in trenching!

Get a free demonstration!
Find out how Ford 555 digs up to 25 percent more per gallon of fuel than Deere 410! More than Case 580 Super D! More than Massey Ferguson 60!
And there's more! Ford 555 trenched up to 27 percent faster than Deere...and faster than the other competitive rigs against which it was tested.

Your choice of 2 or 4-lever controls provide smooth performance. Optional extendible dipperstick digs over 19 feet deep. Up front, Ford 555 gives you 9,800 pounds of loader breakout force and easy, single-lever control to handle 4,700-pound loads. New Ford 4x4 torque converter power-reversing transmission speeds shuttle operations.

For a free demonstration of the Ford 555 and a summary of the independent test results, call your Ford Tractor dealer today.

The Backhoe-Loader Specialist

FORD TRACTORS

48-month fixed rate financing on all new Ford industrial tractors, tractor loaders, backhoe-loaders and wheel loaders. Or, delay your payments until April 1, 1984, followed by up to four years of 10 1/2% Fixed Annual Percentage Rate financing. You must be a qualified buyer and take delivery by November 30, 1983.
