Going organic
Several lawn care pros using organic soil amendments say they’ll never go back to their old ways.

By BETH GERACI

At a time when organic lawn care products are gaining buzz in the Green Industry, one product in particular is making a strong push in the market. And the lawn care professionals using it say they’re seeing results.

The product is called Holganix. It’s a 100-percent organic soil amendment that functions as a biostimulant, enabling plants to efficiently take up nutrients and pesticides.

Some companies are hesitant to use Holganix, a type of compost tea, because it must be refrigerated in special refrigeration units at 33 to 44 degrees. But the vendor provides and sets up the units for clients at no cost. The units come in three sizes based on the amount of the product a company will need.

“I don’t see us going back to what we were doing before—not at all,” says Ed Fleming, owner of Milton, Del.-based Lawns Unlimited. Fleming made the switch from liquid fertilizers and micronutrient packages to Holganix two years ago, wanting to reduce the amount of nitrogen and herbicides applied to his customers’ lawns.

“The concern was the amount of nitrogen we applied,” he says. “We wanted the plant to not be dependent on it as much. The more fertilizers that we apply onto these lawns, the more we’re reducing the biology in the soil.”

PLANT HEALTH ELEMENTS
Fleming, who is an agronomist, learned about Holganix from one of his distributors. Since he’s been using it, he says he’s noted better color, fewer disease problems, healthier and stronger root systems and better control of broadleaf weeds on his customers’ lawns.

“Based on the depth of the roots and the thickness of the turf, our lawns just stand out compared to our competition. They’re greener, thicker and healthier,” he says. “And the program is cumulative, so the longer you use it, the better the results are.”

Gerry White, managing partner at Grassmaster Plus in Georgetown, Mass., north of Boston, has been using Holganix since last June. White had a 20-year career as a golf course superintendent before making his foray into lawn care six years ago. As a superintendent, he used organic products on fairways and greens to maintain the health of the soil.

When White saw Holganix, he thought it could help reduce his inputs, including the amount of nitrogen and pesticides his workers applied.

WEBINAR #2: Treating scale

Thursday, May 23, 2013
10 a.m. PT/1 p.m. ET

WEBINAR DESCRIPTION:
Join Landscape Management for an hour-long webinar on treating scale insects. Our experts will cover both the technical side of treating these potentially damaging insects and the business side of educating customers and selling it as a service.

PRESENTERS:
Scale identification and control
Joe Boggs
Assistant Professor
The Ohio State University Extension
Boggs is a commercial horticulture educator, providing support to the Green Industry. His specialties include classroom and hand-on teaching of tree/shrub plant problem diagnostics and management, invasive species and applied entomology.

Scale: educating customers, evaluating products and treating trees
Rex Bastian, Ph.D.
Regional Technical Advisor
The Care of Trees/Davey Tree Expert Co.
Bastian joined The Care of Trees in January of 1989 after receiving his Ph.D. from Iowa State University, majoring in entomology. His emphasis is on education and training, public relations and diagnostics. He is an ISA Board Certified Master Arborist and currently serves on the ISA Board Certified Master Arborist Test Committee.

MODERATOR:
Marisa Palmieri, Editor of Landscape Management

Sponsored by: Safari INSECTICIDE

Brought to you by: Landscape Management

“The goal is to have a thicker lawn and fewer inputs of pesticides and herbicides,” White says. “I would say I’ve been able to cut my herbicides down, from a rate standpoint. I want to see it through another season, but I’m definitely intrigued by it and happy with the results I’ve seen so far”—results such as thicker blades of grass that grow laterally instead of vertically, he says.

Scott Whitehead, CEO of Unlimited Landscaping and Turf Management Inc. in Buford, Ga., is new to the Holganix program, launching it Jan. 1. It’s too early to see results, since the grass is just now coming out of dormancy, Whitehead says, but he’s optimistic.

**ENVIRONMENTAL CONSCIOUSNESS**

The environmental health benefits and fewer inputs of Holganix are most appealing to Whitehead. “We want to give customers exactly what their lawn needs and not more than that—to avoid having products just run off into our lakes, rivers, creeks and streams,” he says.

