IF THIS IS WHAT YOU THINK PRIMO DOES TO YOUR GRASS,

It's time we set you in the right direction.

Lots of people know that Primo® regulates the growth of grass. But not as many understand how.

Primo doesn't stunt turf. Instead, it redirects the grass's growth.

Unlike other growth regulators, which actually stop cell division, grass treated with Primo will still be actively growing, producing the same amount of new cells. Only now the cells will be smaller. Smaller cells mean a more compact plant.

Nutrients that otherwise would be needed above ground are now channeled into the roots, giving you a thicker stand, and up to 25% more root mass. So the grass can more efficiently take up water and nutrients.

And Primo is foliar-absorbed, so there's less risk of inconsistent uptake.

The result? The easiest-to-manage, best-looking turf you can imagine.

It's easy to see why all roads lead to Primo.
Lawn, tree and landscape software includes support

The “Lawn Genius,” from Genius Software Development Corporation is easy to use and pays for itself.

A personalized “Lawn Genius” program fits your specific business needs.

With this program, you can automatically route and schedule jobs with less paperwork. You decide which customers get billed and when.

Comprehensive manuals and on-screen help and telephone support are also available.

The “Lawn Genius” will help customize services for individual customers, print invoices, statements, work schedules and more than 100 reports.

A built-in mail merge function is included for making selective mailings.

Complete pesticide tracking and reporting is included, and the program will handle any method of billing.

Three versions are available, for trial runs, small business and networks.

Solar-powered trim mower needs little care

Solar Power International, Inc. has introduced what it calls the world’s first solar-powered lawn mower for the consumer market.

The result of extensive research and development, as well as on-site testing, the Solar Mower uses the same solar cell technology that drives NASA’s space program.

Three state-of-the-art solar panels, comprised of 72 highly efficient, individual silicon solar cells, charge the all-weather Solar Mower, even as you mow.

Reel mower features on-demand four-wheel drive

The Toro Company’s Reelmaster 3500-D is designed for a broad range of mowing applications over smooth and rolling terrain.

The versatile triplex mower features on-demand four-wheel drive and a 36-hp diesel engine for optimum traction and power. Variable reel speed control allows for precision cutting.

Software designed with help of landscape pros

The TRIMS Grounds Management Software provides landscape managers with instant access to information, and lets them make better management decisions.

TRIMS Grounds Management Software is a simple solution to the paperwork and record keeping required for today’s landscape management professional.

Features include:

- ease of use;
- “point & shoot” mouse operation;
- integrated operation;
- informative graphics;
- modular construction.

Prior computer experience is not required.

Scrolling, mouse operation and function keys make TRIMS easy to use for both the beginner and advanced user.

Simple prompts and help screens guide the user through the necessary steps for data entry and reporting.

‘Mini-prill’ formulation new to fertilizer product line

Vicksburg Chemical Company has developed 12-0-42 K-Power controlled-release mini-prill blend fertilizer with controlled-release nutrients for use on greens and close-cut turf.

This product provides 50 percent controlled-release nitrogen and potassium from polymer-coated potassium nitrate.

According to national sales manager Michael Larisey, the easy-to-use mini-prill formulation combines a desirable nitrogen-to-potassium ratio with the benefits of slow-release nutrients.

Front mower available with 4WD

Kubota Tractor Corp. has introduced the GF1800 front mower with 4-wheel drive, designed for enhanced maneuverability in a variety of mowing conditions.

Featuring a unique Foot Control 4WD and an independent hydraulic PTO, the 18-hp GF1800 changes easily between two and four-wheel drive, and offers increased mobility on slopes and in soft ground conditions.

The 4WD GF1800’s unique two-pedal design allows the operator to switch easily between drives by simply stepping on either the 4WD Lock Pedal or 4WD Release Pedal. This Foot Control 4WD can be activated “on the go,” permitting quick response to changing ground conditions.

New, nimble gloves cover worker protection standard

Covering hands with chemical-resistant gloves when working with pesticides is the law under the EPA’s Worker Protection Standard. The problem is, the gloves can make it difficult to change sprayer tips and nozzles.

Gempler’s new, 100 percent Nitrile gloves provide protection without sacrificing dexterity.

