CORN INSECTS—ABOVE GROUND

For safe and effective use of insecticides, always identify the problem correctly.

1. European corn borer (early leaf feeding and mature borers)

8. Grasshopper

2. Southwestern corn borer

5. Corn earworm

9. Corn leaf aphid

3. Common stalk borer

6. Armyworm

10. Corn flea beetle and damage

4. Chinch bug

7. Corn rootworm beetles (left to right: Northern, Western and Southern)
These beetles clip silks causing poor pollination shown at far right.
