Now, golf course superintendents can change the course of turfgrass disease control with HERITAGE, a completely new fungicide with a novel mode of action. HERITAGE will give your golf course round-the-clock protection against devastating diseases. With its powerful combination of preventative and curative activity and its high level of effectiveness against 18 of the toughest turf diseases, HERITAGE will make an outstanding difference in the quality and health of your turfgrass.

The active ingredient in HERITAGE is based on naturally occurring fungicides, called strobilurins, which are found in certain mushrooms.

HERITAGE has a novel mode of action which is different than any other fungicide now on the market. It has both preventative and curative activity and is absorbed into the leaf blades and stems as well as taken up by the roots. This ensures that your golf course is protected from the devastating effects of turfgrass diseases.

HERITAGE is the only fungicide available that controls both brown patch and Pythium, as well as take-all patch, summer patch, anthracnose and snow mold—an unprecedented advantage for the turf professional’s disease program. HERITAGE is also effective against certain fungicide-resistant pathogens, making it an extremely useful tool in resistance management strategies.
Superintendents will find that HERITAGE is exceptionally compatible with the environmental balance of their courses. HERITAGE poses minimal risk to birds, mammals and fish, and its low use rates and extended application intervals mean less active ingredient is released into the surroundings.

For more information on HERITAGE Fungicide and how it’s changing the course of disease control, contact your Zeneca Sales Representative or call Zeneca Professional Products Toll Free at 1-888-617-7690.

Once you learn about the powerful, round-the-clock protection this new fungicide offers, you’ll agree that it’s time to change the course of your turfgrass disease management program, with HERITAGE.
THE VOICE OF THE GREEN INDUSTRY

LANDSCAPE management

Move to Kubota Country

Move to Kubota country and you'll find versatility, durability and operator comfort. The Kubota B-Series (13 to 18 PTO horsepower) tractors are compact to fit in tight places and powerful to get lots of jobs done. Kubota performance matched implements include rotary tillers, front loaders, mid and rear mount mowers, boxscrapers and snowblower.

Need more power? Move up to the innovative Grand L-Series (25 to 37 PTO horsepower). Hydrostatic steering, shuttle transmission with shift-on-the-go provides ease of operation. Kubota's exclusive optional Glideshift transmission has clutchless operation through all eight speeds, forward and reverse. These tractors are smooth and quiet, with Kubota's E-TVCS engine which ensures clean emissions while providing high torque rise. Get one with an integral cab with heat and air-conditioning for year 'round comfort.

Visit your Kubota dealer and find out how to make your move - to Kubota country!

The LM 100 class of 1997 is comprised of "great" green industry people and organizations that deserve some recognition due to their ongoing standard of quality and service.

We don't concern ourselves too much with sales figures here—frankly, not everyone wants to report them. In the golf category, we don't look at prestige as a deciding factor, or total rounds played or who designed the course. We looked at reputation, uniqueness and initiative. Has this or that green industry organization kept up a standard of quality or tradition that is worth mention, or a special way of getting the job done?

Barnes Nursery has a model composting program in place that provides high quality materials for use in landscapes. It saves money, recycles yard waste, and generates profit for the company.

Some companies, such as Bozutto Landscaping Company or Blondie's Treehouse, have received awards from their communities or from an association for the work they do to beautify their corners of the world.

Internal company programs to train and stretch employee potential are worthy of note. Coronis does it in Nashua, New Hampshire, and so does Dennis' Seven Dees, Orlando. With the continuing challenge to find good, long-haul workers—workers who want careers beyond June-July-August—more companies have realized the need to treat people as more than a recyclable commodity.

Some companies began in the '60s, and are still solid, such as the Hermes Company of Lenexa, Kan. They quietly went about their work, did what they needed to do, established their niche, and kept customers happy. That photo we have of John Hermes kind of sums it up: a happy man who's spent his life in a business he loves, in a company that's well run and efficient.

John Swingle started his company with one Jeep and one helper. Laurence Coronis was also a one-man shop. Marty Grunder started with a $25 mower and a crazy dream that's become a $1.6 million reality.

Golf course supers who made it into this year's class have monumental tasks. Thousands of acres of turf and trees need daily care, often on a limited budget. Same for athletic field managers and parks and recreation directors. What a bag of challenges. Green speed; bunkers; golfers; fairways. Little League; soccer; players; coaches.

