Maintaining a fairway can be a real headache. Fine fescues give you less to worry about...

Keeping your course looking great and your budget balanced can be a real headache. Oregon grown fine fescues can make your job just a bit easier. When used on tees and fairways, fine fescues offer shade tolerance with low fertilizer and water requirements. Fine fescues mix well with ryegrass and bluegrass without getting pushy, and they have a tight, upright growth habit. Oregon fine fescues germinate and perform better than imported varieties.

Where do you find fine fescues? On tees, fairways, roughs, parks, home lawns, industrial campuses and anywhere a fine textured, shade tolerant turf is desired.

Where do you get fine fescue? Ask your distributor for Oregon grown fine fescue for sure!

For a series of eight tech sheets on Oregon grown Chewings and creeping red fescues, call or write

Circle No. 135 on Reader Inquiry Card
environments in pneumatically applied man-made rock formations from project design to completion. The company also refurbishes existing rockscapes.

The company offers a program which can include consultation, design, scale models, fabrication and coordination for a complete project. M.S.C. works in conjunction with R.J. Stovicek and Assoc., designers, artists and architects, and Master Builders, which provides engineering and technical knowledge.

**Lightweight nine-gang reduces soil compaction**

The GR-9 Jerry Clipper nine-gang mower cuts a 20-foot swath but retracts to a transport width of eight feet, three inches. The high-stress steel tube frame is lightweight but strong, reducing compaction while absorbing punishment, its manufacturer says.

Jerry Clipper's PTO allows the operator to select reel speed for each mowing job. The mower's four wheels pivot on 360 degrees so that the mower can turn tightly and even back up.

The GR-9 can mow at speeds up to six miles per hour while being towed by a 20 hp tractor.

**Tool locates buried pipe, other material**

The Locat from Bloch & Co., is a sensing device that locates and traces buried pipe, sewer lines, drain tile and other buried material.

The device weighs only a pound and a half and operates without batteries or earphones. The improved Locat rotates on three bearings when it comes across the threshold of a pipe. It comes with an audio training cassette and written instructions on use.

The Locat is accurate, locating both edges of pipe or other material. It is ideal for locating old irrigation lines and drain tile and will locate any form of material, from metal to PVC.

**Weed trimmer has telescopic qualities**

Tanaka Kogyo USA plays the innovator with the introduction of its telescopic trimmer, the TST-218. The 218's shaft "telescopes" down from 78 inches to a compact 50 inches for convenient transport on a truck or in the trunk of a car.

This 1 hp 11-lb. trimmer has bullhorn handles and a pivotal shaft that can be swivelled 360 degrees independently from the engine and locked into any position for easier edging or hillside cutting.
For season-long, full-course protection, base your disease control program on CHIPCO 26019 fungicide.

When it comes to season-long, full-course protection, more and more superintendents are building their disease control programs around CHIPCO 26019 fungicide. That’s because CHIPCO 26019 fungicide offers more important features than any other turf fungicide.

First of all, CHIPCO 26019 fungicide provides unsurpassed control of all major turf diseases: Helminthosporium Leaf Spot and Melting Out, Dollar Spot, Brown Patch, Fusarium Blight and Red Thread. Plus, CHIPCO 26019 fungicide protects against Pink and Gray Snow Mold as well as Fusarium Patch.

Secondly, CHIPCO 26019 fungicide delivers the longest-lasting disease control you can buy. Just one application protects your turf up to four full weeks. Based on cost per day of control, CHIPCO 26019 fungicide ranks as your best fungicide value. That makes it the ideal replacement for fairway disease control.

You’ll also like the fact that CHIPCO 26019 is easy on the environment, with no phototoxicity. And now you can choose between two convenient formulations—wettable powder or flowable.

This season, cover your course with the best in disease control: CHIPCO 26019 fungicide.

Rhone-Poulenc Ag Company, CHIPCO Department, P.O. Box 12014, Research Triangle Park, NC 27709.

Ever-Green Lawns Corp.
Some of life's best lessons are learned in the school of 'soft knocks'

The young man on the left will fall several times before he hits his first home run. The young man on the right wants him to have the advantage of falling on real turf.

We think it's curious that the same lawmakers who insist that individuals and corporations make environment and products safer for children neglect to legislate safer standards for school playgrounds.

It's no doubt easier to make us spend our own cash to improve conditions than to appropriate public funds for safe playing areas.

Things are changing ... slowly ... but NSTC has been instrumental in distributing information and talking to some appropriate people, but it all takes time and money.

While we're waiting for the big picture to change, we can all improve our little corner ... like planting an improved turf plot of our own, then using it! When officials see how much more fun we're having, they'll no doubt want in on the action.

Equal Opportunity Employer, M/F/H/V.
In order to lay the proper groundwork, you'll need a superior ground force. Like you've come to expect from Kubota.

This time we've broken the mold with the first walk-behind tiller to feature a liquid-cooled diesel engine. Three forward speeds, one reverse speed and seven-horsepower will help the AD70 make light of even the toughest, most sod-bound dirt.

Its tines dig especially deep when counter-rotating, pulling hard-packed soil up by the roots. Running forward, they'll turn up fine seed beds and seed cover.

There's a steering clutch on each wheel for precision maneuverability. There's a tiller clutch to stop the tine action immediately—keeping you well out of harm's way. While adjustable handlebars that swing left and right take care of keeping you out of those freshly tilled rows.

All it takes is a quick electric start, and you're ready to turn the earth around. To receive more information on Kubota's diesel tiller or our 2.2–7 hp gas-powered tillers, simply write to us at Kubota Tractor Corporation, P.O. Box 7020-A, Compton, California, 90224-7020.
