Adjuvants from Terra buffer, improve mixability, reduce drift, suspend, defoam, increase deposition, penetrate, spread, wet, cover, coat, hold, protect, prevent evaporation, mark, extend, solve problems, clean, and pay off with improved pesticide application & performance.

Make the most of your pesticide investment this season. Talk to Terra for the right products, advice and service.

Always read and follow label directions.
Overhead:
a vital part of profit-making

Consultant Charles Vander Kooi says you don't start making a profit until you pay 'the bill in the night.'

When Charles Vander Kooi finally leaves this friendly world, he wants just two words chiseled onto his tombstone: "overhead recovery." That's exactly what he told lawn care professionals at this past November's PLCAA conference in Baltimore.

Valuable pricing tips

• Every contractor should review their pricing system to see if it meets the following four criteria, says business consultant Charles Vander Kooi:
  1) Does it give the owner the ability to know where every dollar that is spent comes back to the company through its prices?
  2) Is it able to compensate for the variables that exist from job to job, from property to property? "I've never, ever seen two jobs identically alike," says Vander Kooi.
  3) Does it give the owner the ability to control the job and the company more? (Simply put: getting the job done at a price "that leaves a profit.")
  4) Does it give the owner the information needed to make good business decisions? (Not decisions based on emotion or a "gut feeling.")

(Hey Chuck, what's wrong with "business consultant?" Or "longtime construction industry guru?")

Vander Kooi says he wants contractors to always remember him and the two words overhead recovery synonymously. Forever. That's how crucial he feels these two words are to the continued business survival of any contractor, including landscape contractor.

Contractors must have systems to recover overhead if they want to stay in business, i.e. make a profit. If they don't have ways to recover overhead, it will strangle a company as surely as the sun rises every morning, says Vander Kooi.

In fact, he insists, a contracting business can suffocate even with money coming in and everyone busy. It will die because no profit is being absorbed by overhead that isn't being rightfully recovered from customers. Vander Kooi has a rather dramatic way of describing overhead: he calls it "the bill in the night."

It always comes due, he insists, every nickel, dime and quarter. It's never forgiving.

"Overhead is a lot more of a fixed cost than most contractors would understand," says Vander Kooi.

Successful contractors "recover" overhead in large part, through pricing/bidding systems based on a realistic understanding of the true costs of operating a business, particularly the true costs of overhead, he explains. It takes some digging to really nail down overhead because costs are often hidden in twilight areas.

Usually these expenses can't be billed directly to customers but they must be recovered nonetheless. They include, among many others, the expense of getting to and from jobs, or the cost of disposing of landscape wastes arising from work on a customer's property.

In truth, Vander Kooi says, a contractor should look at overhead as "the family budget of the business."

And, just like a budget, contractors must determine what their overhead is going to be prior to starting a business season. "You have to project a future overhead that you will recover over future jobs," he says.

The reason is obvious, he says. No business can make a profit until it's paid off its overhead. In landscape contracting, this is typically anywhere from mid-October to early November.

That's why instead of slowing down for the holidays, Vander Kooi says this is the time for landscape contractors to "put the pedal to the metal" and maximize production and profits.

Even then, says Vander Kooi, the national average of profit for both low-risk (those who sub-contract out most work) and high-risk (those who hire and manage a lot of labor) contractors is about two and three percent, respectively.

—Ron Hall

Charles Vander Kooi urges contractors to calculate 'true' costs before putting a price to their services.

FOR PROFESSIONALS

Get the competitive edge with good business management: improve customer service; enhance finances; know the industry; bid smart. Make sure up-to-date information is at your fingertips by adding these books to your library:

LANDSCAPE MANAGEMENT 1993 DIRECTORY AND BUYER'S GUIDE
Your complete guide to the professionals you want to contact for business, including key contacts at land grant universities across the country. Sections include equipment, equipment companies, seed and chemical companies, and control products. Find extra tips and information in special departments spotlighting products and "As We See It." 112pp. IS-BG-S $10.00

BIDDING FOR CONTRACTORS: HOW TO MAKE BIDS THAT MAKE MONEY by Paul J. Cook
A clearly defined working guide for producing winning bids. Learn the benefits of the author's extensive experience in construction project management by providing contractors with the necessary tools to develop competitive bids from small jobs to multi-million dollar projects.
225pp. BK-348-S $35.95

