"We may live without poetry, music or art;
We may live without conscience, live without heart;
We may live without friends, we may live without books,
But civilized man cannot live without cooks."

"He may live without books, what is knowledge but grieving?
He may live without hope, what is hope but deceiving?
He may live without love, what is passion but pining?
But where is the man that can live without dining?"

SOUPS.

CLAM SOUP.

First catch your clams, along the ebbing edges
 Of Saline coves, you'll find the precious wedges
 With backs up, lurking in the sandy bottom,
 Pull in your rake, and lo! you've got 'em.
 Take thirty large ones, put a basin under;
 Add water, three quarts to the native liquor.
 Bring to a boil (and by the way the quicker
 It boils the better, if you'll do it cutely,)
 Now add the clams, chopped up and minced minutely.
 Allow a longer boil of just three minutes,
 And while it bubbles, quickly stir within its
 Tumultuous depths, where still the mollusks mutter,
 Four teaspoons of flour and four of butter,
 A pint of milk, some pepper to your notion.
 And clams need salting, altho' born of ocean.
 Remove from the fire (if much boiled they will suffer,
 You'll find that india rubber is not tougher.)
 After 'tis off, add three fresh eggs well beaten,
 Stir once more and its ready to be eaten. A. R. H.

Mrs. Jones Where do you purchase your teas and coffees? I buy them
 at the People's Grocery, Mrs. Smith. They certainly have the best I
 ever drank.

MEATS.

“Man wants but little here below,
As beef, veal, mutton, pork, lamb, venison, show.”

Meats to be roasted or broiled, should be given the greatest amount of heat possible at first, that the surface may be hardened and the juices retained.

ROAST BEEF.

After the meat is well washed, rub salt into it and dredge it with flour. Put into the oven, baste every fifteen minutes until done. A piece of beef weighing ten pounds requires two hours. CANDIES.

"Sweets to the sweets."—Shakespeare.

FRENCH CANDIES.

In the first place let me impress strongly the fact that a number one confectioner's sugar must be used. Roll and sift this, place the whites of two eggs in a tumbler and mark with the thumb the amount; pour this into a dish and add the same measure of cold water and

a scant tablespoon of vanilla. Stir these well together and have ready about two pounds of the sugar; add this slowly, stirring all well together with a silver spoon. It sometimes takes a little more or less sugar, according to the size of the eggs. Have prepared one cocoanut grated, one-half pound of English walnuts, carefully shelled, one-half pound of dates, and, in fact, as many varieties of the fruit as you care to make. Take part of the mixture or dough on the bread board and knead a little of the sugar into it. Then roll it out about half an inch thick. Cut off in small pieces with a silver knife and roll with the hands into balls; these set aside to harden for chocolate drops. Cut off other pieces and shaping them with the hands place halves of the English walnuts on each side. Take one-half pound of shelled almonds, roll in pieces of the dough, then in granulated sugar, shaping them nicely. Stone the dates and fill the openings with the dough, then roll in granulated sugar. Place some more of the dough on the board and knead into it as much of the grated cocoanut as it will hold, then roll and cut into squares, or some may be rolled into balls to be covered with the chocolate. Take the broken pieces of nuts, chop and mix with cocoanut and knead into some of the dough. This cut into squares makes a delicious candy. While

Pure Flavoring Extracts at Fellows' drug store

you are preparing these, have a half cake of baker's chocolate melting on the back of the stove, do not allow it to boil. The balls for chocolate drops harden soon in a cool place and it requires only a little dexterity to drop them into the chocolate. Dip them out with a fork and place on a paper to harden. Figs, prunes, filberts and Brazil nuts may be used. Many use desicated cocoanut but the flavor is not so rich as that of the fresh.

DIET FOR THE SICK.

By Marie Arruda .Graduate Nurses Training School.

GRAHAM GRUEL OR OATMEAL.

One tablespoon of cream, one-half cup of boiling water, pinch of salt, one teaspoon of graham flour stirred in slowly. Boil slowly one-half hour. Strain through a fine strainer. Add two tablespoons cream and beat well.

TOAST COFFEE.

Toast three slices of bread, over which pour one pint boiling water, pour off water and add one-third cup of cream.

TO PREPARE STEAK FOR THE SICK.

Scrape the meat and broil. Add a little salt and pepper.

BEEF TEA FOR THE SICK.

To half a cup of well washed barley add two quarts of water. Boil half an hour. When cool, add equal quantity of milk and sweeten to taste.

BARLEY WATER FOR THE SICK.

Strain the beef tea carefully and keep ice around it. Just as it is taken put a small piece of ice in it. A patient will often drink freely of this when a hot beef tea would be rejected. Do not call it beef tea in this case, but broth or drink.

Go to Muncey's for Holiday Goods.

BEEF TEA.

Chop fine a pound of lean beef, put it in a wide-mouthed jar, stand it in a saucepan of water and boil slowly until the juice of the meat is extracted; skim and strain if greasy, and give cold or hot.

