Introducing Team Pro.

Just think of it as Team with a Turbocharger.

It's called taking the best crabgrass herbicide anywhere and tweaking the formulation until it works even better. New Team* Pro herbicide is more consistent on everything from crabgrass to spurge and oxalis.

The only crabgrass preventer with a unique blend of two active ingredients covers great at 4 lbs. per 1,000 sq. ft.

But it still won't stain your customers' property and is safe to nearby ornamentals. Always read and follow label directions.

For more information, call us toll-free at 1-800-352-6776.
Customer driven through the next century

by DICK HOLZSCHU/General Manager, Urban Pest Management

As the old song goes, "The times they are a changin'." In fact, everything changes, even the rate of change changes—or more precisely, accelerates. It’s simply a fact of life.

At DowElanco, we want to do more than just keep up with change. We want to stay ahead of it. We know that thriving in today’s business world means exceeding customers’ needs not just today, but well into the future. That requires a total commitment to the turf and ornamental industry while embracing the changes taking place within it.

Our total commitment to the industry focuses on three areas: supporting current products, developing innovative new products, and providing accurate, up-to-the-minute information to the industry.

Current workhorses

Support of our current products is ongoing and includes continual testing and research, both in the laboratory and in the field. Our goal—ensure our products meet efficacy standards and satisfy customers’ needs.

One of the products we remain committed to is Dursban* insecticide. Dursban has been a mainstay in thousands of insect pest control programs for years. We don’t take that kind of loyalty for granted. Because our customers rely on Dursban, we support it through research, development of improved formulations and packaging, and educational seminars designed to help customers get the maximum benefit from their insect pest control programs.

Another product we remain committed to is Surflan* herbicide. Because Surflan offers season-long control of over 40 grasses and broadleaf weeds and is safe on more than 400 ornamentals, it offers greater protection than any competitive product, and therefore continues to be the backbone of weed control programs for thousands of professionals throughout the country. With this in mind, we’re happy to report our Surflan plant expansion is complete and we fully expect to meet current demands for the product throughout 1997 and beyond.

New horizons

In the effort to meet tomorrow’s needs, DowElanco continues to funnel resources to new product development. Our commitment is large. In fact, our Research and Development Building contains more than 612,000 square feet and 15 individual greenhouses employing approximately 400 scientists and other employees. It’s the world’s largest single plant breeding and agricultural research center under one roof.

Along with the research conducted at the world headquarters in Indianapolis, major research stations are maintained in 19 additional areas around the world. With this global perspective, we’ve secured a place as a leader in the discovery and development of new pest control technologies.

In this vein, I’m pleased to announce one of our newest products, Team* Pro herbicide, is now available. Team Pro is more consistent on everything from crabgrass to spurge and oxalis, and it’s the only crabgrass preventer available with a unique blend of the two active ingredients Balan* herbicide and Treflan* herbicide. This combination provides the quick activity of Balan with the long residual rates and broadleaf weed control spectrum of Treflan.

Information age

Of course, research and development triumphs aren’t enough to carry us into the 21st century. Real success comes from a commitment to information—the information our customers and their clients need.

With that in mind, we strive to be an industry leader in education, support and environmental stewardship. In fact, we have over 20 sales and technical support representatives dedicated to the turf and ornamental marketplace.

We believe teaching our customers about using pest control products responsibly is important. As a part of that we provide educational materials and speakers to seminars and associations, we promote IPM practices and responsible use of our products, and we maintain a leadership role in associations such as Responsible Industry for a Sound Environment (RISE), The Professional Lawn Care Association of America (PLCAA), Golf Course Superintendents Association of America (GCSAAS) as well as many other state and local associations that work to educate the public and the government about the use of specialty pesticides in the environment.

In the end, it comes down to not only recognizing, but promoting change and growth within our industry. And through commitment, dedication and unwavering support, DowElanco plans to continue to be the leading manufacturer of turf and ornamental specialty products through whatever changes the next century may bring.

One hit, one miss, says reader

I appreciated your article on diazinon in Texas (January, 1997). It clearly stated the fact that the average homeowner does not understand how to use or dispose of toxic products. I feel that most of us in the industry are sensitive to environmental issues, and most of us do take the time to educate our customers. The real problem, in my opinion, is with the mass merchant who is not interested in safety or the environment when it gets in the way of profit.

