You have enough things to worry about. But with Onetime® herbicide, wasting time tank-mixing isn’t one of them. Onetime combines our new patented formulation of quinclorac, MCPP-P and dicamba, enabling you to control more than 70 weeds, including crabgrass, clover and dandelion without tank-mixing. Plus, its liquid formulation, which includes the same active ingredient as in Drive® XLR8 herbicide, provides more rapid absorption into the plant in both warm- and cool-season turf. If you’ve got weeds, it’s time for Onetime.

BASF
The Chemical Company
Do unto others …

Heller admits he was a pretty shy kid growing up.

“I was a social moron,” says the outgoing president of PLANET’s Day of Service Committee. “It has taken years of my wife telling me to go and network for me to be comfortable speaking in public. She encouraged me not to talk about my business too much, but rather to take baby steps and be comfortable with each one. You can’t go straight from being shy to being a motor mouth.”

What helped Heller get over the rough spots was having a passion for what he was doing, including the various customer service projects his company supports. “It’s easier to talk about something if you really care about what you’re doing and whom you’re doing it for,” he explains.

When choosing a volunteer effort, passion is the most important criteria.

“You have to be excited about what you’re doing and feel good about helping someone who has a need,” explains Newman, the incoming president of the PLANET Day of Service Committee. “If you are excited and have passion, everyone you interact with — whether it’s your employees or vendors or the media — will feed off of your excitement.”

And that’s where one community service effort sets itself apart from another. Making a positive impact and growing employee and customer loyalty are all key drivers of volunteer efforts. But many Green Industry professionals who have had success here say none of this is possible by faking it. The primary rule of thumb: Believe in your project.

“It’s more than just trying to make a good impression for the sake of making a good impression,” Newman says. “It’s about simply doing good because it’s the right thing to do.”

volunteer programs.

The Harvard Business Review did a study of the linkage between employee attitude, customer relations and sales at Sears and found improving employee attitude by five points resulted in a 1.3-point improvement in customer satisfaction, which produced a 0.5% revenue hike. For a company like Sears, this amounts to $65 million annually.
nobody knows the exact age of an ancient and mysterious Native American mound located at the summit of a wooded ridgeline in central Ohio. Most experts believe it was constructed about the time of the birth of Jesus. The X-shaped mound, whose circumference approximates the size of a Little League infield, is the attraction at Cross Mound Park on the outskirts of the village of Tarlton (about 300 people), which is a 35-minute drive south of Columbus.

Chuck Miller selected Cross Mound Park as his company’s PLANET Day of Service project. His company, EsQape-proof your weed control.

EsQape-proof your weed control. Even hard case weeds like crabgrass can’t get away from Quincept® herbicide. With three active ingredients in rates that optimize performance, Quincept nails grass and broadleaf weeds that have escaped pre-emerge applications. See your distributor or www.nufarm.com/turf for more on how to put a stop to escapes.

Mirrorscapes LLC, proves you don’t have to be a big landscape company or one that’s been around a long time to do something nice for your region. Miller, 52, founded Mirrorscapes in nearby Lancaster, OH, three years ago as he was winding down a 30-year-career as a high school educator — much of it spent teaching agriculture.

His company has four trucks and employs “seven or eight” employees, adding part-time help as needed for bigger projects. Miller’s top challenge this spring has been reining in his firm’s rapid growth, thanks to its “follow-up and customer service” and, more recently, to winning a prestigious award for its display landscape at the Tri-County Home Builders Home and Garden Show in March.

“We’ve been going like crazy. The phone’s been ringing off the hook,” says Miller, obviously pleased as he and his six-man crew load two work trucks for the morning’s work at the park. “We needed a break. The guys needed something different to do. They’ve been putting in a lot of hours.”

His young crew (including “plant man” Lennie Conrad, a retired high school guidance counselor/coach and several years Miller’s senior) approaches the Earth Day project with unfazed enthusiasm, fueled probably as much by the prospect of a working picnic in the park — as evidenced by the boxes of goodies being loaded into the trucks — as by the cloudless, bracing April morning.

Driving three trucks to Cross Mound Park, and after digging into pastries and...
HEAVY ON THE LIFTING. LIGHT ON ITS FRAME.

The 2010 Freightliner Sprinter Cab Chassis proves that it doesn’t take a heavyweight to carry heavy loads. Its lightweight, all-steel, unibody frame handles a Best-In-Class* payload up to 6,269 lbs. And with numerous upfit options and body packages available, the Sprinter Cab Chassis has the versatility to carry any business. Visit FreightlinerSprinterUSA.com or your local dealer to discover your Sprinter today.

Years after losing the ability to water one of Denver’s oldest cemeteries, a group of volunteers works to revive the site with native species.

