Sorry, crabgrass. Sorry, goosegrass. You won't be checking in here this season. Not on turf areas treated with Team preemergence herbicide.

Only one group has reservations. Your turfgrass. Even bentgrass can relax. Team is that gentle.

That means with a split application you can take an all-season vacation from weeds. From upset golfers, callbacks and costly reapplications.

Application is easy and accurate. Team gets to the ground where you want it. It won’t leach out, even in heavy rainfall. Once activated, it forms a zone of protection that shuts the door on weeds for up to 20 weeks.

Team is widely available on dry fertilizer from leading formulators, and in granular form from your distributor.

So if weeds are planning to visit your turf this season, tell them sorry. You've booked Team for the season.

Elanco Products Company
A Division of Eli Lilly and Company
Lilly Corporate Center
Dept. EM-455, Indianapolis, IN 46285, U.S.A.

Team™ — (benefin+trifluralin, Elanco)
Refer to the Team label for complete use directions.

With Team™ on your turf, weeds won’t check in all season long.

For Your Fertilizer Needs!

A TRUE SOLUTION. Nitro-26 CRN (26-0-0) is a liquid fertilizer so unique that it has all the advantages of both solutions and suspensions. In fact, it looks like a solution, but it contains long chain methylene diureas (MDU) normally found in suspensions. Low burn • Excellent stability • No special agitation • Less leaching & volatilization • Controlled nitrogen release • More uniform growth response • Longer residual response

Now, You Can Help Your Customers’ Lawns Recover From Drought.

Fall Applications of Bio Groundskeeper™ for Thatch Reduction

For a healthy, disease resistant lawn that requires less watering, strip away the blanket of thatch that blocks water and nutrients.

Reducing thatch helps lawns recover from drought and combat winter stress. Spring application continues recovery and encourages your customers to renew your lawn care program.

Research at Michigan State University rated Bio Groundskeeper™ for Thatch Reduction most effective for reducing thatch. Easy to apply liquid is ALL NATURAL.

So now you don't have to.

Until now, getting rid of ugly clumps of tall fescue was no easy task. The weed had to either be physically removed by digging or chemically removed by spot treating with a non-selective herbicide that left unsightly brown patches for weeks. LESCO TFC™ Herbicide changes all that. It's the first product to provide selective spot control of tall fescue in established Kentucky bluegrass, fine fescue, bentgrass, bahiagrass and bermudagrass turf. Active at a rate of just a few ounces per acre, the convenient water dispersible granule formulation exhibits both contact and residual soil activity. It slowly eliminates tall fescue, while allowing the desirable grass to fill in.

For tall fescue control without the digging, make LESCO TFC Herbicide part of your application program.

Order today. Contact your LESCO sales representative, visit the nearest LESCO Service Center or call us toll free.

Scotts TGR\* Poa Annua Control has joined forces with the Penn Pals to help you win the war on Poa.

When you apply Scotts patented TGR Poa Annua Control to enemy-occupied territory, it weakens Poa annua, while Scotts controlled-release fertilizer helps surrounding bentgrass thrive and overtake the Poa.

On bentgrass fairways and greens, overseeding two weeks later with one of the Penn Pals (Penncross, Penneagle, PennLinks or Pennway blend\*) helps speed up the transition

*Fairway use only.
to desirable turf. Soon you can stand astride lush fairways and greens and declare total victory.

Your Scotts Tech Rep is ready, willing and able to help you plan your attack, and supply your TGR Poa Annua Control and creeping bentgrass needs.

For more information, contact your Scotts Tech Rep or simply call 1-800-543-0006. In Ohio, call collect: 513-644-2900.

Why Dormant Feed Milorganite?

Reduce Operating Costs
You'll save time and money. Apply Milorganite in late fall for efficient labor and nutrient use. More time is available for you and your staff in late fall, and spring time crunches will be avoided when you dormant feed Milorganite.

The W.I.N. Factor
Dormant applied Milorganite does not burn, leach, or lose its nutritive value due to a 90% Water Insoluble Nitrogen (W.I.N.) factor.

Rich In Chelated Iron
Your turf will look great. Milorganite provides 4% min. iron and a full package of nutrients. That means an early spring green-up without excessive growth, with the iron content carrying the rich color well into the heat of summer.

New! Soil Moist Plus™
• Stores water & nutrients.
• Helps control overwatering.
• Easy to use.
• Reduces soil compacting.

SOIL MOIST PLUS works unlike any other product to time release both water and nutrients into the soil. It absorbs excess water with an action similar to that of a sponge and when the surrounding soil becomes dry, the product discharges the water into the soil as needed. As water is released, nutrients are also released into the soil. Write or call for free fact sheet.

For season-long, full-course protection, base your disease control program on CHIPCO 26019 fungicide.

When it comes to season-long, full-course protection, more and more superintendents are building their disease control programs around CHIPCO 26019 fungicide. That's because CHIPCO 26019 fungicide offers more important features than any other turf fungicide.

First of all, CHIPCO 26019 fungicide provides unsurpassed control of all major turf diseases: Helminthosporium Leaf Spot and Melting Out, Dollar Spot, Brown Patch, Fusarium Blight and Red Thread. Plus, CHIPCO 26019 fungicide protects against Pink and Gray Snow Mold as well as Fusarium Patch.

Secondly, CHIPCO 26019 fungicide delivers the longest-lasting disease control you can buy. Just one application protects your turf up to four full weeks.

Based on cost per day of control, CHIPCO 26019 fungicide ranks as your best fungicide value. That makes it the ideal replacement for fairway disease control.

You'll also like the fact that CHIPCO 26019 is easy on the environment, with no phytotoxicity. And now you can choose between two convenient formulations—wettable powder or flowable.

This season, cover your course with the best in disease control. CHIPCO 26019 fungicide.

Rhone-Poulenc Ag Company, CHIPCO Department, P.O. Box 12014, Research Triangle Park, NC 27709.