In years past, Unlimited was “fertilizing non-stop,” Whitehead says. But he got fed up with that. “We wanted to set ourselves apart and have a more organic approach than our competitors.”

Using less fertilizer also is vital for Fleming, who’s focused on environmental stewardship. “Using organics is important for being a good steward of the soil and the earth,” he says. Whereas slow-release fertilizers used to be on Fleming’s agenda, now he’s focused on “preserving the biology in the soil, so the soil can feed the health of the plant,” he says. “It’s kind of like either putting people on welfare or giving them a job so they can be dependent on themselves.”

Holganix can be more expensive than typical fertilizing products—White says it increased his material costs by about 5 percent. But “the benefits far outweigh the costs,” he says. “If you look at the whole picture, in the long run it will save money because you can reduce your rates, spend less time spraying on the property, all of those things are going to build up as time goes on.”

One year into it, White has Holganix on all his trucks. “I wanted to see it last year,” he says. “I wanted to believe it, and I saw good enough results where I made the switch completely. I’m all in, baby.”

**MARKET WATCH**

**PVB LOCK BOX**

The P.V.B LOCK BOX will come in one size 24x24x12 this will fit all wall mounted Pressure Vacuum Breaker units ranging from ¼” to 2 ½” as you may have seen at the 2012 irrigation show this product is professionally built in the U.S.A. The product is powder coated hunter green, it comes with the four security bolts and lead anchors it also comes with one security key unlocking bit. This Unit wholesales at $319.99 and the manufacturers suggested retail price is $499.00. Our contractors are installing these units at $600.00 each and the unit installs in less than 20 minutes.

Call 800.372.1434 To Place Your Order Or Visit Us At Www.pvblockbox.com

**CLOCK BOX**

The CLOCK BOX will come in one size 14x17x10 this will fit most outdoor irrigation controllers, this unit also be powder coated hunter green and come with a removable front cover for access to the unit the locking mechanism will be (2) security hex pin locking bolts and will come with two unlocking bits one for the owner and one for the irrigation or maintenance tech. This Unit wholesales at $259.99 and the MSRP is $439.00. Our contractors installed pricing is $539.00 and this also installs in less than 20 minutes. By installing this product this assures that no unauthorized person or persons are tampering with the irrigation controller and will also protect it from being stolen.

“We want to give customers exactly what their lawn needs and not more than that.”

—Scott Whitehead, Unlimited Landscaping
WHEN WINTER’S ICY tendrils snake their way through the northern part of the country, many contractors put the mowers away and attach plows to the fronts of their trucks. But today they’re doing so on the heels of a couple seasons where snowfall was erratic and unpredictable.

In the face of such uncertainty, contractors can’t confidently rely on the residential market to earn their winter keep, and many of them have come to prefer the steadier, long-term income generated by commercial accounts. Nonetheless, snow contractors have found several ways to differentiate themselves and make money from their residential services. Here’s a look at how three contractors are doing just that.

**Short-term accounts**
Madison, Wis.-based Barnes Inc. provides both commercial and residential service during the long Wisconsin winters. And while the bulk of the winter income is derived from the commercial accounts, Barnes is growing its residential base, often with the clients dropped by competitors leaving this part of the market.

“It’s a balancing game,” says Chris Schultz, quality control coordinator and sidewalk snow removal division manager for Barnes.

“When you transition to residential, you have to do that in a timely fashion,” he says. “Getting to your residential accounts as soon as you can after your commercial accounts is the challenge.”

Three snow contractors put a new twist on winter’s residential market. **BY DAN JACOBS**
Barnes is large enough and flexible enough to offer traditional snow services along with vacation and emergency services. Many customers are content to take care of their own driveways—until a big snow comes along. Nobody wants to shovel a 15-in. snowfall, Schultz says. “Because we are so big, we’re able to take on customers for a short period of time,” he says.

