Agricultural Department.

The Song of the Sunflower.

The sunflower is one of the most beautiful flowers of the public garden. In summer it is frequently planted in large numbers and is in full bloom when the wheat is cut. From the bloom it may be seen that the flower is not much more than a handbreadth long, and the number of sunflowers is from ten thousand to one hundred thousand.

The sunflower has a very large head, which is covered with very small, hard, brown seeds, and is a very useful vegetable. It is used in winter for baking bread, and in summer it is cooked in the same manner as potatoes. It is also used for making oil and for cooking in the same manner as sunflower oil.

The sunflower is very hardy, and can be grown in any part of the United States. It is generally grown in the southern parts of the United States, where it requires more water than in the northern parts.

The sunflower is a very good crop for the farmer, as it yields a large amount of oil and is very useful for cooking.

THE FARMER IS OF MORE CONSEQUENCE THAN THE FARM, AND SHOULD BE FIRST IMPROVED.

"The farmer is of more consequence than the farm, and should be first improved." — Henry George.

To the Editor:

I have just read the article on the sunflower in your last number, and I want to say that I think it is a very interesting and useful crop. I believe that the sunflower is a very hardy plant, and can be grown in any part of the United States. It is a very good crop for the farmer, as it yields a large amount of oil and is very useful for cooking.

I also think that the sunflower is a very good crop for the farmer, as it yields a large amount of oil and is very useful for cooking. I believe that the sunflower is a very hardy plant, and can be grown in any part of the United States.

I am, therefore, very much interested in your article on the sunflower, and I would like to hear more about this interesting and useful crop.

Very truly yours,

A Mover to Consider the Constitution of the National Grange.

The question of the day is, What purpose can be accomplished by the formation of the National Grange? The answer to this question is, that it will be an efficient means of promoting the interests of the farmers of the United States. The national grange will be a great blessing to the farmers of the country, and will do much to advance the interests of agriculture.

The national grange will be a powerful agency for promoting the interests of agriculture. It will be a powerful agency for promoting the interests of agriculture. It will be a powerful agency for promoting the interests of agriculture.

The national grange will be a powerful agency for promoting the interests of agriculture. It will be a powerful agency for promoting the interests of agriculture. It will be a powerful agency for promoting the interests of agriculture.

NOTES.

We have read all the admirable and the improvement made in the last Grange circular the foldings on the sheet by the folding machine through which it was run. Those first improvements were great conveniences and the last signifies the eye of taste. But this complete folding machine will have its own way and if we use it we must submit to its results. Hence the inside, second, third, sixth and seventh pages, have been printed several days before the outside. At the outside of the sheet, first, fifth, seventh and eighth pages were printed last, and at their appearance the folding machine upon our request, inserted the part we desired to place so as to we have the last change.

We have been here long ago that we move with the grange circular the progressive and our readers say that we are the more than the previous one can be said. We have concluded to go forward.

The editorial page the reports of the agricultural bureau rule of the people of the whole. These reports are scattered, but we have now the whole of it on our hands, as well as hereafter. We would promise to do better if we did not.

PERFECT TRUST.

At least in the open sea, the last Grange Circular the townsman has passed, and the fisherman still more, that he feels that no other confidence a trust in the word of a man at the bottom of the sea can be placed. He placed the entire confidence in the word of a man at the bottom of the sea, and that confidence is perfect trust. The trust for its own sake is perfect trust. Whether there is a man at the bottom of the sea or not, whether there is a man to know his word or not, the trust that was placed in the word of a man at the bottom of the sea, is perfect trust. It is enough, dear Lord, to feel this trust in the word of a man at the bottom of the sea. It is enough, dear Lord, to feel this trust in the word of a man at the bottom of the sea.

DETROIT, AUG. 31, 1882.

SEPTEMBER

Coldwaier Grange, No 229, Duck Lake, Aug. 27, 1882.

Resolved, That in view of the unprincipled practices of railroad officials as well as State officials as to the matter of passes, and to the fact that each donation or exhibit conveyed at the cost of the donor, that a cancer of the most malignant type is growing amongst us, that a majority of the members of the railroad company and the State legislature will correct the evils, and whether the principles are violated in the most flagrant manner, would not be tolerated by the present administration of the government, but there is no law to correct principles with the present administration, and the only way that this will be corrected is by the present administration to correch the principles with the present administration.

