Preventive or curative? Why not both?

MACH 2® is the only turf insecticide that gives you the power to prevent or cure grub infestation. Apply mid-May to prevent grubs all season long. Or apply immediately after egg hatch and grubs up to the second instar stop feeding within hours after ingestion, and die shortly after.

Plus, the innovative new chemistry behind MACH 2 Turf Insecticide requires no immediate irrigation, is virtually odorless and offers a favorable environmental profile.

So, when it comes to MACH 2®, the best of both worlds is clearly an understatement.

For more information, call 1-888-764-6432 ext. R2551, or visit our website at www.mach-2.com
Should you buy our independent suspension mower because it’s more comfortable?
Or because you can mow faster?
Yes.

Some time ago, we all agreed the world is not flat. Bumps, ruts, divots, holes. Day after day, they take a toll on you, your equipment and your profits. That’s why we developed independent suspension for the riding mower. Our ProCut Z with IS® suspension smoothes out the roughest turf, so you can mow comfortably from dawn to dusk. And because IS® also allows you to mow faster, you can service more customers. Which means you can make more money. Of course we’re assuming you do like money, right? For more information, call us at 1-800-933-6175.

The ProCut® Z. The only riding mower with independent suspension.

WE GUARANTEE TALSTAR INSECTICIDES WORK.

{OF COURSE, THERE'S NO LIVING PROOF.}

THE TALSTAR® MONEY-BACK GUARANTEE.

When you use Talstar® insecticides, we'll guarantee long-lasting performance against a broad spectrum of insects, or your money back. That's because Talstar® insecticides have the longest proven residual in the industry, providing up to 6 months control of target pests.

The active ingredient, bifenthrin, is the only biphenyl pyrethroid available in the industry. And since bifenthrin contains no alpha-cyano group, Talstar® insecticides won't cause the skin or throat irritation experienced with other pyrethroids.

Talstar® insecticides can solve your toughest insect problems. In and around buildings, on lawns and ornamentals, even on golf courses, Talstar® insecticides control a broad spectrum of insects and mites.

The water-based flowable and the granular formulations can both be safely applied to sensitive turf and ornamentals without damage or burning. Plus, they're easy to handle and are odor-free at label rates.

Find out more about our new money-back guarantee for Talstar® GC Granular Insecticide, Talstar® GC Flowable Insecticide/Miticide, Talstar® PL Granular Insecticide and Talstar® Lawn & Tree Flowable Insecticide/Miticide.* Contact your FMC authorized distributor or call 1-800-321-1FMC.

The power of planning

Remember where you wanted to be by now? Are you there yet, or are you too busy putting out fires to think about plans for July, or 2001 or even 2010?

Harvard Business School once did a study of a graduating class and their progress 20 years later. While most students had goals at graduation, not all achieved them. It helped a lot if they had clear and specific goals at graduation, for there was a dramatically higher chance of achieving them. But what was even more remarkable was that 80% of those who actually wrote down their goals achieved them.

That's probably not so much a testament to being a purposeful, organized person (although that doesn’t hurt) as it is an insight into the power of planning, for the act of writing a goal is very complex. It involves thinking it through and defining exactly what you hope to achieve, how you'll measure success and how you plan to get there. Writing formalizes it and makes it more of a commitment.

I was fortunate to sit with several landscape contractors at ALCA's Executive Forum as they discussed their problems dealing with growth, or in some cases, "hypergrowth." As they shared their concerns, some common threads emerged:

▶ Growth, like a virulent infection, can take over before you’re aware you’re in trouble.
▶ When you grow too fast, it can throw your whole operation into chaos.
▶ You might see hypergrowth on the horizon, but unless you have a solid plan to deal with it, you’re going to have problems.
▶ If you can plan for growth, you can handle growth.

This group was smart, experienced and savvy (some even had five-year plans). Yet, growth ambushed them.

Planning for change

So what can you do? Don’t plan all the time, but it does pay to plan regularly, and to be specific, foresighted and imaginative. A relative told me that the best mothers were those who were the most imaginative, because they imagined the potential problems and dangers that could happen to their children and tried to take steps ahead of time to avoid them. They aren’t being overprotective, just anticipatory.

It’s the same thing with your operation. You have to anticipate your competitor’s tactics, hiring shortages, cash flow problems, good or bad weather, economic downturns and too much growth, too fast. You need a solid, specific plan that will get you from Point A to Point B. And you must take time to revise that plan, develop an emergency Plan B for those unexpected new fires to put out.

Those plans will make you ready to invest in a new service, tackle a long-term problem or move your quality up to a higher level. Those plans will give you the power to change.
