New Holland has four minis.

3330-lb. operating weight and 18hp engine. The EC25 is 6,060 lbs. with 28 hp; EC35, 7,500 lbs. and 36 hp; and the EC45 has 10,320-lb. capacity and a 46hp engine. The units from the Carol Stream, IL firm dig at depths from 7'3" to 12'2". Attachments include hydraulic hammers, tampers and ditch cleaning buckets.

Circle No. 281

TERRAMITE CORP. 800/428-3772 www.terramite.com

Two mini-excavators, the TX-15 and TX-25, offer sophisticated three-pump hydraulics for maximum efficiency. Made by Terramite Corp., Charleston, WV, the TX-15 has a 1.35-cu. ft. bucket, 9-rpm slewing speed and a digging force of 2,430 lbs. to a depth of 6'8". The TX-25 has the same size bucket but a slewing speed of 89.5 rpm, 3'750 lbs. of digging force and a maximum depth of 7'11". Both are powered by 3-cylinder Isuzu diesels, the former at 16.5hp, the latter at 23hp.

Circle No. 282

THOMAS EQUIPMENT 800/561-5623

The T153S from Thomas Equipment, Centreville, NB, is designed for tight areas. New this past fall, the 1500-lb. class unit has a 73.5-in. operating height and 60-in. working width. The front end offers 4,150 lbs. of breakout force.

It is powered by a 52hp Kubota V2203E. A heavy-duty 100 drive chain provides power to the wheels for traction and pushing. For operator safety, the hydraulic controls remain locked until the operator is in the seat with seatbelt fastened and seat bar lowered.

Circle No. 283

Turfco Manufacturing Inc., based in Minneapolis, has announced a new direct purchase program for its lawn care products line. The new program will be available to landscapers and lawn care firms involved in commercial turf maintenance.

The new "Turfco Direct" program began November 15, 1999, with important new features for buyers, such as:

- 90-day "same as cash" purchase option
- No payment for 120 days
- 14-day "satisfaction assured" approval period
- Extended two-year new equipment warranty period
- A new "Parts Direct" overnight delivery program
- Toll-free phone ordering at 800-679-8201
- Online ordering and purchase options at www.turfco.com

Direct delivery now saves you time and money.

"This new program was developed after very deliberate and careful market analysis," said George Kinkead, Turfco President. "The fast pace of product development and improvements makes it imperative that new products be made available to end users as rapidly as possible. For example, Turfco has introduced 12 new products to the market just in the past seven years. Yet, the "main-line" dealer operations focus most of their efforts on their primary product lines, so renovation and specialty products tend to get lost in the shuffle."

Kinkead says offering both products and replacement parts directly to customers will shorten their turn-around time for getting new equipment into operation, as well as getting machines back to work quicker. "Our product designs now make it possible for equipment owners and operators to make most repairs and adjustments right in the field, using regular hand tools."

Kinkead continued "Our turn-around time will be shorter and our factory will be more responsive. The company's golf course products will continue to be marketed through our existing distribution channels."

The new "Turfco Direct" phone number is (800) 679-8201. Fax requests and orders can be sent to (612) 785-0556, mailed to Turfco Manufacturing, Inc., 1655 101st Ave. N.E., Minneapolis, MN 55449-4420 or e-mailed to sales@turfco.com. For fast, immediate savings, visit the company's website at www.turfco.com.

"Customers receive products faster and for less," says President Kinkead.
Handling messy tree fruit

Some of our customers are concerned with fruit droppings from crabapple trees. They like the flowers, but not the messy fruits. Is there anything we can do to help them? Also, are there any crabapples that produce good spring flowers, but little or no fruits later on?

— MINNESOTA

Consider treating with a product called Florel for eliminating fruits on existing crabapples. Success in fruit prevention depends upon applying Florel at the proper time. Reports indicate that treating crabapples when the plant is in full bloom to petal fall is better. More research is needed to fine-tune the treatment timing.

I found some information from the University of Minnesota stating that columnar cherry crabapple (Malus robusta ‘Srecta’) has a nice symmetrical oval form. It is a sparse bloomer, produces few fruits and has been disease-free.

Spring snow crabapple (Malus ‘Spring Snow’) has good tree form and has been disease-free and also reportedly produces abundant white flowers and bears no fruit.

An extension agent may be able to tell you of other crabapple varieties that do not produce fruit.

Quackgrass attack

We have a nursery where we grow a number of deciduous crops. We also grow hemlocks, spruce and fir plants. What kind of herbicide can we use to control quackgrass in our nursery?

