Create a Colorful Difference

WITH

Pinto WILD FLOWER MIX . . .

the colorful and decorative answer for low maintenance landscape areas.

Multi-colored blends of annuals and perennials like Chicory, Scarlet Flax, Bachelor's Button, Baby's Breath and Painted Daisy. A blend that reseeds itself for lasting beauty year after year.

Pinto is ideal for any landscape — parks, roadsides, golf course roughs, home gardens, industrial and landfill sites. And perfect for areas where you don't have to mow.

Available either as 100% wild flowers, or mixed with a fescue as a Meadow Mix to aid soil stability.

It's custom blended in a Northern or Southern mix. So wherever you live, your Pinto order will be perfectly adapted for your climate. It will make this year the start of many colorful years to come.

Pinto Wild Flower Mix: the easy, low-maintenance way to naturalize your surroundings.

Development Corporation (NIDC), says efforts are under way to gather the estimated $350,000 to turn the design into a reality.

The contest was funded in part with public funds from the New York State Council on the Arts, contributions from Citibank, and NIDC.

"We were talking about what we can do to improve this area and we came up with this idea," Fleischer explains. "After driving through the Bronx with all the factories and freeways and traffic many people think that's all there is. But there's another

Bronx. There's a place where people are proud of the neighborhood. Most people are really pleasantly surprised and we think the Gateway to Pelham Parkway will help."

Fleischer says she's grateful the jury which choose Wild's designs "kept our budget and need for low maintenance costs in mind."

CHEMICALS

**Velsicol, Japan co-develop Rizolex**

Velsicol Chemical Corp and Sumitomo Chemical Co. Ltd. of Japan will co-develop and market Rizolex, a fungicide for control of soil-borne diseases such as Rhizoctonia spp and Schlerotium spp.

Velsicol will have exclusive rights to the development of Rizolex in the United States, Mexico and Canada. The chemical's primary use in North America will be in turf and ornamentals and cotton, peanuts and other field crops.

Sumitomo has also made arrangements with PBI Gordon to produce the insecticide Sumithion.

CHEMICALS

**Seminar to difuse "time bomb"**

The National Coalition For A Reasonable 2,4-D Policy will sponsor a one-day seminar "to arm members of the lawn care, forestry and agricultural industries" with educational and resource materials designed to support the industry's continued use of herbicides at a local level.

According to the Coalition, the lawn care industry is one of the most visible herbicide user groups in the country. Because of its visibility, lawn care businesses have become the focal point for an increasing amount of regulation. The Coalition points to "prior prenotification" and "posting" as a "potentially dangerous trend" in lawn care regulation.

The Survival Training Workshop is slated for March 12 at the Airport Marriott in Atlanta. The day-long seminar will examine current herbicide issues and is aimed at improving communications skills and generating better understanding between those involved with herbicide use and the general public.

Edith Efron, author of The Apocalyptic, a book about undisclosed cancer research facts, will be the keynote luncheon speaker. Registration fee is $65. For more information, call the 2,4-D Coalition headquarters, (312) 644-0828.

12 WEEDS TREES & TURF/MARCH 1985
While nobody was looking, Fairmont developed a Limb Lopper power pack that lets you trim branches quietly without being tied to your truck.

A hundred feet or a hundred yards. Distances no longer matter with the quiet, self-contained mobile hydraulic power pack from Fairmont. This compact, highly portable unit weighs just 53 pounds. It supplements the hydraulic outlets on your truck to let you do ground and ladder trimming beyond your truck's normal 25-foot hose limit. Best of all, it works with the tools that you're already using in your basket.

The practical benefits of Limb Lopper's mobile power pack are obvious. No longer do you have to equip each truck with manual and gasoline-powered tools for jobs that a basket can't reach. One set of quiet, efficient hydraulic tools takes care of every tree-trimming job.

Many of the big commercial tree-trimming companies have already switched to Limb Lopper chain saws, circular saws, and shade-tree pruners. It's easy for you to do the same. Just phone or visit your nearest member of Fairmont's trained, dependable Limb Lopper dealer network. Or write: Fairmont Hydraulics, a division of Fairmont Railway Motors, Bldg. B, Suite 408, 800 Roosevelt Road, Glen Ellyn, IL 60137. Phone (312) 790-1690.
Karathane, not Kelthane suspended

In December Government Update we erroneously reported that Rohm & Haas had voluntarily suspended Kelthane until additional studies were completed. We had the common name right (dinoicap) but the product name wrong, it should have been Karathane. Kelthane (Dinofol) is still on the market as one of the few effective miticides available.

