Florists' Mutual Insurance (FMI) is the only insurance company that's exclusively committed to serving the needs of the entire horticultural industry. We've created custom insurance programs for horticultural businesses like yours for over 110 years. You'll never find an insurance company better able to serve your growing business than FMI. Call us at 1-800-851-7740 or visit us at www.fmi-insurance.com. If you can dial it or click it, we can appraise it, quote it, write it, support it and service it.

INSURANCE SPECIALISTS FOR THE HORTICULTURAL INDUSTRY
KROMER CO.
800/373-0337
The self-propelled spray unit from Kromer, Mound, MN, can be equipped with four sizes of spray booms: 43-in. one piece with 60-in. swath, 63-in. two-piece folding with 80-in. swath, 103-in. two-piece folding with 120-in. swath and 163-in. three-piece with 180-in. swath and 7-way valve. A 25-ft. hose and gun is available.
Circle 267

LESCO
800/321-5325
The newest design in a 200-gal. sprayer comes from Lesco, Rocky River, OH. It fits sideways into a full-size pickup. Pump, hose and engine are accessed from curbside of truck. Powered by Kawasaki 5.5-hp FE-series engine and Hypro 403 series 3-piston diaphragm pump. Hannay electric hose reel has 300 ft. of 1/2-in. 800 psi urethane inner core hose.
Circle 268

MANTIS/LITTLE WONDER
877/596-6337
www.littlewonder.com
The Mantis Spray Partner from Mantis/Little Wonder, Southamptom, PA, has an adjustable nozzle that changes from gentle mist to powerful jet up to 25 ft. or more. Pump provides 50 psi pressure and maximum flow rate of 2.2 gal. per minute.
Circle 269

MASTER MANUFACTURING
712/258-0108
The TC1060-008 (14-gal.) and TC1060-009 (25-gal.) Turf Choice spray units from Master Manufacturing, Sioux City, IA, come with non-corrosive poly tank with 5-in. screw-on lid and st-on flotation tires. They are equipped with a Shurflo 12-volt santoprene diaphragm pump providing 1.4 gpm at up to 60 psi. Comes standard with trigger gun with nozzle that adjusts from hollow cone to straight stream, 25 ft. of hose, and 2-nozzle, 7-ft. cover boom.
Circle 270

ROGERS INNOVATIVE
888/975-8294
www.rogersinnovative.com
With the ETT2000, a 90-in. drift containment tow sprayer, the wind can blow and the public can look on. Its electric pump connects to your tractor or riding lawn-mower’s battery with a cable switch near the operator.
Circle 272

SHINDAIWA
800/521-7733
The Model SP415 from Shindaiwa is made of high density, UV-protected polyethylene. Unit comes with four spray nozzles. The pump handle is reversible for right-hand or left-hand operation.
Circle 273

SMITHCO
610/688-4009
www.smithco.com
The Spray Star 1000 turf sprayer from Smithco, Wayne, PA, has a 160-gal. fiberglass tank and two-wheel mechanical drive. The 3000 has a 300-gal. cross-linked polyethylene tank and two-wheel hydrostatic drive. All units have low centers of gravity and offer three spray control options.
Circle 274

SNOWEX
800/725-8377
www.snowex.com
The 425 backpack sprayer from Solo, Sindelfingen, Germany, comes with padded straps and a 4-ft. sprayer hose. All parts are made of corrosion-resistant plastic. Piston-style pump delivers up to 85 psi from the 4-gal. tank.
Circle 275

SOLO, INC.
757/245-4228
www.solo-germany.com
The 425 backpack sprayer from Solo, Sindelfingen, Germany, comes with padded straps and a 4-ft. sprayer hose. All parts are made of corrosion-resistant plastic. Piston-style pump delivers up to 85 psi from the 4-gal. tank.
Circle 276

SP SYSTEMS
800/457-3440
www.simpsystemsllc.com
The SP2 4-gal. backpack sprayer from SP Systems, Santa Monica, CA, is capable of 180 psi and uses polyethylene tank treated with UV inhibitors. Spray pistol has brass shut-off pin and double O-rings made of upgraded Viton formula. A 6-in. mouth with built-in strainer makes for easy filling.
Circle 277

