"Now is not the time to go it alone."

"If you're like so many other lawn care companies, you have more than crabgrass to contend with. Sure, your sales are up—but so are your problems. Cash flow worries. The need for more employee training. The threat of growing regulation. The exploding costs of insurance and health benefits. These are only a few of the realities of running a lawn care business in the '80s.

That's where the Professional Lawn Care Association of America can help. PLCAA is the ProSource for over 1,000 businesses, large and small. PLCAA provides the benefits and resources you need regardless of the size of your company. Find out for yourself what so many other lawn care businesses have discovered, that PLCAA membership doesn't cost—it pays!"

JAMES R. BROOKS
Executive Vice President,
Professional Lawn Care Association of America

Check the PLCAA benefits...

- Management Monograph Publications—Booklets that cover critical business subjects like getting a loan, developing a marketing plan, hiring and firing practices, and more.
- Group insurance and health care—PLCAA offers health and life insurance plans for companies with as few as two employees—and at attractive group rates.
- Collection services—A results-producing collection service to help members with slow-paying accounts.
- Audio-visual training programs—Comprehensive, inexpensive video and slide programs for in-house training of your employees. Current subjects include insect and weed identification, turf diseases, and pesticide handling, with additional topics under development.
- Regional seminars—Each year PLCAA brings the latest in management and technical training, plus equipment demonstrations, direct to a location near you.
- Annual Conference and Show—Exhibits, educational sessions, workshops, and an outdoor equipment demonstration are just a few features of PLCAA's popular annual gathering of lawn care professionals.
- Exclusive publications—Stay current with Turf Talks, PLCAA's bimonthly newsletter. Members also keep in touch with tax, labor, financial and regulatory information through our periodicals, the Legal Update and Environmental Update bulletins.

And that's only part of the advantages PLCAA members enjoy. If you want to know more, just drop the coupon below in the mail, or give us a call at toll-free 1-800-458-3466.

Reducing liability from golf cart injuries

by James Leatzow, president, Leatzow & Associates

In this modern age it seems as though we take too many things for granted. Golf carts, as innocent as they may seem, are an example. These small, wheeled, mobile recreational vehicles hold the potential for significant lawsuits in today's litigious society.

If an accident occurs involving a cart, it's likely that the injured party will allege it was poorly maintained. Unfortunately, it's up to the owner/operator to prove that the vehicle had been properly maintained and serviced. To prove this, you must be able to provide bona fide maintenance records as well as some form of formalized procedure manual covering the scope and frequency of the work performed to the golf cart in question.

You will help your case immeasurably by requesting a cart's maintenance procedures when you buy it. You should then follow its scheduled maintenance to the letter. However, all of this effort is of little or no value unless you document and file records showing it—which should be standard procedure for virtually all golf course equipment.

**Essential maintenance**

Make sure that tires have enough tread to keep the cart from sliding on a slick or wet surface. Its pedals should be equipped with a rubber pad. Routine inspections should include checking for loose bolts, sharp objects and broken or missing parts—all of which could injure someone during a sudden stop or on rough terrain. Likewise, if the cart has shock absorbers to reduce its sway or roll, follow the manufacturer's maintenance instructions carefully.

It is also very important to replace safety placards on the carts. Though these stickers will be scratched and marred over time, it's still your responsibility to make sure they can be read at all times.

There are other dangerous exposures that aren't attributable to the cart itself. For instance, a cart path that passes by a steep incline without safety fencing may lead to an accident. It is very important to make certain that cart paths and other areas where carts may be used are safe and free from dangerous situations. Golf cart paths that are properly maintained go a long way to show that your operations meet the test of safety and care for public health and welfare.

**Posting terrain**

If the golf course you are designing or involved with has terrain that might be dangerous for the typical cart user, make sure they fully understand all exposures. During the rental process, have them sign a readable, printed form that states they will be the only operator of the cart, that they understand the terrain might be dangerous if the golf cart is not used properly and that alcohol and other drugs will impair their judgement and ability to operate the equipment.

Obviously, there are no foolproof precautions you can take, but you should be interested in trying to educate the routine user about the potential dangers of golf cart use.

Remember that if you are drawn into court because of an alleged injury, the burden is on you to show that your carts and environment are safe and that all common sense dangerous exposures have been addressed to prevent injury. Anything short of that can ultimately lead to a large payout against your professional or general liability policy.
“On a busy day we’ll handle more than 500 golfers. That’s when we really see the value of Lebanon quality in action.”