The Nitrile gloves are recommended over rubber for chemical work, says the company, and resist damage from acids, caustics, solvents, grease, punctures and tears.

The embossed, anti-slip grip holds tips and nozzles tightly without impeding finger movement. Unlined and flock-lined pairs come individually packaged.

Apply fungicide to trees with injection system

Chipco’s Aliette Injectable brand fungicide is available for use in trees through an innovative micro-injection system from the ArborX company.

The technology lets the operator inject the material directly into the tree. Consequently, those who provide professional tree care can deliver an immediate self-contained dose of the fungicide’s disease-control properties.

According to Chipco, the technology addresses the issue of potential applicator exposure to chemicals and can also be useful in saving urban trees in situations where high pressure spraying is not a practical option.

Weather satellite service keeps watch for lightning

Golf Communications, Inc. has offered GolfLink—called the first complete golf weather and information satellite service—to the green industry.

GolfLink is designed to keep golf professionals, superintendents and players informed of the latest information in the golf industry.

GolfLink provides news from national and local golf and superintendent associations, tips from the pros, new product information and much more.

The most exciting feature about GolfLink, according to the company, is the weather and lightning information provided to all subscribers. GolfLink has the most complete weather and lightning package that is offered to anyone in the golf industry.

This system offers 12 different maps from national and regional radar maps; jet stream, temperature and soil temperature maps; action radar maps showing the movement of weather front; high and low forecasts and any other type of information that relates to weather.

All of this information is updated several times an hour.

The Lightning Strike maps can help warn golfers of any lightning strikes in the area.

All information is available 24 hours each day, seven days a week.

Cost is a $250 one-time fee, plus $58.25 per month. A two-month trial offer costs $159.
Kubota’s FZ2100 and FZ2400 with Zero Diameter Turn (ZDT) run circles around the competition.

The power in the innovative FZ front mowers starts with 20 or 24 horsepower Kubota liquid cooled diesel engines and continues with the Auto Assist Differential (AAD) drive system that automatically switches between 2WD and 4WD to match operating conditions. With AAD, you get extra power to maneuver easily in wet grass and muddy conditions with the front wheels rotating freely through the tightest turns. The FZ can turn completely around in one spot without damage to the turf, cutting way down the time spent on labor-intensive hand trimming jobs.

For productivity and versatility, Kubota’s F-Series front mowers can’t be beat. The F2400 is 4WD and 24 horsepower, while the F2100 is available in 2WD or 4WD, and has 20 horsepower. Both have Kubota diesel engines, and are equipped with hydrostatic rear-wheel power steering for easy handling. A wide selection of Performance Matched Implements provide the versatility. They include triplex reel, rotary, flail and mulching rear discharge mowers, rotary broom, leaf blower, snowblower, and front blade. Roomy operator’s deck, tilt steering wheel, and excellent visibility increase comfort and productivity.

Your Kubota dealer can show you the complete Kubota turf equipment line with the power and maneuverability to run circles around the competition.
Roll-type aerator added to product line

Classen adds the new model TA-19 self-propelled, roll-type core aerator to its line of turf equipment.

The TA-19 is powered by a 4-hp Honda engine and covers up to 24,000 sq. ft. per hour.

Other features include:
- a rugged, one-piece frame with a removable weight bar;
- user-friendly handle and controls.

The TA-19 will easily fit through a 30-inch wide area.

Foliar fertilizer improves turf color, spreads nutrients

Terra International introduces the foliar fertilizer Six Iron to its line of professional turf products.

Six Iron is a ferrous sulfate, urea and sulfur combination that improves the color of turfgrass.

Terra reports that foliar applications of Six Iron distribute iron and nitrogen more rapidly to the turf than do soil applications.

Six Iron is available in 2.5-gallon jugs and 55-gallon drums.

Broader label designation for ornamental herbicide

The Environmental Protection Agency has approved an expanded label for Pendulum WDG herbicide from American Cyanamid Company.

The new label enables landscapers, nursery growers, lawn care operators and golf course superintendents to use the product over the top of an additional 70 species of ornamental plants.

