New bentgrass variety provides a truer putting surface at Wilmington CC.

When David Kroll, CGCS, was dealt the problem of bentgrass deterioration on the greens of this prestigious country club, he called in the experts to help. The greens could not be salvaged, so they were treated with methyl bromide and completely re-greened.

Dr. Joe Duich, Penn State University, suggested seeding with a bentgrass coded PSU 126.

Two and a half years later, the greens look great and with PennLinks' more upright growth pattern, putt like a dream. That experimental variety is now named PENNLINKS, and is available in limited quantities.

Available in limited supply this fall in the re-usable 6 gallon "PENN PAIL."

PennLinks' Oregon certified blue tags qualify for cash awards to qualifying turf organizations for turf research. Call our toll-free number for details.

Marketed by TEE-2-GREEN Corp., PO Box 250 Hubbard, OR 97032 1-800-547-0255 TWX 510-590-0957
Look closely at this course. No dollar spot in sight. Not even resistant dollar spot, thanks to Rubigan.

Rubigan controls dollar spot on your tees, greens and fairways for only about 10 cents per 1,000 square feet per day. That's all. And you get a full 28 days control with just one 0.4 oz. application per 1,000 square feet.

Now look closer. Notice there's also no fusarium blight, necrotic ring spot, summer patch or take-all patch. And no large brown patch, either, with a Daconil 2787® tank mix.

Only Rubigan is labeled to prevent and treat all these harmful diseases. No wonder Rubigan is the superintendents' choice for dependable dollar spot control in all types of weather.

This year, make your course look this spotless. Make it dollar spotless with Rubigan. See your Elanco distributor. Or call toll-free: 1-800-352-6776.

Dollar spotless.

Dollar for dollar, nothing controls dollar spot better than Rubigan®.
A quality cut isn't the only thing it's designed to leave behind

Make no mistake. The John Deere 756 and 856 are turf mowers first. Good ones. But what makes these two mowers even more attractive is their ability to do more than cut grass.

With the rear cutting unit removed (a job that takes less than 5 minutes), the 756 and 856 can do extra duty carrying rear-mounted implements.

Both feature Category 1 3-point hitch capability and drawbar. So, when needed, you can quickly put attachments like aerators or spreaders to work.

For mowing, the 756 and 856 both feature three 30-inch cutting units. All are hydraulically driven to deliver better quality cuts in long grass, wet conditions, or over contoured terrain. Places where ground-driven reels fall short.

Individual control of left, right, and rear cutting units also makes them perfect for areas where mowing around obstacles is a must.

Talk to your John Deere distributor today for more information on these multifunctional mowers. Or, write John Deere, Dept. 956, Moline, IL 61265 for a free brochure on all of John Deere's Golf and Turf Equipment.

The 756 and 856 both feature a Category 1 3-point hitch capability to carry attachments like the John Deere 206 Spreader or 260S Shatter Aerator.

Standard drawbar on 756 and 856 allows you to pull implements like the John Deere 140S Shatter Aerator.
**Cover Story: Cool-Season Insect Control Guide**

Here's what's new in cool-season insect control: Triumph has finally received a label; diazinon can no longer be used on golf courses; and nematodes may control insects biologically.

**Not So Fast**

Opinions on green speeds vary as much as the management practices themselves. In the following, a few superintendents reflect on the trials and tribulations of managing greens in the face of pressure from players.

**Guide to Lawn Grasses**

Confused about which new turf varieties will work best for home lawns? The executive director of The Better Lawn and Turf Institute tells what to look for in choosing good grass.

**Disease Guide for Cool-Season Turf**

No fungicide offers a complete spectrum of turf disease control. But, for most diseases, a range of reliable products is available and (in spite of enormous development costs), the introduction of new materials continues.

**Valuing Your Company**

If you are thinking about selling your landscape or lawn care company, how do you determine how much to ask? Or to expect from the potential buyer? These formulas should help you get in the ballpark, anyway.
THE ORTHENE MACHINE PROTECTS TURF BOTH WAYS.

