For some, protection can be a matter of life and death. But when it comes to protecting your ornamentals, death is not an option if you use Surflan® herbicide from DowElanco. In fact, while being safe over the top of 400 types of ornamentals, it's still tough as nails on weeds. Surflan gives you extended control of 50 weeds such as crabgrass and goosegrass. It also strong-arms small-seeded broadleaf weeds.
like chickweed and henbit - weeds that are usually untouchable. Plus Surflan can be used in many tank mixes. So when it comes to protecting ornamentals while killing weeds, let's just say we've got an offer you can't refuse. For further information on Surflan or any other product in the extensive line of DowElanco products, call 1-800-352-6776. Always read and follow label directions.

20 COVER STORY: THE POLITICS OF SAVING WATER
Interaction between water utilities, green industry groups and government runs the gamut from confrontational to cooperative. LEAH ROTTKE

24 LM REPORTS: STUMP CUTTERS
The teeth are the most important part of these heavy duty tools. They better be sharp to do the job. CURT HARLER

28 COOL SEASON ORNAMENTAL DISEASE CONTROL
Ornamentals need proper care, including disease control, during the growing season. This article focuses on general groups of ornamental diseases with specific examples. JOHN WATKINS, PH.D.

32 WARM-SEASON ORNAMENTAL DISEASE CONTROL
Ornamental host plants and their many diseases preclude a comprehensive list of common diseases. JANELL STEVENS-JOHNK, PH.D.

36 FLOODING AND TREES
Damage to trees due to prolonged submersion depends on water temperature, species, the age of the tree and duration. DRS. E. BUCHANAN; C. LULEY; B. RAO
In your business two types of crabs are a fact of life. New Acclaim® Extra Herbicide provides excellent control of the crabgrass escape type. Even more concentrated than the original Acclaim, Acclaim Extra is 14% stronger. So lower rates give you the same dependable spot treatment control without damaging your existing turf.

Plus, Acclaim Extra also lets you reseed fescue and ryegrass immediately after the spray dries. It can also still be used on bluegrass, ryegrass, zoysiagrass, fine fescue and tall fescue. And Acclaim Extra controls crabgrass escapes from the 1-leaf stage right up to just before seed head formation.

No preemergence herbicide is perfect, so make postemergence Acclaim Extra a part of your season-long crabgrass control program. As for that other type of crab... sorry, but you're on your own. *Wait 3 weeks for bluegrass, zoysiagrass.

One Crab We Control.
The Other One's Up to You.
Research money: now you see it, now you don’t

E ver wonder who will fund turfgrass research in the days ahead? So do some of the people doing that very research that helps fuel industry growth and product improvements.

“At almost all universities there have been enormous cutbacks,” says one researcher who wants to remain anonymous. “In order to preserve faculty positions, a lot of the support services positions are being lost. Those are the people who take care of the farms, the technical people.”

Some turf profs are even being asked to pay for their projects.

On the upside, there are grants here and there from industry to fund product research on behalf of the manufacturers of control products or equipment. But in between are the cracks through which fall jobs and individual research projects.

“The money for ag research is more than likely going to be coming from funds raised from state and regional turfgrass associations through conferences and trade shows, and also through industry grants. The money coming from the USDA is going to be less and less,” says Dr. Eliot Roberts of Rosehall Associates, Sparta, Tenn.

“With so many humanistic concerns higher on the list, the agricultural/turfgrass industry can well afford to provide the funds for turf research so federal funds can be used for humanistic concerns,” says Roberts.

Turfgrass is becoming the USDA’s poor cousin who has to look elsewhere for help.

As Jim Elgin, USDA national program leader for forage grasses told me, programs in food safety, human nutrition and environmental issues—$26 million worth—are priority items. Which explains why Congress plans to eliminate the $55,000 it gives to the National Turfgrass Evaluation Program, this time for good.

“The [NTEP] program has matured, and has arrived at the point where it’s capable of supporting its own needs,” says Elgin.

NTEP receives more than $600,000 from seed companies. The $55,000 is a drop in the bucket, but Kevin Morris, NTEP director, believes the USDA and Congress are blind to the intangible benefits of NTEP support.

