Trailer lock to prevent theft

The Trailer-Keeper is an economical theft deterrent system for trailers which prevents tire rotation so a trailer can't move. Manufactured by Fulton Performance Products, this rugged, steel, locking device attaches to the lug latches on a case-hardened steel rod. The rod is threaded through the wheel and tire and the lug latches are secured to the wheel lock bar with a special brass padlock. Installed in seconds, the Trailer Keeper is adjustable to fit wheels up to 15" and can be used on almost any type of trailer.

Act now! Or this may be the only pest control tool you’ll ever use again!

How come?
Because the Environmental Protection Agency is reevaluating the pesticides you count on to run your farm, keep bugs out of your house and weeds out of your garden.

As early as May, you could begin to lose some of the most trusted insecticides on the market today.

Why?
Because EPA isn’t asking you—the pesticide user—or other Americans how you actually use these pest control products. Without accurate input, the new Food Quality Protection Act cannot be fully and fairly implemented.

So what?
So you lose many cost-effective pesticides—the tools you depend on most. Fewer products lead to less effective IPM. Pest resistance rises. Damage occurs.

So act now!
