How to Keep your Trees Healthy

Extension Bulletin E-1076 Nat. Resources Series, Jan. '77

> Cooperative Extension Service Michigan State University

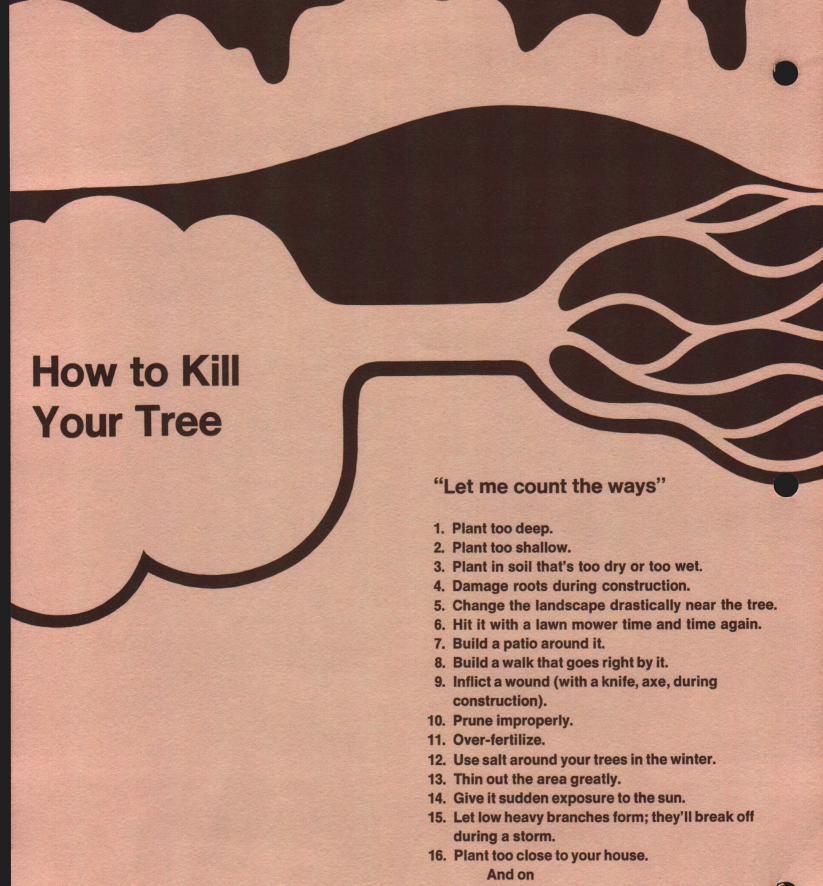

Healthy trees add beauty to our homes and parks. They help cool and clean the air, deaden sound, and provide shade. Here's what you can do to help keep your trees healthy:

- Use fencing or other protection around trees near construction sites — prevent wounds.
- 2. Avoid changing the normal dramage pattern.
- Keep pedestrian and other traffic patterns away from trees to prevent soil compaction.
- Help to control eir pollution by working with environmental agencies, keeping your car tuned, and obeying open-burning ordinances.
- Be careful not to run into trees with tawn and garden equipment. As a precaution, keep grass away from tree trunks.

- Be careful in your choice of lawn and garden chemicals. Use them only as recommended on the label.
- 7. Avoid or minimize the use of salt around your trees.
- 8. Sidid camplifes away from frees.
- de Treat wounds, property and immediately.
- Remove injured or diseased branches before they die. Prune branches close to the trunk or connecting branch.
- Use proper planting techniques for new trees. For specific planting guides, consult an expert.
- Water and fertilize properly, especially with young trees.
- 13. Establish a sound maintenance program.
- Keep dead wood away from trees practice sanitation.
