YEAR

YOUR FARM ACCOUNT BOOK

This farm account book has been prepared to help you do a better job of farming. A good set of farm records is a necessity in the highly-competitive, commercialized business of farming today.

Here you can keep an organized record of income and expenditures. The column headings correspond to the farm income tax forms, Schedule 1040-F. The most important use that can be made of this record is to help you study your farm business and make needed improvements. Michigan State University Extension can provide other assistance, too. We suggest that you:

- 1.Keep the book—summarize it—study the figures.
- 2.Compare the figures for your farm business with those of other farmers. Your County Extension Director can provide you with a Telfarm business analysis report for different types of farms.
- 3. Maintain the strong points of your farm business and improve or eliminate the weak points.
- 4. Consult with your Extension Agricultural Agent and/or creditor about ideas or changes you have in mind to improve the business.
- 5.Use this book when planning your credit needs. Present the facts to your creditor and discuss the plans with him/her.
- 6. Know the facts about your own farm business. This is the best way to succeed and at the same time build a strong agriculture.

RECORDING EXPENSES (Pages 4-67)

INTRODUCTION:

Income tax regulations specify the items which can be included as cash operating expense and reported in Schedule F Part II. The cost of capital purchases of dairy, breeding and work stock, machinery, tile and buildings is recovered through annual depreciation and must be handled separately.

Columns 1, 2 and 3 are to be used for recording quantities and dollar amounts in journal fashion. The quantities of some items are necessary for business analyses and planning. This is especially true of purchased feed and feeder livestock. The total of column 3 can be used as a cross-check of the totals of all other columns to guard against posting errors. Also, it can be used for initial recording during rush periods and the figures posted to the proper itemized column when more time is available. Space is provided on pages 68 and 69 to record monthly totals of dollars and quantities of each kind of expense. Some prefer to total each column on each page, carry the totals to the following page and not use the summary on pages 68 and 69.

OPERATING EXPENSES

Column 4 - Record the cost of the purchased feeder livestock which, when sold, will be entered in column 5 of receipts. Since some of these animals may have been purchased in the previous tax year, special care should be taken with the costs recorded here. One way is to keep a separate record of feeder livestock when purchased and then record the cost in this book at the time sold. Where it is difficult to keep the identity of animals straight, it is possible to use a first-in, first-out method of reporting.

Column 5 - The farm business share of automobile expense and truck expense is entered here.

Column 6 - Enter all chemicals used in crop production.

Column 7 - Enter conservation expenses (see the Farmers' Tax Guide) and land clearing expenses.

Column 8 - Record any custom work hired such as trucking, combining, silo filling or plowing. A common mistake is to include the cost of hiring someone to lay

tile. This is a cost which must be combined with the cost of the tile and placed on the depreciation schedule.

Column 9 - Enter employee benefit plans and the amount you put into a retirement plan which qualifies for deduction from taxable income for your employees.

Column 10 - List all feed purchased, including grain, hay and supplement. Commonly included is the cost of grinding and minerals.

Column 11 - Record the cost of fertilizer and lime, as well as the cost of soil testing.

Column 12 - Enter all trucking costs.

Column 13 - Record the cost of gasoline, oil, diesel fuel and other fuel.

Column 14 and 21 - Include only the farm share of these costs. Any reasonable division which can be defended in a tax review is satisfactory. Taxes, insurance and utilities for the personal residence of the taxpayer cannot be included.

Column 15 - All interest paid on farm business debts is a legitimate operating expense and should be kept separate from principle payments and recorded in this column. This includes interest on real estate debt.

Real estate taxes are also recorded here.

Column 16 - Record all costs of hired labor. This includes social security paid by the employer and all fringe benefits provided. Social security for hired workers, both employee's and employer's shares, is sent to the Federal Government at the time it is paid to a bank and a depository receipt obtained. At this time, social security payments become an expense. Also record the wage actually paid a worker (wage minus withholding for social security).

Column 17 - Record repairs to buildings, tile and fence, which do not materially lengthen the useful life. This includes paint, minor repairs and upkeep. The same rules apply for machinery repairs. Small tools, which have a short useful life, are also commonly included as an annual cost, as is truck insurance and licenses.

Column 18 - Include all items of crop expense such as seeds, plants, crates, twine, etc.

Column 19 - Record grain storage costs here.

Column 20 - Schedule F Part II provides a line for supplies. This is for items of a general nature. (For good business analysis, items which can clearly be identified as crop, livestock or machinery should be recorded in those columns.)

Column 21 - (See Column 14.)

Column 22 - Combine all items of livestock expenses in this column. Included are veterinary, medicine, breeding fees, milkhouse supplies and registration. The cost of chicks or pullets also goes here.