IT'S MEAN.
Blasts sod webworms, mole crickets, and fire ants.
Continues to work systemically by remote control.
Sprayable by vehicle or on foot.
Gives effective, broad-spectrum control of armyworms, leafhoppers and greenbugs.

IT'S MILD.
Reduces need for bulky protective equipment.
Low toxicity to wildlife.
Convenient-to-use soluble powder. Compatible with most insecticides and fungicides—gentle on turf.
Once spray dries you can re-enter treated area immediately—ideal around golf courses and parks.
Gentle to streams and ponds fed by runoff.

Industry needs to join forces

Words from Larry Scovotto, executive vice president of the American Association of Nurserymen:

"A great deal of work needs to be accomplished on behalf of the landscape industry. The residential landscaper, the landscape contractor and the interior landscaper need to join forces in a unified business and marketing effort to make the commercial sector and the general consumer more aware of the value and necessity of landscaping.

"On the national level, there is a big job to be done in residential, commercial and governmental business promotion on behalf of landscaping. People at all levels need to be educated to perceive both the need and value of landscaping. The expectation of landscaping throughout our daily lives must become a part of a new national culture."

Governmental sales growing?

Sales of turf supplies to landscape managers in the government sector will be a growing area in the next few years, according to James I. FitzGibbon of Lesco Inc.

"Government, school and institutional sales has the potential to be a big revenue-producer for us in the near future," he told company employees and suppliers recently.

FitzGibbon made the comments at the company's annual sales meeting in Sebring, Fla. which featured two days of trade show exhibits. Seminars were conducted by Ciba-Geigy, American Cyanamid, Elanco, Hoechst-Roussel and Mobay.

Construction up, down

A construction boom is seen on college campuses in the next five years, but the overall construction outlook for 1988 doesn't appear as rosy.

According to The Chronicle of Higher Education, "a survey of college planners found that about 60 percent saw the need for new or modernized facilities on their campuses as 'extremely urgent' or 'very urgent.'" Why? Because the facilities built during the first post-war baby boom in the 1960s are reaching the end of their 25-year life expectancy.

However, the overall 1988 construction picture is not good, according to George Christie, vice-president and chief economist for McGraw-Hill Information Systems. "Lower interest rates, more than anything else, will make the difference between a shallow and a steep decline of construction activity" this year. Projection is that the total 1988 construction contract value will drop three percent lower than last year's $248.4 billion.
One great discovery deserves another. We call ours the Kubota F2000 front mower.

With a flip of a lever you're in 4-wheel drive, making fast work of those nooks, crannies, curbs and curves you can't landscape into submission.

Add front wheel differential lock, a 20-horsepower diesel engine, and travel speeds up to 9.5 mph, and it flies in the face of rain, snow and mud. With Kubota-like ease.

It has a hydrostatic transmission to spare you the trouble of clutching. Rear-wheel power steering and independent front brakes for precision maneuverability. And your choice of 60" or 72" mowers, a sweeper or snowblower. All lifted hydraulically.

Next time your turf throws you a curve, let our F2000 straighten it out.

Send for our free Grounds Maintenance Equipment Guide, by writing to Kubota Tractor Corp., P. O. Box 7020-A, Compton, California 90224-7020.

GOLF
Keeping your course secure

Vandals used to be a problem at Chicasaw Country Club in the Memphis, Tenn., area. No longer.

Jim Harris, Chicasaw superintendent, has some tips on how to keep undesirables off golf courses, especially in urban areas. They focus on “preventing rather than apprehending and prosecuting.”