— NEW YORK

To manage a quackgrass problem in a nursery, consider using a herbicide such as Casoron, Eptan, Kerb or Princep. Before using or purchasing them, study the label and make sure that the herbicides are safe to use around the crops you are growing. You may want to consider matching the herbicide to the specific situation rather than selecting one for your entire nursery. For example, Casoron will suppress or control quackgrass and a few other rhizome-forming perennial weeds in many deciduous crops. However, it should not be used on hemlock, spruce or fir. Casoron should be applied during late fall or early spring when you expect good rain. Moisture helps activate the herbicide and reduce loss due to volatilization.

Eptan is used to suppress the growth of several weeds, including quackgrass. It must be well incorporated into the soil, preferably by tilling, soon after application. Therefore, it may not be suitable or practical to use in your situation. Eptan has a short-term residual.

Kerb is also labeled for managing quackgrass and should be applied in autumn. Review the label for these herbicides and determine the one that will give you the best weed control.

Mysterious maple spotting

Norway maples planted along roadsides are showing leaf spotting and foliar discoloration. There is a pattern to the discoloration in the tree canopy. It is more on the street side, approximately 1/4 to 1/2 of the tree. It is found on three to four trees on both sides of the street. There is no evidence of anthracnose or girdling root. It doesn’t appear to be leaf scorch. Any idea what it might be? City personnel have treated the trees with fungicides for tar spot disease.

— CANADA

From your description of the symptom pattern, it appears to be related to an abiotic disorder. Since the trees have been treated with a fungicide to manage tar spot disease, the problem is most likely related to that. Check the mix rate and application technique. Since there is a specific pattern, the injury is roadside and it is limited to certain positions in the crown, I believe the foliar discoloration is related to spray injury. Most likely, the affected trees were treated with mix that remained in the hose for a period of time in the hot sun. If not recirculated, this hot mix can cause injury to treated foliage. Trees treated after the hot mix was sprayed out would not be injured.

To verify this, study the suspect plant on site. Also, study the temperature on the day the trees were treated and other areas in the city treated by the same person. If the product itself was phytotoxic, the injury pattern would be on all the treated trees. Make sure the mix rate and application techniques were done properly. Blasting with too much pressure also can cause injury.

The Landscape Management Handbook
The best single-source reference containing the most current and comprehensive information on the basics of turfgrass and landscape management available today!
edited by William E. Knoop
125 pages, soft cover • Item #LSMB630
$24.95
• Provides an overall understanding of turf and landscape care and management and covers all the basics of the green industry
• Covers all the topics golf course superintendents and students of turfgrass and landscape management need to know
• Combines practical information with the tried and true basics of management to provide a single, practical, affordable and up-to-date text
• Features detailed information, charts, diagrams, figures and tables to illustrate key information points

Easy adjustment rotor
Rain Bird's new 5000 Series rotor requires only a bladed screwdriver for fast, easy top adjustment. Available in a 4-in. model, and, in the future, 6- and 12-in. models, the rotors provide the convenience of reversing full- or part-circle operation in one, plus easy arc adjustment from 40° to 360°. Other features include a water-lubricated gear drive, O-ring seals for solid performance under wet conditions and a pressure-activated, multifunction wipe seal that blocks out debris. The rotors also come with a tree (or “rack”) of low angle, Radius+ and standard angle Rain Curtain™ nozzles and a capability of 50 ft.
For more information contact Rain Bird Sales at 626/812-3400 / circle no. 250

Dumping made easy with Goldoni Transcar
One of the most unique features of Panorama's Goldoni Transcar utility vehicle is its trilateral dumping system. The units dump to the right, left or the rear simply by moving a hinge pin. These vehicles are available in 21.5 hp, 30 hp or 37 hp in both articulated and front wheel steer models. All have power steering and four-wheel drive, and tire selections include ag tires, turf tires and super terra-grip tires. The Model 25 and 33 have six forward speeds and three reverse, and the Model 40 has eight forward and eight reverse with a shuttle shift. All three models have a rear PTO.
For more information contact Panorama at 800/392-2386 / circle no. 252

Break down stumps and logs to manageable sized pieces
The new Megabyte stump and log shear is designed to break down stumps and oversized logs into manageable pieces, says its maker, Bandit Industries. It also acts as a stump puller that splits stumps that are still in the ground. The 9-ft., 2-in. opening allows it to split logs of almost any length both horizontal and perpendicular. It comes with a replaceable shear knife tip, replaceable front knife surfaces and replaceable teeth. With a third function hydraulic valve, removing the bucket and installing the shear only takes one to two hours.
For more information contact Bandit Industries at 800/952-0178 / circle no. 251