Reagan proposes EPA $$ freeze

President Reagan's 1986 budget recommends a freeze on EPA's budget while increasing toxic waste cleanup funding. Water treatment programs will be cut to make room for toxic waste programs.

A number of bills generated in the aftermath of Bhopal will put pressure on funding for toxic waste handling and disposal programs and right-to-know legislation. Groundwater pollution is also a hot topic in Washington.

A special committee reviewing FIFRA programs is not expected to complete its recommendations before congressional budget hearings this spring. Minutes from the committee's meetings indicate strong interest in inert ingredients in pesticides, cancellation of pesticides with insufficient data supporting them, improving state local needs labelling, and authority of Federal residue standards in food over state standards.

Senators rekindle Harper's Ferry

The storm over the Harper's Ferry Bill, a bill described as the environmentalists' wish list, has not blown over. In fact, it has been scooped up by the leading liberal Democrats in the Senate, Cranston (California), Proxmire (Wisconsin), Metzenbaum (Ohio), and Leahy (Vermont). These men know how to use the media to generate support. It represents a considerably larger threat than legislation attempted in 1984.

EPA readies applicator protection

EPA's Director of Pesticide Programs Steven Schatzow announced standards for farm worker protection will be issued by this fall. Schatzow, who took over from Edwin Johnson last year, appears to focus his attention on exposure to pesticides, whether direct or indirect. Since he started, he has given special attention to residues and applicator protection. WT&T thinks he is on the right track, without carrying some grudge against chemicals. He could be swayed, like others, by the emotional pressure from the antipesticide lobby. Instead, like Ruckelshaus, he has a good grasp of the basic goals.

New home for PGMS

The Professional Grounds Management Society got a full-time director the first of the year and also a new headquarters.

The oldest professional grounds management association in the country is now located at 3701 Old Court Road, Suite 15, Pikesville, MD 21208. The phone, (301) 653-2742, is unchanged.

Executive Director Alan Shulder told WT&T the new 400-square-foot facility is "far more modern and gives us a little more working space."

ASPA unveils marketing program

The American Sod Producers Association is intensifying its advertising and marketing plans to better acquaint sod producers and the public with the advantages of sod.

ASPA has produced a series of advertisements which its members can purchase and place in publications of their choosing as well as specialized brochures for their retail and wholesale customers. ASPA membership decals and bumper stickers will be available to further publicize the product and organization.

Current plans also call for ASPA to place advertisements in several national publications whose readers are landscape architects and contractors. The campaign theme is "Sod's Quality Advantages," and "Sod: The Perfect Cover."

For more information, contact ASPA, (312) 449-2890.

Sea World to open in San Antonio

Harcourt Brace Jovanovich, Inc. (HBJ), parent company of WEEDS TREES & TURF magazine, and other publishing and diversified interests including Sea World enterprises, has announced plans to build a fourth Sea World park in San Antonio, TX. The $75,000,000 facility will be ready the end of 1986. Sea World parks are currently in San Diego, Orlando and Cleveland.

The new park will offer 500 acres of displays and exhibits of killer whales, penguins, dolphins, seals, native and exotic fish and birds. The parks are also known for their creative and well designed and maintained landscaping.
Unbeatable All-Star

PERENNIAL RYEGRASS

★ Resists sod webworm and other insects
★ Resists brown patch, leaf spot, crown rust
★ Germinates within 7 days
★ Grows in sun and shade
★ Excellent mowing quality

† U.S. Plant Protection Applied for No. 8300059
Names in the news

Jerome "Jerry" Faulring, president of Hydro Lawn, Gaithersburg, MD, was the first ever recipient of the Professional Lawn Care Association's "Man of the Year" award. Bob Earley, publisher of Lawn Care Industry magazine, making the presentation at the PLCAA Convention in Tampa says, "Jerry has done more than anyone else for the industry."

Sherwood A. Moore, a golf course superintendent since 1939 and recently retired superintendent at Winged Foot Golf Club, Mamaroneck, NY, received the New York State Turfgrass Association's highest honor, the Citation of Merit, during that group's recent conference in Syracuse.

