## PROJECTS

- **Archery (Conservation Appreciation)**: 23
- **Automotive Care and Safety**: 12
- **Beef (Livestock)**: 46-47
- **Business Program (Town & Country Business)**: 60
- **Basic Conservation**: 17
- **Child Development (Children, Youth, Adults in Family Living)**: 13-14
- **Clothing (Knitting)**: 14-16
- **Conservation**: 17-24
- **Forest**: 17
- **Soil and Water**: 18
- **Wildlife**: 19
- **Appreciation (Archery, Wildflowers, Rocks & Minerals)**: 22-24
- **Dairy**: 24-25
- **Dog Care and Training**: 26
- **Electrical Science**: 27-28
- **Entomology**: 28-29
- **Family Living - Children, Youth, Adults in Family Living**: 14-16
- **Field Crops**: 30-32
- **Fire Prevention (Safety and Fire Prevention)**: 58-60
- **First Aid (Safety and Fire Prevention)**: 59
- **Flower Garden (Horticulture)**: 40
- **Foods - Nutrition (Preservation included)**: 33-37
- **Preservation**: 35-37
- **Forest Conservation**: 18
- **Fruit (Horticulture)**: 41
- **Gun Safety (Conservation Appreciation)**: 22
- **Handicraft**: 43-45
- **Leathercraft**: 43-44
- **Woodworking**: 44-45
- **Home Design (Formerly Home Improvement)**: 38-39
- **Horses (Livestock)**: 48-50
- **Horticulture**: 39-42
- **Basic Plant Science**: 39
- **Flower Garden**: 40
- **Fruit**: 41
- **Production and Marketing**: 41
- **Vegetable Gardening**: 42
- **Landscape**: 43
- **Leathercraft**: 43-44
- **Junior Leadership**: 45
- **Knitting (Clothing)**: 15-16
- **Livestock**: 46-52
- **Beef**: 46-47
- **Horses**: 48-50
- **Sheep**: 50-51
- **Swine**: 51-52
- **Management For You in Your Family (Formerly Money Management)**: 53
- **Personal Improvement**: 53-54
- **Production and Marketing (Horticulture)**: 41
- **Photography**: 54-55
- **Poultry**: 56-57
- **Preservation (Foods and Nutrition)**: 35-37
- **Rabbits**: 58
- **Safety and Fire Prevention**: 58-60
- **Sheep (Livestock)**: 50-51
- **Swine (Livestock)**: 51-52
- **Soil and Water (Conservation)**: 19
- **Town and Country Business Program**: 60
- **Tractor Care and Safety**: 61-62
- **Vegetable Gardening (Horticulture)**: 41
- **Wildlife (Conservation)**: 20-21
- **Wildflowers (Conservation Appreciation)**: 23
- **Woodworking (Handicraft)**: 44-45
4-H LEADERS ARE adults with addled minds and a soft spot in their hearts for kids—all kinds of kids; their own kids, other people's kids, tall kids, short kids, thin kids, not-so-thin kids, regular kids, square kids, responsive kids, and ungrateful kids from ten-agers to teenagers. At their own time and expense, and neglecting their own personal interests, they serve without pay and often without parent cooperation, knowing that they are necessities that personal interests, they serve without pay and often without the Agricultural Extension Service and the 4-H membership could not do without. Seldom are there enough of them and that is the reason they become leaders—so their own offspring can join the 4-H organization.

Leaders are usually to be found in the midst of a more or less attentive group of kids, numbering anywhere from 3 to 15, teaching projects such as cooking, dressmaking, electricity, gardening, chicken raising, horsemanship, canning, tractor operation, home improvement, forestry, camping, etc. They generously and regularly open their homes to scuffling feet, vocal enthusiasm, extemporaneous wrestling matches, and unauthorized pillow fights. And somehow, in spite of alien influence, skills and knowledge are miraculously transferred from leader to child in varying degrees.

A leader explains to, shows how, does for, phones up, pleads with, bosses around, and reminds for the tenth time; urges to throttle good and once again explains to, shows how, does for, phones up, pleads with, bosses around, and reminds for the tenth time.

A 4-H leader is either the most naive person in the world, or the most stout-hearted. A female leader who is afraid of bugs will accept a project group in entomology. A male leader, whose specialty is sales promotion, will tackle animal husbandry for the sake of 4-H members who want to raise sheep. And if a group of 4-H youths ever venture a trip to the moon, it is certain that their leader, however reluctant and earth loving, will not only accompany them to their destination, but will pioneer better and speedier methods to arrive safely.

No one gets madder, tireder, is more often offended, forgives more quickly, shows better sportsmanship, or is a bigger pushover to a request for community service than a 4-H leader. He is Determination with its fingers crossed, Patience with a twinkle in its eye, Ambition drawing tomorrow's blueprints, and Zeal that observes no curfew.

A leader is usually going to, coming from, or planning for a 4-H event. When he is not hauling kids in cars; supervising assorted sales, arranging tours, sponsoring skating parties, snow trips, or conventions, coaching demonstrations; conducting dress revues, horse shows, or talent nights—he is attending night meetings, day meetings, council meetings, club meetings, leader's meetings, and emergency meetings. In his spare time he collects record books, cleans up the club meeting place, judges at fairs and field days, and reads extension literature.

4-H leaders are sometimes happy, but often are frustrated, discouraged, disgusted, and vow that they will quit 4-H forever with as little violence as possible. That is—until their charges suddenly blossom forth with blue ribbons, gold medals, exemplary conduct, unsuspected poise, inner-glow, and unmistakable admiration for their leader shining in their eyes.

That is when the soft spot in every leader's heart grows softer, and the new 4-H year finds him in the midst of his more or less attentive group explaining to, showing how, doing for, phoning up, pleading with, bossing around, reminding again—except for one difference. Three more members have been added to the club.

By Mrs. Molly Brooks, 4-H Leader, Contra Costa County, Calif.

Helping Members Learn

As suggested by Mrs. Molly Brooks, above, a 4-H leader is many things—advisor, pal, counselor, teacher, magician, Mr. or Mrs. Fixit, chauffeur, referee, pace-setter, arbitrator, meeting go'er and much more. All because they are people who are interested in helping boys and girls learn to be useful, productive citizens—interested in helping boys and girls learn some things they themselves have decided on.

This bulletin (314-B) is designed to help members select useful and worthwhile projects that are of interest to them and to help leaders with the task of helping the member learn.

We had these five goals in mind in writing this guide.

1. To help leaders and members know what project areas have been developed. (Those for which members and leaders bulletins are available, with M.S.U. resource people assigned.)
2. To help leaders assist members in the selection of individually useful and worthwhile projects.

3. To help members visualize what they can expect to learn.
4. To help leaders organize what they can do to help the member learn.
5. To help leaders develop useful and satisfying teaching techniques and program plans.

The one central job for you as a leader is that of helping the member learn. Stated another way, the primary job of a 4-H Club leader is that of teaching. We're all teachers many many times a day, with our own families and friends. We seldom think of giving information in these terms, however.

4-H leaders, and many school teachers too, that we've worked with have found it useful to think of their job as one of transferring an idea (their mental picture of that idea) from their head to the head of another in such a way that the other can use it.
"In such a way that he can use it" is the real challenge. The question for the teacher is — How can I present the information so the student's interest will be aroused and so he will do more than just listen to the information? What can I do to be sure the student "chases the idea" and makes it a part of him? The steps in teaching listed below should, if followed, improve the likelihood that the student will "chase the idea".

**Steps in Teaching**

**Step 1. Getting the attention of the learner.** Club members are not always aware of the importance or interest of things they will learn in their projects and activities. The leader needs to get their attention directed toward new ideas or experiences.

ILLUSTRATION: A group of 13 year-old girls become fascinated over a picture of Miss America shown them by their foods project leader.

**Step 2. Stimulating the learner's interest.** Once attention has been captured, the leader may then appeal to the members' basic needs and interests to get them to give further consideration to the idea. In easy stages, the leader reveals how the new idea, skill, or action will be a benefit to the Club members. It helps to present only one new idea at a time. Make it definite and specific. The method of presenting should be attractive, require only a short period of attention and a small amount of mental effort to understand.

ILLUSTRATION: The foods leader asks the girls if they would like to be as lovely as Miss America. She points out Miss America's good health as one of her keys to loveliness.

**Step 3. Arousing the member's desire for information.** The teacher must stimulate the member's interest until he is willing to act, to do something about learning for himself. The leader must convince the boys and girls that this information or experience will be helpful to them in their own situations, that it will fill some basic need or desire of their own.

ILLUSTRATION: At this point, the foods leader begins to ask the girls if they know anything about Miss America's health habits.

**Step 4. Convincing the learner that he should act.** The leader needs to make certain that the learner understands just what is to be done; that he knows how it applies to his own situation. The leader helps the member to feel that he is capable of doing this new thing; that it will turn out all right. Seeing other people get good results may help him to imagine better how he can do it and succeed.

ILLUSTRATION: After learning about Miss America's health habits, the girls begin to compare them with their own health habits.