Donald Amsler
Golf Course Superintendent

The 5th Hole, Sandpiper Course, Spring Lake Golf Course, Middle Island, NY

There’s no margin for error on a heavy-traffic course. Which is one reason why more golf course superintendents depend on the premium quality of Lebanon Country Club Turf Products.

Our homogeneous fertilizers are formulated with time-proven methylene ureas. So every granule delivers a constant, predictable release of plant food — giving you quick green-up, consistent growth and color and a residual base you can build on year after year.

For more information on our complete line of products, contact your local Lebanon distributor today. Or call our Greenline at 1-800-233-0628 or 717-273-1685.

Deep-tine machines debut at GCSAA

The model 105.145 Verti-Drain Deep Tined Aerator is one of three new models introduced at the recent GCSAA show. Verti-Drain reports that its deep aerators have proven successful in alleviating the most difficult soil compaction problems, going more than twice the depth than other available aerators.

The Verti-Drain units are powered by the PTO of a category 1 or 2 tractor, and are capable of aerating up to four acres a day. Verti-Drain continuously drives solid or hollow coring tines into the soil to depths ranging from two to sixteen inches. Tines pivot back and forth, causing a "lifting" effect in the soil, and combines penetration through the soil pan for vertical drainage with the shattering effect of the compacted layers for thorough aeration.

Power-take-off mowers for quality

Brouwer reports that its new transportable PTO-driven mowers give a fine, quality cut regardless of weather conditions. The standard Brouwer mowers with fixed mowing units give reliable and economic service, and can go the distance on long, tough grass.

Brouwer says the Fairway models have a unique floating mowing unit design that delivers an outstanding, quality cut, even in wet weather. All mowers are equipped with positive height of cut adjustment and optional quick height adjusters.

They are available in three-, five- and seven-gang units, manual or hydraulic lift and a choice of four- to eight-blade reels.

Nematode control product approved

A new product for control of plant pathogenic nematodes is called ClandoSan, from Igene Biotechnology, Inc. ClandoSan has been given EPA unrestricted use approval for all crops, turf and ornamentals.

ClandoSan, reports Igene, is completely safe, non-toxic and non-soluble and its mode of action is indirect. ClandoSan is composed primarily of...
chitin, which is derived from shellfish waste through a patented process. The chitin stimulates normal soil micro-organisms to produce enzymes, which destroy the nematodes and their eggs.

**Total turf aerator proven in field**

Salsco has introduced the TTA-550 Total Turf Aerator, which brings together the proven technology of the TTA-60-24 aerator and a comfortably efficient riding unit. Powered by a 20-hp Kohler engine, the TTA is described as ideal for greens, tees, fairways, sports fields and other large turf areas. Variable core spacing from one to six inches enables the TTA-550 to aerate more than 60,000 sq. ft. per hour.

Tines are raised and lowered hydraulically and are driven by Salsco's patented "Camshaft Free-Float Tine System." Hole spacing can be adjusted without stopping the machine.

**High-rotation sprinkler quick, covers lightly**

Hunter Industries has introduced the I-42 sprinkler, designed "for irrigation situations where a fast, light application of water is desired."

The gear-driven model can be used for syringing golf greens and lightly irrigating clay tennis courts, skinned baseball diamonds and horse race tracks. According to Hunter, the sprinkler also works well to control frost.

Its 4-inch pop-up stroke incorporates all the standard features of Hunter's Institutional Series, including a safety-cushioned rubber cover, locking body cap, and slip clutch protected drive system. An interchangeable nozzle-stator set supplied with each sprinkler allows the discharge rate to be adjusted from 6.5 gpm to 25.8 gpm. The I-42 is available in 17 course covered.

**Surflan** covers your ornamentals against weeds and grasses.

Spray Surflan directly over the top of your ornamentals. Without fear of injury.

It controls over 50 different weeds before they start, including crabgrass, oxalis, chickweed and prostrate knotweed. All season. For less than $3.00/1,000 sq. ft. Compare that to handweeding labor costs of $30-50 for the same area.

**Rubigan** covers your course against dollar spot, anthracnose and patch diseases.

Fusarium blight. Necrotic ring spot. Summer patch. Take-all patch. Spring dead spot. All patch diseases are difficult to tell apart, difficult to control.

Only Rubigan is labeled to prevent and treat all five. Not to mention nine other common turfgrass fungal diseases. So why take chances controlling only part of the patch disease problem? Rubigan gets them all.
fixed arcs of coverage and a full circle.

Colorful shrubs introduced for '89
Hines Nurseries has introduces five shrub varieties for the upcoming season.