TORO
800/476-9673
www.toro.com
The Toro 80T and the 50T trailer sprayers both have a 3.5-hp Briggs & Stratton engine that powers a diaphragm pump. A handgun with 25 ft. hose is standard. The 80T from Toro, Bloomington, MN, has a 14-ft. boom with eight nozzles. The smaller 50T has a 6-ft. boom with four nozzles.
Circle 278

TRI-CON INC.
800/448-2486
If you’re looking for nozzles, wands, or other related parts, check out the products available from Tri-Con, Cleveland, OH. Among the popular attachments are the S-125 adjustable nozzle water spray gun.
Circle 279

WYLIE MANUFACTURING CO.
800/722-4001
www.wyliesprayers.com
Wylie Manufacturing’s new spot sprayer is compatible with diesel as a chemical carrier. Available in 15-, 25- or 55-gal. sizes, it features a 12-volt Flojet pump, brass trigger gun, adjustable nozzle and 25 ft. of fuel grade hose.

Salty situation
I manage turf in the central San Joaquin Valley of California with high levels of salts, chlorides and sodium in the soil. Common bermuda and tall fescue are dominant grasses (in different areas). What are the best seed choices for overseeding or for the seeding of new lawns, in soils of this type?

— CA

According to the adaptation map, both the tall fescue and bermudagrass will grow in your area. However, the National Turfgrass Evaluation Program (NTEP) report indicates that bermudagrass tolerates salt very well, while tall fescue tolerates salt only moderately well. As far as alkaline tolerant turfgrass, only bermudagrass was mentioned. For the most current information on tolerant species, check out the NTEP’s Web site at www.ntep.org.

Pine needle scale and sawfly
Mugo pine and other pines on our clients’ properties are affected by pine needle scale and pine sawfly every year. How well does Merit insecticide control these diseases?

— PA

One way to manage pine needle scales and pine sawflies is to use the multiple target principle, which allows you to gain control of more than one pest with an insecticide application. Before you do this, check if the product is active on other target pests and the timing coincides.

Pine sawfly is on Merit’s label, so it should manage the problem well. The reason Merit can manage sawflies is that it’s root absorbed and moves to new candles. If the soil is dry when you apply the product, irrigate to improve its movement within the plant. This increases its effectiveness.

Treat for pine sawflies in the fall for best results. Merit will manage the larvae when they hatch and feed on the new growth the following spring.

If you miss the fall treatment, treat early in the spring, early March, if possible. Sawfly eggs hatch during late April or early May. Be aware, however, that if the soil is saturated from melting snow or rain, the product uptake may be affected. Another problem is the short duration between treatment time and egg hatch. Also, if the pine trees are large, the product may not be distributed fast enough throughout the tree to protect the needles.

Don’t expect a good result from managing pine needle scale with Merit, particularly if the scale infestation is heavy. Pine needle scale is a sucking pest with a hard or armored scale cover. You may get some suppression from the treatment, but reports indicate you can’t depend on the treatment for scale management. After treating in fall, monitor the population the following spring. If scales are present and still alive, provide management as needed.

Insecticide failure
I applied insecticide to a client’s property, but it didn’t solve the problem.
What could have gone wrong?

— VT

Several factors may be responsible for poor insect and mite control on ornamental trees and shrubs.

Here are several beyond those I detailed in last month’s Landscape Management article, “Why Insecticides Fail,” found on page 58.

Failures related to lack of product knowledge include: improper selection of product or formulation; slow activity on target pests; too-high customer expectations; low concentration of mix; failure to penetrate surfaces; phytotoxicity; product is too old or photodegraded; solvent in the mix; volatilization; spoiled or separated product; high pH of water; chemical incompatibility of products or product has the wrong type of activity; and several others. Short or no residual effect or heavy pest infestation may also come into play.

Failures related to misunderstanding the treatment methods include miscalculating the active ingredient; improper mixing/agitating; improper tank cleaning; lack of surfactant or buffering agents if needed; failure to incorporate into soil; too much organic matter inhibiting application from reaching pest; failure to water-in or use water correctly in mix; failure to apply at proper times; improper equipment or calibration; poor uptake into trees for trunk injections; failure to penetrate insect’s protection; rain wash-off; failure to reach the target because of barriers; wind drift; soil conditions; and others.