On the other hand, I was appalled that you printed the article on Litchfield Park, Ariz. (January issue). This is an example of landscaping that should not be used in an area that is having problems with water resources. If the people of this community feel the need for palms, orange trees and lush green bermuda, they should move to Florida.

If the taxpayers were aware of how much money was being wasted, they might hire a new city manager. What is wrong with using the many native grasses, trees and shrubs that make Arizona what it is?

Shouldn't "The Voice of the Green Industry" be speaking against needless waste and for landscapes that make sense?

Paul Dowleary, Wichita Valley Landscape, Wichita Falls, Texas

Bob Gaunt, director of public works for the City of Litchfield Park, replies:

In the past six years, we have turned numerous turf areas into xeriscape landscaping. We also have one, five-acre park that is totally landscaped with native desert plants.

The City has received five tree grants (about 40 trees per grant) during the past six years. All trees were low-water use and were used to replace high-water use on trees. Our City does have approximately 1,400 palm trees, which are considered low-water users.

We are very much aware of the importance of water conservation. Watering is done in the most efficient and cost effective manner and all feasible conservation procedures are implemented. We are very proud of our city and of the distinction of being recognized as a "Tree City, U.S.A." for three years in a row.

The City of Litchfield Park does not have a personal property tax. The City operates on a budget generated by revenues from state sales tax and bed tax.

The article incorrectly gave the population of Litchfield Park as 38,000. The correct population of our small community is 3,800.

Janet Marquardt, CGCS, Lake Wisconsin Country Club

January cover a winter wonder!

Congratulations on the cover photo of the January, 1997 issue. It is beautiful!

Living in the north, we often let the dismal effects of winter get the best of us. How refreshing to see a national magazine champion the beauty of northern winters with such a picture. Though we often spend many of our days plowing snow, it does not make it any less beautiful. Ironically, most of us who have to work with it love to play in it (skiing, snowmobiling and an occasional snowball fight).

Great picture!

Rob McCartney, grounds manager, Sea World of Ohio

Thanks, Rob. We want our covers to display the green industry at its best. January's cover was certainly a 'best of' in the category of winter landscape photography. And we're certain our readers who profit from snow removal can relate! —ed.
Don't spend all day in the sun, Buy the new NINETY-ONE

If your work site demands HIGH PRODUCTION, SUPERB TRIMMING and GREAT DECK FLOTATION, step up to the new 91" deck from HOWARD PRICE TURF EQUIPMENT.

This new 91" deck, powered by your choice of three traction units, can mow up to 4.6 acres at 5.1 mph (depending on your mowing conditions) and offers a 26% increase over a standard 72" cutting deck.

This 91" deck allows trimming on both sides of the deck. The rear discharge decks, combined with the power steering, eliminates second passes over an area that a side discharge deck requires.

This 91" deck offers you a choice of size and flexibility. Choose your cutting width (91", 74" or 56") with a simple deck control lever. The flexing decks float upward at a responsive 15 degree angle and the wings lower to 5 degrees.

This 91" deck can afford you the production, trimming capabilities and flotation to perform a quality service on your turf location.

SAFETY MAKES 'CENTS'

There are a lot of good reasons to build
a culture of safety into your green
industry operation, but the most obvious
one involves money.

by RON HALL/ Managing Editor

Lesco's Bill Sisley says today's mowing
equipment is engineered for safety, but
equipment operators still need training.

It's bad business
"Safety makes good financial sense," says Hansen with American Safety and Health Management Consultants, Inc., Canal Fulton, Ohio. "Many people don't realize that until you sit down with them and go through it. They have a misconception that there is an insurance policy out there that covers them. What they don't realize is that that insurance policy is controlled by their individual efforts, and their experience.

"For instance, getting in a group rating can save them 70 percent of workers comp premiums. That's money they can use or put on their bottom line right now.

