## A.I. SIRE SUMMARY

This report contains the latest USDA sire information for 291 sires. The list of sires has been provided by each of the four studs\*. Only proven sires with semen available through the studs have been included. Each sire had 10 or more daughters reported to USDA with production information.

Summary of Reported A.I. Sires Available in Michigan \*

Breed	No. Bulls	PD Milk	PD %	PD Fat	PD \$\$	% Rpt
Ayrshire	11	+714	-.04	+23	\$57	81%
Guernsey	25	+590	-.06	+22	\$49	68%
Holstein	211	+708	-.05	+18	\$53	66%
Jersey	30	+737	-.12	+25	\$60	58%
Brown Swiss	13	+543	+.01	+23	\$48	64%

\* Courtesy of ABS, Carnation, Curtiss and MABC

Sires are ranked by the superiority of their daughters to herdmates as expressed by the Predicted Difference value for income. This combines economic aspects for both milk and fat.

An improved evaluation procedure (Modified Contemporary Comparison) was used for this summary; records-in-progress were included, new age-month factors and pedigree information were implemented, etc. The results are more accurate and should be interpreted exactly the same as before.

### Explanation of Headings

\*REGISTRATION NUMBER and NAME of sire. \*STUD CODE for technicians.

\*NO. HERDS in which records were made. \*NO. DAUS. with production records.

\*PCT. INC. (percent incomplete) represents the portion of a sire's daughters in their first lactation that died or were sold before milking 305 days.

\*PCT. RIP (percent records-in-progress) denotes the portion of a sire's daughter records was on in-progress lactations.

\*PCT. RPT. (percent repeatability) is an index value which measures the reliability of the PD considering the number of daughter records and its distribution over herds.

\*PREDICTED DIFFERENCE is to be used to measure the sire differences in ability to transmit production potential. Predicted Difference indicates the amount of MILK, PCT (% test), FAT, and \$\$\$ (dollar value) that future daughters of a sire are expected to differ from their herdmates. Prices used were \$8.20 per cwt. for 3.5% milk with an 8.0 cent fat differential. The dollar value is the gross value of product that future daughters should return per lactation over herdmates.

Prepared by Ivan L. Mao and Clinton E. Meadows, Extension Dairy Specialists, with technical assistance from Roger R. Neitzel and James F. Plog.
