Circle No. 239 on Reader Inquiry Card
in recent months could cause buyers to rethink their equipment purchases in 1985 because not only are traditional manufacturers beefing up their product lines (Cushman, the market leader for over a decade, is putting more muscle in its vehicles by going from an 18 to a 22 hp engine) but foreign manufacturers are entering the marketplace with some vigor.

"They've had a captive market for years," Lee Rinehard of Terrain Vehicles, Inc, East Coast distributor of Daihatsu maintenance vehicles, says of the traditional utility vehicle producers. "But, we've come in with a strong product at a competitive price and we'll be right up there too. We're knocking at their back door and they know it."

In addition, Honda, Yamaha, Suzuki, and Kawasaki are encroaching on the market from a different direction, initially with sporty and relatively inexpensive three-wheel ATCs, most recently with more work-oriented four-wheel vehicles. Cost and the growing availability of optional work attachments are making these vehicles attractive for specialized maintenance tasks and for running errands.

It's this diversity which will cause buyers and users of turf vehicles to think long and hard in an attempt to match purchases with jobs in 1985.

Does this mean the "workhorse" type of turf vehicle is losing its popularity? Probably not. It is a signal, however, that competition for sales in specific equipment—applications performed in the past by the "workhorse"—is going to be red hot.

Versatility, even in this day and age, is certainly no dirty word, Dan Hedglin, sales manager for turf and industrial vehicles at Cushman/OMC, stresses. The demand for equipment that fulfills many work functions is still strong. Cushman, of course, built its reputation on its workhorse vehicles.

"We expect a strong year," he says. "We've had an excellent year this year. There are probably a couple of reasons for this. The economy has come back significantly although we didn't see it affect the turf industries as much as other industries. And we enjoyed sales increases because of product improvements." Hedglin says Cushman, in addition to boosting the horsepower of its vehicles, is committed to making its vehicles more versatile and efficient.

**TURFCO**

**Sod Master**

New Improved Self-propelled Top Dresser

It still uses Turfco's original method of conveyor and brush but the new Mete-R-Matic will make your top dressing job easier, faster and better.

...the best...just got better!

NEW! Endless composition conveyor belt moves top dressing more efficiently and reduces maintenance to a bare minimum.

NEW! All controls are up front and within easy reach of operator for faster, non-stop operation.

NEW! Front shield protects engine and drive assembly from overspill when loading.

NEW! Full width rear bumper guards against damage to rotating brush.

NEW! As standard equipment—galvanized steel, 11.5 cu. ft. hopper and a 5 h.p. I/C engine.

WHEN YOU'VE GOT A TOUGH CUSTOMER TO PLEASE, THE BEST COURSE IS IBDU.

"If like me, you insist on the best possible playing conditions on your course, you need to know about PAR EX® with IBDU®. I feel strongly about the quality of the courses I play and the quality of the courses I manage. That's why my design and maintenance organization counts on IBDU®.

IBDU slowly releases nitrogen—later in the fall, earlier in the spring and more consistently through the summer than any other fertilizer. That means a beautiful, long-lasting turf for greens, trees and fairways. Without early flushes or extra clippings. It's performance only IBDU offers.

So why not see your distributor for the PAR EX formulation that will save you from too many applications. Too many mowings. And too many complaints, from picky players like Jack Nicklaus.

Jacobsen strengthens its offerings with a pair of new utility trucks, the T1000 with a 1000-lb capacity and the T2000 with a 2000-lb capacity and a variety of optional attachments that can convert it to a mini dumper, aerator, seeder, spreader, top dresser and sprayer.

Taylor-Dunn offers its new 2,000-lb. capacity B 2-10 model with an exclusive speed control that increases the running time and distance of the vehicle up to 30 percent. It can be adapted to seat two and four passengers with a cargo area, or seat six passengers comfortably.

Further evidence that the workhorse-type vehicle should remain popular is Smithco's new Runaway turf maintenance truck which got its first production run this past summer. Smithco's Donald Smith feels the Runaway, which features a hydraulic drive train, is also an example that reducing maintenance costs, even at the expense of a slightly higher initial cost, will become increasingly important.

"People don't seem to mind spending the extra money for fewer maintenance costs, for less down time," he explains. "The whole industry will be going more into hydraulics we feel."

Even though Smith doesn't feel the introduction of new foreign products has made a major impact on the market yet, particularly in the East, he cautions traditional manufacturers from taking it too lightly. "If we don't see the direction the industry is going and take steps to stay with it, four or five years down the road we're going to get hurt," he notes.