Column 23 - Record any expense that is not reported in other columns.

NON-OPERATING EXPENDITURES

Column 24 - Record purchased dairy, breeding and workstock which are held and used in the business. Write in the appropriate class of livestock in the item column.

Column 25 - List any new investment in buildings, tile and fence which will be recovered through depreciation and added to your depreciation schedule when preparing your tax return.

Column 26 - Any machinery or equipment purchased is recorded here and added to your depreciation schedule. The cost is either the purchase price or the difference paid plus the unrecovered cost of the item traded.

RECORDING INCOME

(Pages 72-89)

INTRODUCTION:

For Federal income tax reporting a distinction is made between income and expense which result from the operation of a business and the gains (or losses) incurred in holding assets which one must own in order to conduct a particular business. These capital assets, commonly referred to as Form 4797 items, must be kept separate and any gains (or losses) reported on (Form 4797). This gain or loss does not affect the level of qualification for social security. In this record book the last columns to the right in both the income and expense section have been designated as non-operating income and expenditures for this purpose.

Columns 1, 2 and 3 are to be used for recording quantities and dollar amounts in journal fashion. The quantities are necessary for business analysis and planning. The total of column 3 can be used as a cross-check of the totals of all other columns to guard against posting errors. Also, it can be used for initial recording during rush periods and the

figures posted to the proper itemized column when more time is available. Space is provided on pages 88 and 89 to record monthly totals of quantities and dollars for each kind of income.

Many items of income are erroneously reported on Schedule F which should be reported on a Schedule B, C or D and totaled on the individual's Form 1040.

For a more complete discussion, get a copy of the "Farmers' Tax Guide" from your County Agricultural Agent or the Internal Revenue Service.

OPERATING INCOME

1. Schedule F Part I

Column 4 is for the income from raised livestock which do not qualify for capital gain treatment in columns 22 and 23. Included are raised slaughter livestock (calves, steers, lambs and pigs).

Column 5 is for the sale of feeder livestock that has previously been purchased to be fed out and resold.

Columns 6 through 16 are for income from the sale of crops and livestock products. Be sure to use the same order of headings on each page to avoid confusion.

Column 17 is for custom income.

Column 18 has been provided for the sale of maple products, Christmas trees, pulp wood and timber. Under special conditions, timber can be a Form 4797 item. See the Farmers' Tax Guide for details.

Column 19 is for patronage dividends and refunds which result from the operation of the business.

Column 20 is for government payments for agricultural conservation practices, diversion payments for reducing production and wheat certificates. Also included are payments received for tiling.

Column 21 is for any other miscellaneous income not reported elsewhere.

RECORDING INCOME (Cont'd)

NON-OPERATING INCOME

1. Capital Assets Sold

Columns 22 and 23 — Any raised or purchased dairy cattle (cows or bulls), beef cattle, sheep or swine which qualify as breeding stock should be reported in these columns. Most farms will have only two classes of livestock. Write in dairy, beef, sheep or

swine as appropriate. Since the livestock listed above must be held for a specified number of months to qualify as a long term gain (see Farmers' Tax Guide), it is best to mark any which were held less than the specified number of months for reporting in another part of Form 4797.

Column 24 — The income received from the sale of any building or other real estate should be reported

here. This also includes insurance collected for buildings damaged or destroyed. Check the regulations carefully when preparing income tax reports as several different options are available.

Column 25 — The income received from the sale of machinery can be recorded here. This does not include machinery traded in.

SILO CAPACITIES OF CORNAGE PER FOOT OF HEIGHT

Approximate bushels of dry grain (15.5%)

Kernel	Conver-					Inside si	o diame	ter (feet)			
content	sion Factor	8	10	12	14	16	18	90	22	24	26	30
	SHE	LLED	CORN	(1.25 cu	bic feet	per bush	el at 15	.5 per c	ent moist	ure)		
15.5(*)	1.0	40	63	90	123	160	204	251	304	362	494	640
24	.93	37	58	84	114	148	188	233	281	334	392	599
28	.89	35	56	80	109	142	180	224	270	320	376	561
38	.85	34	53	77	105	136	173	214	258	307	360	543
	GROUND	EAR	CORN	(1.94 cu	bic feet	per bush	el at 15.	5 percer	t kernel	moisture)	
15.5	1.0	26	41	59	80	103	131	169	196	233	274	41
24	.90	23	37	53	72	94	119	148	176	213	250	37
28	.86	22	35	50	69	90	114	141	169	203	238	35
32	.83	21	34	48	66	86	109	134	169	193	227	34

(*) This first line is for dry grain and can be used to measure capacity of round bins for all small grains.