**Step 5. Getting action by the learner.** It is the leader's job to make it as pleasant and easy as possible for the members to act on their new information. The leader will want to try to remove all objections and blocks to action and to be willing to help slower members with patience and slow steps until they can take on the new idea or experience.

ILLUSTRATION: Through an example like Miss America, the foods leader convinces her members that they should be concerned with proper diet, skin care, exercise, and adequate rest.

**Step 6. Making certain that the learner obtains satisfaction.** The leader helps the member to evaluate what he has done. They discuss the advantages and various accomplishments. The leader gives approval wherever earned.

ILLUSTRATION: After the girls have begun to change their health habits, their foods leader encourages the girls to evaluate the results of their newly acquired health habits. This age is the time when acne, overweight and other equally unpleasant fates greet young people. If they can see improvement in themselves or even their
friends, it will inspire them to continue their new found ways of healthful living.

In 4-H we are most fortunate that 4-H'ers come to us on their own initiative. They are not compelled to attend. This usually means they are attending because they are interested and do want to learn. We can't bank on this, however, for we know that folks join 4-H for a variety of reasons.

The problem is that we're not sure what the member is interested in. One thing we can be fairly certain of is that not all members will have identical interests, even if they are enrolled in the same project. PEOPLE ARE DIFFERENT. Each 4-H member is different from every other. We as teachers must find out what each member wants to learn, how he wants to learn it, and what we can do to help him learn. Before you as a leader get to feeling that this is an impossible task, let's hasten to say that it is not. Really what we're saying is this: THINGS THAT WE TEACH HIM, JUST WHAT HE WANTS TO LEARN. I'm sure you are asking yourself "how can the member know what he wants to learn if he doesn't know what's available?" "How can a member possibly know that he should learn something now that he will need to serve as a base for later learnings?" BUT REMEMBER — We can't teach them what they don't want to learn. Our task is to arrange the situation so they will want to learn what it is we're trying to teach. Go over the steps in teaching outlined above and think creatively about how you would present what you want to teach so as to be fairly certain your members would be anxious to learn it. When you've thought about how you might present your case or "arrange the situation" the following "ways for getting 4-H members to learn" may be helpful to you.

**Ways for Helping 4-H Members Learn**

**Steps in Teaching**

1. **Make the Meeting Place Comfortable.**
   
   **Examples, With 4-H Members**
   
   1. In a school or farm center arrange chairs in circle, if possible. In a home, be sure everyone can see and hear.
   
   For a farm tour or demonstration, have a warm, dry place for meeting.

2. **Get the Members' Interest.**
   
   A clothing leader might set up a simple exhibit of synthetic materials to get interest in a study of textiles. Roll calls might ask for your favorite food, some fact about electricity, the type of feed being used, etc.

   Post card notices of a meeting might suggest a "surprise", illustrate a demonstration, list topics to be discussed.

3. **Start Where the Members Are.**

4. **Have Every Member Active.**

5. **Make Teaching Practical.**

6. **Teach by Association of Ideas.**

7. **Teach Basic Principles.**

8. **Use a Variety of Teaching Techniques.**

**Teaching Techniques**

We have said that we can teach if, and only if, the member is ready to learn. We, as leaders, need to know how to use a variety of methods and techniques which will help the member learn. We cannot always use a demonstration or always use a lecture, etc. We need rather to ask, what am I trying to teach and how can I put it across to the members?

You can't smell a rose by reading about it. You can't tell texture of soil or cloth by looking at it or smelling it. You can't tell somebody about the blue of a lake in the mountains at sunset. You can't see or feel the taste and smell of good silage.

5
The five senses are the gateway to the mind. We see, hear, smell, taste and touch as we learn about things from childhood. We need to play upon our senses, all of them, hear, smell, taste and touch as we learn about things from knowing what teaching techniques are available, and know how to use them. Knowing how to use them comes only with study and practice. There is no magic formula.

It will help us remember to watch the reactions of the members to see if they are understanding what is being said. If you get puzzled looking frowns, or general inattention, better try to put it across another way.

**Member Evaluation with Leaders**

An important part of learning is evaluation. There is no better way to make clear to boys and girls that you are genuinely "interested in them as persons". When they know that you personally care about their progress they are likely to learn more.

There is no one in better position to know how much the member has learned (about his 4-H project or the business of growing to a responsible citizen) than the members' own leader. Better still a combination of the member, his parent, and his leader.

In the process of evaluation, the leader and member have the opportunity to share in evaluating the member's accomplishments — what he has learned — be it in clothing, dairy or photography. This procedure gives the member a much greater sense of personal involvement than does the judging of exhibits. Members have a chance to see that everyone has needs, some in common with others, some highly individual, and that needs and values can give meaningful direction to what we want to learn and how hard we are willing to work on it. Learning is increased by early setting of goals (by the member) and by positive approaches to improving one's self through what one chooses to learn. More positive views of one's abilities are possible when he is able to feel and know his own needs and values. He can then begin to "take charge" and change them. In this way members can begin to move toward a feeling of "can-do-it-ness".

At one of your first Club meetings, discuss the things members want to learn this year. Also discuss the new skills they will learn and the activities they will carry out in order to learn these things.

Have each Club member write down the things he wants to learn this year, the skills he wants to develop and the articles he will make in order to do these things. (Younger members may need more guidance than older members.) Collect and keep these lists. Check each month with individual members to see what progress is being made and how they feel about it. At the end of the project, visit with each member about their accomplishments in relation to their originally stated goals and help them set new goals for the next year's project. This is evaluation.

From the member's point of view then, evaluation is an essential "tool for learning". From the leader's point of view it is a necessary tool for teaching. If you attempt to help the member learn you must know what he wants to learn and what he now knows and feels about the learning project selected.

Ideas for helping you and your members set goals will be found in this outline under the "learning plan" section of each project. "Learning activities" are listed to give you the suggestions of the things your members might choose to make or do in order to reach these goals. You will find more ideas in the bulletins for each project.

### Multiphase

Not only do we know that people are different, we also know that certain age groupings are different in rather predictable ways. We, as 4-H leaders to be successful as teachers and leaders, need to have a working knowledge of what in the Michigan 4-H Club program is called the MULTIPHASE CONCEPT.

**Multiphase**

Multiphase means 4-H members (and all people for that matter) move through many phases in the growing up process. Youngsters at different ages have different interest spans, different needs for love and recognition, different abilities to understand complex materials, desires to be with others of the same or opposite sex, needs for guidance in selecting and carrying out activities, etc.

Multiphase is a program tailored to meet the needs and interests of each individual member.

### Planning Programs with Different Age Groups

In the following charts, the basic traits of these three age groups are listed along with some suggested types of developmental experiences which the 4-H program can provide for each.
**YOUNGER 4-H MEMBERS**  
(Age 9-12, Grade 4-7)

**Characteristics**
1. Live in a neighborhood world and are loyal to it.
2. Not too busy except at play. Vacation periods relatively free.
3. Want to belong to gang, probably not co-educational. Like symbols and regalia. Accept rules and regulations.
4. Are eager, enthusiastic, and easily motivated. Learning how to make choices.
5. Accept direction and leadership blindly; have developed little leadership ability. Want to be self-reliant, but lack foresight.
7. Want to earn spending money.

**Significance to 4-H Program**
1. Small local clubs, in walking distance if possible.
2. Meetings may be frequent, camping and other activities may be long. Can meet after school and on Saturdays.
3. Single sex groups. Meetings and group activities are important for their own sake. Use symbols and regalia, ceremonies, songs, etc.
4. Projects are required, but allow for self-selection. Awards and incentives needed. Achievement recognition.
5. Adult leader takes most responsibility at first. Develop leadership through assigning leadership jobs whenever possible.
6. Closely supervise individual projects, demonstrations, etc. Plan instruction carefully, and apply it in small doses. Literature and records should not be too difficult. Include some recreation, mostly simple games, at every meeting.
7. Economic projects, exhibits and contests important.

**EARLY TEEN 4-H MEMBERS**  
(Ages 12-14, Junior high school)

**Characteristics**
1. Live in larger community with wider loyalties and interests.
2. Busier with home, school, and community activities, but need to be busy.
3. Boys and girls want social activity together. Interested in meeting others.

**Significance to 4-H Program**
1. Community groups with ties to wider areas. Inter-community.
2. Meet less often; plan evening meetings; activities such as camps should be of shorter duration.
3. Coeducational groups. Program largely social and recreational.
4. Allow and encourage group to function under its own leadership, but provide counsel and guidance when needed and desired. Encourage leadership of younger group.
5. Are self-conscious. Have strong desire to conform and be accepted by own age group. Need help in personal self-improvement.
6. In "trying-out" age, openminded. Want to explore but not study intensively. Impatient with local community.
7. Want voice in own program.
8. Need for citizenship development and building democratic attitudes and values.
9. Interested in what various jobs are like and vocation.

**OLDER 4-H MEMBERS**  
(Ages 14-18, high school)

**Characteristics**
1. Urge independent activity toward adulthood.
2. Learn social skills (and acquire managerial ability).
3. Achieve level of reasoning of which capable.
4. Strong peer group attachments.
5. Prepare for marriage.
6. Prepare for responsible citizenship.
7. Are aware of appearance and personality.
8. Develop interest in a broader horizon.
9. Provide chance to observe vocations by tours, movies.