PATRICIA CARMODY steers her white Subaru Outback wagon along the bumpy dirt and gravel road that winds its way through the 77-acre Riverside Cemetery, Denver’s oldest operating cemetery. She muses about her desire to find a scout troop in search of a community service project, and a benefactor willing to donate some gravel to repair the many potholes dotting the road, now oozing with mud following the morning’s cold shower. But the sun has

Knock out multiple weeds in a single round.

Only Solitare® takes on crabgrass, sedges and broadleaf weeds with no tank mixing required.

Fighting more than one weed problem used to require more than one product. Now there's new Solitare® herbicide from FMC Professional Solutions, the only all-in-one postemergence solution designed to help you control multiple weeds in a single, fast-acting application.

Wherever several weeds like crabgrass, sedges and broadleaf weeds come together, you'll experience the Solitare “sweet spot.” That's because Solitare controls or suppresses over 60 weeds without the hassle and cost of tank mixing. Dual-action Solitare herbicide features a patent-pending combination of active ingredients that combats weeds from the foliage down and the root up. Solitare also impacts viability of seeds and tubers within the soil, helping to decrease weed populations this season and next. When multiple weeds gang up on you, there's only one solution you want in your corner: Solitare herbicide.

For more information on Solitare and other solutions from FMC, visit www.fmcprosolutions.com or contact your FMC Sales Representative or local FMC Distributor.
since come out, and wispy clouds waft through a blue sky over the cemetery — through which volunteers scurry about, working on a number of projects as part of PLANET’s second annual Day of Service.

Carmody passes a small raised planter and stops both the car and her conversation. She catches her breath slightly as she sees the work some of the volunteers completed earlier. Within a few hours, the planter went from weed-filled to tilled bed to beautiful display of native and specially selected flowers, all to please visitors coming to honor the 67,000 friends and loved ones buried in the 134-year-old cemetery.

“Look at that,” says Carmody, executive director of the Fairmount Heritage Foundation, which oversees the cemetery. Still wearing the plastic-garbage-bag-turned-rain-poncho, Carmody stares in awe at the transformed planter. “I am so grateful. It’s the revival of Riverside.”

Dozens of volunteers come courtesy of the Colorado Association of Lawn Care Professionals (CALCP) to prep and plant 2 acres of groundcover; install a variety of native trees, plants, and shrubs; plant a heritage iris garden; and remove a number of dead heritage trees — including an approximately 80-year-old American elm.

Though it will take years to complete, the goal is to make the cemetery sustainable. The only watering done will be until the plants are established.

CALCP committed to reviving the cemetery, which fell into disrepair after the organization overseeing the site lost a long court battle that went to the Supreme Court over water rights.

“This is one of my favorite days of the year,” says Andy Ferguson, president of CALCP and the district manager of the West Denver office of The Davey Tree Expert Co. “Our members show up in force.”

IT’S BIGGER THAN IT USED TO BE.

ARE YOU M-POWERED?

Sometimes bigger is better. Like the new cab on the Bobcat® M-Series loaders. Bobcat lowered the door threshold and increased the size of the front access to give you an easier entry and exit – also making it easier to see and do your work. Bobcat increased the cab space by 10%, giving you more room where it matters at your arms, legs, shoulders, head and feet. You can grow comfortably with the new Bobcat M-Series loaders. Go to www.bobcat.com/bigger19 to learn more, or see your dealer to find out how these new loaders can M-Power you to do more.

Providing labor and equipment for half a day means those workers, machines and vehicles aren’t doing work the company can bill for. But that’s not really the point.

“It’s a great way for us to make a big impact without impacting our ability to make some money,” Ferguson says.

Companies from across the state and across the country participated in a variety of projects.

“We found out about Day of Service two years ago,” says Bryan Gooch, marketing manager for Agrium Advanced Technology. “We jumped on the opportunity to be a lead sponsor. It is perfectly aligned with what we believe in. We saw Day of Service as not only a chance to give back to the communities that we live in, but also to donate products to people who can help extend the message, and let them use products that are good for the environment.”

Loveland, CO-based Agrium volunteers worked on their own project near the company’s new headquarters (transplanting native plant seedlings to help restore wetlands and natural areas) and donated fertilizer to several more.

Planting the seeds for healing

While CALCP members toiled away at the Riverside Cemetery, about 20 minutes away Troy Shimp, senior designer for Denver-based Lifescape Associates, and his team started working on a healing garden between two buildings that house the Denver Children’s Advocacy Center (DCAC). Though the rain only slowed the crew at Riverside Cemetery, it put a halt to the day’s work at the DCAC. But that only meant the crew would be back at the next opportunity.

“We see giving back to the commu-