Notable among the newcomers to the market are such companies as SNS Motor Import, Oxnard, CA, which became the distributor of the Sanfu line of equipment last January, Terrain Vehicles, Inc., Addison, IL, the East Coast Distributor for Daihatsu, and EquipTech Products Inc., Cincinnati, OH, sole U.S. distributor for the Chikazu line.

The Sanfu line is anchored by the

THE PRODUCTION MACHINE
“HIGH CAPACITY, ECONOMICAL, HIGH-FLOATATION”

That’s how this machine has been designed! The mammoth 104” appetite affords you 31% higher capacity than a standard 72” unit. With a 60” mower out front and two hydraulically operated wings, we have eliminated the application of long, troublesome belts and assured you of picture perfect floatation over berms and undulations.

Add to this a field tested, 3-cylinder water-cooled, 27 HP diesel engine in conjunction with hydrostatic transmission and you have a machine which will maximize your return on cost of acre cut!

Contact your local HOWARD PRICE distributor for a demonstration on your turf.

TPV600 (turf personnel vehicle) which features a 27-hp, water-cooled engine, rack and pinion steering, and a 12-month, 12,000-mile limited warranty. Even though sales of Sanfu (the vehicles are manufactured in Taiwan) have been primarily in the West so far, SNS Motor Imports is putting together a national dealer network.

“Our first year in 1984 was a building year,” Tony Nunez of SNS Motor Imports says. “We knew a lot of the vehicles we would sell would be initial inventory and we expect a lot of reorders. We’re looking at having a good year in 1985. We’ve been able to attract quality dealers and that was our goal, good solid dealers that have been in business a long time.”

Likewise looking to the coming year with unabashed eagerness is Rinehard of Terrain Vehicles, a new company that oversees 19 Daihatsu dealer points in 15 states. Although Daihatsu vehicles have been on the market for a number of years, Rinehard feels the quality of the product and the parts support system his company provides will make Daihatsu a more noticeable force in the utility vehicle market.

“We have a high 90 percent parts/fill ratio,” Rinehard stresses. “The complaint that foreign products have a parts problem is old hat, a good sales trick. We can fill any order for any part.” Daihatsu products are supported by Subaru Mid-America, parent company for Terrain, which maintains a complete supply of parts, Rinehard explains.

The diversity of the market is reflected at Pinehurst, NC, where equipment manager Richard Yow reports using Daihatsu vehicles in a truckster capacity while retaining Cushmans for use on the greens.

Joining the utility vehicle sales fray this September was EquipTech Products with its Chikazu line of 15 different vehicles ranging in size from a motorized wheelbarrow to an eight-wheeled-drive vehicle with a two-ton payload. Included in this array are the GX12B and GX15B mini dump trucks.

“We can cover a number of markets with our products,” EquipTech’s Joe Engelbert says. “Some of them overlap and some of them don’t.” Engelbert is looking to a strong debut for Chikazu. “It’s one of those things you feel like you should have been a year ago,” he notes.

With the ringing of the bell signifying the start of the 1985 selling season there is no lack of challengers to the traditional utility vehicle leaders; and if they can’t win the bout, it might be that they’ll be satisfied to win a round or two. At least for now.
Greens or fairways... the Spray-Pro 44 with its big high flotation tires to protect your turf, converts in minutes to a Sprayer, Spreader, Aerifier or Utility Bed. Designed for easy on, easy off switching and year 'round service.

This “crew” should be working for you

the sprayer...
160 gal. poly tank, 3-section boom for 18-1/2 ft. coverage. Spray with 1, 2, or all 3 booms. Fingertip control of all spray system functions.

the aerifier...
Hydraulically controlled from operator's position. Cultivates a full 42 inch width. Cleanly penetrates to 3 inches, depending on soil conditions. Optional Slicing Blades to open the soil with a minimum of turf disturbance.

the spreader...
Precise rate settings for a uniform pattern. Top dress sand in 12 to 20 ft. swath, apply seed, fertilizer and lime 20 to 40 ft. Up to 500 lbs. per minute.

the utility truck bed...
Reinforced steel, 1500 lbs. capacity. Converts to dump bed with addition of Hydraulic Package.

NOVEMBER 1984/WEEDS TREES & TURF 67
Walking through a local garden show, most consumers have no idea what effort goes into the exhibits by various landscape contractors. They say to themselves, “I paid four bucks to get into this commercial advertisement, so it better be good!”

Little do they realize the display set-up alone can come close to 250 hours. And, the cost of a display can range from $1,000 to $35,000.