**Significance to 4-H Program**
1. Urge independent activity in selecting, planning project; add responsibility as junior leader.
2. Encourage member to take responsibility for more planning of meetings for family and friends. Let members assume responsibility in club.
3. Encourage member to develop originality and initiative in entire project.
4. Encourage group activities boys and girls can share.
5. Learn more social and managerial skills.
6. Encourage group activities in church and community affairs.
7. Help members get factual information on effect of food on appearance, skin condition, hair, weight.
8. Help members get a broader concept of the world around them, and gain an understanding of how they can cooperate with other organizations and business groups.
The Needs of the 4-H Club Member

Youth needs to belong. At about ten the youngster wants to belong to a “gang”. A club group with a well-defined purpose and program will meet his desires and hold his interests. Every boy and girl needs to feel accepted, not only by other members, but the leader, too. The leader should accept each child as he is and guide him in the best direction. The leader should see that each child gains a place of importance in and with a group and has a feeling of belonging. He will re-enroll as long as his friends are in the group and he feels wanted.

They want to be successful. Youth needs and wants to develop skills. Skill in project work, demonstrations, and judging, skill in activities and recreation, feeling at ease socially, — all are important in their world. They need variety because they can only keep interested in one topic for a short period.

They need an opportunity to learn how to do things successfully. Most of all they want to develop the skill necessary in getting along with others.

Recognition is an important need in the life of a youngster. A spoken “well done” is often a sufficient reward for the completion of a difficult task. A youngster needs a great deal of encouragement if he is to maintain his interests. Every boy and girl has an innate desire to be of service to others. Opportunities to carry out the Heart “H” should be given to the ten-year-old as well as to older members.

Youth needs responsibilities in proportion to its age. The younger member has about all he can do at his age level if he learns to be responsible for his project, his project report, and his participation in Club meetings. He is not able to make too many choices. Each year he should be able to add a few more responsibilities.

The adolescent needs and likes freedom in choice. He has developed to the point where he likes to make decisions, not only for himself, but for the group. With the older adolescent, the leader should act as an adviser, allowing the members to assume the major responsibility under his guidance.

Leadership jobs offer opportunities for growth and development. A youngster will strive to live up to the ideas of his 4-H pledge if his interests and needs are met as they appear at each stage of his development.

Affection or love is just as essential in personality development as is milk to the growing person. We need to know that we are wanted and loved in spite of our shortcomings.

In personality development, the leader must keep in mind many things; some for the group as a whole, some for the individual. Balance is the key word. A boy or girl growing in a balanced way is poised, comfortable, and happy. Leaders must have a great interest in the boy or girl and be guided by keen insight and understanding of the child’s individual problems in order for the boy or girl to enjoy a balanced personality development.

If 4-H Club members gain approval, independence, friendships, status, belonging, achievement, and security they will have a well-balanced program and your 4-H Club will succeed in holding its membership.

Techniques

Lecture — Usually means that the teacher speaks to the group from prepared notes without the benefit of visual aids or without opportunity for the group to break in with questions. We don’t very often see this technique in its pure form. When new facts or information are to be presented the lecture method may be used for a short period of time. It should be combined with other techniques such as small group discussion, agree-disagree statements, questioning, etc., to be sure that members understood what was said and how they can use it.

It’s a good idea to tell members before you start that you are going to talk for awhile and that they then will be active in discussing what they heard.

Illustrated talk — An off-shoot of the lecture technique whereby the teacher supports the talk with drawings, posters, actual articles, “gimmicks”, etc. This is a very good technique to use with 4-H Club members.

The drawings or posters don’t need to be professional art pieces. All they have to be is interesting and clear. For example in entomology, rather than just talking about the various shapes and distinguishing characteristics of insects, sketch them on a large sheet of paper or blackboard or have an actual specimen or picture of it. Many times the item talked about is in the members’ bulletin and you can have them follow along in their books.

Discussion — This technique takes many forms ranging from the teacher raising a question to the whole group and allowing free-flowing answers and questions by both the teacher and students — to small group discussion whereby the groups are given one, or two, or three topics which they discuss and report back to the larger (whole) group.

This technique is excellent in that members share in the pooling of experiences, ideas, information, and hunches. Members really get involved and are likely to learn more as a result of this involvement, assuming of course that most had something to contribute at the beginning of the discussion and that many learned as a result of it.

The discussion must have direction, be more than a “bull-session”. The group should know: what topics are to be discussed, how the group is to be divided for discussion or whether they will discuss as a total group, how
much time is allotted for discussion, and how the group's work will be reported back and summarized.

**Question and Answer Technique** — There is a wealth of information in the experiences and knowledge among the group members themselves. Questions and answers are a quick and efficient way to pool and share this knowledge. The right questions from the leader can stimulate the group to center their attention and thoughts on the subject.

A question and answer session may take place in different ways:

1. The leader may ask the question and call upon the group for answers.
2. The leader may draw questions from the members and he or a resource person, if one is present, may answer them.
3. The leader may draw questions from the group, then turn the question back to the group for an answer.

**Demonstration** — “Show me” is a good way to think of this technique. Basically, the teacher shows the student how to do something. For example, if I were to take you out to the garage right now and have you look on while I changed a tire — and if at the same time I explained what I was doing, as well as showing you how to do it, then this is a Demonstration. This is a most effective technique in 4-H and one often used by members and leaders alike, as they share knowledge about projects and activities.

Another kind of demonstration is the result demonstration. The result demonstration shows by example the effect of putting a recommended practice into effect. For example, it is recommended that ascorbic acid be used on fresh peaches to keep them from turning brown. You can demonstrate the results of using ascorbic acid by taking a fresh peach, peeling it, cutting it in half and treating one half with the recommended treatment and leaving the other half untreated. Place both in open containers for half an hour and show results. Similar demonstrations can be done with fertilizers on crops, varieties of plants, kinds of wood finishes, etc. The list is unlimited. The technique is a most effective teaching tool. Refer to 4-H Bulletin 111B, Let's Give A Demonstration, 111C, Demonstrations for your Community, and 311, 4-H Leaders Guide in 4-H Demonstrations.

**Work session** — Follows nicely from any of the above and gives members a chance to “learn by doing”. The work session is the back-bone of 4-H Club work. In this technique, members, under the guidance of leaders, have opportunities to test and perfect their new learnings. For example, after talking to the group about how to apply wood finish, have everyone practice with the recommended material and method.

**Individual study** — A good technique to strengthen member initiative and build confidence in ability to handle independent work. The leader’s role here is to guide and encourage the member in his exploration.

**Experiments** (trying new things) — The “let’s explore” notion quickens the pulse of young and old alike. This is a most successful technique for 4-H members when based on individual and/or group study. We see if our new ideas will work. Such individual work provides many, many, result demonstrations and much new information.

**Tour** — **Home Visit** — An impending garden tour will do more to kill those big weeds than all the modern chemicals. A visit by the leader and fellow members will provide an opportunity for constructive suggestions, will assure the host member that folks care about him and will add to the fun and comradeship of the group. The tour or home visit is particularly helpful in projects that cannot be readily transported to the Club meeting, such as crops, gardening, livestock, home improvement and landscaping. Tours also can be to view long-time result demonstrations — places using recommended practices, for example. Tours can be to places having direct educational bearing on a specific project or they may be of a more general nature. For example, a tour to a museum as opposed to a tour of an electrical supply house for members of an electrical club.

**Exhibits** — The preparation of an educational exhibit by the member is a good teaching tool. The emphasis needs to be on what should go into the exhibit and why it should go in. The question is: “what should we tell people by way of this exhibit and how can we put it across?” See 4-H Bulletin, 317A, Let’s Make An Exhibit.

Exhibits constructed by you or other leaders or members are effective interest-getters. Exhibits can be used to teach subject matter. In essence, the exhibit is a way of putting information in view of the student over a long period of time.

**How To Use This Book**

A project is the core of the 4-H Club member’s experience. It is the basis of membership in the local club and is the center of many activities and experiences in which members should be encouraged to participate. The experienced member will find satisfaction in expanding his project work, in learning experiences of greater depth, in career or avocational possibilities and in learning the “why” behind the “how to do it.” Each of these relates to the project the member selects.

This bulletin is a catalog of 4-H projects which have
much time is alloted for discussion, and how the group's work will be reported back and summarized.

**Question and Answer Technique** — There is a wealth of information in the experiences and knowledge among the group members themselves. Questions and answers are a quick and efficient way to pool and share this knowledge. The right questions from the leader can stimulate the group to center their attention and thoughts on the subject.

A question and answer session may take place in different ways:

1. The leader may ask the question and call upon the group for answers.
2. The leader may draw questions from the members and he or a resource person, if one is present, may answer them.
3. The leader may draw questions from the group, then turn the question back to the group for an answer.

**Demonstration** — "Show me" is a good way to think of this technique. Basically, the teacher shows the student how to do something. For example, if I were to take you out to the garage right now and have you look on while I changed a tire — and if at the same time I explained what I was doing, as well as showing you how to do it, then this is a Demonstration. This is a most effective technique in 4-H and one often used by members and leaders alike, as they share knowledge about projects and activities.