Failures related to timing involve pest growth stages; incorrect temperature; hatching sequence; emergence after residual is gone; activity only when pest is young; and other factors.
What a joy
Kawasaki's new KRB400B backpack blower features a joy stick throttle with a trigger throttle, fully adjustable throttle lock and engine shutoff switch. Both the KRB400A and KRB400B models feature a 3.2-hp Kawasaki engine with maximum air volume of 418 cfm and maximum air velocity of 198 mph. Each blower weighs just over 18 lbs. and, Kawasaki says, is several decibels quieter than last year and has one of the lowest noise levels in its class.
For more information contact Kawasaki at www.kawasaki.com / circle no. 250

Expanded label
The Chipco Professional Products group of Aventis E.S. says that its 26GT fungicide can now be used on ornamentals. With its active ingredient iprodione, 26GT controls a broad spectrum of foliar and borne diseases including rhizoctonia and botrytis. Diseases such as pythium and phytophthora can be controlled when 26GT is combined with Alette fungicide.
For more information contact Aventis E.S. at 800/438-5837 or www.aventischipco.com / circle no. 251

Groovy removal
FFC Inc.'s Snow Push attachment for skid-steers, tractor loader backhoes and wheel loaders is perfect for removing snow, handling wastewater or cleaning up after a flood. The optional pull-back kit allows the operator to pull back from walls, fences and garage doors by rolling the blade over the material and moving the machine backward. Available in four widths (6.5 ft. to 10.5 ft.), contractors can cover parking lots, roads, driveways and sidewalks.
For more information contact FFC at P.O. Box 122, Lee, IL 60530 / circle no. 252

Watch the weather
Spectrum Technologies' new family of three WatchDog weather stations lets you monitor, document and analyze site-specific growing conditions. The 900ET weather station monitors evapotranspiration and aids in irrigation scheduling by collecting data on wind speed and direction, wind chill, dew point and more. Up to three optional plug-in sensors gather even more weather information. All three stations feature an LCD display, ready-mount design and internal 8-month battery power source.
For more information contact Spectrum Technologies at 800/248-8873 or www.specmeters.com / circle no. 253

Soak that soil
Cascade Plus is a residual soil-wetting agent that uses the basic technology of the original Cascade molecule to provide more consistent, longer lasting water infiltration and performance on localized dry spot. It also offers an improved environmental profile and empirical trendline.
For more information call 800/323-6280 / circle no. 254

More water distribution
Signature Control Systems' Thompson 286/287 commercial rotor is a plastic rotor that provides more water distribution at a higher pop up than the 186/187 model to clear taller turf-grasses. It offers five uniform-coverage nozzles for a variety of flow rates. The radius can be adjusted up to 25% for optimum coverage.
For more information contact Signature at 949/580-3640 or www.signaturecontrolsystems.com / circle no. 255

Precise mix
CCI Products says its EZ 2-Cyder dual chamber fueling system mixes 2-cycle oil and gasoline precisely, easily and cleanly. All it takes is setting a dial to meet any equipment maker's specifications in ratios, ounces or milliliters. A companion product, the EZ 2-Mixer, mixes liquid fertilizers, pesticides and defoliants with water.
For more information contact CCI Products at 877/224-7763 or www.ezdispensers.com / circle no. 256

Twice the power
Bobcat Company's new SG60 stump grinder attachment is twice as powerful as the previous model. The company says that using a Bobcat 863 high-flow loader as the power source, it can grind a stump 30 in. in diameter to a depth of 10 in. below grade in less than 10 minutes. The grinding head is mounted 90 degrees to the operator for better visibility, and the swing cylinder generates an arc of 80 degrees, allowing the operator to cut up to a 45-in. stump without repositioning.
For more information contact Bobcat at 701/241-8740 or www.bobcat.com / circle no. 257
61- or 72-inch cutting width
27 hp LC Kawasaki or 31 hp Daihatsu engine
All-new four-wheel (front and rear) IS® Independent Suspension