The American Sod Producers Association recently awarded research grants of $1,000 each to Auburn's Dr. Ray Dickens and Cornell's Dr. Dick Smiley. Dr. Dickens is to study the eradication of common bermudagrass through use of herbicides while Dr. Smiley will continue his study of Fusarium blight syndrome.

Steven B. Crick becomes the president of the Washington State Nurseriesmen's Association. Crick is vice president of Pacific Coast Nursery. Bob Schmitz is the 400-plus member organization's first vice president. George Gillet its second vice president, and Marianna Ball begins her third term as treasurer.

At American Association of Nurseriesmen headquarters they're saying goodbye to Ray Brush who's been with the AAN staff since 1958 and hello to David Hamilton a former professor of horticulture at Purdue University who will be replacing him.

David Kearsley takes over as national accounts manager of Rain Bird, the manufacturers of irrigation products. Kearsley is moving to Chicago, while Trey Duren steps in as his replacement as Colorado district manager.

Sally B. Callander has been named market manager of turf products by Velsicol Chemical Corporation. Ms. Callander joined Velsicol in 1965.

Layton J. Overstreet, Jr. recently took over as superintendent at Marriott's Orlando World Center's 18-hole golf course, and Bill Spence as superintendent at The Country Club, Brookline, MA, site of the 1988 U.S. Open. Spence got the job after golfing heavyweight Tom Watson put a bug in the ear of the Brookline course's greens chairman.

Maag Agrochemicals, Inc., announced the appointment of Louis F. Gingins to the position of president. Gingins started with Maag in 1947. Clair Palmer is the company's new marketing manager. Palmer formerly held positions with Cole Chemicals, Mobil Chemicals, and BASF-Wyandotte.
NO OTHER HERBICIDE COVERS THE LANDSCAPE LIKE CHIPCO RONSTAR.

IT'S SAFE ON THE BROADEST RANGE OF TURF AND ORNAMENTALS.

You have to be careful when you put down most pre-emergence herbicides. They're safe on turf or ornamentals. Not on both.

Enter CHIPCO RONSTAR preemergence herbicide. The only product you can use safely to weed the whole landscape: turf, woody ornamentals, ground cover, and trees.

RONSTAR herbicide solves a lot of problems. And simplifies your inventory and application. It causes no root pruning. Needs no incorporation. Won't leach or move into untreated areas.

RONSTAR GIVES EXCELLENT WEED CONTROL.

Just one application of RONSTAR herbicide gives effective, season-long control of over twenty of your toughest annual broadleaf and grassy weeds.

FOR A GOOD-LOOKING LANDSCAPE, TAKE A GOOD LOOK AT RONSTAR HERBICIDE.

If you'd like to find a simpler, safer way to keep weeds under control, find out more about the preemergence herbicide that covers the landscape: CHIPCO RONSTAR herbicide. See your dealer, or write: Rhône-Poulenc Inc., Agrochemical Division, Monmouth Junction, NJ 08852.

RONSTAR SPREAD THE WORD.

Please read the label carefully, and use only as directed.
With the Greensmaster 300, it won't

They can blame the ball. They can blame the putter. They can blame the weather or perhaps their lack of concentration. But when you cut with the Toro Greensmaster® 300, they can't blame the green.

That's because the versatile Greensmaster 300 gives you the lowest possible precision cut of any greensmower on the market.

Any greensmower. (So reason suggests if you're not currently using a Toro, you may be riding an easy target for a lot of bad putting excuses.)

And now recent design changes and a new line of accessories enable you to custom tailor the Greensmaster 300 to your specific maintenance practices and turf conditions.

To assure an accurate clip, an optional variable speed kit allows you to select a constant ground speed from 0 to 3.5 mph. For a finer clip at low heights of cut, or for easy maneuvering in tight spots, simply adjust the speed downward.

Precision cutting on greens, tees, approaches and other formal areas is assured with the new 5 and 8 blade cutting units, each available with our exclusive single-knob adjustment for maintaining a sharp cutting surface with a minimum of effort. Just a twist of your hand is all it takes. And it virtually eliminates the need for backlapping.

We added new, heavier Wiehle rollers for greater penetration to maintain an even cut, even over your denser grasses.

Even at cuts below 1/8", the Greensmaster 300 delivers a consistent, precise cut due to a new low-cut suspension frame engineered to transfer additional...