Another kind of demonstration is the result demonstration. The result demonstration shows by example the effect of putting a recommended practice into effect. For example, it is recommended that ascorbic acid be used on fresh peaches to keep them from turning brown. You can demonstrate the results of using ascorbic acid by taking a fresh peach, peeling it, cutting it in half and treating one half with the recommended treatment and leaving the other half untreated. Place both in open containers for half an hour and show results. Similar demonstrations can be done with fertilizers on crops, varieties of plants, kinds of wood finishes, etc. The list is unlimited. The technique is a most effective teaching tool.

**How To Use This Book**

A project is the core of the 4-H Club member's experience. It is the basis of membership in the local club and is the center of many activities and experiences in which members should be encouraged to participate. The experienced member will find satisfaction in expanding his project work, in learning experiences of greater depth, in career or avocational possibilities and in learning the "why" behind the "how to do it." Each of these relates to the project the member selects.

This bulletin is a catalog of 4-H projects which have
been sufficiently developed to have member bulletins printed and resource people mobilized for effective learning experiences. Read through this bulletin and be familiar with its contents. Under each project heading you will note overall objectives for that area. Below this, three columns give you (1) the member and leader materials available, (2) what the member can (and should) learn from enrollment in that project, and (3) activities designed to help the member learn.

Sit down with your members, as suggested in the “member evaluation” section, with this book in hand and together work out what project(s) the member wishes to enroll in.

When counseling 4-H members on project selection, the following points may be helpful to you:

- The project should fit the member’s home and family situation.
- The member should have a sincere interest in the project.
- The project should be suited to the member’s physical and mental liabilities — not too easy nor too difficult — a challenge that he can accomplish.
- Availability of competent leadership — either yourself or other club leaders in the community — who can guide the member in the project selected.

As a leader, you will find that the project is a useful tool to teach boys and girls many new skills. But more important is helping boys and girls grow into useful adults in all walks of life.

The Growth of a 4-H Member

As a 4-H member the boy and girl is primarily interested in, and focused on, the work of their selected project. As leaders, however, we must work on a much broader base of concern. We must help boys and girls develop and grow in many ways. We should strive to develop in each member:

- A desire to be creative.
- A healthy attitude toward work and a continuously developing career plan.
- An appreciation of knowledge and the ability and willingness to share it.
- A desire to reach their potential: mental, physical, spiritual, moral.
- A way of thinking, feeling, and acting towards others which stresses the uniqueness and personal worth of each individual.
- An understanding of the basic political, social, and economic institutions at work in our society and a person’s responsibility to them.
- A desire to be active in one’s community and to take the leadership in those areas where he can.
- An openness to new ideas and experiences.
- A desire for lifelong learning.
- A pattern for the purposeful use of leisure time.
- An ability to apply principles of management in one’s daily living.

Some ways in which the interests of boys and girls change have been discussed in this bulletin. You will find others in 4-H Bulletin 314A, Michigan 4-H Club Leader’s Guide. If you don’t have a copy, you can get one from your County Extension Agent. It will be a valuable help to you. Remember, as a 4-H leader, you are helping members:

- Have a useful work experience along with the responsibility for their project and club activities.
- Gain knowledge and skill to improve their attitudes for satisfying home and family life.
- Serve in leadership responsibilities, thus developing their talents for helping others.

Planning Your 4-H Club Meetings

Here are the essentials that are included in a good 4-H meeting:

- Business session
- Project work
- Recreation.

BUSINESS SESSION: This part of the meeting gives your members training in parliamentary procedure. They learn to share in a democracy. Make this part of the meeting short and snappy.

Your club may not have a business meeting each time they meet — only when they have business to transact. It should be conducted by the members and their elected officers with the leader helping or advising only as needed. This experience helps 4-H members grow into good, useful citizens.

PROJECT WORK: This might also be called the educational section. Through project work the members learn skills, good work habits, the value of working together and pride in their accomplishments.

It may include demonstrations, judging, talks, tours, slides, movies and discussions as well as actual work on individual or group projects by the members. 4-H members “learn by doing.”
RECREATION: Growing boys and girls need clean wholesome recreation to help develop their minds and bodies. It develops both physical and mental health. Young people make new friends and learn social skills through a good recreation program.

Many games may be used in a well-rounded program. They include several types such as get-acquainted, active, quiet, musical, large group, small group, singing and pencil and paper games.

Variety is important. New ideas and new experiences keep members interested not only in recreation but in all of your club's programs. The "multiphase" idea can be applied to these aspects of your club program, too. You'll soon notice a difference in the things which interest different age groups in your club. As these differences are noticed, you can help your members plan something that attracts each age group.

Here are some suggested club activities that might be included in your club program:

**Guest Speakers:**
- Safety — police officials
- Livestock feeds — elevator manager
- Clothing — clothing store buyer
- Wildlife — conservation officer
- Child care — nurse

**Animal diseases** — veterinarian  
**Care of the hair** — beauty operator

**Special Events:**
- Parents' night
- Foods show (or other project show)
- Christmas carolling
- Club dress revue
- Local dairy show

**Tours of:**
- Meat market
- Automobile factory
- Clothing store
- Visit member's projects
- Grain terminal
- Farm machinery dealer
- Livestock auction
- Canning factory
- Lumber yard
- Freezing plant

You and your club members will think of many other ideas, too. Your members will "grow up" as they have the experience of planning the club program. Give them plenty of opportunity to plan for themselves, but be available to assist them when needed.

**Supplies Available**

Your County Extension Agent will provide you with supplies necessary to a successful 4-H club program. These supplies include:

- Leader Guides
- Member enrollment cards
- Project bulletins for members
- Project reports and records
- Recreation materials
- Secretary's record book
- Treasurer's record book
- Achievement certificates for members
- Membership pins
- General 4-H program information through letters, training meetings and special events.

Visit your County Extension Agent to obtain these and any other valuable helps that he has available for your use. Leaders have also found that the other youth organizations and many commercial concerns are good sources of educational materials useful in helping the member learn. Libraries are also excellent sources of references and learning materials.

Encourage your members to read their bulletins carefully, then to practice what they read. The wise use of bulletins or other literature is essential to good project work. Some tips on the use of bulletins are: (1) discuss the bulletin when it is given to the member, (2) make assigned readings with each member reporting on a section, (3) talk about information in the bulletins at club meetings. Bulletins are valuable — use them wisely.

To help you understand the Michigan 4-H Bulletin identification system, you will be interested to know that all 4-H materials are numbered by the following system:

<table>
<thead>
<tr>
<th>Type of Publication</th>
<th>Number series</th>
</tr>
</thead>
<tbody>
<tr>
<td>4-H Member's Bulletins</td>
<td>100 - 199</td>
</tr>
<tr>
<td>4-H Reports</td>
<td>200 - 299</td>
</tr>
<tr>
<td>Leader's Guides</td>
<td>300 - 399</td>
</tr>
<tr>
<td>4-H Forms</td>
<td>400 - 499</td>
</tr>
<tr>
<td>4-H Miscellaneous</td>
<td>500 - 599</td>
</tr>
</tbody>
</table>

At present, not all 4-H publications used in Michigan carry the series number, but it is good to use the 4-H series number when ordering supplies from your County Extension Office. Most counties will provide you with a 4-H Bulletin Order Blank to order your supplies as indicated for each project in this bulletin.
Automotive Care and Safety

Objectives:

To develop an understanding of the importance of the motor vehicle on our way of life.

To develop a clear knowledge of highway safety and proper attitudes of highway courtesy.

To create an understanding of traffic regulations and other laws related to the ownership and operation of motor vehicles.

To help young drivers acquire the ability to understand the basic parts and principles of the automobile, and to perform the elementary car maintenance operations efficiently.

To help boys and girls achieve and enjoy the fullest opportunities as a safe and efficient automobile driver.

# Children, Youth, Adults in Family Living

**Objectives:**

That young people will:
- Gain knowledge about how young children grow in order to better enjoy them and live with them.
- Gain understanding of young children in order to better understand oneself and be able to live more effectively as a person.
- Develop increased interest in other people.
- Improve in ability to get along with others.