- If an incident takes place and the culprit is not apprehended, keep it out of the media. This takes away his satisfaction.
- Have members keep valuables at home or in the locker. A number of players on his course had been robbed during rounds.
- Hire highly visible, uniformed security guards.
- Cover drain ducts with grates to keep people from crawling in through them and enclose the course in fencing with barbed wire on top if possible.
- Make sure everyone on the course can be identified: members, maintenance crew and caddies. Uniforms for maintenance crews are a good idea, Harris says. Question any unaccounted for people on the course.
- Control all course entrances and hire 24-hour security for the front gate, closing almost all the gates.
- There are, of course, some problems in taking these measures. “Locked gates meant vendors had to go to the front office and then be let in,” Harris says. Also, the pro shop couldn’t sell orange shirts because this was the color given to the maintenance crew.

LANDSCAPING
‘Million Dollar List’ led by Environmental

Sixty-seven companies made Lawn Care Industry’s second annual Million Dollar Mowers List, representing more than $170 million in mowing/management revenue in 1987.

Mowing/management revenue is that which is billed for mowing, trimming and clean-up services. Billings specifically for chemical applications, landscape installation, design and tree/shrub care are not included.

Fourteen companies joined the list this year. Two companies dropped off. Environmental Care (Calabassas, Calif.), The Brickman Group (Long Grove, Ill.) and Lancaster Landscapes (Arlington, Va.) held their respective first, second and third place rankings from last year. The rest of the top 10: 4. Northwest Landscape Industries (Tigard, Ore.), 5. Oyler Brothers (Orlando, Fla.), 6. (tie) Maintain (Dallas, Texas) and Cagwin & Dorward (Novato, Calif.) 8. Las Colinas Landscape Services (Dallas, Texas), 9. AAA Lawn Industries (Tucker, Ga.), 10. (tie) Shearon Environmental Design (Plymouth Meeting, Pa.), Pampered Lawns (Houston, Texas).

The companies averaged approximately 20 percent growth over 1986.

Company representatives attribute the growth to a continually wider demand for their services.

“I think developers are more aware of the need for curb appeal, selling their project as the people are walking in the door,” says Scot Davis of Davis Landscape Contractors.

“Maintenance is a market that’s really growing,” adds Wayne Richards of Cagwin & Dorward.

Dr. Robert Shearman

RESEARCH
Potassium prominence growing in turf care

As more research is conducted, results are showing more benefits of potassium use.

Within the turfgrass plant, potassium helps with sugar transporting, starch formation and enzyme activity. It also influences the opening and closing of stomata.

Studies conducted at the University of Nebraska on Fylking Kentucky bluegrass show that potassium increased root density and depth. “With increased potassium, wilting tendency is lower because of the decreased water use rate and deeper rooting,” explains Robert Shearman, continued on page 18

**LANDSCAPE MANAGEMENT**

MAY 1988

This card void after July 15, 1988

MY PRIMARY BUSINESS AT THIS LOCATION IS:

(PLEASE CHECK ONE ONLY IN EITHER A, B OR C)

A. LANDSCAPING/GROUND CARE AT ONE OF THE FOLLOWING TYPES OF FACILITIES:

- 0005 Golf courses
- 0010 Sport complexes
- 0015 Parks
- 0020 Rights-of-way maintenance for highways, railroads & utilities
- 0025 Schools, colleges & universities
- 0030 Industrial & office parks/plants
- 0045 Condominiums/apartments/housing developments/hotels/resorts
- 0050 Cemeteries/memorial gardens
- 0060 Military installations & prisons
- 0065 Airports
- 0070 Multiple government/municipal facilities
- Other type of facility (please specify)

B. CONTRACTORS/SERVICE COMPANIES/CONSULTANTS:

- 0105 Landscape contractors (installation & maintenance)
- 0110 Lawn care service companies
- 0115 Landscape architects
- 0125 Extension agents/consultants for horticulture
- Other contractor or service (please specify)

C. SUPPLIERS:

- 0205 Sod growers
- 0210 Dealers, Distributors
- Other supplier (please specify)

Approximately how many acres of vegetation do you maintain or manage?

What is your title? (please specify)

I would like to receive (continue receiving) LANDSCAPE MANAGEMENT each month: YES □ NO □

Your Signature: Date: ___ ___