Vibratory plow has all the moves to get the job done
Vermeer Manufacturing Co. placed 715 lbs. of optimized weight over the flotation tracks and the plow blade in the direct center to make its new LM-11 with Porta-Bore attachment a highly maneuverable vibratory plow. The Porta-Bore attachment eliminates sidewalks, driveways and streets as obstructions, Vermeer says. Powered by an 11.5-hp one-cylinder Kawasaki engine, the vibratory plow can plow down to 12 in. A variable hydrostatic ground drive with steel track drive sprockets ensures solid performance.
Contact Vermeer at 888/VERMEER; www.vermeer.com / circle no. 254

New blade for loaders
The new Harley Power Box Blade™ for skid-steer loaders requires no electrical hook-up for a hydraulic angling cylinder. It has all the functions of Harley's PowerBox Rake, except for windrowed. Designed for landscaping, trench restoration or athletic field maintenance, it features a solid carbide toothed rake fixed in a straight forward operating position and welded to a quick attach plate. The roller is powered by the boom hydraulic of the skid-steer requiring 14 gpm.

Less noise all around
Fradan Power Equipment says its blowers, trimmers, stick edgers and brush cutters are all better on the ears, not to mention improved. Trimmers include a fixed guard that will not spin on the shaft, auto line cutter that protects against overload, adjustable loop and bike handle and multiple cross wrap flex shaft with full liner. The Back-Pac Power Blower features a parachute-style harness, large capacity fuel tank and a supercharged system that diverts pressurized air into the air filter, decreasing fuel emission and intake noise.
For more information contact Fradan at 914/632-3769 / circle no. 255

Alleviator irrigation shut-off valve offers convenience
Pappas Products says its new Alleviator irrigation shut-off valve will allow business owners to work faster, dispatch employees at their convenience and give customers a time window for service rather than a specific appointment time. Pappas claims that the Alleviator™ is a full-port valve with less friction loss than a standard water meter. It can be mounted in any position and comes with a T-fitting to assist alignment to domestic water feed. An internally engineered plug-guide prevents metering rod vibration, whipping and loss of pressure.
For more information contact Pappas Products at 800/834-9119 / circle no. 256

The Spade eases tree, material transport needs
The Spade, an attachment for skid loaders, is designed to aid the transplantation of trees and shrubs. But it can also do more, says Triple D Enterprises, like construct retaining walls, dig in horizontal banks and dig trenches for drain
pipe installation and irrigation. Boom-like design and chain attachment makes for simple unloading from trailer or truck. The Spade’s design enables operators to dig correct size holes ranging from container trees to large root balls. Also a 1/2-yd. bucket, it can haul additional topsoil to help finish planting.

For more information contact Triple D Enterprises at 800/478-7077 / circle no. 257

Take a pill to treat oily water
The new BioPuck HC from Landa Water Cleaning Systems uses bacteria to naturally reduce oil and other hydrocarbons in wash-water collection pits. In most applications, the company claims, each puck is capable of treating 1,000 gal. of oily water for a month. The puck is dropped into the collection pit like a “pill” and begins to metabolize the hydrocarbons, converting them into carbon dioxide and water.

Contact Landa Water Cleaning Systems at 800/547-8672, ext. 175 / circle no. 258

Mortarless retaining walls
Versa-Lok Retaining Wall Systems calls the Mosaic™ retaining wall system revolutionary because of its random, stone-like geometry and technological advantages. Concrete units of different sizes match the appearance of natural stone retaining walls. Mosaic. Weathered™ units undergo a special process to create rustic, old-world character. Versa-Lok says that the concrete units are easily installed without mortar, require no concrete footings and are environmentally safe.

Contact Versa-Lok Retaining Wall Systems at 800/770-4525 / circle no. 259

EZ Arc™ rotor
Toro Irrigation’s new EZ Arc™ rotor can be adjusted from the top of the head with a simple tool or screwdriver and is now available in a 5-in. size to make clearing tall turf easy. Features include an X-Flow™ shut-off for dry nozzle and...
arc changes and Truectory™ adjustment for fine tuning the trajectory from 5 to 25 degrees. Smart Arc™ was created with vandals in mind as it returns the sprinkler to its previously set arc. Flow can be adjusted from 1 to 9 gpm and operates at up to 100 psi.

For more information contact Toro at 612/888-8801 or www.toro.com / circle no. 260

**Stihl grass trimmers**

The Stihl Professional Series™ grass trimmers feature increased horsepower for more power, torque and power-to-weight ratio. A new 25.4-cc engine features a swirl combustion chamber for improved fuel efficiency, increased power and durability. An Easy Start™ system includes a shock absorbing handle and a fuel pump primer. Other features include see-through fuel tank, dual stage air filter, electronic ignition and antivibration system.