Tradition really enters the picture when you talk about a golf course. Baltusrol's certainly got it. So does Cog Hill. The father-son team of Clyde and Kevin Nettles at the Dallas Athletic Club counts for much, and so does Frank Ekas' 40 years at Saxon Golf Club.

Each green industry segment has a solid core of dedicated professionals who give the industry its good name and make it run. This year's LM 100 are off and running each and every day.

Phil Christian, a popular green industry consultant who founded, and for a time led ChemLawn's Commercial Services Division, died of a heart attack on September 1. He was 56.

Christian was born and raised in Atlanta. He graduated from Auburn University in 1963 with a degree in Building Technology. For 11 years he worked in his family's construction business, which he bought in 1970 and sold in 1974. He then joined ChemLawn, where he pioneered the commercial pricing system for lawn care applications, and began to develop what is known today as "Practical Site and Landscape Management," a computer-assisted landscape management system.

Christian formed PDC Consultants in 1982. "Phil's family has lost a father, husband and grandfather, I have lost a good friend and the industry has lost a giant," said John Allin, The Allin Companies, Erie, Pa., who had worked with Christian on various projects.
There’s more than fertilizer in this bag.

T here’s a total resource. One that can help you grow healthy, green turf with a strong root system and a solid base. Turf that’s healthy and better able to fight disease, pests and everyday wear and tear. That resource is Terra. You’ll find a complete, new line of Terra Professional Fertilizers – with primary, secondary, micronutrient and pesticide packages available. Plus, you can count on the support, service, assistance and expertise it takes to select and use the right fertilizer. The product that will do the job for you. For fertilizers, turf seed, plant protection products and a whole lot more – work with Terra. You’ll get more.

Working with you.
Professional hedge clippers that not only maximize your reach, but deliver improved power and better balance. That's Echo Pro Performance. Like our remarkable Shaft Hedge Clippers with an innovative shaft-type design that offers you maximum reach and superior balance to enhance professional results. And of course, these hedge clippers are powered by our legendary, world-class, two-stroke engine. Just what you'd expect from the number one name in outdoor power equipment.

At Echo, we've been giving landscaping professionals exactly what they need for over twenty-five years: superior outdoor power equipment that more than performs...day after day after bumping, jostling, banging, hard-working day.

The result? Power equipment that exceeds professional demands for quality, durability and dependability. Echo Pro Performance. Built by the team that knows what professionals need. Maybe that's why more landscaping professionals choose Echo than any other brand of outdoor power equipment. For more information on Echo Pro Performance products call 1-800-432-ECHO (3246).

This new single-source reference provides the most current and comprehensive information on the basics of turfgrass and landscape management available today!

The Landscape Management Handbook

edited by William E. Knoop
125 pages, softcover
Item #LSMB830
$34.95

Provides an overall understanding of turf and landscape care and management and covers all the basics of the green industry.

Covers all the topics both golf course superintendents and students of turfgrass and landscape management need to know about.

Combines practical information with the tried and true basics of management to provide a single, practical, affordable and up-to-date text.

Features detailed information, charts, diagrams, figures and tables to illustrate key information points.

The Landscape Management Handbook provides a unique, single-source reference of comprehensive information on a variety of turf and landscape topics. It's an ideal handbook for golf course and lawn care superintendents and crew members, and is also appropriate for schools that teach basic turf and landscape management.

What I Did Last Summer...

by John L. Mower

Thanks to my very loud alarm, I got up. It was a sunny morning and I had planned to spend some time on the lake catching fish, but I had a major problem in the yard. The fruit trees were growing nicely, but the bermudagrass was not. It looked as if we had been watering with a very small sprinkler! Summer was slipping away and the stress was mounting. Obviously, it was a growing problem so I began to look for some in-depth clues.

Then, I had a very good idea. I hurried right to the phone and called Seeds West, the bermudagrass experts. Their great selection of CERTIFIED bermudagrasses gave me exactly what I needed. They told me about the Sultan brand bermudagrass and that I could have a denser, darker and finer textured lawn. Soon, everything was just right. I even had time to hit the lake and catch some fish. For a great summer, you should call SEEDS WEST, too.