"But, if they've had bad experiences (worker injuries and claims) over the past four years, they can be penalty rated. Workers compensation is going to charge them a high premium," says Hansen whose firm advises other companies and associations on safety issues. "That's why one person can be paying $5,000 a year and somebody else in the same business can be paying $20,000 for basically the same coverage." The right thing

There's a humanitarian reason for protecting your workers, adds Kate Goewey, corporate safety director for W.A. Natorp Co., Cincinnati.

"Imagine that someone that you care about personally, perhaps a son or a daughter, will be doing a task, or using a specific piece of equipment. Are you uneasy?" she asks. "If you are, don't let your employees do it either." W.A. Natorp, like most successful green industry operations, has a working safety program. The emphasis here is on "working".

"Every person who becomes an employee goes through a safety orientation," says Goewey. "Each new employee gets a company safety manual. But, we don't just tell the employee to take the manual home and read it, we go over it with them word for word. This takes 45 to 60 minutes.

"This lets employees know up front that we're serious about safety."

Each division of W.A. Natorp meets regularly to discuss safety issues—tree and
landscape crews weekly, and nursery and garden store employees twice a month.

“We encourage discussions and questions. The topics are geared to the work and the conditions at the time,” says Goewey. “Many times we present a problem and ask for solutions. Our people have come up with some fantastic ideas that turned out to be simple to implement. They know the work and its hazards best.”

No compromises

Safety expert Hansen says green industry organizations should insist that employees follow safety rules 100 percent of the time.

“The function of safety training is to get employees to do a task or operate a piece of machinery the right way consistently, no matter what,” he says. “There always has to be follow-up by management, correction by management. When it comes to safety there can be no deviations, no excuses.”

As for safety training? Keep it simple, make it applicable to the type of work you’re doing. And do it regularly.

“It can be basic. It can be fairly easy,” says Hansen, “but it has to be a formal part of your mission, like your corporate mission. It makes sense. Isn’t one of your missions to protect your most vital assets? Your employees? Your equipment? Your property? Your sales or production capabilities? Your company’s good name?”

Corey Eastwood’s golf course maintenance crew meets every other Monday to review safety issues. The meetings last about 15-30 minutes each.

“Sometimes we review safety apparel, and we have general discussions too,” says Eastwood. “Often we discuss equipment. We want to make sure all of our equipment is operating properly. About once a year we go over every piece of equipment. We get the manuals, we involve the mechanics and we review all the safety features of the equipment.”

Eastwood’s 18-member crew at the Stockdale Country Club, Bakersfield, CA, is proud of not having a lost-time accident in three years.

A safety culture

“At the Morrell Group we look at safety as being, not just a program, but a part of our everyday operation,” adds George Morrell, owner of the Atlanta-based landscape company. That’s one reason why safety training begins immediately for new hires during their initial 1½-2 day orientation programs. “Each step along the way we discuss safety with them,” says Morrell.

The 20-year landscape veteran knows that safety goes beyond manuals, videos and bi-weekly worker meetings. It includes having first aid kits and fire extinguishers on all company trucks. Of equipping employees with proper protective gear, including, in the Morrell Group’s case, bright orange company shirts. Of insisting that employees report all accidents, then reviewing why they happened.

The Morrell Group’s safety committee meets regularly and provides managers with four or five suggestions to pass on to frontline workers. The company also has a “Safety Bucks” program that rewards accident-free workers with a little extra compensation.

Even if you have a strong program, you’ll probably have to revise and update it to meet changing conditions.

“Every year we get our employees more involved with the idea of safety, and we’re asking them to tell us what topics they need,” says Sandy French, Human Resource/Safety Manager for Hillenmeyer Nursery, Lexington, KY. “We want them to actually participate in the demonstrations. This year we want to be out in the nursery or in the shop. We realize that these people have chosen to work outdoors so it’s hard for them to always sit inside and listen to me talk.”

Even so, French insists that Hillenmeyer employees hear the most important safety instructions over and over.