“We’re trying to get them to understand we’re good for them,” says Morris. “I get a lot of national and international visitors here. To have a national program for research so close to D.C. makes sense.”

Dr. Tim Murphy of the University of Georgia says the funding there is sufficient for now.

“We get pretty good support...from our state appropriation and some federal dollars the university uses for turf and ornamental research, extension and teaching.

“Within the state, our state associations, the Golf Course Superintendents Association, and the Georgia Turfgrass Association provide monies to the Georgia Turf Foundation, which in turn funds various projects and activities.”

However, Murphy sees a trend at the federal and state levels in terms of cash support for salaries, physical plant expenses and the like. ‘Those funds will likely remain level or decrease. ‘Level funding’ is actually a cut, when inflation is factored in,” Murphy explains.

The money is out there. Lofts Seed, for example, this year presented a generous $670,000 in endowment/royalty money to Rutgers University and the University of Rhode Island, and another $14,000 to the USGA.

Associations are indeed doing their part, through golf tournaments, scholarships or outright cash contributions, and it looks like more of that kind of support will be needed in the days ahead. Support research whenever you can. LM

What’s your opinion on the state of research funding in the green industry? Write to us at 7500 Old Oak Blvd., Cleveland, Ohio 44130. Or e-mail to tmciver@advanstar.com

Practical turfgrass management information you can depend on.

Your subscription to TURFGRASS TRENDS gives you the information you need to manage the toughest turfgrass problems. Written by experts in the field, timely information and latest leading-edge research give you practical, proven answers to the challenges you face.

- disease management
- genetic improvement
- nutrients
- insect management
- irrigation
- weed management

TURFGRASS TRENDS is the hands-on tool you’ve been looking for to keep up to date on the latest cutting edge research and proven turf management practices. Find out why others are calling TURFGRASS TRENDS “the #1 research digest for turf managers.” Begin your subscription today!

“TURFGRASS TRENDS is an important planning resource. The advanced seasonal information is timely for preparing my stress-avoidance programs.”
Mark H. Bunte
Golf Course Superintendent
Lake Wildwood Country Club
Penn Valley, CA

“... helpful and informative. I believe this is a very valuable publication, especially as we all work to protect the environment.”
Dr. Terrance P. Riordan
Turfgrass Plant Breeder
University of Nebraska

“TURFGRASS TRENDS is geared toward conveying information, not advertising...I consider it to be the best publication in my field.”
Barry Carter
Golf Course Superintendent
Oak Hills Country Club
San Antonio, TX

Professional hedge clippers that not only maximize your reach, but deliver improved power and better balance. That's Echo Pro Performance. Like our remarkable Shaft Hedge Clippers with an innovative shaft-type design that offers you maximum reach and superior balance to enhance professional results. And of course, these hedge clippers are powered by our legendary, world-class, two-stroke engine. Just what you'd expect from the number one name in outdoor power equipment.

At Echo, we’ve been giving landscaping professionals exactly what they need for over twenty-five years: superior outdoor power equipment that more than performs...day after day after bumping, jostling, banging, hard-working day.

The result? Power equipment that exceeds professional demands for quality, durability and dependability. Echo Pro Performance. Built by the team that knows what professionals need. Maybe that’s why more landscaping professionals choose Echo than any other brand of outdoor power equipment. For more information on Echo Pro Performance products call 1-800-432-ECHO (3246).
REACH FOR THE HIGHEST PERFORMANCE.

This new single-source reference provides the most current and comprehensive information on the basics of turfgrass and landscape management available today!

The Landscape Management Handbook

edited by William E. Knoop

125 pages, softcover

Item #LSMB830

$34.95

Provides an overall understanding of turf and landscape care and management and covers all the basics of the green industry

Covers all the topics both golf course superintendents and students of turfgrass and landscape management need to know about

Combines practical information with the tried and true basics of management to provide a single, practical, affordable and up-to-date text

Features detailed information, charts, diagrams, figures and tables to illustrate key information points

The Landscape Management Handbook provides a unique, single-source reference of comprehensive information on a variety of turf and landscape topics. It's an ideal handbook for golf course and lawn care superintendents and crew members, and is also appropriate for schools that teach basic turf and landscape management.