Hines Gold is a cultivar selection of the popular evergreen shrub, Gold Spot Euonymus. It features pure yellow-gold leaves bordered with dark green margins.

Moon Bay (Nandina domestica) is globular in form, well-groomed and bright lime green color that matures to medium green.
Hines' Brazilian fuchsia (Justicia rizzinii) is a herbaceous evergreen covered with drooping tubular, one-inch flowers that are bright red and tipped with yellow.
Japanese Beauty Berry is a deciduous mounded shrub with arching branches, growing to as high as six feet. Metallic-purple fruit forms in late summer and remains in fall and winter.

Line-stripper is self-propelled
The All-Pro is a new self-propelled line stripper designed exclusively for athletic field marking. Newstripe reports the product's design enables you to line your field up to four times faster than current models.

Capacity is 12 gallons, enough for an average size football field. A 3-hp, air-cooled engine powers the All-Pro along its 26" X 20" wheel base. Four interchangeable nozzles are available. Paint flow is controlled by a spring-loaded valve and hand lever.

Foam marker now for the turf market
A.D.J.A. Industries of Salt Lake City has designed a foam marking system specifically for the turf market to avoid overlaps and misses. No pumps or compressors are involved, thanks to a pre-charged cannister.

The Duck Plant is named for its papery, duck-like seed pods. Narrow curved flowers measure about an inch in length and bloom a bright brick red from January to June, followed by the pale green inflated seed pods.
It grows to a maximum height of six feet.

Of course.
Yet that’s pretty much the additional cost for an engine that outlives all others of its generation.
The Wisconsin Robin.
We’ve designed important components, like the automatic decompression system, with fewer moving parts. And greater size per part. Making the engine much better equipped to endure hardships, tribulations, and stresses without coming to an untimely end.
So in your search for equipment, make sure it has a Wisconsin Robin engine. And enjoy two extra years or so of productive, powerful life before you have to shell out several hundred dollars for a new engine.
For an extra twenty bucks, it’ll seem like an eternity.
Wisconsin Robin
More power to you.
Herbicide available for many grasses

PBI/Gordon Corp. has introduced Trimec Southern, a broadleaf herbicide for use on Bermudagrass, centipede and St. Augustinegrass as well as zoysia, fescue and other turfgrasses.

The company says Trimec Southern is formulated as a high performance, post-emergence weed control treatment for 2,4-D sensitive grasses. At the recommended rate, one gallon covers up to eight acres of St. Augustine or centipede at a matarial cost as low as $4 per acre, based on 1988 end user pricing. Cost and dosage for Bermudagrass are slightly higher.

Mower attachments can carry it all

Lawrence, Inc. has designed a new generation of rugged yet lightweight attachments for front-mount mowers and tractors with category 1, 3-point hitches.

You only need five minutes to change from a tote platform for transporting shrubs or fertilizer to a 12-cubic foot Hooper for hauling bark or debris.

Additionally the line offers an aluminum Hopper, Scoop and Tool Organizer along with a steel Fork Set and Tote Platform Bracket Kit. Quick release pins make for one-man installation.

Tree injector is safe, accurate, easy-to-use

The Davey Tree Expert Co. has developed a new four-point, CO2-powered system to inject trees. The system is presently used in the utility and municipal arborcare market for injection of tree growth regulators. The injection system and material reservoir are self-contained in one easily-transported case. Features include minimal injection time, no manual filling or measuring for each hole, a closed system, reduction of daily cleaning and immediate priming system. Cylinders are easily adjustable for different injection rates.

New concept for pH meter-users

Cardy is a new, compact pH meter which provides quick, digital pH readings. Soil samples are placed on a flat sensor pad, which is a glass electrode system, with three or four drops of deionized/distilled water.

The Cardy liquid crystal reads 0-14 pH with a repeatability of plus or minus 1 pH.

Troubled waters?

**Otterbine Aerators**

The prescription for troubled breathing, poor circulation, and changing temperatures in ponds and lakes is practical engineering that is esthetically pleasing.

These aerators range in power, circulating from 600,000 to 20 million gallons of water in a 24-hour period. Each complete, turnkey system is delivered fully assembled; no special pumps or foundations are required.

Striking patterns begin with the Starburst, Rocket, Sunburst, Constellation, or Phoenix working alone or mingled together. Add the Otterbine Fountain Glo™ lighting system for spectacular evening display as well as security or the Rock Float Cover for the illusion of natural spray.

Otterbine Aerators meet the water management needs of golf courses, parks, recreational lakes, office developments, and residential condominiums. Call or write for more information:
