

*Tough mowers...
from rough cut
to smooth finish.*

The CM Series

Extra Heavy Duty
Hydrostatic Rotary Mowers for
Commercial/Municipal Users

CM 20-60/72

Superior performance in both rough cut and refined mowing at speeds to 11 miles per hour. The "CM" gives the commercial user a tough, low maintenance machine that mows better at top speed than other mowers at half the speed. And does it with the added safety of rear discharge.

Kut-Kwick. More than forty years of experience building professional mowers for professional users.

What is PGMS doing for the Grounds Manager?

TAKE A LOOK.

If you haven't checked out the Professional Grounds Management Society recently, then you're in for a surprise. We're offering a bundle of new benefits that make joining PGMS more rewarding than ever! Here's what we've been up to and how you can benefit:

ANNUAL CONFERENCE AND TRADE SHOW -

The yearly forum bringing together grounds managers, top speakers, and suppliers for the sharing of knowledge and ideas.

NEWSLETTERS - A newsletter is mailed monthly to keep members current on the affairs of the Society and the latest developments critical to successful grounds management.

CERTIFICATION - Voluntary peer review of acceptable competence to enable you to become a Certified Grounds Manager.

RETURN OF DUES PROGRAM - All renewal dues will be credited to your return of dues account. Upon retirement all renewal dues paid by you will be refunded.

AWARDS - Members are recognized for outstanding achievement in grounds management. Annual Grounds Maintenance Awards Contest.

GROUND'S MAINTENANCE ESTIMATING GUIDE - To assist you in **total cost** job estimating.

GROUND'S MAINTENANCE MANAGEMENT GUIDELINES - Now available to assist you in management.

WORKSHOP TRAINING - Basic Management skills for first level supervisors. Available to all sections of the country.

EMPLOYMENT SERVICE - Personnel and position vacancy notices are listed in the monthly newsletter.

No matter how large or small your operation, **PGMS** is your source for the best, most meaningful grounds management information and help. Your membership investment goes to work for you immediately — that's the PGMS promise. Join now and grow with us!

THIS TEST WON'T HOLD WATER —OR AIR.

Water passes easily through highly permeable Duon Weed Control Mat.

Just blow through Duon to see how easily air passes through it.

The proof is stronger, longer lasting plants with **DUON**[®] Weed Control Mat.

Both water and air pass easily through Duon Weed Control Mat, made of Phillips Fibers non-woven polypropylene. As a landscaper, you know how important that is to a plant's root system and to the future well-being of your big landscape jobs—especially those you use as references.

When water and air can't get through, plants die. Black plastic won't work for the long-term. And woven polypropylenes are nowhere near as permeable as nonwovens. For example, the air permeability for nonwoven Duon is about 14 times greater than for woven polypropylenes and the water

permeability for Duon is about 10 times greater.

Put our words to the test. Hold Duon under running water, then take another piece and breathe through it. Then try the same test with a competitive weed control mat.

When covered from sunlight, Duon is virtually permanent. It allows plants to thrive and impedes about 95% of weed growth (in most areas). It also keeps mulch from going down into the soil.

For your quality landscape jobs, order Duon. For further information, call Phillips Fibers (803) 242-6600.

**CHOOSE THE
TURF TEAM WITH
THE BETTER GAME PLAN**

COUNTRY CLUB 19-4-6 FERTILIZER AND CRABGRASS PREVENTER WITH TEAM™

It's a contest that's played out on the ground—healthy grass pitted against crabgrass and goosegrass. But Country Club 19-4-6 Fertilizer and Crabgrass Preventer with Team™ has the defensive strength of benefin and trifluralin, yet it's gentle on your turf. The combination of these two proven herbicides kills the seeds of annual bluegrass, smooth and hairy crabgrass, goosegrass, as well as green and yellow foxtail as they germinate. And our premium quality fertilizer strengthens both Northern and Southern turfgrasses at the same time.

It can all be accomplished in one pass for full season control with Lebanon's new Country Club 19-4-6 Fertilizer and Crabgrass Preventer with Team™. Follow application instructions on the package—because successful teamwork hinges on everyone following the game plan.

Better turf care from the ground up.

If you have any questions about our new Country Club 19-4-6 Fertilizer and Crabgrass Preventer with Team™, or any of our other products and services, call our *Greenline* today at 1-800-233-0628; in Pennsylvania, call 717-273-1687. And start getting help with your game plan against crabgrass and goosegrass . . . from the ground up.

Our weapons are being fired upon

When you've got one of your most powerful aircraft carriers patrolling your own waters, and the enemy nukes it with an ICBM, do you just stand around sucking your thumb, or do you alert your people at Cheyenne Mountain?

If you've got any guts—or common sense, for that matter—you don't just stand around. You defend yourself.

That scenario is a gross exaggeration of what's happening on the pesticide front, but it serves its purpose.

The Environmental Protection Agency has recently demanded supplemental data on some old tried-and-true turf chemicals, and it's also taking a close look at the toxicity of others. Witness the problems the industry is experiencing with mecoprop (MCP), an effective broadleaf weed-killer, and diazinon, a trusty insecticide (see "Green Industry News").

In the case of the former, the producers of MCP simply can't justify the multi-million dollar expense to comply with the data call-in the EPA is demanding. In the latter case, Ciba-Geigy promises to do everything in its power to convince the EPA that diazinon is perfectly safe if applied according to label directions.

But, more than these isolated instances, the problem will continue to grow as the EPA buckles down on the landscape manager's most effective weapons against insects, weeds and even diseases.

It's gratifying to see pro-pesticide concerns coalescing into effective defensive groups like the Pesticide Public Policy Foundation and Rational Approach to Pesticides. They, however, are just the cornerstone. They need building blocks upon which to expand.

You, reader—if you apply pesticides to turf or landscape plants—represent those building blocks. You can help your own cause by joining pro-pesticide groups in your area, by donating your time and by donating your money.

You are the ammunition in the green industry's arsenal.

Penneagle crowds out bluegrasses on Butler National's fairways

Triplex fairway mowing at The Butler National Golf Club, Oak Brook, IL

When Oscar Miles, CGCS, of The Butler National Golf Club, introduced Penneagle creeping bentgrass into his *Poa annua* infested A-20 bluegrass fairways in 1980, he took a dynamic step toward the beautiful fairways praised by the pros during the Western Open.

Utilizing a prescribed program of aggressive, deep core aeration, drop seeding and verticutting, Penneagle was expected to aggressively compete with the bluegrasses. With triplex mowing and clipping removal, the unwanted grasses are yielding to Penneagle.

Oscar feels that his fairways are now 70-90% Penneagle.

With Butler National's reputation at stake, Oscar Miles couldn't chance anything less than Penneagle for his "immaculate" fairways.

Warren Bidwell is available to talk to your superintendents' group about Butler National Golf Course and the "Penn Pals," Penncross, Penneagle and Pennway Blend, on your golf course. Call or write TEE-2-GREEN Corp. for details.