Even when the snows don’t pile up quite that high, many customers call on Barnes to provide services while they’re away for the holidays or on a business trip. They hire Barnes to take care of their properties during those times. “We’re very flexible like that,” Schultz says. “Whenever our customers are gone and need snow removal services, we’re there for them. It’s a nice service to be able to offer for people because it’s one less thing they have to worry about. One less thing customers want to do is come home to three fines because their snow removal wasn’t done. It’s one phone call. It’s peace of mind for them.”

It’s all about delivering on a need. “We’ve been doing that forever,” Schultz says. “It’s one of our selling points. We’ll pick up full-time customers from that because they’re so happy with our service that we’re able to fit them in for a week or two. They don’t want to continue to do their own snow removal, so they’ll hire us out for the rest of the season. It’s a nice service for our customers because we’re able to take the work on and not lack any quality or service.”

**Concierge service**

The unpredictable nature of winter weather often brings late night and sometimes very long hours. When he first entered the Green Industry, Aaron Smith worked in snow removal for a large landscaping company in Minnesota. “I could be gone for 80 hours straight and not see anybody, not sleep and barely eat,” says Smith, general manager.

**LUBRA-SEAL**

Spreader Encapsulant

Apply once to encapsulate and seal — you’re all set for summer storage!

Blocks the rusting process — Impervious to even the most torrential rains. Keep moisture, oxygen and salt away!

Environmentally responsible — Will not wash off and contaminate the soil.

Easy, one-step application process — Protect in just minutes! Trusted by over 40 State Departments of Transportation.

**NEUTRO-WASH**

Salt & Chloride Neutralizer

Removes white salt residue left behind from pressure washing with detergents — use NEUTRO-WASH™ before applying LUBRA-SEAL®.

Put a STOP to corrosion corruption and expensive repairs — enjoy more efficient equipment that works harder, lasts longer and looks better.

Save thousands of dollars simply by protecting the equipment you already have in your fleet.

It was fun for the first two events. After that it got kind of old.”

It was old for his new bride, too, and Smith promised when he started working in the family business he wouldn’t work those hours again. Yet the allure of winter income proved too strong.

Not wanting to break his promise to his wife, Smith had to find a way to bring in the income without working those long hours. Smith’s solution was to offer a highly personal, higher-margin concierge snow removal service.

“We use walk-behind snow blowers,” Smith says. “We service some of our summer clients and a few who are not. The minimum charge is $45 for a single width or a very short double-width driveway from 3 in. to 6 in. of snow. More than 6 in. is $65. In the case of continuous snow, we’re trying to be there every 4 in.”

The route is small and Smith uses only two workers. And the service includes more than just clearing snow from a driveway.

“If your car is in the driveway, the car will get brushed off,” Smith says. “It does not get scraped for ice for liability reasons. We hand shovel around all the cars so there is no snow underneath the car. We snow blow the front walks and city walks.”

Because S&D only provides the concierge snow removal to a few customers, the service can be customized, such as clearing a client’s back deck by request.

“The beauty of it is, it was an afterthought,” Smith says. “Because our budget is set up to recover in the summer, this boils down to extra operating capital and keeping guys busy.”

Smith acknowledges it’s been difficult to manage expectations. Two years ago there wasn’t that much snow, and customers were thrilled with the service. Last year, when the snow was much heavier, some customers found themselves with a $500 monthly bill.

That said, Smith has some very devoted followers.

“We looked at doing something else, expanding in a different direction, and we got some push back when we suggested we would drop the service,” Smith says.

**Tractor-based approach**

Chris Marino, owner of Xtreme Snow Pros of Mahwah, N.J., visited a Montreal, Canada-based colleague to learn about the approach contractors there...
The new PRODIGY™ snowplow features an ingenious patented mechanical wing design that automatically positions its wings to deliver maximum plowing efficiency. Whether in straight-ahead scoop mode or angled for windrowing, it delivers multi-position winged plow productivity in a unit that’s as easy to operate as a straight-blade.

Also available for skid-steer loaders.