## SUGGESTED PROJECT PLAN

<table>

<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
</table>
| LIVING WITH CHILDREN      | **How A Child Grows**                                                         | Make an observation of a young child. (Try to select a child who is not in your own family.)
                        | For Members:                                                                 | What did you see the child do? Did he seem to "act his age" according to what has been learned?  
| STORY TELLING AND MUSIC   | Learn how to choose stories for young children, how to read to them, tell a story to them or make up a story. | Tell or read a story to a child during play or at bed-time.                        |
                        | For Members:                                                                 | Select a short record or play parts of a long record for a young child. Note: 1) how long the child is willing to just listen, 2) how long he will listen if the record contains some action in which he can take part. |
                        | Story Telling and Music, 124C Report 224                                       | Member evaluation with leader.                                                        |
| CHILD SAFETY              | Gain knowledge about child safety and appreciate the importance of preventing childhood accidents. | Help an adult take care of a child for 2 or 3 hours. Note how many times safety practices are used. Make up your own child safety formula. |
                        | For Members:                                                                 | Member evaluation with leader.                                                        |
                        | Safety Practices, 124D Report 224                                              |                                                                                      |
| HELPING CHILDREN          | Understand some of the ways in which young children can learn to help themselves. | Demonstration and discussion, 2 or more:                                          |
                        | For Members:                                                                 | Teaching A Skill:                                                                    |
                        | Teaching a Skill, 124E Report 224                                              | - Teaching A Child How To Remove and Hang Up His Clothing                            |
                        | TOYS AND PLAY                                                                  | - Teaching Tying His Shoes                                                           |
                        | For Members:                                                                 | - Teaching A Child To Ride A Tricycle                                                |
                        | Toys and Play, 124F Report 224                                                 | - Teaching A Child How To Drink From A Glass and Eat With Silverware                 |
                        |                                                                 | Include what ages he might be able to do the skill and why, techniques for helping him learn, and what tasks would be the most difficult for him. Make a list of the activities a 2, 4, 6, 8 year old might do during a day. |
                        |                                                                 | Teach one or more finger plays to a young child. Plan and carry out a children's party. |
                        |                                                                 | Make a collection of games suitable for children of a certain age.                   |
                        |                                                                 | Collect suitable activities that you and brothers and sisters would enjoy together:  |
                        |                                                                 | - when riding in a car                                                               |
                        |                                                                 | - when on a family picnic                                                            |
                        |                                                                 | - during a rainy evening at home                                                    |
                        |                                                                 | Exhibit and discuss the main kinds of toys. What kinds of learning are available from toys? What causes a child to like a certain toy? What are the safety rules that pertain to toys? Make one or more home-made toys for a particular child. Display and discuss the toys you have made before giving them to the child. |
                        |                                                                 | Member evaluation with leader.                                                      |

### Division | Learning Plan | Learning Activities*
---|---|---
**14-18 Year Olds**

**UNDERSTANDING MYSELF AND OTHERS**
Gain knowledge and understanding on how to live more effectively as a person.
Plan your own project using the suggested list of bulletins in the member-leaders’ guide as a beginning.

**NOTE:** Members select one or more of the leaflets listed below according to member’s interest and project plan: additional references are listed in the Leader’s-Member’s Guide 524A. The references listed in the guide are ordered directly from the source indicated.

**FOR MEMBERS - LEADERS:**
- Looking Your Best, 124G4
- Making Friends, 124G5
- Keeping Friends, 124G6
- Member evaluation with leader.
- How Do You Do; Manners — at home and abroad, 124G7
- Developing a Philosophy of Life in the Teen Years, 124G8
- Report 224 Understanding Ourselves and Others: Member’s-Leader’s Reference Guide, 524A

### Clothing

**Objectives:**
The clothing project encourages young people in learning:
- Knowledge and skills of appropriate and suitable dress in relation to self and society.
- Skills which give satisfaction from clothing made and purchased.
- Judgment in planning, making, and buying clothing and accessories.
- Management of time, energy and money in relation to clothing that will result in maximum satisfaction.
- Ability and willingness to share knowledge and skills with others.

**SUGGESTED PROJECT PLAN**

#### 10-12 Year Olds

**YOUNG MISS**
- **For Members:**
  - You Learn to Sew, 127A
  - You Make a Dress, 127B
- **Report 227**
- **For Leaders:**
  - Leader’s Guide: You Learn to Sew 327A
  - Leader’s Guide: You Make a Dress, 327B
  - Guidelines for Clothing Evaluation, 527A

**12-14 Year Olds**

**JUNIOR MISS**
- **For Members:**
  - A Junior Miss Sews, 127C
  - Selecting Patterns and Fabrics, 127D
- **Report 227**
- **For Leader:**
  - Guidelines for Clothing Evaluation, 527A

</tr>
</tbody>
</table>

#### Learning Plan

Develop skill in planning, selecting and buying clothing.

- Learn to plan wardrobe selections with suitability to individual appropriateness for intended use and care required in mind.
- Continue to learn about fabrics and their use and care.
- Continue to develop sewing skills.
- Learn to utilize clothing and grooming to make the most of personal appearance.
- Learn to use clothing and personal appearance as a tool for creative expression.
- Learn about career opportunities in the clothing field.
- Learn to share knowledge and skills with others.

Choose one or more of the following:

- Make a garment or garments that fit the member's wardrobe needs and assemble any appropriate accessories.
- Make a costume for general wear
- Make a costume for best wear
- Make a costume for sports wear
- Make a costume for rain wear
- Study wardrobe needs, purchase a garment or garments that coordinate with existing wardrobe, and assemble any appropriate accessories.

Suggestions for purchase are:

- Coat
- Dress
- Sports wear
- Simple suit
- Rain wear

Learning activities could include a wardrobe inventory, a wardrobe plan, tours, visits with buyers, comparison shopping, a study of consumer information, etc.

A combination of items 1 and 2 whereby the member makes one or more garments and purchases one or more coordinating garments for her wardrobe.

A creative project planned by the leader and member designed to give the older member new learning experiences in the clothing field.

Some suggestions are:

- Exploration of the career opportunities in clothing and related fields.
- Construction of garments for other family members.
- A study of clothing care including laundry, dry cleaning, etc.
- A wardrobe plan for work or college.
- A study of some phase of textiles.

Member evaluation with leader.

#### Learning Activities*

Choose one or more of the following:

- Make a garment or garments that fit the member's wardrobe needs and assemble any appropriate accessories.
- Make a sampler showing three or more of the basic knitting techniques and three or more simple knitting stitches.
- Make one or more articles using three or more of the basic knitting techniques and simple knitting stitches.
- Make one or more knitted articles or garments following a simple pattern.
- Member evaluation with leader.

---

### Knitting

**Objectives:** (See Clothing)

</tr>
</tbody>
</table>

#### Learning Plan

- Learn to recognize and use some knitting tools.
- Learn to recognize and use woolen, worsted yarn.
- Learn about winding yarn for knitting.
- Learn these basic knitting techniques:
  - to cast on stitches
  - to knit
  - to purl
  - to find off stitches
  - to increase and decrease stitches

Choose one or more of the following:

- Make a sampler showing three or more of the basic knitting techniques and three or more simple knitting stitches.
- Make one or more articles using three or more of the basic knitting techniques and simple knitting stitches.
- Make one or more knitted articles or garments following a simple pattern.
- Member evaluation with leader.

"Basic" Conservation Series

Objectives:
To learn about natural resources and their relationship to people.
To learn how the management of soil, water, forests, and wildlife affects our every day lives.
The "Basic" Series is designed to give an understanding and appreciation of these resources, and afford outdoor experiences and activities.

SUGGESTED PROJECT PLAN

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td>&quot;BASIC&quot; CONSERVATION ACTIVITIES AND YOUTH</td>
<td>Become familiar with our natural resources and their importance in our daily lives. Learn about the interrelationship of one natural resource to another. Develop the conservation story of muddy river valley and clear river valley.</td>
<td>Complete the Conservation Chart and discuss it as a group. Carry out 4 outdoor conservation activities, one in each phase of conservation: soil, water, forests and wildlife. Assemble a scrapbook consisting of your workbook, added pages for a record of activities, pictures, etc., and report. Member evaluation with leader. Exhibit the completed project materials.</td>
</tr>
<tr>
<td>For Members: Basic Conservation: Act. and Youth, 130A Report 230</td>
<td>For Leaders: Leaders' (Kit) Basic Conservation: Act. and Youth, 330A Conservation Chart 430 (one chart for each 5 members)</td>
<td></td>
</tr>
<tr>
<td>&quot;BASIC&quot; CONSERVATION AND WATER</td>
<td>Learn about the importance of water. Appreciate the many uses made of water. Get acquainted with what is meant by pollution. Find out the causes of so-called water shortages. Understand the water cycle.</td>
<td>Complete 8 activities in workbook. Make a water sanitation check of the home well, or, as a club, of the city water supply. Assemble a scrapbook consisting of the workbook, pictures, report, etc. Member evaluation with leader. Exhibit the completed project materials.</td>
</tr>
<tr>
<td>For Members: Basic Conservation and Water, 130B Report 230</td>
<td>For Leaders: Leaders' (Kit) Basic Conservation and Water, 330B</td>
<td></td>
</tr>
<tr>
<td>&quot;BASIC&quot; CONSERVATION AND LAND</td>
<td>Learn the importance of land and appreciate its many uses. Get acquainted with what is meant by erosion and find out the causes of so-called “wearing out” of the land. Learn that the quantity and quality of our land depends upon how we use and develop it.</td>
<td>Take part in a soil conservation field trip. Discuss how soil is formed, studying soil samples. List the foods which come from the land. Assemble a scrapbook consisting of the workbook, pictures, charts and report. Member evaluation with leader. Exhibit the project materials completed.</td>
</tr>
<tr>
<td>For Members: Basic Conservation and Land, 130C Report 230</td>
<td>For Leaders: Leaders' (Kit) Basic Conservation and Land, 330C</td>
<td></td>
</tr>
<tr>
<td>&quot;BASIC&quot; CONSERVATION AND FORESTS</td>
<td>Learn about the products of the forests and their relationship to other resources. Learn how to identify trees. Understand why we must manage forests and plant trees for the future.</td>
<td>Complete 8 activities in the workbook. Participate in tree planting, tree identification, and “fun in the forest” (picnic) activities. Assemble a scrapbook consisting of the workbook, additional record sheets, leaf collections and report. Member evaluation with leader. Exhibit the project materials.</td>
</tr>
<tr>
<td>For Members: Basic Conservation and Forest, 130D Report 230</td>
<td>For Leaders: Leaders' (Kit) Basic Conservation and Forest, 330D</td>
<td></td>
</tr>
<tr>
<td>&quot;BASIC&quot; CONSERVATION AND WILDLIFE</td>
<td>Learn about the importance of fish, birds, and mammals and appreciate their many values. Learn about “harvesting the surplus crop” and find out ways of helping wildlife. Understand the needs of wildlife.</td>
<td>Complete activities in the workbook: —wildlife values —food and cover for wildlife —how to help wildlife —game laws Make an inventory of the wildlife in your community. Assemble a scrapbook consisting of the workbook, added record sheets, pictures, etc., and report. Member evaluation with leader. Exhibit the project materials.</td>
</tr>
<tr>
<td>For Members: Basic Conservation and Wildlife, 130E Report 230</td>
<td>For Leaders: Leaders' (Kit) Basic Conservation and Wildlife, 330E</td>
<td></td>
</tr>
</tbody>
</table>
**Forest Conservation**