With the new label, Pendulum WDG herbicide may be used to control grasses and broadleaf weeds in more than 260 species of trees, shrubs, flowering beds and ground covers.

The product contains pendimethalin, a leading pre-emergence turf herbicide.

Self-propelled field stripper has a 3-year warranty

The Brite Striper 2000 now carries what Pioneer Manufacturing says is the longest warranty in the industry: three years.

Three large, 13-inch wheels provide smooth rolling on rough surfaces.

An extra-large, 12-gallon, stainless steel tank reduces the number of delays for refilling. A Thomas-diaphragm-type compressor prevents costly and time-consuming problems associated with oil mixing and marking paint.

Company makes vertical shaft engine

Briggs & Stratton Corporation's new Quattro engine provides economical and dependable power and low-cost differentiation in price-sensitive markets.

The powerful, 4-hp, 10 cubic inch engine offers a distinctive, contemporary-styled appearance. Features include a large rewind and mechanical compression release for easier starting.

Other features include Magnetron electronic ignition, foam element air cleaner, and a two-year consumer warranty.

An extended oil fill and automotive type dipstick makes it easy to accurately check and service engine oil.

New line of stone seats, tables, benches for outdoors

An expanded line of cast stone site tables and benches has been introduced by Dura Art Stone, bringing to 15 the number of standard tables it makes for picnic, game, recreational and general outdoor use, including a variety of shapes in traditional and art deco styles.

All tables have matching seats or benches that are either freestanding or an integral part of the design, as with picnic tables.

All styles of table offer the beauty and permanence of top quality cast stone in a choice of 18 standard colors and six finishes.

Most designs include wheelchair access by modifying the table height in compliance with Americans with Disabilities Act standards.

Other standard options include umbrella holes for tables and a variety of installation mounts to meet different application needs.

Fertilizer spreaders have many options, sizes

Precision cam gauge metering on Gandy 10 Series spreaders give accuracy and simplicity in gravity flow application of fertilizer, granular material and seeds.

Standard powder angles can be installed on the internal rotors for added agitation when applying granulated lime.

Each spreader has a cold-roll steel bottom with stainless steel slide which are precision mated at the factory for accuracy.

Hopper capacity is approximately 100 lbs./linear ft., with hoppers available in six-, eight- and 12-foot sizes in four models—trailer model, 3 pt. hitch end-wheel drive model and 3-pt. hitch or implement-mounted with 12-volt motor or hydraulic motor drive.

'Boom' applicator greatly reduces spray product drift

Environmental Technologies has introduced the "ultimate" walking boom spray applicator that virtually eliminates spray drift to ensure the spray goes and stays where you want it. The enclosed design also improves operator and environmental safety while reducing public complaints.

The Drift Guard WB70 is a 3-section boom that follows ground contours to ensure accurate spray application.

The wings fold for easy transport and storage. The walking boom also comes standard with a nozzle flow monitor, pressure gauge and digital speedometer.

An optional "chariot" unit lets you load and transport the sprayer.

W-2 form report generator available for tax needs

Armor Systems has the Report Generator W-2 Form Format software.

The format, which requires the use of the Premier Report Generator and Payroll modules, is perfect for large and small operations that incorporate Advance EIC Payments, have employees in multiple states or have special W-2 printing needs.

By using the new format, companies with employees in two states and localities, or those who have special printing needs can eliminate multiple print runs.

In addition, this format package reports Advance EIC Payments amounts in a separate box on W-2 forms, so employees will no longer have to fill in the Advance EOC Payments by hand.

New hydrostatic mower cuts back on maintenance

Ransomes America Corporation introduces a new, Ransomes Bob-Cat Hydrostatic Drive walk-behind mower. Designed to cut up to 24.6 acres in an eight-hour day, the mower features an infinitely variable number of ground speeds for optimum productivity.

The hydrostatic drive's transmission features dual Sunstrand/Hydrogear pumps and Ross wheel motors. Fingertip levers control independent power to each wheel for moving, stopping, power turning and reverse. The result is exceptional maneuverability in confined areas.

Controls for blade engagement, throttle and wheel tracking are conveniently located on the panel and handlebars.

Kohler, Kawasaki and Vanguard air-cooled engines are available.