Taking into consideration the time, money and hard work put into it, one might wonder if being in a garden show is worth it. Although the reasons for being in shows vary from landscape contractor to landscape contractor, most agree the event is a worthwhile one.

“The incentive for being in a garden show is just very simply the hope of achieving some leads in a very off-time of year,” Bob Kinney, vice president in charge of landscaping and nursery division, Wilmore Gardens, Denver, CO, remarked. “Any time you can encourage any type of current or potential customer contact, it’s very critical.”

“Because it’s very cold and wet here, it gets the customers thinking about spring.” Lambth Marshall, president, Associated Landscape, Inc., Hoyt Court, NC, explained. “All you need is one really good customer. That one customer can turn around and give you 25 customers in the next year.”

Being in a show often represents credibility and is a sign of prestige, according to Greg Ash, co-owner and architect, Barker-Ash Landscape Design, Indianapolis, IN.

“I think it lends more credibility to you. The promoters of an established show will only let companies exhibit they know can do the job and present something that’s going to look nice.”

Russell Jones, president, J. Franklin Styer Nurseries, Concordville, PA, agrees. “People recognize immediately you’re a good contractor. The show itself has a lot of stimulus and is pretty prestigious.”

However, Rick Solo, owner of Solo Design Group, Charlotte, NC, believes the prestige of a garden show is questionable.

“I used to think the show was prestigious, but I don’t anymore. What I have noticed over the years is the quality of the garden displays really...
A new day in grass control for ornamentals.

FUSILADE™

Postemergence grass control
This is the beginning of the FUSILADE herbicide era for ornamentals. FUSILADE is now registered for postemergence control of both annual and perennial grasses in ornamentals.

Safe grass control
FUSILADE controls grasses without damage to ornamentals. You can apply FUSILADE either over-the-top or as a directed spray. Follow label directions carefully for the correct method of application for specific ornamentals. Used as directed, FUSILADE controls nearly all grasses without danger of phytotoxicity to ornamentals, eliminating expensive hand labor to remove grassy weeds.

Complete grass control
FUSILADE means complete grass control because it controls weeds systemically, even penetrating into roots, rhizomes and stolons. And FUSILADE can be used with more ornamental species than any other postemergence grass herbicide. It's a new day in complete grass control for ornamentals. For more information on FUSILADE, call the ICI Americas Information Service toll-free, 1-800-441-7757, extension 3192. ICI Americas Inc., Wilmington, DE 19897.

The Grass Master

ICI Americas Inc.
GREENSKEEPER INSECT and GRUB CONTROL - A granular product, impregnated on corn cobs, designed to kill both surface and subsurface insects on turf. GREENSKEEPER INSECT and GRUB CONTROL’s granular formulation spreads fast, easy, and accurate with any spreader, eliminating the drudgery of sprayers.

COUNTRY CLUB INSECT CONTROL 19-4-4 - A full weight, high density product designed to do two jobs in one easy application - fertilize the turf and control insects, thus saving you time and money. This granular product is a premium balanced 19-4-4 with 3.0 units of W.I.N. to reduce chances of turf burn and for extended feeding.

Both GREENSKEEPER INSECT and GRUB CONTROL and COUNTRY CLUB INSECT CONTROL 19-4-4 will control sod webworms, chinch bugs, ants, ticks, mole crickets, cut worms, brown dog ticks, earwigs, hyperodas weevils, japanese beetle grubs, and earwigs.

Barnes Nursery & Garden Center, Inc., Huron, OH, won Best of Show at the 1984 Home and Flower Show in Cleveland.

seems to have gone downhill. It seems to me a lot of the stronger companies are not participating like they used to. I think it may have something to do with whether you get work out of the show. Generally, if you get work out of the show, it is residential and some companies are beginning to move away from the residential market,” Solo explained.

Some landscape contractors see the show as a place to invite customers they will be working with in the upcoming season.

“A lot of work that comes out of the shows is getting ready for spring. We arrange to meet clients at the show and take them around as our guests, so, the show is also a sales tool,” Jones said.

For others, the show is a way to get together with former customers and talk about updating gardens.

“It is also an educational tool to show people our style,” Loonsten said. Style goes beyond the simple how-to of do-it-yourselfers.

Professional exposure is also received at a garden show, according to Mike Spena, president, Spena Landscaping, Highland Heights, OH.

“The incentive of the show is exposure; the people see the garden and it reinforces their idea of us. But, it also gives us professional exposure. It promotes the image within the industry. You get to know a lot of people and, if you’re not there, I think you miss some of the association.”