Slightly broil a pound of lean beef, the steak from the haunch or round is the best. Cut it into strips and squeeze out the juice with a lemon squeezer. Give it cold with a little salt and celery essence. A tablespoon of claret wine may be added. A pound of meat makes about three tablespoons of juice. This is very easily assimilated and is much to be preferred to beef tea.

Milk may in almost all cases be given with safety, shake hard. Give the patient as much as he will take.

Put a quart of milk into a large, perfectly clean bottle, drop in the whites of three raw eggs, cork it and and will be kept down when all other things produce nausea. In such case add to one pint of milk four tablespoons of lime water, or more if ordered, and give two wineglassfuls at a time at short intervals. Brandy can be added to this if ordered and if the patient can retain it.

To one pint of milk slightly warmed stir in a large dessert spoon of liquid rennet and set it aside to cool. This makes a soft blanc mange very easily swallowed.

Reading aloud, or in the presence of the patient, is never admissible unless asked for, and should never be long continued. If reading aloud is agreeable to the patient, or is permitted, read in an even, rather low voice, without much emphasis and without gesture. Do not make little pauses to pick out scraps for your own reading while the patient waits, and do not fold and re-fold a newspaper, or rattle the leaves of a book as you turn them. Be quiet and selfpossessed at all times.

HOW DOSES OF IPECAC SHOULD BE GIVEN.

It is better to give small doses and repeat them if necessary. For this purpose about half a teaspoonful of syrup of ipecacuanha may be given to a child under a year old, and repeated in twenty minutes if no vomiting occurs. When free vomiting has been produced, one-half the quantity can be given at the same interval, so as to keep the child slightly nauseated. A child between one and two may have a half larger dose.

A moist atmosphere tends to relieve the breathing. This can be secured by keeping water boiling in the room, one tablespoon turpentine to two quarts of water.

A child subject to croup should be guarded from the changes of the weather with unusual care.

MISCELLANEOUS.

ENGLISH PASTY.

For one pasty it requires a piece of pie paste the size of a tea cup, three common sized potatoes, half a pound or a little more of round steak, pepper and salt. Don't make paste nearly so rich as for ordinary pastry. Roll the paste, keeping the shape perfectly round, until it is about the size of a teaplate, which leaves it about one-half an inch thick. Pare and wash the potatoes and chip them up in pieces about an inch square, not too thin. Put them in a pile on center of paste and place the steak, cut in pieces one inch wide and two inches long, over the top of the potatoes. Sprinkle freely with salt and pepper. Bring opposite edges of paste together over the top and pinch together, which will enclose the meat and potatoes in crust. When completed the pasty should be oblong. Bake in a moderately hot oven one hour. A very little onion chipped up and put in the meat and potatoes gives a flavor that suits some tastes, or turnips may be used instead of potatoes.

Mrs. Webb.

Here is a receipt that will knock out the carpet bug every time. One ounce of alum, one ounce of chloride of zinc and three ounces of salt. Mix with one quart of water and let it stand over night in a covered vessel, so that all sediment may be left behind. Dilute this with two quarts of water and apply by sprinkling the edges of the carpet about a foot from the wall. This is all that is necessary. They will leave boxes, bedding and any resort which has been sprinkled with the solution,

on the shortest possible notice, and nothing will be injured in texture or color.

Mrs. Wm. Donovan,

Lansing, Mich.

TO PRESERVE A HUSBAND.

Be careful in your selection. Do not choose too young and take only such varieties as have been raised in a good moral atmosphere. When once decided upon and selected, let that part remain forever settled and give your entire time and thought to preparations for domestic use. Some insist on keeping them in a pickle while others are constantly keeping them in hot water. But even poor varieties may be made sweet, tender and good by garnishing with patience, well sweetened with smiles and flavored with kisses to taste. Wrap them well in the mantle of charity, keep warm with a steady flow of domestic devotion and serve well with peaches and cream. When thus prepared they will keep for years.

FAIRY PUDDING.

To make the fairy pudding, put a tumbler of quince jelly into a saucepan, any firm jelly will do, but the

quince gives an especially delicate flavor. Add to it a cupful of boiling water and stir over the fire until the jelly is melted and the mixture at the boiling point. Add quickly to it two tablespoonfuls of cornstarch mixed with a pinch of salt and sufficient water to make a thin paste; stir until smooth and clear, then draw to one side and cook slowly for ten minutes. Turn into a large bowl and set aside. When cool and beginning to thicken beat it with an egg beater. When it begins to froth, add the stiffly whipped whites of two eggs and continue to beat until it is a mass of foam. Turn into wetter molds and put away in a cold place. Beat the yolks of the eggs with three tablespoonfuls of sugar. Scald a pint of milk, add to it a teaspoonful of cornstarch dissolved in a little cold water and cook for ten minutes. Mix with the eggs and sugar, add a pinch of salt, and stir until it is a nice custard. Strain, flavor with a drop of almond extract, and chill.
