New Compass™
Locked-in disease control for both lawns and landscape ornamentals at the lowest rates ever.

New Compass controls Brown Patch, Leaf Spot, Gray Leaf Spot, Red Thread, Rust, and more.

Effective for all turf areas and all species, Compass fungicide delivers the value of a contact, the power of a systemic. In fact, it's the best Brown Patch value ever developed. Compass also goes on to control important ornamental diseases, such as Apple Scab on crabapple and flowering cherry trees.

Compass gives you preventive and curative options.

Compass delivers the highest efficacy against Brown Patch and a broad spectrum of diseases at the lowest use rates ever. One pound of Compass at 0.15 oz/1,000 sq. ft. covers 2.45 acres of turf.

New technology, yet competitively priced.

With unique mesostemic power, Compass delivers locked in, broad spectrum control at a price you can afford.
Just in time, a reduced-risk fungicide that is environmentally sound.

Compass has been classified as reduced-risk. So you can use it with confidence.

Mesostemic power ensures locked-in, rainfast disease control up to 28 days.

Compass securely locks into the plant surface due to its high affinity with the surface. Forming a protective reservoir of fungicide on the plant surface, it resists washing off, thus ensuring long-lasting disease control.

Important: Always read and follow label instructions before purchasing or using these products. ©1999 Novartis Crop Protection, Inc., Turf & Ornamental Products, Greensboro, NC 27419. Compass™ and the Novartis logo are trademarks of Novartis.
Otterbine subsurface aeration.

For effective pond management, turn to the industry leader.

Otterbine subsurface aerators give you the highest quality construction and assembly... at purchase prices and operating costs that are the most competitive in the industry. Otterbine units are backed by unsurpassed product safety testing, the industry’s finest warranty, and over 130 distributors and over 60 authorized Otterbine service centers worldwide.

Choose the subsurface product that best suits your needs. TRITON₂ is perfect for narrow waterways; SUBTRITON₂ is especially suited to shallow ponds; and AIRFLO, used in deep applications, is ideal for recreational settings.

Otterbine, a family-owned company, has used its 40-plus years’ experience to bring you the best in water quality management products, including surface and subsurface aerators, lake dye, dewatering pumps, and Otterzone, an ozone-generating system for effluent, odor or clarity problems.

Call today at 1-800-237-8837.

Water works with Otterbine.

Preventive or curative? Why not both?

MACH 2® is the only turf insecticide that gives you the power to prevent or cure grub infestation. Apply in mid-May to prevent grubs all season long. Or apply immediately after egg hatch and grubs up to the second instar stop feeding within hours after ingestion, and die shortly after.

Plus, the innovative new chemistry behind MACH 2 Turf Insecticide requires no immediate irrigation, is virtually odorless and offers a favorable environmental profile.

So, when it comes to MACH 2®, the best of both worlds is clearly an understatement.

For more information, call 1-888-764-6432 ext. R2551, or visit our website at www.mach2.com
I'd buy time if I could

Have you ever felt like this? I have 10 new projects on my desk, plus the usual day-to-day assignments, all of them needing my attention, and now. I'm not complaining, but if I knew more about juggling I'd feel better. You must feel the same when the Spring rush comes. Those urgent telephone inquiries, scheduling and estimating challenges, employee training demands and fast-growing landscapes all need your attention, and they need it now. Whew! No wonder you're feeling pressured.

I'm amazed at how much more work an ordinary person can accomplish when they are challenged. The experts tell us people are just as productive when they work for four long days rather than five regular ones, or when they have incredible pressures to meet a schedule. Who hasn't accomplished twice as much as usual on the day before a vacation?

Those who have devised effective time management systems know exactly what it takes to be efficient, and most of us discover it on our own when time is short: it's planning for your priorities.

In May, the priority is production. Get the work done, get the new employees assimilated, get the schedule tweaked, get those phones answered, get out and make new estimates. Get it all done and don't even think about slacking off — there's no time.

Right now, you're probably as focused as you're going to be for the rest of the year. But what is "effective" when you have enough to keep yourself busy 18 hours a day? That's where the planning comes in. Be realistic and know you won't get everything done. That will give you insight into your real priorities. If you spend this month working hard on just your top priorities, you'll have one heck of an effective time. Guaranteed.

D.C. in a nutshell: low-balling

Several D.C.-area contractors recently told me some large area firms continue to "buy business" by low-balling maintenance contract bids (read more about this in our cover story: "Market under the Microscope," starting on page 28). This brings two conflicting thoughts to mind:

There's nothing wrong with providing "economy" service at "economy" prices. Sure, most of you want prices to climb for everyone in the industry because this sets a higher value on your services and makes it easier to be profitable in a highly competitive business. For some, it might be the first time you truly are profitable.

But if I believed all that I'd be naive. That's business and customers get what they pay for. They can pay more if they want higher levels of service.

Low-balling doesn't always work that way, however. When your customers are used to high quality service (and those extras you provide for free), and they switch because of an irresistibly low bid, they may be disappointed with the new contractor and even the industry as a whole. No wonder so many go back to their old providers. It proves that relationships often do mean more than money.