For more information contact Stihl at 800/GO STIHL or www.stihlusa.com / circle no. 261

**Pop goes the water**

Aqua-Pop Pop-Up assemblies rise up with 6 lbs. of water pressure at 5 or 9 in. above groundcover, evenly water gardens and groundcover and retract back into the ground when not in use. That way, a beautiful garden takes center stage while watering devices remain hidden. The Aqua Pops are pre-assembled in the following options: 9 in. or 5 in., barbed or threaded for connection to 1/4-in. tubing or 1/2-in. PVC and spray jets in three different spray patterns — full, half or quarter circle.

For more information contact Raindrip at 800/544-3747 / circle no. 262

**Invisible valve**

The Whetstone Group promises that its Slam Shut™ flow control valve will eliminate waste that comes from leaky or broken sprinklers. The combination ball valve and retaining system are installed in seconds inside the sprinkler riser. The stem holds the valve open for normal, unrestricted operation, but when a sprinkler head is broken, the Slam Shut valve closes instantly. A tiny stream of water is allowed to shoot upward to mark the location of a broken head for fast repair. Other sprinklers in the same zone aren't affected, either.

Contact Whetstone at 760/738-0005 or www.slamshut.com / circle no. 263

**Super scraper gives skid-steer more versatility**

The new Bobcat® Super Scraper skid-steer loader attachment features a horizontal, rotating disk designed to remove ice, compacted snow, mud and commercial tile. A skid-steer loader operator lowers the edge of the disk flat to the ground and then drives forward to peel away material. The Super Scraper attachment mounts quickly to Bobcat skid-steer loaders and can be easily maneuvered to desired project locations, providing quick turnaround time. The self-sharpening disk is 22 in. in diameter and weighs 172 lbs.

For more information contact Bobcat at 701/241-8740 / circle no. 264

**Get a lift**

The Kesmac Lift forklift has a low center of gravity and one of the shortest overhangs on a truck or trailer. Buyers now have a choice of the Kesmac slide hook-up or the standard pad mount system. Soon, Kesmac will offer a hook-on easy mounting kit.

For more information contact Kesmac at 905/476-6222 / circle no. 265

**Spreading the field**

Shindaiwa has added to its extensive landscape equipment product line by offering RS75 rotary broadcast spreaders with welded steel frames and 13-in. tires. To ensure constant and accurate dosages, each has a spring-loaded on/off lever, on-hopper rate adjustment and optional side deflector. A rotary hopper agitator, Delrin axle bushings and removable gear cover make for smoother service and adjustment.

Contact Shindaiwa at 503/692-3070; www.shindaiwa.com / circle no. 266

**Log splitter eliminates carbon monoxide emissions**

No carbon monoxide emissions makes Bachtold's new electric log splitter unique — go ahead, operate the Bachtold HE-21 in the shelter of a garage away from the rain and cold. A "bring-it-back" log tray does away with having to lift the unsplit section of large logs back onto the splitter. The log tray extends and retracts with the hydraulic cylinder to carry and hold the log while splitting it and bring back the unsplit log section if the operator wants to split it into a smaller piece. The splitter is rated at 12

Herbicides for dry or wet environments
Riverdale Chemical has two new broad spectrum, postemergent herbicides for turf and landscape: Razor™ and AquaNeat. Razor is for terrestrial applications, including railroad beds, roadsides, industrial sites, forestry areas and recreational sites. AquaNeat is for lakes, rivers, ponds, estuaries, irrigation and drainage ditches, reservoirs and wastewater treatment facilities. Both herbicides are designed for sprayable applications, and both are absorbed through weeds’ leaves.

Connect PTOs fast, easy
The Ekeberg is a 3-pt. PTO quick coupling attachment that Ekeberg International says connects and disconnects PTOs and non-PTO attachments safe, fast and easy in less than 20 seconds. Other claims are that the Ekeberg can be connected by the operator without assistance and without getting out of the seat by engaging the hydraulic locking cylinders. It covers categories one to three, aligns on various levels and angles and has an automatic PTO and smooth, interlocking chamber.
For more information contact Ekeberg at 978/689-9330 / circle no. 269

For more safety on slopes
R & B Manufacturing’s four models of Slope Degree Indicators detect dangerous degrees of slopes and save lives. The model for riding lawn mowers has a face measuring 3-in.-by-2-in., reads from 0° to 45° side to side tilt, and is accurate to within less than one degree, R & B says.
For more information contact R & B at 816/587-9814; www.tiltmeter.com / circle no. 270

Want a new source for pest information?

www.pestfacts.org

Termites, cockroaches, rodents, even poison ivy and other nasty weeds. They're all pests, which means they can cause real problems that pose health and safety risks to children and adults. The good news is now you've got the Pest Facts Information Center at www.pestfacts.org. It's a handy resource discussing the problems caused by pests, as well as the safe and responsible use of urban pesticides and related issues. So don't just sit there...log on.