Conversion Factor—For any size not listed multiply the dry grain capacity of the storage by this factor at listed moisture content to determine equivalent in dry grain.

Density increases with depth but no allowance was made for compaction in this table. Silos 40 feet or higher may have 10 percent greater capacity than shown in table.

CAPACITIES OF BINS AND CRIBS IN DRY GRAIN

To find the capacities in bushels, first find the volume in cubic feet:

For a crib or cube multiply the length x width x height (all in feet).

For round bins, cribs, or silo multiply the radius (1/g diameter) x radius x 3.1416 x height.

Then to convert cubic feet to bushels:

Multiply by .8 for small grain or shelled corn

Multiply by .4 if ear corn.

Multiply by .515 if ground ear corn.

For round bins you may use the top line in Table and multiply by height in feet.

Crib capacities in bushels for ear corn per foot of length:

Width			Height in Feet		
in feet	8.	10'	12'	14"	16'
5	16	20	24	28	32
6	19.2	24	28.8	33.6	38.4

STANDARD WEIGHTS OF FARM PRODUCTS PER BUSHEL

	lbs.		lbs.		lbs
Alfalfa	60	Corn (shelled)	56	Ryegrass	24
Apples (average)	50	Corn kernel meal	50	Rye	56
Barley (common)	48	Corn (sweet)	50	Soybeans	60
Beans	60	Cowpeas	60	Spelt	0-40
Bluegrass, (Kentucky)1	4-28	Flax	56	Sorghum	56
Bromegrass, Orchard grass	14	Millet (grain)	50	Sudan grass	40
Buckwheat	50	Oats	32	Sunflower	24
Clover	60	Onions	52	Timothy	45
Com (dry ear)	70	Pegs	60	Wheat	60
Com and cob meal	45	Potatoes	60	Milk, per gallon	8.6

RULE OF THUMB ON SILO CAPACITIES:

20' x 60' = 500 T. 20' x 50' = 390 T.

20' x 40' = 280 T. 20' x 70' = 575 T.

For any other size silo the radius squared expressed as a decimal (divided by 100) times the tonnage of a 20 ft. silo will give the capacity in tons.

Examples

30' x 60'—15 x 15 = 2.25 x 500 or 1145 Tons 16' x 50'— 8 x 8 = .64 x 390 or .250 Tons 12' x 40'— 6 x 6 = .36 x 280 or .101 Tons

TO CONVERT HIGH MOISTURE FORAGE TO DRY HAY EQUIVALENT

Method A—Read the tonnage from the Silo Capacity Table.

Then divide this figure by 3 to convert to dry hay equivalent. This will be a close estimate regardless of the moisture content of the grass or haylage.

Method B—Multiply the tonnage of green or wet material by the dry hay per ton equivalent in the following table:

Hay or Forage	Percent Maisture	Dry Hay Per Ton
Green chop	88	.25 toni
Grass silage	70	.34
Grass silage	65	.40
Haylage	60	.45
Haylage	50	.57
Haylage	40	.68

MEASUREMENT STANDARDS, HAY AND STRAW

	Average	Range
	cu. ft./ton	cu. ft./ton
Hay, baled	275	250-300
Hay, chopped—field cured	495	400-450
Hay, chopped-mow cured	325	300-350
Hay, long	500	475-525
Straw, baled	450	400-500
Straw, chopped	600	575-625
Hay, loose	480	370-390
Straw, loose	800	750-850

SILO CAPACITY: TONS OF CORN OR GRASS SILAGE (68% MOISTURE) IN SETTLED UNOPENED SILOS

Depth of silage	Inside diameter of silo in feet								
(in feet)	121	14'	16'	181	90'	24'	26	30

70	_		_	_	574	827	970	1290	

NOTE: When a silo is partially unloaded from the top, the remaining silage is more tightly packed and heavier than the same volume in an unopened silo. Therefore, compute the weight remaining as follows:

EXAMPLE.

- Use the table to find the original contents before the silo was weight 389 T.
- Estimate depth of silage removed. Weight removed in 32" ~ 205 Tons. ed and determine its weight from table.
- 3. Subtract tonnage removed from original contents to find tonnage remaining.

 389 T. (original contents)
 205 T. (removed in 32')
 184 T. (remaining in 18')

BUNKER SILO—Capacity For Corn Silage, 70 Percent Moisture

Formula

Average length x width x settled depth (all in feet) x 40 lbs. = Tons

Weight per cu. ft. will vary by amount of packing, fineness of cut, moisture content, and depth of material. Use the following table to estimate pounds per cu. ft. according to depth of pile.

Depth of silage	Pounds per cu. ft
6 h	32 lbs.
8	36
12	40
20	45
