When it comes to preventing the broadleaf and grassy weeds that most often plague your customers' turfgrasses, PRE-M® preemergent herbicide is right on target. Why pay more for other products when, time after time, university trials prove that PRE-M offers you better overall performance combined with unmatched value?

Superior performance made PRE-M the leading* preemergent herbicide. Superior value widens the gap. PRE-M is everything you'd expect from LESCO®, the leading supplier in the professional turf care industry.

Ask your LESCO professional or call 1-800-321-5325 to learn how you can earn generous rebates for your PRE-M purchases.

Get behind the leading edge.

Honda Proudly Announces Some Dramatic Reductions.

No, this isn’t a closeout sale. It’s the Honda UMK Series, 4-stroke trimmer/brushcutters. Thanks to some dramatic reductions, now you really can do more with less. Honda’s UMK trimmers take advantage of their 4-stroke engine’s combustion format to dramatically decrease noise. 4-stroke engines are well known for producing fewer emissions than comparably sized 2-stroke engines, making them very environmentally friendly. In fact, Honda’s trimmers meet all EPA and CARB emission standards. Honda’s trimmers use straight gasoline, eliminating the hassle of mixing gas and oil. And they can run two times longer than comparable 2-stroke engines on the same amount of fuel. The engines also suppress spark plug carbon buildup and carburetor clogging, maintaining like-new starting ease.

Honda’s hard-working, durable string trimmers are some of the most efficient and cost-effective string trimmers available.

Any way
the wind blows.

NEW, NO-DUST, LOWER-ODOR Orthene® Turf, Tree & Ornamental Spray 97 blows away any other turf insecticide.

New ORTHENE 97 controls more than 40 pests (far more than Chipco® Choice®).
ORTHENE 97 controls through both contact and local systemic activity (more than Talstar®). So ORTHENE 97 is one of the most COST-EFFECTIVE turf insecticides you can buy.

Best of all, its patented 97 PERCENT PELLET delivers genuine ORTHENE performance in a smooth-flowing formulation that improves handling convenience and measuring accuracy while it reduces odor and virtually eliminates dust.

Find out about new ORTHENE 97 from your distributor or through the Valent web site at www.valent.com.

"T
his millenium, I'm planning ahead, and I mean it!" I vowed, along with millions of others. How about you? Will this be the year when you make plans instead of promises, or develop written business goals and a program to achieve them? I believe that you can achieve those things if you work for them.

So how will you work at hiring employees this year? I'm sorry to say if you don't have a plan in place right now, you're already out of this year's game. You might get lucky, but the best people will go elsewhere.

"What? I haven't even written our clever new want ads yet!" you shriek. "I'm still developing our internet search strategy. It's not too late — it's only February!"

Sorry, you're wrong. It's too late to start planning because right now, you should be planning for February 2001, 2002 and 2003. In fact, you should be planning all aspects of your business for the next five years, and not just your hiring plan. The "people" is critical to building your organization of the future.

That's one thing I've learned from the experts who contributed to our series on labor, which starts this month. I've also learned it from observing the most successful managers in our industry. They don't recruit, hire or retain people as an afterthought. They plan like hell for it.

Why? Because the numbers are stacked against you. The "available" workforce will shrink even more in upcoming years and you'll have to look for "nontraditional" employees and use new systems to keep them. It's going to be a lot harder in the future.

So here's my recipe for playing today's and tomorrow's labor game successfully:

1. **Think and act long-term.** Be purposeful and plan years ahead to have the organization, relationships and systems that feed people with potential to you, and keep them there for the long term.

2. **Network like crazy.** Reach out to "nontraditional" employees and build creative alliances for hiring and training.

3. **Be a leader.** Everyone can't be a leader, but you can be the best at something. You can have an organization that grows its people along with its business — and you'll have to.

Too many of you tell me that the key factor keeping you from growing more is lack of good people. If this problem is so critical, you need to work hard — short-term and long-term — to solve it.

Our coverage this month starts on page 48. We'd love to hear your sources for people, your ideas for training and your methods of slowing turnover for future articles. If you have the time, please give me a call at 800/225-4569 x2729, or email me: sgibson@advanstar.com.

**Welcome Jason Stahl**

It's our pleasure to welcome Jason Stahl as managing editor of *Landscape Management* and our sister publication, *Athletic Turf*. Jason joins us with several years of experience in publications and is already learning plenty about the ins and outs of professional landscape work. He will cover many industry events and has already started developing several features on our industry, like his piece in *Industry Almanac*, page 32. You can reach him at 440/891-2623 or jstahl@advanstar.com.

"It's too late to start planning...you should be planning for February 2001 and 2002..." — SG
New Compass controls
Brown Patch, Leaf Spot,
Gray Leaf Spot, Red Thread,
Rust, and more.

Effective for all turf areas and all species, Compass fungicide delivers the value of a contact, the power of a systemic. In fact, it's the best Brown Patch value ever developed. Compass also goes on to control important ornamental diseases, such as Apple Scab on crabapple and flowering cherry trees.

**Compass gives you preventive and curative options.**

Compass delivers the highest efficacy against Brown Patch and a broad spectrum of diseases at the lowest use rates ever. One pound of Compass at 0.15 oz/1,000 sq. ft. rate covers 2.45 acres of turf.

**New technology, yet competitively priced.**

With unique mesostemic power, Compass delivers locked in, broad-spectrum control at a price you can afford.
Just in time, a reduced-risk fungicide that is environmentally sound.

Compass has been classified as reduced-risk. So you can use it with confidence.

Mesostemic power ensures locked-in, rainfast disease control up to 28 days.

Compass securely locks into the plant surface due to its high affinity with the surface. Forming a protective reservoir of fungicide on the plant surface, it resists washing off, thus ensuring long-lasting disease control.