START & RUN YOUR OWN PROFITABLE SERVICE BUSINESS by Irving Burstiner
Step-by-step how to follow your dream of owning your own business into the reality of the service sector. Find out how to plan, launch and successfully run a service business: prepare a business plan; master the financials; buy an existing business or start a new one; choose a place of business; market your service; forms required for a proprietorship, partnership, corporation; model business plan; sample tax returns; and a list of selected franchise operations.
286pp. BK-349-S $18.95

ACHIEVING EXCELLENCE THROUGH CUSTOMER SERVICE by John Tschohl with Steve Franzmeier
This savvy guide holds all the ways to establish caring, dependable and speedy service to bring customers back again and again. From hiring and motivating workers to refocusing company policies and procedures on customer satisfaction, this book is the answer to customer service.
304pp. BK-350—$22.95

FINANCE AND ACCOUNTING FOR NONFINANCIAL MANAGERS by Steven A. Finkler
Completely updated, this expanded edition explains the basics of finance and accounting in clear, non-technical language. Get a firm grip on everyday business transactions involving finance, assets, depreciation, liabilities, inventory, costing, owner's equity, capital budgeting, audits, cost accounting, cash-flow statements, ratio analysis. Includes current tax laws.
225pp. BK-351—$14.95

WINNING STRATEGIES FOR LAWN & LANDSCAPE CONTRACTORS - A SYSTEM FOR SUCCESS by Brent Demos
Discover proven techniques that will help you meet and beat the competition! Win more bids, increase jobs from current clients, hire productive employees, and learn successful management skills. This comprehensive manual also includes effective tips for marketing and advertising, equipment management, diversification, education and training.
136pp. LSM-BK-761-S $59.95

LAWN CARE INDUSTRY STATE OF THE INDUSTRY REPORT
An up-to-date report of lawn care business growth, average annual expenditures, and a look at the future of the industry. Ranks the largest lawn care businesses in North America.

What you’re looking at is the way to go an entire season on a single herbicide application—a control zone in the top inch of soil that keeps weeds from germinating all season long. It can greatly reduce your use of postemergence herbicides and handweeding in your ornamentals. We have three different pre-emergence herbicides that make this possible. All of them are very gentle on your plants. And they bind tightly to soil particles, which makes them very resistant to leaching. If you’re looking for grassy weed control, you can use Surflan® preemergence herbicide. Surflan is, in fact, so gentle that you can spray it directly over the top of delicate ornamentals. Yet one application gives you up to eight full months of control.

If you like what Surflan does, but prefer a granular form, you can use XL® herbicide. It contains the same active ingredient as Surflan. Apply it in the spring, and you’ll get a full season of broad spectrum grassy weed control.

And for woody ornamentals, you can use Snapshot® herbicide.

### How To Make Your First Roundup Your Last Roundup

Here’s a way to make your first application of Roundup herbicide last all season. Mix 3 oz. of Surflan per 1000 square feet with ¾ oz. of Roundup per gallon of water and apply when weeds are less than 6” tall. Roundup will knock the weeds down, and Surflan will keep them from coming back for the rest of the season. Since Roundup is a postemergence herbicide, do not spray this tank mix on any desirable vegetation.

It controls both broadleaf and grassy weeds. A single application lasts up to eight months. And it’s available as a sprayable or in a granular form.

We can show you lots of ways to control weeds more safely and effectively. They’re explained in our 40-page book, The Nursery And Landscape Guide To Responsible Pest Management. It also contains information on better ways to control insects and diseases. For a free copy, mail the coupon, or call our toll-free number. Because

Becoming a ‘Certified Turfgrass Professional’

University of Georgia's Helen Mills: certification candidates go at their own pace

can be known as CTPs.

They can wear the distinctive new green-and-white patch on the sleeves of their uniforms.

John Robinson, PLCAA’s immediate past president, says certification will help confirm to the public that lawn care companies have better trained technicians in the field.

Adds Steve Derrick, Orkin Pest Control, “We in lawn care knew we had to increase the quality of service and also the perception of quality that our customers had of us.” That, says Derrick, is why PLCAA sought help in administering and managing the program. “We wanted an outside credible source so it wasn’t us training us.”

When Derrick contacted Dr. Keith Karnok, professor of agronomy at UGa, he found a ready ear. Karnok, author of “Principles of Turfgrass Management” with more than 17 years experience in both warm- and cool-season turfgrasses, directed PLCAA to Helen Mills, U.Ga. Center for Continuing Education.

The Center, Dr. Karnok and PLCAA then collaborated on building the independent study course that technicians must complete and pass to earn certification.

