

"OUR GOLF COURSE HAS TWO PROS. I'M ONE OF THEM. THE OTHER IS OUR WOODS RM 90."

Mr. Tim O'Leary
Member—Wilson Sporting Goods
National Advisory Staff
Part owner, general manager, and pro
Lost Nations Golf Club
Dixon, Illinois

After 15 years at the same golf complex, Mr. O'Leary has come to the conclusion that their two year old Woods RM 90 is, "far superior to any type of mower...including reels. It mows weeds and grass under wet or dry conditions, and the maintenance savings alone paid for the mower in the first year."

If you're in charge of mowing a golf course, park, school, cemetery or industrial site, it would pay you to get to know the Woods RM 90 better. It's 7-1/2 ft. cutting swath cuts the big jobs down to size by mowing up to 4-1/2 acres per hour.

For complete information on the RM 90, contact Woods, Division of Hesston, Dept. PM, Oregon, Illinois 61061.

The mower is powered by a 16 hp Kohler cast iron engine, and has hydrostatic transmissions with ground speeds up to 6 mph and true zero turning radius.

The machine is designed for operator comfort since the operator does not straddle the engine or framework. A handrail is provided to assist the operator in getting on and off the mower.

Trimming mower gets crankshaft warranty

A revolutionary crankshaft protection device developed by Jacobsen has allowed the company to offer a limited two-year crankshaft warranty on its commercial 20-inch walk-behind trimming mowers.

The device uses a stiffener and blade adapter between the crankshaft and the rotary blade to prevent twisting, bending or breakage of the shaft. This extends engine life and maximizes productive cutting time while minimizing repair and replacement costs.

The warranty was announced at the 1987 Golf Course Superintendents

Association trade show.

Sod cup sprinkler disappears into turf

Hunter Industries has developed an innovative sprinkler, the Model I-44 Sod Cup, which actually has turf growing on top of it.

The sod cup has a plug of turf about 1 1/2 inches deep which grows actively.

When the head is retracted, the turf fills the hole. The I-44 poses no problems with mowers, and covers a wide range of turf.

The PGA West Golf Course at La Quinta, Calif., has had one in operation on the sixth green for a year with no complaints from golfers or PGA tour officials.

New collecting system improves lawn mowers

An improved grass collecting system has been developed by Howard Price Turf Equipment for its Turf Blazer 727 and Turf Blazer II mowers. The blower assembly housing is an 18 1/2-inch diameter, two-piece steel bolt-together housing with a four-blade, 18-inch diameter steel impeller. For protection, the blower has a formed steel tube bumper attached to the mowing deck.

The chute is a six-inch diameter, wire-reinforced transparent plastic hose. The hopper support assembly is welded frame steel tubing mounted on the right side of the prime mover and supports two hoppers, which are Rubber Maid trash cans. The hoppers

GET THE FEELING THEY KNOW SOMETHING YOU DON'T?

They do. It's their job to know things first and then pass that information on to you fast. Things like new turf management techniques, effective methods of insect and weed control, what really works... and what won't.

LOOK FAMILIAR?

They should. You've seen them often at turf shows, seminars, conventions—wherever industry news is in the making. They're the editorial and sales management team of WEEDS TREES & TURF. Please meet (sitting from left to right) Heide Aungst, Jerry Roche, Ken Kuhajda, (standing from left to right) Dick Gore, Bob Mierow, Ron Kempner, Jon Miducki and Bob Earley.

THERE'S NO GRASS GROWING UNDER THEIR FEET.

They apologize for not always being in when you call, but great stories are found in the field, not in the office. These pros know that the only way to really cover the green industry is to get out and be a part of it. From turf test plots in Oregon to the corridors of our nation's capital, they're following the leads, surveying the markets, and interviewing

the landscape professionals who make our industry grow. Then, they use their years of experience to pull it all together, analyze and present it to you in a crisp, easy-to-read and easy-to-use style. That way, you have the information you need to do your job better, faster and more effectively.

The next time you want to know something about the green industry, give them a call. If you can't reach them at the office, don't worry. **They'll reach you** in the pages of WEEDS TREES & TURF.

slide out of the support assembly for easy dumping.

Circle No. 199 on Reader Inquiry Card

Dump box makes golf cars versatile

TNT Utility Systems is offering an interchangeable-mount dump box that, using a patent-pending base frame, will fit all major new or used golf cars.

The dump box enables superintendents to convert golf cars into utility vehicles, saving money on investment and depreciation of utility vehicles.

Accessories for the dump box and a rear seat/cargo bed include a beverage unit and rubber bed-mat.