“They might be sick of hearing about some of this material, but we all learn by repetition. Eventually all of us must realize how important this is,” says French.
Evaluating preemergence turf herbicides can be like comparing apples and oranges. True, all of them control weeds. (To some degree, at least.) But a closer look reveals big differences. When you consider all the products on the market, you’ll find:

- A lot of them focus on low price.
- That’s usually because they don’t have much else to offer.
Dimension® turf herbicide, on the other hand, gives you real value. Dimension offers premium performance, along with extra benefits that make your job easier. Here are a few reasons why Dimension stands out from the competition:

- Dimension provides unmatched crabgrass control.
- It controls crabgrass all season long—without breakthroughs.
- Dimension also handles goosegrass, oxalis and spurge.
- Fall applications help you manage unwanted Poa annua, as well as crabgrass and other weeds.
- Altogether, Dimension takes care of more than 20 tough weeds.
- Dimension works before or after crabgrass appears, extending your application window.
- It's completely non-staining—all you see is great-looking turf.
- You can stretch the long-lasting control of Dimension even further with split applications.
- Dimension works at low use rates.
- It’s labeled for lawn care and golf course uses.
- Dimension offers the application flexibility of sprayable EC or granular fertilizer formulations.
- You can overseed just three months after application.
- And you can always count on exceptional turf safety.

To find out more about the benefits of Dimension, see your local Rohm and Haas distributor.

Weed control beyond compare.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS FOR DIMENSION TURF HERBICIDE.

The Golf Course Superintendents Association of America Trade Show in Las Vegas last month showcased several acres of bright new equipment—tractors, mowers, and all of their related implements and attachments.

The next opportunity to see that much turf and landscape hardware, including a galaxy of attachments, is at Expo 97, the International Lawn, Garden & Power Equipment Expo, July 26-28 in Louisville, Ky.

Last year over 30,000 people checked out the equipment that filled 50,000 sq. ft. of inside floor space, and 20 acres outside where turf pros put all types of professional equipment through their paces.

Spend a day or two at Expo 97 at the Kentucky Fair & Expo Center in Louisville. For more information call (502) 562-1962 or fax (502) 562-1970.

Varied attachments make Gravely Riding Tractors more versatile.

Options for Massey Ferguson tractors can handle big turf jobs.

Agri-Fab 12-Volt Tractor Mounted Spreader accurately applies fertilizer, grass seed, de-icing materials—all-season spreader.

Bush Hog offers an array of land maintenance and preparation implements, including mowers like its TDM-11 Mulching Mowers which offer a fine cut on an 11-foot cutting width. Cultivators, tillers, front-end loaders, blades and post hole diggers. Catalogs available.

Dixie Chopper
Getting that professional mowing job done quickly is making Dixie Chopper a favorite with turf managers. The 72-inch category City Slicker can easily mow four acres per hour. Also comes with work-saving attachments.

Earth & Turf
Two drop spreaders. The ET54D for a 16-hp tractor is 56-inch wide, the ET36D is 38-inch wide and can be pulled by a 12-hp tractor. Also a new Scoop & Spread that allows operator to load and topdress dry flowable material from tractor seat.

Emrex Inc. Rototairon soil renovators for mid-size up to 150-hp tractors. Five compact soil renovators, weights 850-1700 lbs.—cultivation, levelling, burying of stones and other debris. Can be used with optional Combi Seeder for single-pass seeding.

F.D. Kees Manufacturing Co.
Professional riding and walk-behind mowers. Walk-behinds, 36-inch and 48-inch cutting widths. Accessorize with 3-bushel grass catcher, 5-bushel leaf catcher, riding sulkies, mulching kit, hour meter.

Finn Corporation
Ground-Hog Landscape Tillers (4 models) till, level and rake in one operation. 3 pt. hitch. Depending on models, tilling widths from 5877 inches. Recommended hp ranges from 16-30 hp to 24-45 hp.

Gandy Company
Spiker Aerator, Sweep Master Turf Brush, Dethatcher/Overseeder with 2-inch seed spacing, 48-inches wide. For tractors 18 hp and up.

Glenmac
The Harley Roller Packer Wheel fits all Pro-6 & 8, and T-6 & 8 rakes. Self-pivoting, adjustable down pressure to change the depth of Power Rake Roller, helps erase marks left by chain chase. Models to fit 24 to 65-hp tractors.

Gordon Bannerman Limited
Ballpark-6 Groomer combines five adjustable grooming tools—ripper blade, springtooth rake, double-blade levelling, hollow-steel roller, and brush—to be used with 17 hp and up tractors.