Mills says the home correspondence course is based on the notebook “Principles of Turfgrass Management.” It is divided

---

Quote of the month comes from Michael Fumento, author of the book “Science Under Siege.” While attending the Georgia Turfgrass Conference, LM heard Fumento utter this memorable line: “I’ve got very good news if you’re a bullfrog. No amount of dioxin will make you croak. On the other hand, it won’t make you a prince, either.” Second runner-up for quote of the month also comes from Fumento’s mouth: “Wouldn’t it be great if every community in the country had a lower-than-average risk of cancer? It’d be great! It’d also defy all the laws of mathematics!”

Think you’re busy? Then LM advises you compare your schedule with that of Dick Ficco, one busy person. Ficco, the president of Partners Quality Lawn Service, Easton, Mass., heads the Massachusetts Association of Lawn Care Professionals, serves on the boards of both PLCAA and the Massachusetts Turfgrass Advisory Commission, is the resident lawn care spokesman on WBZ Radio, and is a frequent guest on local television. Last year, he also accepted an appointment to the national EPA Pesticide Users Advisory.

A long-standing friend the green industry, Bill Culpepper, is starting his own business. Culpepper, formerly of DowElanco, will manufacture and market three control products—Arest, Pipron and Sonar—through the new company, SePro. He will also be the exclusive U.S. distributor of Rubigan to the specialty horticultural markets. Culpepper was formerly on the board of directors of RISE, the PLCAA and the GIE. “We’ll address the more specialized markets within the green industry,” Culpepper tells LM. “Frankly I love it. I like to put together a whole lot of little pieces and make it make sense.” You can contact SePro at (317) 580-8282.

FX-10 is the new “miracle” turfgrass in Florida. According to a press release received in the LM offices: “during the ‘storm of the century...on the shores of Tampa Bay...homes landscaped with FX-10 received little or no erosion damage while homes in the same development without FX-10 had entire lawns washed away. Bobby Bonilla, the New York Mets outfielder, uses FX-10 for his lawn and helicopter landing at the mouth of the Manatee River, says Jim Anderson of Anderson & Son Nursery, Ruskin, Fla. For more info about FX-10, phone (800) 532-7006.

Dr. Bruce Ames continues his crusade against seemingly unfair EPA requirements and the glut of professional environmentalists. An LM staffer, en route to a state turfgrass conference was reading a recent issue of Forbes magazine. He noted this quote from Dr. Ames: “I think the EPA kills people. I knew lots of good guys who went to work for the EPA because they were idealists, but it’s run by lawyers, and the institutional incentives take over. The scientists on the committee...keep putting out lousy reports” because of the pressure to conform to established government risk standards.
When it comes to guarding against weeds, think of us as man's best friend.

The Andersons Proven Professional Turf™ Fertilizers Combined With TEAM™ Broad Spectrum Weed Control Get You The Results You Need To Turn Customers Into Friends For Life.

Standard Professional Turf fertilizer formulations incorporating Team include:
- 25-3-8
- 20-2-6
- 20-5-5

Each product is individually designed to meet specific nutrient requirements and deliver up to 16 weeks of effective weed control. But you get more than effectiveness. You get efficiency, too, because you get two jobs done with one application.

Team is a proven performer when it comes to crabgrass, goosegrass and many other pesky weeds. Plus it's labeled for use on most major turfgrass species. With The Andersons superior formulating capabilities you get clean, free-flowing products for consistently great results. Use The Andersons Professional Turf fertilizers with Team and make your customers friends for life.

Orkin’s Steve Derrick: industry needed a credible outside source

into 14 chapters. Review questions at the end of each chapter prepare the technician for the four open-book mail-in tests. These are then graded and returned to the technician.

At the end of Chapter 7 the technician must take a monitored, closed-book exam; then, a second monitored exam at the completion of the notebook. The technician must score 70 percent or better to earn the CTP designation and patch. The U.Ga. will arrange exam details with a university or college in the technician’s geographical location.

Mills says a technician can take as long as 12 months to complete the course. “It’s up to the students to let us know when they want to take the exams,” she says.

PLCAA Government Affairs Director Tom Delaney believes the certification program may help companies retain employees better. “Technicians can feel better about themselves,” he says.

Delaney says he’s alerting regulators in every state to the new program. “I feel a lot of them are going to jump on this.”

The enrollment fee is $275 per person. Discounts for multiple enrollments from the same company are available. Cost to PLCAA members is $225 per person.

For information on course enrollment, call the University of Georgia at (706) 542-1756. PLCAA members should call (800) 458-3466 for information concerning special member rates.
