LEBANON GETS OUT THE HEAVY ARTILLERY AGAINST CRABGRASS AND GOOSEGRASS!

RONSTAR®

Your best defense is a strong offense.

And that offense should begin with Lebanon fertilizers with Ronstar®—the pre-emergence herbicide.

Whether your battlefield is northern or southern grasses, Ronstar beats back such difficult enemies as crabgrass, goosegrass and broadleaves such as pigweed, Florida pusley, oxalis, stinging nettle and carpetgrass.

Unchallenged performance, selectivity and safety.

Ronstar is a proven leader with season-long, lasting power. Yet, deadly as it is to weeds, it’s safe to cool season grasses, as well as to ornamentals—even if they’re newly transplanted!

And because of its superior selectivity, Ronstar can be applied any time of the year prior to weed germination.

Maximum Ronstar effectiveness in Lebanon Country Club 19-4-6 Fertilizer.

You won’t find a more cost-effective way to control weeds. That’s because Ronstar is impregnated on our premium Country Club 19-4-6 Fertilizer with 25% organic nitrogen. You get more efficient particle distribution and extended feeding. So you only need one application—a significant savings of time and money.

Custom mixes such as our 7-3-22 with Ronstar are available for your special needs.

For more information on Ronstar or our full line of fertilizers, SCU blends, combination products and straight chemical products, call our Greenline today at 1-800-233-0629; in Pennsylvania, call 717-273-1687. And start getting better weed control... from the ground up.

NOVEMBER 1986/WEEDS TREES & TURF 71
Athletic turf...revisited

Our September issue has generated tremendous feedback. You'll recall we devoted most of the issue toward addressing how an athletic field manager can make his field safer.

We're saddened by some of your replies. There's no doubt that most are trying to do an adequate job of maintaining your fields, but your responses tell us the job is next to impossible.

Howard Parker, manager of maintenance, grounds, and custodial services in the Newfane Central School system in Newfane, N.Y., poignantly writes:

"(We have) two men to mow four schools and related fields (over 100 acres), repair and maintain 13 vehicles and several mowers, deliver supplies, and maintain three playground areas, 13 ball fields, paint five fields once a week in the fall, paint the track once a week in the spring, and plow snow and refurbish equipment in the winter. It's no fun job."

Mr. Parker concludes: "There just is not enough time to even properly consider field maintenance. Planning programs without a real possibility of implementing them is hopeless (almost)."

That's just one example. We've received other letters and phone calls along those same lines.

There's no doubt that many school systems are in financial trouble; there's a choice between updated textbooks and adequate maintenance budgets. School levies are shot down with alarming frequency.

Yet some schools systems with money in the coffers are ignoring the conditions of their sports fields. Sadly, they review the conditions only when a serious injury (and lawsuit) occurs.

If administrators refuse to face up to horrendous conditions, they need to be educated. Here are some things you can do:

Be a pest. Keep on the backs of administration (within reason) until they are made aware of the issue of safe turf.

Be aggressive. Show off your good work, noting conditions before and after you labored.

Be efficient. Document your work, develop yearly budgets, keep tabs on equipment, and keep an eye to long-range plans.

Give administrators a copy of the September issue of WEEDS TREES & TURF to call attention to the problem of unsafe turf.

The next time your request for funds and/or equipment is denied, tell the moneyman that you don't want to wait until someone is seriously injured on your surface. That cost is much more than the price of fertilizer, herbicides, a mower, and an aerifier. Only when schools and parks realize this will we make the strides needed toward creating safe surfaces.

IF IT'S WORTH DOING, IT'S WORTH DOING RIGHT.

There's only one way to get quality greens core aeration. With a Greensaire® II aerator from Ryan.

Since its introduction, the Greensaire® II from Ryan has set the standard for greens aeration all around the world.

In fact, wherever a demand for the finest-quality greens core aeration exists, you'll find a Greensaire II hard at work . . . day after day, year after year.

Here's why:

• Up and down motion cuts clean vertical holes up to 3" deep. Leaves a smooth playing surface for continuous play.

• 24" swath; 36 cores per square foot.

• Up to 6,800 square feet per hour.

• Heat-treated, self-sharpening tines. The standard of the industry.

• Optional core processor lets you aerate and top dress in one simple step.

• Rugged dependability: 8-hp cast iron engine; a cast iron housing containing precision machined aerating components.

• Greensaire 16 offers same thorough aeration in a more economical size (16" swath; 36 cores per square foot; 4,000 square feet per hour).

When you want to do it right, do it with a Greensaire.

For a free demonstration call your Ryan dealer today. Or, for more information, write 2733 Cushman, P.O. Box 82409, Lincoln, NE 68501. Or, call toll-free: 1-800-228-4444.