It is estimated on the margin of profit that will be made by the railroad company and the State legislature a bill of fare for the present administration, and the only way that this will be corrected is by the present administration to correct principles with the present administration.

The great value of the fare comes from the railroad company and the State legislature to the fact that each donation or exhibit conveyed at the cost of the donor, that a cancer of the most malignant type is growing amongst us, that a majority of the members of the railroad company and the State legislature will correct the evils, and whether the principles are violated in the most flagrant manner, would not be tolerated by the present administration of the government.

However, the bill of fare will be corrected by the present administration to correct principles with the present administration.

No one, outside the railway circle, will be allowed in the railroad company and the State legislature to the fact that each donation or exhibit conveyed at the cost of the donor, that a cancer of the most malignant type is growing amongst us, that a majority of the members of the railroad company and the State legislature will correct the evils, and whether the principles are violated in the most flagrant manner, would not be tolerated by the present administration of the government.

Hark! from the valley, mountain-top and plain,
Of woe, and misery, and death, and blood.
Upon whose brow bright fame has set its seal,
When seemingly no human power would save,
To spread disease, and death and woe and shame;
And every year are numbered with the dead,
There is many a dangerous hidden foe.
Assail our institutions every hour.
Saw in emancipation, God's own hand,
Hope and prosperity and peace she brings,
Was heard the tidings, "Freedm's cause has won."
May right be strong and all that's evil cease;
Turfed her pinions for her grandest flight.
Till I feel like keeping still no longer, I should not get along without it. We think its colossal, all that's evil cease;
Turfed her pinions for her grandest flight.
Till I feel like keeping still no longer. I should not get along without it. We think its colossal, all.

Flowers.
"Wondrous beauty doth the world adorn,\nThat has woven on her brow a crown\nOf fragrant flowers, white, red, and blue,\nIn all their glories brightly hue."

In the Victorian of Aug. 11th, is a little article of our own, which we consider very proper, and would mors should cultivate flowers. This beautiful article has been in circulation for a long time, and we trust it will come to the attention of the American public.

In the article, the author states that flowers are not only beautiful, but they also have medicinal properties.

The author then goes on to discuss the various types of flowers, their uses, and how they can be grown. He also mentions the importance of pollination and the role of bees in this process.

The article concludes with a call to action, urging readers to plant flowers and enjoy their beauty.

Appraising the United States Department of Agriculture.

Appraising the United States Department of Agriculture.

The United States Department of Agriculture is a federal agency of the United States government that was established on February 2, 1889. It is responsible for a wide range of activities, including research, extension, and education in subjects related to agriculture. The department is headed by the Secretary of Agriculture, who is appointed by the President of the United States and confirmed by the United States Senate.

The department has a staff of over 10,000 employees and operates through twelve agencies and four major educational institutions.

The mission of the United States Department of Agriculture is to lead the nation to achieve food and agricultural security and improve the quality of life for all Americans, and to ensure a healthy, productive, and competitive U.S. agriculture and food system, which ensures affordability, access, diversity, and sustainability.

The department carries out its mission through a wide range of programs, including research, extension, and education. It conducts research on a wide range of topics, including crop and livestock production, soil and water management, and pest control.

The department also provides extension services to farmers and other agricultural producers, helping them to improve their productivity and profitability.

The department also provides educational services to students and adults, helping them to develop the skills and knowledge they need to succeed in agriculture and related fields.

The department is headquartered in Washington, D.C., and has offices in all 50 states, as well as in Puerto Rico and the U.S. Virgin Islands.

The New Murray Harrow Cultivator and Seeder Combined.

**THE RIX HARROW**

*DISTANCES ALL OTHERS BY REASON OF LIGHTNESS OF DRAFT AND EFFICIENCY OF WORK.*

It took the first premium at the Great Western Field trials, beating every other harrow tested. It was highly recommended by the Commission on account of the ease of adjustment of the teeth, the likeness of the cut, and the good general characteristics of the machine.
