If crabgrass is a growing problem on your turf, you're not using the right herbicide. What you need is Pendimethalin.

No other preemergent offers a broader spectrum of control. Fact is, this high-performance herbicide effectively controls crabgrass, most annual grassy weeds, and many annual broadleaf weeds. Ohio State University 1996

And Pendimethalin has excellent turf tolerance. University and field research studies have shown that Pendimethalin provides consistent, superior weed control—yet offers tremendous tolerance to warm- and cool-season turfgrasses.

Here's how it works: After Pendimethalin makes contact with the germinating weed seed, it disrupts the seed's biochemical processes, which makes the weed seed stop growing—and start dying—before emerging.

What's more, Pendimethalin works hard—and long. Through the entire season. That's because its low volatility and slow decomposition characteristics keep it active in the soil longer. Pendimethalin also makes your life easier. You have the flexibility to spread it on as a dry granule, alone, or in combination with fertilizer products. Or you can use the sprayable formulations, available as a 3.3 EC, 60 WDG and 60 WP.

No wonder professional turf managers have made Pendimethalin the #1 preemergent herbicide.

So take control of your turf—and your reputation. Use Pendimethalin herbicide to control crabgrass and more. Because the only thing you should see growing like a weed is beautiful grass.

DEVELOPING RUGBY II WAS A PAINFUL PROCESS.

JUST ASK OUR RESEARCHERS.

Before we introduced Rugby II, we dragged it through one of the most grueling development processes ever. We grew it under the severest conditions. We played hard on it. We even ignored it. In the end, we ended up with the most durable, low maintenance turf around. One with excellent winter color and outstanding resistance to most Bluegrass diseases.

Sure, Rugby II made life hard on our researchers. But it'll make your life a little easier.

FEATURES

17 SPECIAL SUPPLEMENT: SOLUTIONS FOR TODAY AND TOMORROW
The Dow AgroSciences company brings news of product solutions, and the people who are using them.

34 MIRACLE WORKERS?
The green industry demands that its mechanics be repairmen, managers, and, yes, sometimes even diplomats and trainers.

38 LM REPORTS: LINE TRIMMERS
When buying a line trimmer, consider engine size or power, the weight of the trimmer, and whether it offers an anti-vibration system to make operation more comfortable.

42 GUIDE TO WEED CONTROL IN THE NORTH AND THE SOUTH
Vigorous turfgrass does not provide 'room' for weeds. Winter broadleaf weeds can be an opportunity or a headache for the turf manager.

55 PERENNIALS FOR SHADY SPOTS
There are different kinds of shady areas, and perennials that thrive in partial or full shade.
Two tough machines to get you into and out of tight spots. Our loader/landscaper tractors – the Kubota B21 with 21 horsepower and the L35 with 35 horsepower – give you two ways to go when you’re moving dirt.

Both tractors are compact and powerful for working in close quarters. They feature a slanted, hard-nose hood and enclosed muffler for better visibility. A liquid-cooled diesel engine, power steering and 4-wheel drive are all standard features.

The B21 features a user-friendly hydrostatic transmission with 3-speed range. While the L35’s new generation Glide Shift Transmission operates all eight speeds and reverse without clutching.

Integrally designed, the front loader on the B21 and L35 have a convenient single-lever/dual function control with an increased lifting capacity. The backhoe is a cinch to quick-attach while the rear PTO and 3-point hitch maximize your applications. Dig, till, scrape or mow with one tractor. Both tractors are easy to transport on a utility trailer, so they go where you go. And this tough team is solidly built to Kubota’s rigorous standards.

So, small wonder these compacts are the choice for breaking ground with contractors and municipal diggers everywhere. See your dealer today and size up these versatile compacts.

At Echo, we've been giving landscaping professionals exactly what they need for over twenty-five years: superior outdoor power equipment that more than performs... day after day after bumping, jostling, banging, hard-working day.

The result? Power equipment that exceeds professional demands for quality, durability and dependability. Echo Pro Performance. Built by the team that knows what professionals need. Maybe that's why more landscaping professionals choose Echo than any other brand of outdoor power equipment. For more information on Echo Pro Performance products call 1-800-432-ECHO (3246).
Trimmers that deliver maximum performance and versatility. That's Echo Pro Performance. Like our innovative SB Series Trimmers, featuring an ingenious splitboom, which allows the trimmers to be easily converted into versatile, lightweight edgers, compact cultivators, hardworking hedge trimmers or Power Pruners™. And of course they are all powered by our legendary, world-class, two-stroke engine. Just what you'd expect from the number one name in outdoor power equipment.
When it comes to aeration, Millcreek gives you more choices, faster delivery, and more ways to help you promote your aeration business.

Models to Fit Your Equipment With so many models to choose from, you'll find a Millcreek aerator to fit your existing equipment.

Rugged Construction Millcreek Aerators are no-nonsense workhorses that get the job done and keep on working and earning.

Affordable Prices You won't find more competitive pricing anywhere in the market.

Guaranteed Fast Delivery Order by 1PM Eastern time, your aerator shipped next business day or we pay the freight.

Free Offer Call today. We'll send you a FREE "Aeration for Profit" kit, with ad slick and reproducible handout flyer.

Poke holes, make money

The Ultimate Wheelbarrow

No more wheelbarrows! Add speed, efficiency, productivity and profit to your landscaping and erosion control projects with an Express Blower

- Blows organic mulch with a range of up to 350 ft with a flow rate of up to 55 cu. yds. per hour.
- One man operates the system by remote control for "on demand" adjustments in flow rate.
- Features automatic feed & dust suppression systems (patents pending).

Tom Delaney, long time government affairs director for the Professional Lawn Care Association of America, has been named executive vice president of the Marietta, Ga.-based association. The appointment ends a year-long search to find a replacement for Ann McClure, who resigned the post in March 1997.

"We went through over 600 resumes," says PLCAA President Larry Messina. "We realized that Tom, who had been interim executive vp, had the talent and skills we needed."

"I was watching the process at different junctures, and thought we would have found someone [from outside the association]," says Delaney, "but we never had a complete fit. I decided to accept the challenge."

"The board and I are looking at the member interests as our first priority. We want what's best for the industry and the association. I think I can meet the call and the challenge."

"I've been here long enough to know where we are and what's going on."

Delaney adds that he will remain as government relations liaison, at least for now.

"I'm still going to talk to every member who calls with a question on government affairs," he says.

In other PLCAA news, Bob Andrews of The Greenskeeper, Carmel, Ind., will advise PLCAA on marketing and membership development and retention initiatives.

Andrews, himself an ex-president of PLCAA, who, along with Delaney and all of the PLCAA board, sees the need members have for information. New companies, says Andrews, need help to stay afloat.

"At the Indiana State Association, we have given the members what they wanted: basic education. The new companies coming in to the lawn care industry are very small operations. They know how to do the [technical] work but they don't know how to run the business."

Delaney agrees, and says that's one reason PLCAA began its "Mentor Program," which gives established company owners a chance to share what they know with new companies.

"The new companies need information on running a business," says Delaney. This information includes help with employee, marketing and bidding issues.

Delaney says mentors now total about 40 or 50. At press time, PLCAA needed 23 mentors. (If you're an LCO who wants to help out a new member, call PLCAA at 800/458-3466.)

Lawn care operators are more frequently diversifying their service mix, which means they need more information on a variety of services.

"There are really very few firms who say 99 percent of their income comes from lawn care," says Andrews.

"In the Indiana State Lawn Care Association, only 50 percent of our members are LCOs. Other members include irrigation contractors and parks and recreation professionals. (Andrews is director of the Indiana LCA.)"

"I think Tom Delaney is going to be excellent in the executive vice president post," says Andrews. "And you've got Bob Ottey, Jerry Grossi and President Larry Messina serving [among others]. These are solid people.

"I would not be surprised if there were a lot of changes in the next six to eight months."