Other products expected soon by the company include a rear seeder, rear spreader, hose/cord reel and a tool/ladder carrier.

Model 251

Investment Performance

Hustler's new 251 and 262 deliver commercial-quality mowing at budget prices.

Excel Hustler 251 and 262 make smart equipment investments. They bring efficient mowing without breaking your initial purchase budget.

Agile. Both models have 18 hp engines and productive

innovations like: dual-hydrostatic direct-drive, true zero-degree radius turning and the easy maneuverability of one-hand, twin-lever steering.

The Model 251, with 51" rear-discharge deck, and four-wheel stance, trims from either side. An optional 8 bu. rear-mounted BAC-PAC™ catches grass and the deck

adjusts in one easy step.

The Model 262 is an out-front mower with 60" 3-way deck (mulch, side or rear discharge) and hydraulic attachment lift. Options like coultter-type edger, 16 bu. BAC-VAC™, 60" dozer blade, V-Blade, utility scoop and cab keep it working year-round.

For an investment in mowing performance, see your Excel Hustler Dealer or, call toll-free for literature or more information.

Erosion fabric useful for seedbed establishment

Hold/Gro is an erosion control fabric used for seedbed establishment on critical slopes and as a stabilization fabric where ground cover plantings are to be used.

Hold/Gro features paper strips in a knitted mesh support fabric. Sprigs of young plants are inserted through the material. The fabric provides soil protection and conserves moisture needed for root establishment. The fabric is bio- and photo-degradable and will disappear after plantings take hold.

SMART WOMEN KNOW HOW TO MAKE MONEY.

It's easy, with U.S. Savings Bonds. Today's Bonds earn competitive, market-based interest rates—like money market accounts. Plus, there's a guaranteed minimum return and big tax advantages. For more information, call 1-800-US-BONDS.

U.S. SAVINGS BONDS

Bonds held less than five years earn a lower rate than the guaranteed minimum. A public service of this publication.

FOR GENERATIONS CANCER PLAGUED THIS FAMILY. THEN WE CAME INTO THE PICTURE.

It's a tragic coincidence that cancer has taken so many members of this family over the years.

It took Frank Domato in 1961. Patricia O'Hara Brown in 1974. And Serafino Gentile in 1982.

But the fact that the chain of tragedies has now been broken is no coincidence at all.

Over the last 40 years, research programs supported by the American Cancer Society have made increasing progress in the treatment, detection and prevention of cancer.

In 1985 alone, the Society funded over 700 projects conducted by the most distinguished scientists and research institutions in the country.

So it's no coincidence that in 1986, cancer did *not* take Debra Gentile—Frank Domato's great-granddaughter. Just as it didn't take hundreds of thousands of others who have been successfully treated for the disease.

You see, we are winning.

But we need you to help keep it that way.

 **AMERICAN CANCER SOCIETY**[®]
Help us keep winning.

Get the thatch out before you fertilize

Don't fertilize the thatch

Turf experts agree that, after a hard winter, excessive thatch must be removed in order to have a healthy turf in the spring and summer. Nutrients are merely absorbed into the **thatch** and don't reach down into the **roots** if the thatch build-up is not removed.

knife reel

flail reel

BlueBird Lawn Combers are the largest selling and most customer-accepted power rakes for removing thatch — worldwide. With a BlueBird model for every type of lawn, and spacings for every application, it's no wonder BlueBird is Number One. THIS TEST WON'T HOLD WATER —OR AIR.

Water passes easily through highly permeable Duon Weed Control Mat.

Just blow through Duon to see how easily air passes through it.

The proof is stronger, longer lasting plants with **DUON**[®] Weed Control Mat.

Both water and air pass easily through Duon Weed Control Mat, made of Phillips Fibers non-woven polypropylene. As a landscaper, you know how important that is to a plant's root system and to the future well-being of your big landscape jobs—especially those you use as references.

When water and air can't get through, plants die. Black plastic won't work for the long-term. And woven polypropylenes are nowhere near as permeable as nonwovens. For example, the air permeability for nonwoven Duon is about 14 times greater than for woven polypropylenes and the water

permeability for Duon is about 10 times greater.

Put our words to the test. Hold Duon under running water, then take another piece and breathe through it. Then try the same test with a competitive weed control mat.

When covered from sunlight, Duon is virtually permanent. It allows plants to thrive and impedes about 95% of weed growth (in most areas). It also keeps mulch from going down into the soil.

For your quality landscape jobs, order Duon. For further information, call Phillips Fibers (803) 242-6600.