**Objectives:**

To learn about our forest resources and develop an understanding of forest management, use and development. To develop an appreciation for the many uses of our forest resources, and learn about “multiple-use”. Through field activities, learn to identify forest trees and recognize their relationship to the other natural resources.

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>I — FOREST TREES AND HOW THEY GROW</strong>&lt;br&gt;For Members: <em>Forest Trees and How They Grow, 132.1A</em>&lt;br&gt;Report 232</td>
<td>Learn:&lt;br&gt;— how a tree grows&lt;br&gt;— to identify 15 or more trees and the scientific name&lt;br&gt;— to mount leaves&lt;br&gt;Become aware of the enemies of the forest.&lt;br&gt;Understand multiple-use of forests.</td>
<td>Complete 8 activities in members’ bulletin.&lt;br&gt;Identify 15 or more trees by their leaves, seed and bark.&lt;br&gt;Plant forest tree seeds and check germination under various conditions (light, water, heat).&lt;br&gt;Member evaluation with leader.&lt;br&gt;Exhibit project materials.</td>
</tr>
<tr>
<td><strong>II — TREE PLANTING</strong>&lt;br&gt;For Members: <em>Tree Planting, 132.1B</em>&lt;br&gt;Report 232</td>
<td>Learn about forest plantations; what trees to plant, where and when.&lt;br&gt;Care of planting stock.&lt;br&gt;Why plant forest trees.&lt;br&gt;Early care of forest plantations.</td>
<td>Complete 7 activities in bulletin (must include activities 1, 2, 3, 4, and 9).&lt;br&gt;Choose two activities from activities 5, 6, 7 and 8.&lt;br&gt;Tree planting, for:&lt;br&gt;— timber&lt;br&gt;— Christmas trees&lt;br&gt;— windbreaks&lt;br&gt;— reforesting blow-sand areas&lt;br&gt;Help plant a shade tree.&lt;br&gt;Member evaluation with leader.&lt;br&gt;Exhibit project materials.</td>
</tr>
<tr>
<td><strong>III — FOREST MANAGEMENT</strong>&lt;br&gt;For Members: <em>Forest Management, 132.1C</em>&lt;br&gt;Report 232</td>
<td>Learn about:&lt;br&gt;— forest management&lt;br&gt;— timber estimating&lt;br&gt;— care of forests&lt;br&gt;— value of forest products</td>
<td>Make:&lt;br&gt;— tree calipers&lt;br&gt;— tally&lt;br&gt;— hypsometer&lt;br&gt;Estimate either number of cords or board feet on 1/4 acre of woodland.&lt;br&gt;Scale at least 6 logs.&lt;br&gt;(or) Conduct a special study relative to forest management. Develop own project outline and get approval of your leader.&lt;br&gt;Member evaluation with leader.&lt;br&gt;Exhibit project material.</td>
</tr>
<tr>
<td><strong>ADVANCED — FOREST MANAGEMENT</strong>&lt;br&gt;For Members: <em>Forest Management, 132.1C</em>&lt;br&gt;Report 232</td>
<td>Advance the interest and understanding of management already learned.&lt;br&gt;Apply principle of forest management to a specific situation—i.e. your planting.&lt;br&gt;Develop own project outline.</td>
<td>Member to develop own project outline and get approval of leader.&lt;br&gt;Complete this project.&lt;br&gt;Record outline and activities in 8 1/2” x 11” folder.&lt;br&gt;(or) Conduct a study of some aspect of the technology or science of forestry.&lt;br&gt;Member evaluation with leader.&lt;br&gt;Exhibit project materials.</td>
</tr>
</tbody>
</table>

For other suggestions on teaching tools, please turn to pages 4 to 11.
Soil and Water Conservation

Objectives:
To develop an appreciation for soil and water resources, through an understanding of the characteristics of the resources and the problems of management.

To learn, through field experiences, about the interrelationship of soil and water and their effect on other natural resources.

To learn what can be done to practice soil and water conservation.

To recognize the value of soil and water to our ‘everyday lives.’

Dairy

Objectives:

To develop a better understanding of the dairy industry and its importance in our total economy.
To gain sufficient knowledge about dairying to enable a member to be successful in establishing and managing a good dairy herd.
To learn the role of science in the function of the dairy cow and the production of dairy foods.
To appreciate the importance of kind treatment of animals and learn that the performance of dairy animals is influenced by the way they are treated by their masters.
To experience the joy and satisfaction of working with dairy animals to produce a good healthful product for human consumption.

Dog Care and Training

Objectives:
To experience the pleasure and companionship that a well trained dog provides.
To acquire a knowledge of the responsibilities of dog ownership in the home and community.
To demonstrate sound dog care and management practices including feeding, care, handling, grooming and fitting.
To learn about the more important breeds and their characteristics and to be able to identify them.
To learn and follow all basic regulations for dog health including first aid and simple treatments for ailments not requiring veterinary attention.
To train the dog to obey and heed established uniform simple commands.
To develop an understanding of the values of scientific research and its influence upon dog husbandry.

</tbody>
</table>

12-14 Year Olds

For Members and Leaders: See age 10-12.

Learn—
- Food habits and nutritional needs of other breeds.
- How to groom other breeds.
- How to clip toenails and clean ears.
- How to clip and trim dog for show.
- Michigan laws related to dogs' registration procedures.
- Parts and their function.
- Skills needed in breeding program.
- Complete Novice A and begin open, tracking or other work classes.

Do comparative studies of various feeds.
- Continue work on training your dog in work classes.
- Observe other dogs being trimmed and groomed.
- Try grooming other dogs.
- Continue to add to your notebook on dogs.
- Identify and name parts of the dog's body.
- Test what you and the dog know by entering a dog show, field trial, etc.
- Plan an educational exhibit.
- Member evaluation with leader.

14-18 Year Olds

For Members and Leaders: See age 10-12.

Study litter rations.
- Study rations for different working classes.
- Understand different methods of feeding.
- Learn how to groom many breeds.
- Explore breeding programs.
- Train a utility or field trial dog or do brace or team training in obedience.
- Share your knowledge with others through Junior Leadership.

Explore career opportunities (Read chapter 19 in "You and Your Dog").
- Experiment with different feeding methods.
- Practice with your dog in whatever work you've outlined.
- Groom several dogs of different breeds.
- Test your skill in grooming and handling by grooming and entering in Junior or open shows.
- Whelp and raise a litter.
- Study various breeding programs.
- Design training aids and programs for younger member.
- Member evaluation with leader.

For other suggestions on teaching tools, please turn to pages 4 to 11.
**Electrical Science**

*Objectives:*

To become familiar with electricity and its applications.
To learn about methods and materials for distributing and controlling electricity.
To develop some skill in making and using electrical equipment.
To develop the ability to plan electrical systems for the home and farm.

---

Entomology

Objectives:
To promote better public understanding of the role insects play in relation to man and the world about him.
To provide an opportunity for youth to learn more about the science of Entomology.
To encourage scientific training among young people.
To promote project experiences that will provide training in the use of the scientific method and foster adoption of the scientific attitude among project participants.
To promote project experiences that will help 4-H members become more aware and appreciative of natural phenomena.
To provide an opportunity for young people to develop precise work habits, skill in craftsmanship and the ability to see jobs through to their completion.
To encourage healthful out-door experiences which will prove beneficial to development of body and mind for each participating boy and girl.

Field Crops

Objectives:

To learn, practice and demonstrate how to:

- Manage the soil through the use of fertilizers, lime, tillage and other good practices.
- Produce quality crops by use of good seed and controlling insects, disease and weeds.
- Use equipment and labor to best advantage.
- Harvest, process, store and market high quality crops.

To learn that an important relationship exists between the cropping program and the type of dairy, livestock and poultry operations on the farm.

To provide interesting experiences through demonstrations, exhibits, tours, judging and comparing results.

To become aware of job opportunities on the farm and in related industries through the field crops program by meeting people concerned with crops; successful farmers, college and industrial men, market and sales people, writers and others.

SUGGESTED PROJECT PLAN

<table>

<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
</table>
| **BEGINNER**  
For Members:  
Beginning 4-H Crops Projects, 142.1A  
Report 242  
Crop Plant and Weed Mounting Sheets (sets of 10), 442  
Basic Plant Science, 197.A1  
For Leaders:  
Field Crop Leader's Kit, 342 | 10-12 Year Olds  
Understand the reasons for being able to identify crop and weed plants and seeds.  
Know how to identify crop plants and their seeds from a selected list for both rural and urban youth.  
Know how to identify weed plants (and their seeds if available) from a selected list for both rural and urban youth.  
Know the field crops which are grown in the county and what they are used for.  
Understand how a plant functions and the basic requirements for plant growth. | The following are alternative projects: (It is suggested that a member work on any two of the alternatives in one year.)  
Identification of Field Crops  
Collect, identify, and mount at least 10 plant specimens and seeds of these plants.  
Identification of Weeds  
Collect, identify, and mount at least 10 weed plant specimens and seeds of these plants.  
Crops Grown in County  
Complete a form showing what crops are grown on your farm and in the county including the uses of these crops.  
Visit with parents and elevator managers to obtain information.  
Make an exhibit showing several crops with their main uses indicated.  
Plant Growth  
Find out the primary needs of a plant.  
Identify the various parts of a plant, determine what function the parts perform and responses of plants to various factors.  
Conduct tests for germination of seeds, to show effect of temperature and water on plants.  
Conduct tests to show the difference in water holding capacity of soils.  
Member evaluation with leader. |

| JUNIOR  
For Members:  
Corn Production Guide, 142.1  
plus current extension crops bulletins as suggested by your local leader or county extension agent.  
Report 242  
Crops Record Card, 442 | 12-14 Year Olds  
Learn to grow high yields of high quality crops economically, understand plant fertilization, keep accurate records and how to measure crop yields. | The following are alternative projects: (It is suggested that a member work on two of the following alternatives during one year.)  
Grow one acre or more of a field crop or crops.  
Demonstrate recommended practices as a trial if not used on your farm.  
Find out what is in a bag of seed and in a bag of fertilizer.  
Keep accurate records on a project or on your parents' field.  
Measure the crop yield accurately. |

For other suggestions on teaching tools, please turn to pages 4 to 11.

## Foods and Nutrition

### Objectives:
- Recognize the opportunities which preparing and sharing family meals offers to mutual enjoyment and social development.
- Learn how nutrition affects good health, physical fitness and an attractive appearance.
- Know how to plan, purchase, prepare, serve and enjoy appetizing nutritious meals.
- Understand the principles of preparing and preserving food.
- Understand the cause and extent of malnutrition in the world, and its remedies.
- Know what job opportunities exist in the field of Foods and Nutrition.

### Suggested Project Plan

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LET'S LEARN TO COOK</strong></td>
<td>Develop interest in preparing and serving simple foods—including milk drinks, cookies, sandwiches, fruits and vegetables. Know what foods are important to eat. Know why it is important to select a good recipe and to follow directions carefully—measuring ingredients accurately. Know the importance of safety and cleanliness when preparing and serving food.</td>
<td>Check your own food habits and make plans for improvement. Practice sanitation and safety in the kitchen. Choose a recipe and measure accurately. Make and serve a variety of cookies. Clean and store vegetables. Collect recipes and ideas for serving cookies, beverages, vegetable relishes and fruit dishes. Prepare and serve sandwiches, cookies, beverages, vegetables and fruits in a variety of ways and evaluate. Plan and prepare refreshments for a party. Show by demonstration or exhibit how to prepare foods suggested in bulletin. See additional suggestions in Leaders' Guide and Members' Bulletin. Member evaluation with leader.</td>
</tr>
</tbody>
</table>

|EVERYDAY TREATS| Learn—To check your day’s food for good nutrition. To enjoy eating different kinds of foods. To enjoy preparing and serving foods. Advanced skill in preparing and handling foods and equipment. To prepare and serve simple fruit drinks and dishes, biscuits, cakes, salads, vegetables, and sandwiches. To plan, prepare and pack a picnic lunch.| Check your meals using a daily food guide. Prepare and enjoy different kinds of foods. Prepare and handle foods and equipment correctly. Plan and prepare foods for different occasions and evaluate. Show by demonstration how to prepare foods suggested in bulletin. Member evaluation with leader. |

| **TODAY'S GIRL — HER FOOD AND FUTURE** | Learn—How food affects the way you look, feel and act. Reasons why certain practices are recommended for handling, storing, and cooking foods. To appreciate the beauty, texture and taste of many kinds of food. How to plan and prepare menus for simple meals and snacks. How to get all parts of a meal ready on time. How to make complete plans and arrangements for a party or meal including planning, buying, preparing, serving and clean-up.| For a peppier you, check your own health and nutrition. Examine food and discuss appearance, taste, texture. Experiment with “science whys” listed in members' bulletin. Make complete plans for a special occasion or a meal and evaluate. Show by demonstration or exhibit how to prepare foods suggested in bulletin. Emphasize "science whys". Member evaluation with leader. |

| **TODAY'S BOY — HIS FOOD AND FUTURE** | Counting Calories (F-113), 355C1 Food and Your Weight, (USDA, G-74), 355C2 A Girl and Her Figure, 355C3 | |

FOODS AND NUTRITION (Continued)

SUGGESTED PROJECT PLAN

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td>EXPLORING FOODS AND NUTRITION</td>
<td>A project designed to— Give members experience in planning and completing an independent project in Foods and Nutrition. Encourage originality, curiosity, and initiative. Introduce members to careers and techniques used in sciences of Foods and Nutrition, such as: —Experimental Foods —Food Science —Nutrition</td>
<td>To develop greater understanding of problems related to food and agribusiness. To develop greater understanding of foods and customs of other peoples, their cultures and traditions.</td>
</tr>
</tbody>
</table>

Learning Activities*

Members can select a problem from one of five broad areas:
—Experimental Foods
—Nutrition
—Marketing—Consumer Education
—Food Preparation and Food Management
—Foods Travel Too

Specific suggestions listed below:

Suggested Experimental Food Projects:
—Recipe testing and adapting.
—Substitution of ingredients.
—Study what happens to food under various conditions—for example, when it is cooked or frozen and thawed.
—Study development of a new food or processed food.
—Investigate "Foods of the Future".
—Investigate career opportunities in Experimental Foods or Food Science. Make results available to interested friends and school counselors.

Suggested Nutrition Projects:
—Conduct an informal survey of food habits of group of friends, club members, or family. Analyze and interpret results and make suggestions for improvements.
—Prepare and display a nutrition education.
—Plan and carry out a self-improvement project. If underweight or overweight, analyze your own food habits and activities. With the cooperation of your family physician, try to correct and control your weight intelligently.
—Study what happens to the food you eat. Refer to "The Wonder of You" and "Food and You" which are available from:
  American Institute of Baking
  111 North Canal Street
  Chicago 6, Illinois
—Study the various meanings given to foods. How does this affect nutrition? Food Habits?
—Select deficiency disease—show its occurrence in history, causes, world distribution, and successful elimination. Who was responsible for its eradication?
—Develop project to show role of food in exploration—world and space.
—Investigate career opportunities in the field of nutrition. Make results available to interested friends and school counselors.
—Develop awareness of malnutrition occurring in own community, state and nation, and the need for assistance.

Food Preservation Freeze

For Members:
Freezing for Family and Friends, (10B), 156.2
Report 256

Learn—
How to keep Michigan fruits with fine color, flavor, and texture by freezing them for winter use.
What Michigan fruits can do to improve health. Why frozen fruits keep.
Importance of quality and variety in fruits chosen for freezing.

10-12 Year Olds

Freeze at least two kinds of fruit. Freeze a fruit puree for ice cream sundaes or make an uncooked jam and store in freezer or in refrigerator.

Science Plan:
—Freeze a package of fruit (not in glass), leaving no head space. Open after one month. Report to club what happened.

For other suggestions on teaching tools, please turn to pages 4 to 11.

| Use Members' Bulletin and  
Freezing Foods For Fun, 356.2A | Necessity for cleanliness and for following directions exactly.  
Kinds of containers, packs, and locations in freezer.  
Reasons for spoilage, loss of flavor and color, and change in texture.  
To serve frozen fruits and uncooked jams. | —Freeze a package of strawberries with sugar and one without. Keep them until October or November, then open and compare them, with leader present.  
—Freeze a package of peaches using ascorbic acid and one without it. Keep them until fall, open the packages and compare them after air strikes the peaches.  
Invite mothers to a club meeting. Serve frozen fruits and/or uncooked jams.  
Wrap uncooked jams for gifts and deliver in a hurry on a cold day.  
Protect a package of frozen fruit with many layers of paper and take to a shut-in person.  
Member evaluation with leader. |
| **For Members:**   |                                                                                                                                                |                                                                                      |
| Freezing Foods for Family and Friends (10-B), 156.2  
Home Canning of Fruits and Vegetables, (USDA, HG 8), 156.2A | Learn—  
To can fruits and tomatoes safely.  
How to freeze vegetables and prepared foods of high quality.  
About the nutritive values of products preserved and how values are affected by preservation methods.  
How to plan the family's food supply for the year around.  
To compare costs of home-preserved foods and purchased ones.  
How to store canned foods.  
How to serve the products preserved.  
Principles of canning fruits and tomatoes.  
Nutritive value of products canned or frozen.  
Preferred methods, equipment and directions for canning.  
Comparative costs of freezing and canning.  
Principles of freezing vegetables and factors that influence quality and nutritive value of frozen products.  
Safeguards necessary in freezing prepared foods.  
How to keep inventories.  
About storage of canned foods.  
How to prepare canned and frozen foods for the table.  
What to do if the freezer stops. | Can tomatoes and one kind of fruit.  
Freeze two kinds of vegetables.  
Can two kinds of fruit.  
Keep an inventory of family supply of canned and frozen foods.  
Freeze two prepared foods and demonstrate method to club.  
Can tomato juice, other fruit juice or fruit puree and demonstrate method to club.  
As a club, entertain mothers and friends and serve canned and frozen foods.  
Estimate cost of preserved foods, compare with store price of same amounts. (Compare appearance and flavor also.)  
Science Plan  
Can tomatoes by both hot pack and cold pack methods and compare.  
Freeze two packages of exactly the same kind and size of corn. Blanch corn for one package and not for the other. Label, freeze and store 6 months, then open, cook and compare color, flavor, and texture.  
Wrap a package of vegetables correctly and one in ordinary wax paper, very loosely. Label, freeze and compare quality after 4 to 6 months.  
Member evaluation with leader. |
| **FOOD PRESERVATION —**  
CANNING & FREEZING  
For Members:  
Freezing Foods for Family and Friends (10-B), 156.2  
Home Canning of Meat (USDA-HG6), 156.2B  
How to Make Jellies, Jams and Preserves at Home, (USDA, HG-56), 156.2C  
Making Pickles and Relishes at Home, (USDA), 156.2D | Learn—  
Principles of canning vegetables and meat.  
Principles of making jellies and jams.  
Principles of making pickles and relishes.  
How to freeze meat and poultry.  
How to freeze prepared foods, entire meals, and baked products. | It would be desirable if each member choose a different line of preservation, worked out her own plan and choose foods available to her family. Have plan approved by leader and/or county extension agent.  
Samples of preserved foods might be served to club members and friends. Questions on techniques could be answered at this meeting.  
Cost of products might be estimated and fair trades of individual products arranged between members.  
Member evaluation with leader. |
| **12-14 Year Olds** |                                                                                                                                                |                                                                                      |
| **14-18 Year Olds** |                                                                                                                                                |                                                                                      |

**Home Design**

*Objectives:*
To develop an understanding of the basis for selection and use of furnishings appropriate for positive individual development and good family relationships.
To become a better family member through sharing the responsibility of maintenance of the home and the selection and use of furnishings to meet family needs.
To provide a climate for self expression and creativity.
To develop an awareness of enduring or meaningful design and craftsmanship.
To enrich life by becoming more conscious of our environment and by developing a sensitive appreciation for the world around us.

Horticulture

Objectives:
Learn more about plants and to develop a better understanding of the basic principles of science relating to plant growth.
Develop a greater interest in growing, using, and marketing vegetables, flowers, fruits, and ornamentals.
Learn the principles involved in planning a garden or fruit project and then putting a plan into effect.
Learn the fundamentals of gardening — soil preparation; fertilizing; selecting recommended varieties; planting; thinning; transplanting; irrigating; insect, disease, and weed control, etc.
Learn to identify the common kinds and varieties of horticultural crops that pertain to the member's project and the common seeds, insects, diseases, and weeds which pertain to the project.
Learn how horticultural commodities are marketed.
Learn where to find accurate and up-to-date information on gardening and how to keep accurate and useful records.
Become acquainted with the scientific method and to conduct experiments with plants.

It is suggested that all Beginner members in Horticulture enroll in and complete a Basic Plant Science Project before they enroll in another horticulture project. This means that a Beginner member who plans to take a flower, vegetable garden, or commercial project in the summer should enroll in the Plant Science Project the previous winter.

Junior and Senior members should do the same as soon as Junior and Senior Basic Plant Science bulletins become available.

Basic Plant Science

Light Horse and Pony

Objectives:
To experience the pride and responsibility of owning a horse or pony and receive training in its care, feeding, management and related costs.
To learn safety precautions to prevent injuries to themselves, others, and their mounts.
To prepare for citizenship responsibilities by working together in groups and supporting community horse projects and activities.
To appreciate horseback riding as a healthy and wholesome form of recreation as well as an understanding in handling horses and ponies.
4-H members are strongly urged to own their horses, but it is not required. All members with second year or advanced horse projects are requested to keep year-around records including all project animals owned by them and complete the project report form. It is suggested that older members taking the project for the first time should take an appropriate age group project, however, they should also be taken through the initial projects at their own pace.

For other suggestions on teaching tools, please turn to pages 4 to 11.

Management for You in Your Family

Objective:
Boys and girls to gain an understanding of management as a means of reaching individual and family goals.

SUGGESTED PROJECT PLAN

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td>GETTING ACQUAINTED WITH MANAGEMENT</td>
<td>This project is being designed for high school age 4-H boys and girls to help them understand values, resources, and decision-making as a means of reaching individual and family goals. After pilot testing in several counties, materials will be prepared and made available through your County Extension office.</td>
<td></td>
</tr>
<tr>
<td>MONEY IN YOUR LIFE 14-18 Year Olds</td>
<td>Learn to set one's own financial goals. See how the individual's money problems are closely related to those of the whole family. Realize the many means available for reaching one's own goals. Learn the guides to follow in making and using a financial plan. Through training and experience improve money management ability.</td>
<td>Decide what money problems are the most important to solve. Make a time table for solving them. Study money problems of the individual as a part of the whole financial picture of the family. Use knowledge, skills, and imagination to increase the means available for reaching one's goals. Make a financial plan, using record-keeping as a tool. Try out plan and adjust it as necessary. Member evaluation with leader.</td>
</tr>
</tbody>
</table>

Personal Improvement

Objectives:
To develop desirable personal health practices and attitudes.
To learn that happy living (physical and mental fitness, attractive appearance and a pleasing personality) depends upon health conservation and improvement.
To share in the responsibility for improving the health of the family and of the community.
To develop poise and confidence.
To develop a desire to look well groomed.

SUGGESTED PROJECT PLAN

<table>
<thead>
<tr>
<th>Division</th>
<th>Learning Plan</th>
<th>Learning Activities*</th>
</tr>
</thead>
<tbody>
<tr>
<td>10-12 Year Olds</td>
<td>Learn how proper care of teeth affects personality and general health. Understand how proper foods and oral dental hygiene are used to help keep teeth healthy and free from decay.</td>
<td>Learn the principles of proper dental hygiene by having each member carry out oral dental practices for at least 3 months or more. Have each member visit a dentist for a regular check up during the project, if this has not been done within the last 6 months. Member evaluation with leader.</td>
</tr>
</tbody>
</table>

Girls learn proper make-up techniques, and how to apply them. Learn the principles of good posture and how posture leads to good health. Specifically learn how to walk, sit, stand and lift weight properly and gracefully. | Members will plan and carry out a "skin care" program for at least 3 months, demonstrating the skin care practices suggested in their bulletin. Member evaluation with leader. Each member will practice the suggested good posture habits and demonstrate that they understand why and how these practices are important. Member evaluation with leader. |

Photography

Objectives:
Provide an interesting activity or project for boys and girls of all ages. Introduce 4-H members to a practical art or vocation. Give educational guidance and help members develop skills in taking and using pictures. Help members gain an appreciation of photography as an art, as a science, and as a communication tool. Help members to observe and appreciate their surroundings. Provide experience in recording events, ideas, and situations in picture form for study or reference.

Safety and Fire Prevention
All 4-H clubs should make safety a part of their yearly program. Each leader should have 4-H Bulletin 591-B, “Leaders 4-H Safety Activity Guide” for use in helping develop activities.
Safety and Fire Prevention projects are for those members who want to carry out a more intensive program than that carried out by the activity program.

Objectives:
To help boys and girls learn citizenship fundamentals through an action program that contributes to the safety and welfare of others and helps the entire family become more safety conscious.
To develop ability to recognize hazards and how to correct them, or learn to live with them safely.

Town and Country Business Program

**Objectives:**
To provide greater understanding of business as it operates through firms closely associated with agriculture.
To teach basic economic facts that will help participants better fit themselves into the modern social and economic structure.
To explore employment opportunities in business closely related to agriculture.
To give youth who will go into farming a better appreciation of problems of agricultural marketing.
To point to the needs and benefits of training and education for youth who anticipate employment with agricultural business firms.
